RAMP primary surveillance radar 88−15629
random bi-phase modulated CW radar that copes with range-Doppler ambiguity difficulty *(Japanese)* 88−74032
random pulse radars, computer simulation and anal. 87−28691
range ambiguous radar, false alarm rate implications 88−15675
range correction accuracy 86−55368
range measurement in airborne pulse Doppler radars 88−15648
range selective intrusion detector, design 87−70135
range tracker for precision instrumentation radar, software approach 88−15654
range-Doppler radar, echo processing from range-dependent multiplexed pulses 86−55355
RASS radio acoustic sounding system for atmosphere remote sensing *(Japanese)* 86−23989
RAT 31-SL, multiple beam radar for 3D long range detection 87−49167
RAVEN surveillance RPV, system design 88−15683
RDAS−a color-graphics-based system for radar data acquisition, display and analysis 88−47233
RDF and early IFF, development 85−58230
real aperture radars, airborne, appl. to discrimination between crude oil spills and monomolecular sea slicks 87−63974
real time CCD parallel radar processor 88−28946
real time simulators, advanced approach 88−74037
real-time acousto-optic ambiguity function generator 88−13963
real-time simulation using multiprocessor hardware/software 88−4114
Rebecca-Eureka, history 85−58228
receiver, dynamic range extension using low-noise parametric attenuator 86−17475
receivers using acousto-optic and ultrasonic components 86−2893
REDICAL: an on-line/real-time monitoring system for radar 85−3507
reflector antenna with switchable shaped beams for aspace-based SAR 86−43009
reflector with bidirectional communication capability 85−14369
reliability information system *(Czech)* 85−42650
reliability test and evaluation program for next generation weather radar 88−68702
remote sensing, results from SLAR mode of dual-mode radar with very low PRF 87−63904
remote sensing by multibeam radar altimetry 88−5189
remote sensing by radar, X-band SAR and SIR-C radar systems 87−57355
remote sensing by SAR radar, new satellite instrumentation for land observation 87−57356
remote sensing by satellite radar, SAR systems future requirements 87−57354
remote sensing of rain, spaceborne radar appl., sea clutter effect calculation 85−59501
resolving power of a radar system with synthesized-aperture antenna for a random observation angle 85−37109
review of primary radar systems in United Kingdom 85−14360
RF look-up perimeter sensor for intruderdetection 86−4742
RF test standards, automated, review of problems and solutions 88−60594
RICA, radar image classification expert system 86−43345
robotic air vehicle, pilot's perspective 88−5034
RPV, development 87−70128
S-band phased array radar, tube vs. solid state 87−49168
S-band radar, observations on long range clutter 85−52403
S-band track while scan radar system, development of analogue MTI system 85−47602
SABRE radar observations in the auroral ionosphere 86−59078
SADARM sense and destroy armour smart artillery weapon system 85−58190
SAR, Azimuth ambiguities, specification and control 87−63047
SAR, bistatic, motion compensation 86−17510
SAR, calibration model 85−63750
SAR, coherent simulation 87−63057
SAR, computer simulation of quantisation effects on ERS-1wave-mode spectra 86−30880
SAR, FFT hardware, microprocessor implementation and testing 87−75822
SAR, high resolution spotlight, motion compensation 85−37111
SAR, high resolution spotlight, motion compensation requirements 87−20615
SAR, image shift, three look correlation accuracy *(Japanese)* 86−30884
SAR, image texture over land, simulation 87−63058

radar systems continued
SAR, NASA multifrequency multipolarisation system 88−60258
SAR, object detection, goal driven parameter evaluation 87−41005
SAR, optimal digital filters set 88−60274
SAR, predictive data compression systems, statistical evaluation 87−75862
SAR, preliminary filter design for DSP 88−40959
SAR, range resolution, chirp digital generator appl. 87−76838
SAR, sensitivity problem 87−76837
SAR, signal detection, interference presence 87−56247
SAR, signal phase dependence, piecewise-linear approx. 87−20587
SAR, signal processing modelling 87−20586
SAR, simulation software 87−3235
SAR, strip-mapping, introduction 87−63044
SAR and ISAR signal processing 87−55125
SAR and scatterometer calibration subsystem, design and performance 88−5142
SAR antenna panel, radiation props. determined by planar near field meas. *(German, English)* 87−54704
SAR applications, slot arrays design 87−75612
SAR appls., conf., Frascati Italy (Sept. 1986) 87−43807
SAR characts. and anal. 88−9646
SAR classification, textural anal. appl. 85−63086
SAR concept, rotating antennas (Rosar) based design *(German)* 87−34657
SAR data, spaceborne, registration to topographic maps 87−2609
SAR data filtering for classification 88−16889
SAR data for agriculture and forestry 87−49182
SAR data from dynamic ocean surfaces, multi-look processing 87−20599
SAR data processing, high speed, on NEDIPS data flow computer 87−28686
SAR data products simulation 87−49178
SAR data products simulation 87−49179
SAR data vector quantisation, effect of codebook size 88−60267
sAR detection of ships and ship wakes 87−49180
SAR digital processing time, reduction using vector quantisation 88−60268
SAR fast signal processing on the DAP 87−28687
SAR for Australian ERS-1 programme 87−77903
SAR for Magellan mission to Venus 87−28713
SAR for remote classification of crops, pre-processing and classification techniques 88−22207
SAR for simple moving target imaging 85−63767
SAR for snow and glacier monitoring system 87−49177
SAR for surveying buried pipes and cables *(Japanese)* 88−60251
SAR for terrain height meas. with interferometer 86−50733
SAR ground mapping, ECCM effectiveness of low sidelobe antenna 87−20618
SAR image formation, high resolution, accelerated skew coordinate transformation 87−28661
SAR image formation, real-time optical processor 88−27946
SAR image holography using acoustic lens for 3D underwater imaging 87−28703
SAR image processing architecture 88−9920
SAR image quality, effects of damped phase and amplitude errors 88−60213
SAR image segmentation, data reduction 88−15623
SAR image segmentation and shape recognition techniques 87−41004
SAR imagery, airborne, processing and analysis, segmentation technique 86−55379
SAR imagery, algorithm for automatically acquiring ground control points 87−49184
SAR imagery, data compression technique 86−43893
SAR imagery, distortion free 88−15664
SAR imagery, geological feature enhancement 87−49152
SAR imagery, geometric filter for reducing speckle 87−28654
SAR imagery, geometric positioning error prediction 88−15624
SAR imagery, predictive compression methods, quantisation 88−28944
SAR imagery, predictive compression methods appl. 88−28943
SAR imagery, rate distortion functions 87−70125
SAR imagery, speckle reducing filter 88−53317
SAR images, automated rectification and geocoding *(French)* 88−22206
SAR images, knowledge based object detection 87−62241
SAR images, land use feature detection 87−49183
SAR images, quality measures 88−67453
SAR images, textural information 86−44764
SAR images, thin line detection 87−49181
SAR images, transform coding 87−63042
SAR imaging, inversion problems 85−63748
SAR imaging of ocean azimuth travelling surface waves 88−10583
SAR imaging of ocean waves, direct and inverse methods 86−12186
SAR interferometry for digital terrain models 88−10537
SAR modelling for nonconventional geometry 86−17511
SAR motion compensation systems with strapdown inertial measurement units 88−60215
SAR ocean wave imaging, inverse methods 85−64766
SAR oceanography, basis for theory and expt. 88−60275
SAR on-board image generation equipment for Earth Observation System missions 88−9650
SAR processing and geocoding, German knowledge-based system 88−9640
SAR processing on Cray-1 S supercomputer 86−59938
SAR processing optimisation, inflight 86−11176
SAR radar data, knowledge based processing system 87−41451
SAR radar images enhancement for edges and textures interpretation 87−63054
SAR real-time optical data processing, concepts and techniques 86−30882
SAR sea ice imagery, geophys. anal., computer-assisted techniques 87−4151
SAR system, direct digitally synthesised exciter 88−60261
SAR system design for Earth Resources Satellite 86−12156
SAR with high resolution moving target imaging 87−20621
satellite image processing techniques *(Japanese)* 85−63104
satellite links, S band meteorological radar for slant path rain profile statistics meas. 85−52415
satellite radar architecture for air surveillance/defense appls. 86−59935
satellite radars metric accuracy, use of digital and optical processing techniques 86−18596
satellite SAR conceptual design, resolution and spatial coverage 86−11174
satellite-borne SAR, propagation effects 86−59066
satellite-borne wind scatterometer in-flight calibration method 86−12176
SAW convolvers, appls. to spread-spectrum communications and wideband radar 86−9362
SAW devices use 85−18538
SAW temperature sensor and remote reading system 88−60940

radar systems continued
scanning radar for meteorological target, time to independence 86−17493
SCATTAR, airborne SAR and wind scatterometer system 88−10554
scattering effect investigation 85−14361
sea, radar images, optical anal. using PRIZ modulator 87−56248
sea clutter, compound K-distribution model, significance and scope 88−15634
sea clutter meas. at Alexandria 85−20271
sea ice data downlink, shipborne interface system (STAR-VUE) for tactical ice navigation 87−63977
sea ice thickness meas., UHF band step frequency radar *(Japanese)* 88−35584
Seasat SAR and Skylab data with statistics for classification and correlation, amplitude distributions 85−64688
secondary surveillance, new developments 85−52419
secondary surveillance radar, book contrib. 87−76862
secondary surveillance radar antenna, in situ near-field meas. 88−34426
secondary surveillance radar mode S potential applicationsand future requirements in Europe 86−17480
secondary surveillance radar systems, advances 86−17486
secondary surveillance system, recent improvements *(Japanese)* 88−68604
secondary surveillance systems, developments 86−59932
security alarm 85−37108
semantic compression for increasing usefulness of AWACS downlink transmissions 87−69037
sensitive UHF radar at Arecibo, Puerto Rico, clutter properties in middle atmosphere obs. 85−52400
sensors for inland vessel traffic obs. and control 88−15642
ship-borne type wave height meter using microwave Doppler radar *(Japanese)* 85−48484
shipboard defence systems, simulation of complementary radar and electro-optical systems 88−17004
shipborne electronic warfare, British developments 88−42724
shipborne EW in France−integrated and complementary 88−42725
shipborne radar, trends 88−60241
shipborne surveillance radar aerial systems with flexible masts, attitude control 88−15583
shipborne X-band radar for ocean waves imaging 88−10582
short distance Doppler radar with self-detecting diode oscillator and external diode mixer 88−53374
short range air defense, tracking radar 88−15658
short-range, autodyne vs. heterodyne method comparisons 88−72645
short-range radio point sensor 86−37944
Shuttle Imaging Radar system, Earth resources research 85−25938
Shuttle Imaging Radar-B, multi-angle data set evaluation 86−18546
Shuttle Imaging Radar-B, multiple incidence angle studies 86−17482
Shuttle Imaging Radar-C appls. 86−18547
Shuttle-borne X-band synthetic aperture radar, design and analysis 86−18548
side-looking airborne radars, market growth 85−31091
Siemens radar search antenna, development *(German)* 87−56241
signal processing, ICL distributed array processor appl. 86−11179
signal processing, review 85−52384
signal processing in multistation radar systems 88−28948
signal processing possibilities for pulse radars using polarimetric information 88−15521
signal processing systems, multi-dimensional access appl. 87−13049
signal processing techniques *(Japanese)* 85−3505
signal processor, programmable, for airborne radar 86−10458
simulation, Interactive Radar Environment Simulation Model (IRESM) 88−15604
simulation architecture and organisation 88−15598
simulation in radar clutter suppression *(Japanese)* 86−11166
simulation of bistatic hybrid air/ground-based radar 88−15602
simulation of clutter return for an airborne pulse Doppler radar 88−15600
simulation system, IRSS 88−15601
simulation using digital quadrature modulator 88−15607
simulator studies of crossing encounters in fog 86−55357
single step technique for adaptive array processing 87−13050
SIR-B data collection expts. over Japan 88−53363
SIR-B expts. in Japan, rice crop truth data collection 88−53361
SIR-B expts. in Japan, sensor calibration at Akita Airport 88−53357
SIR-B expts. in Japan, sensor calibration at Kashima test site 88−53360
SIR-B expts. in Japan, sensor calibration at Sarobetsu wild-land test site 88−53358
SIR-B expts. in Japan, sensor calibration at Yamagawa test site 88−53359
SIR-B imagery simulation over Freiburg test site 86−12087
SIR-B ocean-wave enhancement with fast Fourier transform techniques 87−71390
SIR-B oil pollution expt. in Japan 88−53366
SIR-B oil-pollution expt. in Japan 88−53362
SIR-B radar imagery for topographic mapping 88−30152
SIR-B rice crop expt. in Japan 88−53365
SIR-B sensor calib. expt. in Japan 88−53364
SIR-C sensor electronics digital simulation 88−4107
SIR-C systems design for real time global ocean wave spectra 88−9651
sky wave and ground wave systems 87−76861
skywave sea-state radar techniques, auroral zone latitude, expt. investig. 86−65528
SLAR, multiprocessor architecture provides new features 87−56223
slotted ridge waveguide antennas, phase controlled, impedance characts. of ridge waveguides *(German)* 87−61462
SLQ-32 radar warning receiver and electronic defense system, role in attack in USS Stark 88−4097
smart munitions systems, current developments 85−8467
snow stratigraphy measured with an active microwavesensor 86−69826
sodar and RASS for heat flux meas. in atmospheric boundary layer 86−23982
soft copy imagery interpretation capability 85−3498
soil moisture mapping using satellite-borne SAR, performance eval. 86−56255
solid state low pulse power ground surveillance radar 86−55374
solid-state components for radar, conf., London, UK (Feb. 1988) 88−31321
Sondestrom incoherent-scatter radar for ionospheric sounding, overview 85−15420
SOURCESAT, short-range high-resolution FM-CW radar scatterometer system for backscatter meas. 86−43895
SOUSY for air turbulence detection *(German)* 85−52423
Soviet airborne radar progress 85−31090
Soviet radar programme, air defence problem 85−58222

radar systems continued
space based radar, detection performance improvement, displaced phase center antenna appl. 88−4104
space research, role of US Navy, past, present and future 85−8470
Space Shuttle Ku band, first year of operation 86−18411
Space Station communications and tracking system 87−40866
space-based bistatic radar for future tactical air surveillance 86−17507
space-based multifunction radar systems, civilian and military surveillance appl. 87−56255
space-based radar 87−70138
space-based radar for Air Force and Navy 85−31087
space-based surveillance radar, architecture and design criteria 88−35588
space-link stimulation of airborne multimode radars 87−20606
spaceborne bistatic radar requirements, overview 87−13769
spaceborne distributed aperture-coherent array processing technology in remote sensing 87−63994
spaceborne imaging radar for the 1990s 87−71283
spaceborne imaging radar on Earth Observing System 88−5134
Spaceborne Imaging Radar-C, hardware, subsystem and interfaces 88−10518
spaceborne imaging radars, Earth and planetary obs. 87−29921
spaceborne microwave active phased array SAR, design considerations for C-band operation 87−28692
spaceborne radar for global rainfall mapping, conceptual design 88−5173
spaceborne radar scatterometer system configuration, from NASA, simulation on NROSS 87−63061
spaceborne SAR, Doppler centroid ambiguity resolution 87−63056
spaceborne SAR, Doppler parameter estimation 85−25929
spaceborne SAR performance optimization, antenna pattern synthesis technique 88−9653
spaceborne SAR simulation package, SARSIM 87−63059
spaceborne synthetic aperture radar, ocean waves prediction 85−31095
spaceborne synthetic aperture radar design and trade-off analysis for switchable dual incidence angle operation 88−9652
spaceborne synthetic aperture radar sensor technology 87−3234
spatial light modulator, electron beam addressed, radar and sonar processing 87−12258
special nuclear material tracking using radio/radar transmitters 88−41751
speckle noise reduction in synthetic aperture radar images, geometric filter 85−46882
speckled imagery enhancement, perspective on techniques 88−59295
Spectrasat hybrid radar ocean wave spectrometer/SAR approach for wave monitoring 87−71392
Spectrasat radar ocean-wave spectrometer, design and operation 87−71393
speed trap jammer device *(German)* 85−3504
speedmeters, hand-held, EM immunity meas. 85−2610
Sperry Ltd. radar predicted areas of danger display for collision avoidance 88−28942
spotlight SAR, polar Fourier transform appl. 88−59206
SSR Mode S standardisation, developments 88−15637
SSR-systems, high traffic loading, interference probability *(German)* 87−56242
ST and MST radars, antenna-induced range smearing 86−22787
ST radar, 30 m height resolution, decoder 86−23966
ST radars, closely spaced, observations of vertical motions in troposphere and lower stratosphere 86−23972
STACER, an aid to evaluate the radar system coverage under real conditions of use *(French)* 87−41006
standard spherical reflectors for calibrating amplitude channels of radar target scattering-matrix measuring systems 88−4102
STAR-1 SAR system, config. for ice and terrain surveillance appls. 85−64701
stealth-defeating carrier-free radar 87−63034
stealthy targets in radar detection, RF absorbers *(French)* 86−43899
step charging power-supply for radar system RF transmitters 85−27520
step-frequency radar for buried target detect. 85−8471
strapdown inertial navigation system requirements, imposed by synthetic aperture radar 85−9310
strategic missile warning systems, upgrading 86−4718
strip mode processing of spotlight aperture radar data 88−67442
stripmap SAR digital processing and absolute radar calibration 86−4737
subsurface radar, introduction 88−67467
subsurface radar, signal processing methods for noise reduction and high resolution 85−52437
subsurface radars, review 85−52426
superresolution and synthetic-aperture antenna techniques for low-lead propagation studies 88−2761
surface atmospheric pressure sensing by millimetric-wave radar 86−4733
surveillance and air defense radars, signal processing techniques, review 86−11168
surveillance of autobahn toll sticker in Switzerland 86−4745
surveillance radar, current and advanced processing techniques, overview 86−17499
surveillance radar, innovations-based detection algorithm 85−25921
surveillance radar, masking jamming effectiveness meas. 88−15674
surveillance radar, signal processing, review 87−40984
surveillance radar CAD and expt. verification 87−13776
surveillance radar siting improvement with respect to screening, multipath and ground clutter degradation 85−47582
surveillance radar system, inherent search volume 86−30869
surveillance radar systems classification 87−56231
surveillance radars, state of the art, research and perspectives 86−4716
surveillance systems, knowledge based systems appls. 88−60272
Swedish airborne early warning radar, leading-edge technology 88−41731
symbol errors effect on ternary sequence correlation 87−54832
synthesized-aperture radar, resolution improvement 88−53337
synthetic aperture for arbitrary aircraft motion, basic characts. 86−23983
synthetic aperture for subsurface radar 86−69807
synthetic aperture imaging airborne radar 86−17509
synthetic aperture imaging airborne radar 87−20619
synthetic aperture imaging over lossy half-space limitations 88−67468
synthetic aperture radar, airborne, motion compensation and effects of phase errors. 85−52427
synthetic aperture radar, digital processing of spaceborne imaging systems 87−8356
synthetic aperture radar, multilook images of moving targets 85−63732
synthetic aperture radar, programmable real time acoustic-optic/CCD processor 85−31085
synthetic aperture radar, real time optical processing 85−30484
synthetic aperture radar, technology review *(Japanese)* 85−37103

radar systems continued
synthetic aperture radar (SAR) for RPVs 88−15682
synthetic aperture radar antenna, research and development 86−69822
synthetic aperture radar data, digital processing 85−8485
synthetic aperture radar data processing technique improvement for high image quality 85−52428
synthetic aperture radar focusing techniques, for imaging targets with random motion 85−8479
synthetic aperture radar processing, digital prefilter for MTI 85−58218
synthetic aperture radar processor, technological aspects 85−25139
synthetic aperture radar research development 86−69821
synthetic aperture radar signal processing on general purpose computer 85−52431
synthetic aperture radar simulation software 85−52430
synthetic aperture radar target recognition expert system 88−67479
Syowa Station 50 MHz Doppler radar 86−59933
Syowa Station 50 MHz Doppler radar for auroral region observation *(Japanese)* 86−4728
system appls. of microwaves to radars 88−15597
system theory, conf., Charlotte, NC, USA (Mar. 1988) 88−49375

HF ground wave radar, adaptive interference suppression 88−15524
HF ground-wave, theory and practice 88−47215
HF radar, receiving system linearity requirements 88−47221
HF scattering centres, polarimetric model, microwave multipath target imaging anal. 86−69810
high PRF pulse-Doppler radar, range ambiguity resolution 86−17441
high recurrence frequency radar modes, dynamic ranges and signal processing algorithms *(French)* 87−13051
high recurrence frequency radar transmissions, form factor optimisation *(French)* 87−13764
high resolution by eigenvector rotation 86−49723
horizontally stratified atmosphere, propag. calcs. 88−66087
hybrid radar waveform design technique for improvingslant range resolution in a synthetic apertureradar system 86−17463
hydrometeors, freq. determ. from radar echo signals *(Russian)* 86−6100
iceberg detection system using ground wave Doppler radar, software model and expt. study 87−28655

radar theory continued
image boundaries, regression-induced, invariant quantities under special linear transformation 87−69312
image processing, autoregressive model selection, quantitative decision rule 86−10578
image processing for surface aircraft recognition 85−57531
image reconstruction from noisy differential Fourier phase in 1D 87−28648
image signal processing 88−4087
image synthesis, lognormal random field models and their appls. 87−28658
imagery, tutorial paper 85−63746
images, nonlinear filtering algorithm 88−60224
images cross correlation, relief and reflective surface influence on terrain 87−34645
images model, appl. to adaptive digital filtering of multiplicative noise 85−14337
imaging based on rotating antenna 88−67455
imaging radar, spotlight mode to solve high resolution problems 88−4105
imaging radar coherent detectors 87−40989
imaging radar polarisation signatures 87−70119
imaging radars, SNR design method based on image quality eval. *(Japanese)* 87−40987
imaging systems, artifacts anal. due to Fourier domain interpolation 88−3241
incoherent imaging of radar targets using RCS pattern 86−49702
incoherent radar signals with non-Gaussian amplitude-fluctuation distribution, detector probability 88−72958
incremental manoeuvre compensation for radar trackingof a manoeuvring target 86−4703
infrared tracking algorithm, simulation study 87−8352
inland waterway ship auto-pilot with object tracking and recursive identification *(German)* 87−70110
integrated radar detection and tracking system, parameter optimisation 85−25928
interferometer angle accuracy, variance estimator use 88−60270
invariant adaptive detection of pulsed signals, autoregression approach 87−63020
inverse methods applied to microwave target imaging 85−63747
inverse scattering problem for the Helmholtz equation, radar location and antenna synthesis 85−20253
inversion method, image generation of conductivity variation maps using SAR 88−47198
ionosphere, behaviour of backscattered power 85−51437
IR target extraction and tracking, motion filtering 88−66669
ISAR imaging, eigenvector weights approx. 88−41719
iterative noncoherent angular superresolution 88−60220
JINDALEE, over-the-horizon radar, simulation and modeling 85−47551
K-pulse and E-pulse, radar targets 88−28927
Kalman filter for radar point error reduction 88−47193
Kalman filters, adaptive fading memory type, theory and radar appl. 88−59151
Kalman tracking filter with manoeuvring radar target position and velocity inputs, props. 87−76830
L_1-norm algorithm for super-resolution in tracking radars 87−49144
land clutter models for radar design and analysis 85−47552
laser radar cross section of Earth atmosphere objects, theory and numerical results 87−40986
laser radar field processing, optical methods 85−52439
laser radar images enhancement based on generalised histogram entropy optimisation *(Japanese)* 86−69840
laser radar target signature model 88−28981
LIDAR, Mie diffusion and differential absorption, signal processing *(French)* 86−23094
lidar design, false alarm and detection probability 88−74041
lidar inversion, extinction boundary value algorithms 86−69839
lidar inversion algorithm, sensitivity to backscatt. and extinction 85−52382
lidar inversion algorithm with variable backscatt.-extinction ratios 85−52383
lidar system, pulse packet det. 87−70120
life-time measurements of sea-scattered signals 85−20248
linear envelope detectors in radar systems *(Spanish)* 85−14340
linear FM, reflected signal simulation 88−41734
linear FM chirp filters in pulse compression radars 88−22174
linear FM pulse sonar array, digital beamforming 88−15693
linear FM waveforms, Doppler estimation accuracy 86−17440
localised targets, multiple, nonlinear algorithm for optimal estimation 88−3017
log-lattice detector for radar targets in seaclutter 86−49728
log-normal clutter, coherent model 87−40981
long-range radar, eclipsing effects with high-duty factor waveforms 86−17421
low angle tracking over the sea, signal reflection 86−22699
low angle tracking radars and nonlinear time delayestimation 86−30890
low autocorrelation-sidelobe binary sequences, algorithm for generation *(Japanese)* 87−76831
low probability of intercept radar 86−17508
low-angle tracking radars and nonlinear time-delay estimation 88−15512
low-evaluation radar coverage aspects 86−17445
LPI techniques and implementations for radar systems 88−60212
LRNS, long-range navigation system receiver design in quasi-rangefinder mode 85−37124
luminous object tracking using TV system, accuracy calcs. 87−63025
M- and S-matrix weather-radar meas., anal. and appl. 87−56260
M-ary sequential hypothesis testing, radar signal classification 88−22190
maneuverable target detection/tracking with nonlinear target model 85−58180
maneuvering target air-tracking problems 85−63080
manoeuvring multi-target tracking, investigation of correlation region 85−42628
manoeuvring target tracking algorithm for conditions of meas. uncertainty 86−11147
manoeuvring targets from noisy radar meas; state estimation 88−28924
mapping of surface relief heights, calcs. *(Russian)* 88−22188
marine radar iceberg detection model, verification study 87−28656
Markov-chain methods for radio meas. system analysis 88−35571
matched-filter envelope detector deflection performance for a correlated phase channel 87−69119
matrix pencil approach to angle of arrival estimation 88−4089
maximum entropy method radar signal processing 88−9622
maximum entropy processing anal. in space-angle domain, two target case 85−52390

radar theory continued
measurement of moving target azimuth, accuracy 88−41722
medium pulse repetition frequency radars in multiple target environment, range and Doppler ambiguities resolution 87−13757
medium range radar processing: experimental results 88−15525
Mellin transform and its utilisation *(Slovak)* 86−57301
mesosphere, scattering of MF and VHF radar signals, comparison 86−22681
meteorological radar theory, theory of excess bias measurement 87−71342
meteorology *(Spanish)* 87−34649
microwave, propagation near Earth's surface, stratified refractivity effects 85−41602
microwave backscattered signal from wet snow and moist soil, contrib. of vol. scatt. 88−15511
microwave image fidelity improvement through diversity techniques 85−62790
microwave imaging, high resolution, role of digital adaptive beamforming 87−55122
microwave radar, meteorological echoes 88−66091
microwave refractivity profile meas. systems, helicopter/rocket probes 88−40561
microwave scattering from sea surface, modelling 86−22698
microwave short-range radars, signal processing, hidden objects detection 87−56251
microwave tomographic data eval., cylindrical objects surface reconstruction *(Hungarian)* 87−76833
microwave-band EM wave scattering, probability density of angular and azimuthal noises of target 88−45695
millimetre-wave radar modelling for smart munitions 88−60236
mismatched filter design for periodical binary phase coded signals *(German)* 88−53321
mixed triangulation/trilateration technique for emitter location 87−13752
MM wave radar, noise immunity from passive interference *(Russian)* 87−3220
MM wave radar image improvement using simple linear spatial filters 87−49148
MM-wave airborne radar stationary ground targets detection 86−37937
MM-wave seeker signal processing considerations 85−8448
mm-waves importance *(German)* 85−20265
model studies for observed increase in delay spread andstrength during thunderstorms in Tropo links 87−3223
modeling of radar signals 88−34682
modulation transfer function of radar return power from the ocean 88−9626
monogenic function range resolution radar 87−76828
monopulse, signal extraction conditions 87−63021
monopulse angular accuracy for fluctuating targets 85−37091
monopulse FMCW radar sensor adaptive MTI simulation 86−55337
monopulse radar, processors and postdetection algorithms anal. 86−17439
monopulse radar angle tracking accuracy with sum channel limiting 85−37096
monopulse radar deviation angle estimation *(French)* 87−70123
monopulse radar systems, angle-tracking performance in presence of interfering second target, anal. 87−70124
monopulse receivers for secondary surveillance radar, performance analysis, comments with reply 85−52388
monopulse resolution of interferometric ambiguities 86−49708
monopulse SSR, theoretical eval. and expt. meas. comparison 88−15538
monopulse SSR operation at difficult sites 88−15636
monopulse system average response to three steady targets *(German)* 86−49703
monopulse tracking radar 88−15671
monostatic radar cross section of 3-D struct. validation of finite-difference time-domain method 85−52391
motion-compensated SAR image ISLR 88−9621
moving object, soln. of radar image problem *(Romanian)* 88−53325
moving target characterisation by radar signature *(French)* 86−11152
moving target detection performance for quasi-matched filtering, Block-FFT method 85−47562
moving target indication system, detector selection 87−49141
moving target indicator filtering, optimum vel. response functions 85−3491
moving target selection radar systems, optimisation for non-Gaussian signals 85−14342
moving target selector systems, heterodyne oscillation characts., passive interference suppression 88−74031
moving window integrator, detection performance 87−76836
moving-target radar, resolution calcs. 87−70121
MST radar echoes, clear air signal statistics 88−22182
MTI target visibility 86−49712
multi-maneuvering targets tracking in dense multireturn environment 85−52412
multi-target tracking, algorithm for combinatorial problem solving 86−23941
multicriterial optimisation by correlation matrix, generalised indices selection 88−4072
multifrequency radar target identification 87−63024
multifunction radar for airborne appls., conf., Toulouse, France (Oct. 1986) 87−16288
multilook SAR images, adaptive enhancement and speckle reduction 87−63055
multilook speckled images, segmentation 88−66756
multiobject tracking, random point process approach 88−9633
multiobject tracking using passive sensors 86−4708
multipath signal propagation effects of radar system, anal. 86−49714
multiple aircraft manoeuvre tracking, likelihood function method 85−3497
multiple diffraction losses evaluation, approx. method 85−13108
multiple moving sources location, use of signal subspace algorithms 85−52411
multiple path underwater acoustic channel target tracking, high-resolution, methods *(French)* 88−22230
multiple PRF pulse Doppler radar, range ambiguity resolution 87−63043
multiple radar targets tracking, math. representation *(Chinese)* 88−60237
multiple sensor data combination for automatic target acquisition, statistically optimum methods 85−8458
multiple signal estimation 87−39849
multiple target detection, optimum resolution 87−27475
multiple target radio echo dispersion, difference algorithm calcs. 88−67448
multiple target tracking by probabilistic data association using neural networks 88−74002
multiple targets tracking and classification 86−49713
radar theory continued
multiple targets tracking with correlated measurements and manoeuvres 88−67445
multiple-glint targets under laser illumination, statistical properties 85−3513
multiple-variable functions on random variables, change of probability distrib. *(German)* 86−4698
multiplexed optical fibre interferometers, performance anal., radar systems analogy 85−35478
multipolarised SAR image data, stable structure approach to automated scene understanding and awareness 88−28931
multiposition radar, target location accuracy 87−63015
multiposition radar systems, potential accuracy in estimating coordinates 85−42636
multipulsed high-resolution radar for range-velocity clusters 86−37922
multiscatter targets detection in K-distributed clutter 85−25916
multisection digital filtration of range measurements 87−61863
multisensor-multicontact environment, data fusion 88−4092
multisensor-multitarget tracking, data separability/classification enhancement 86−4711
multistatic binomial detectors, design and performance anal. 85−52416
multistatic radar, distributed detection of Swerling targets 87−13750
multistatic radar, overview of detection theory 87−13749
multistatic radar systems, detection and tracking performances, case study 85−58216
multistatic vector inverse scattering methods for three-dimens. radar image construction 85−58184
multitarget data association report detection sequential processing 86−4707
multitarget track-while-scan filter 88−15527
multitarget trackers, state estimation using variable correlation gates 87−56214
multitarget tracking, information fusion in distributed sensor networks 86−11155
multitarget tracking, joint probabilistic data association in distributedsensor networks 86−4704
multitarget tracking, passive/active sensor data fusion development 86−4705
multitarget tracking, smoothing algorithm 87−8351
multitarget tracking, trellis decoding 88−53322
multitarget tracking algorithm for independent but nonPoisson targets 86−4710
MUSIC algorithm, severe multipath environment, low-angle elevation estimation 87−62054
nanosecond pulse propagation, pulse compression due to O_2 absorpt. lines 87−68769
narrowband signals detection, multilevel quantisation 88−52433
natural frequencies identification from measured target response, continuation method 85−41584
natural resonance estimation, from scattering data 86−23038
neighboring radar systems without interference using the same band based on a complete complementary code 85−47559
Neyman-Pearson detection with distributed radars 87−56217
noise and clutter rejection in radars and imaging sensors, conf., Tokyo, Japan (Oct. 1984) 85−49266
noise source calibration considerations *(German)* 86−43885
noise-immune AGC system synthesis 86−43884
noisy multidimensional Gaussian signals classification, reliability and information content *(Russian)* 88−22186
noisy radar measurements, position, velocity and acceleration estimates 85−25924
noncoherent radar data, iterative enhancement 87−27442
noncoherent radar system, complex deconvolution 87−27440
noncoherent radars, quadratic compensators of passive interference, efficiency 87−40999
noncoherent signals with gamma-distribution of energy probability, detection characts. 88−40962
nondispersive targets, electrodynamic similitude and physical scale modeling 88−4076
nonlinear filtering of an elliptically polarized pulsedsignal 86−48928
nonlinear filtering theory appl. 88−8799
nonlinear tracker using attitude measurements of aircraft targets 87−34634
nonparametric identification of continuous linearsystems with discrete measurements 85−51676
nonparametric radar detection, suboptimum rank test 87−34640
nonparametric radar signal detectors with randomization of the detection criterion 87−63019
nonrecursive filters characts. in moving target selection systems using CTDs 88−27920
nonsearching signal detector, power characts. 87−47733
nonsinusoidal waveforms for high resolution subsurface and in-to-the ground radars 85−20260
normalised least mean squared algorithm appl. to multiple sidelobe cancellation system 85−37095
normalized LMS algorithm degradation due to estimation noise 87−33688
novel optimum energy solution in iterative constrained restoration 87−56218
observability in passive tracking 86−59939
ocean internal waves, radar imaging theory 85−37098
ocean radar imaging model comparison with SARSEX data 88−30175
ocean radar remote sensing, normal incidence microwave backscatter theory 88−60210

fibre optics, radiation effects, test procedures and standards 88−47086
fibre optics, radiation-induced losses, temp. depend. 85−7228
fibre optics in adverse environments, conf., Cambridge, USA (Sept. 1986) 88−11560
fibre optics in adverse environments, conf., San Diego, CA, USA (Aug. 1984) 85−32880
fibre optics in high dose radiation fields 86−48139
fibre optics in transient radiation fields 86−48138
fibre optics systems 88−58132
free electron laser, mirror degradation and performance requirements 87−26445
functional reliability of an onboard memory system with considerations of cosmic ray induced soft errors *(Japanese)* 88−50148
fusion reactor high-grade insulators, radiation effects, dielectric loss tangent, Kramers-Kronig rel. appl. 88−33412
GaAs MMIC technology radiation effects 86−35767
glass fibre reinforced polymers, insulators for superconducting magnets, mech. props. after low temp. irrad. 85−33521
Harris HM-6508 1 K RAMs, single event upset, spacecraft on-orbit obs. 87−31886
heavy metal fluoride glass systems for optical device technology, radiation effects 87−18574
high frequency piezoelectric acoustic transducers, temp. and irrad. effects 86−58650
high T_c superconductors, general props., device fabrication, review 88−51386
high-power solid-state RF amplifiers, technical specifications, radiation damage suscept. 88−50046
high-speed logic ccts., total-dose hardness assurance for low Earth orbit radiation environment 88−26390
homogeneous microwave designs for high-speed computers 87−66514
IC radiation induced latchup, testing considerations 88−26389
II-VI compounds, conf., Aussios, France (Mar. 1985) 86−7367
II-VI materials, surface charactn., damage mechanisms caused by spectroscopic anal. techniques 88−19668
III-V and II-VI semiconds., light-enhanced MBE growth mechanisms 88−49828
image guide transmission props., irrad. effects 85−35522
Inmos transputer, single event upset and total dose eval. study 88−25248
instrumentation intelligence, conf., San Diego, California (Apr. 1988) 88−53917
insulated wires, cables and plastic tubing, irradiation treatment effects *(Hungarian)* 85−17915
insulating materials, radiation test results, high power and HV appls. 85−56038
ion implanted semiconductor detectors, radiation resistance *(Russian)* 87−29523
LDPE, charge motion on moist surfaces 88−51085
light sources and detectors, radiation effects 86−48294
LWRs, radiation buildup, corrosion product release, progress report 85−43829
Magnox stations of CEGB, ageing effects on overall plant availabilities 86−51382
material and device processing, ion, photon and electron beam appls. 85−12094
MCFR magnets, irradiation effects on superconducting materials 85−1900
metal films, adhesion to semiconductors and oxides, improvement using electron and photon irradiation 85−55700
metal-semiconductor contacts, dopant profiling by spreading resist. meas., effect of RF EM radiation 85−55574
microelectronics, ionising radiation testing, framework for integrated set of standards 88−24526
microelectronics and microdosimetry 87−54611
microelectronics testing using spontaneous fission fragments 87−53638
microprocessor single-event-upset risk assessment 87−31930
microprocessors, single-event upset rate prediction, techniques 86−34846
microvertex detectors, designs, radiation damage effects 87−29539

radiation effects continued
microwave radiation around satellite Earth stations, environmental level measurement 88−35438
microwave-amplifier performance, radiation effects 88−44369
military space vehicles, solar power requirements 85−64673
MIS structures, insulator charge buildup model 88−1460
monolithic IC protection from radiation-induced damage, photoconductor detector/switch config. 86−9201
MOS capacitor, radiation effects *(Rumanian)* 87−6741
MOS capacitor, very thin oxide, radiation induced flatband volt. shifts 85−23160
MOS capacitors, field oxides, charge and interface state generation 85−23161
MOS capacitors, radiation effects, numerical anal. 87−60185
MOS capacitors and transistors, radiation response correl. 85−18343
MOS devices, ionising radiation dose response, meas. and categorisation 87−32538
MOS devices, radiation sensitivity *(German)* 88−44766
MOS oxides, deep hole trap form. under UV irrad. 88−25986
MOS RAM, influence of radiation *(Polish)* 87−18324
MOS RAM circuits, dose rate effects, post-irrad. annealing 85−17393
MOS static RAM, radiation effect meas. *(Polish)* 86−52822
MOS structures, bipolar radiation cond. of subgate dielecs. 88−7386
MOS transistors, channel mobility rel. to ionising irradiation 85−55824
MOS transistors, irradiated transport processes in SiO_2 85−55592
MOS VLSI, damage by ionizing radiation in microelectronics processing 87−18325
MOS VLSI submicron structures, radiation effects during fabrication, expt. study and prevention *(Polish)* 85−35159
MOSFET, enhancement mode, model for separating interface and oxide charge effects 85−23790
MOSFET, n-channel, radiation and post-irrad. effects modelling 85−18341
MOSFET test chip, spaceborne, parameter extraction rel. to rad. effects 86−35887
MOSFETs, irradiated, programmable test system for transient annealing charactn. 88−26292
MOSFETs, n-channel, two-dimens. modelling, radiation-induced interface, oxide charge 85−18342
multilayered structures, lucky drift models and approx. forms of lucky drift expressions 88−20499
n^+-p diodes, charge collection and funnelling following passage of ionising particle, numerical study 85−18286
NATO radiation effects test program for optical fibers and components 88−72055
neutron damage study facility, RTNS-II, progress report 85−59156
nitrided oxide gate dielectrics, radiation effects 88−50670
NMOS ICs, superrecovery of total dose damage 85−18471
nuclear and space radiation effects, conf., Colorado Springs, CO, USA (July 1984) 85−16547
nuclear and space radiation effects, conf., Monterey, CA, USA (July 1985) 86−33900
nuclear and space radiation effects, conf., Snowmass Village, CO, USA (July 1987) 88−24309
nuclear fields, integrated and fibre optic responses 88−65358
nuclear optical fibre penetration 85−35413
nuclear power plant environmental influence on radiation ageing of polymeric materials 86−70755
nuclear power plants, temp. meas., some problems *(Czech)* 86−65821
nuclear radiation field meas. of semiconductor devices *(Polish)* 88−50774
optical devices for adverse environments, conf., Cannes, France (Nov. 1987) 88−69973
optical disc storage, radiation hardening 88−65167
optical fibers, crystalline IR, new develop. 88−39907
optical fibre, radiation effects, design tradeoffs for radiation environments 87−1964
optical fibre radiation response in a nuclear reactor environment 85−35412
optical fibre tests 88−20385
optical fibre transient radiation damage meas. using streak camera 87−25953
optical fibre waveguides, single mode, radiation response prediction 88−13849
optical fibres, anal. 87−18700
optical fibres, CVD, double crucible and PCS types, radiation characts. study using ^{60}Co sources *(Polish)* 85−2004
optical fibres, ionising-radiation hardness, testing and standards 87−68140
optical fibres, ionizing radiation effects 88−72049
optical fibres, PCS, suprasil core, electron beam radiation-induced transient attenuation 85−35430
optical fibres, radiation effects *(Japanese)* 87−12144
optical fibres, radiation effects, local view 88−33634
optical fibres, radiation-induced loss, drawing condition depend. 86−22088
optical fibres, SiO_2 core, radiation induced light emission 85−35427
optical fibres, transient radiation effect meas. method, nanosec. timescale 85−35408
optical glass fibres, UV-radiation induced colour centres 87−7065
optical PCS cable connector termination, radiation exposure and testing 85−35420
optical waveguide developments, review 85−62395
optoelectronic devices for optical links 88−15474
organosilicon polymers, electron beam and UV sensitivities, O_2 plasma stabilities 88−26165
p-n junctions, irradiated, electron and hole nonlinear diffusion, photocurrents 86−58313
pacemakers containing CMOS circuitry, radiation therapy-induced failures 85−20963
PCBs, Cu-clad polyimide, ionizing radiation effects 85−17949
photodiode array, position sensitive detector for synchrotron X-ray radiation, radiation damage 87−29487
Photovoltaic Specialists Conf., Kissimmee, USA (May 1984) 85−60662
plasma processing, conf., Palo Alto, CA, USA (April 1986) 87−16293
PMMA films, irrad., ESR study 86−1978
polyacetylene films, glow discharge polymerisation and photoablation study 87−32416
polyetherimide optical solar reflector as thermal control material for long-life satellite, reliability study *(Japanese)* 87−29859
polyethylene degradation by irradiation and thermal ageing 86−28565
polyimide taped air impregnated cable, partial discharge perform. assessment for radioactive environment 88−23497
polymer resists, bonds, radiation effects and crosslinking 87−17885
radiation effects continued
polymer resists bearing tetrathiafulvalene groups, UV and electron beam irrad. effects 88−26155
polymeric insulators, radiation effects, Japanese research 87−25706
polymers, heat-shrink technology advances rel. to insulation appls. 88−63391
polyvinylidene fluoride film, fission fragment irradiation, coexistent gases effects on track etching 86−60611
power cable insulation, radiation modification using electron acceleration 88−42855
power MOSFET, transient radiation response modelling 88−26289
power MOSFETs and radiation environments 85−35016
power MOSFETs for convertors in space environment, single event upset sensitivity study 88−24969
processing, dosimetry appls. 87−42033
quartz crystal resonators, modification of point defects for device appl 85−18519
quartz resonators, radiation sensitivity tests 88−20224
radiation damage to drift chambers, lab. study of aging effects 87−29453
radiation hardened power devices for nuclear, military and space systems 87−53555
rapid thermal annealing, device appls. 85−12409
recessed oxide digital bipolar IC, radiation dose to failure versus dose rate prediction 88−26496
reconstituted Charpy specimens, extension of R.E. Ginna reactor vessel surveillance data 86−51219
refractory metal silicides for VLSI, conf., San Juan Bantista, CA, USA (May 1984) 85−23575
satellite microelectronics, radiation effects 86−2313
satellite systems, radiation exposure of components and materials, computer-aided anal. *(Japanese)* 87−14968
semiconductor defects, conf., Paris, France (Aug. 1986) 87−51700
semiconductor detectors, spectral line distortion caused by local impurity detectors 86−38714
semiconductor detectors and electronics, radiation damage 87−29485
semiconductor device latch up, influence of photocurrent representation 87−53639
semiconductor devices, JPL single event upset test data 85−23724
semiconductor integrated circuits, irradiation effects *(Japanese)* 87−1571
semiconductor microstructure, non-stationary annealing characts. control, radiation defect reordering study 86−53314
semiconductor surface barrier structures, getter mechanism of defects 87−66963
semiconductor thermal and temp. meas., conf., San Diego, CA, USA (Feb. 1988) 88−49372
semiconductors, amorphous, conference, Balatonszeplak, Hungary (Sept. 1986) 87−43742
semiconductors, photoenhanced oxidation using UV radiation 87−17976
semiconductors and related materials, energy pulse modification, conf., Dresden, East Germany (Sept. 1984) 86−26490
sensing in hostile environments, conf., Orlando. Fl., USA (May 1987) 88−31271
SMD attachment, solder reflow optimisation with IR radiation 86−52251
software reliability maximization in radiation fields 87−2315
SOI thin-film MOSFETs, gate coupling and floating body effects, expt. study 88−33200
solar cells, radiation damage effects 86−51909
solid insulating material stress endurance and fire risk *(French)* 86−35945
spacecraft, solar flare single event upset rates, standard 85−26841
spacecraft digital systems protection against radiation-induced single-event upsets 86−32451
spacecraft electrostatic discharge tapes, thermal blankets, coatings 85−20981
spacecraft survivability in nucl. age 88−23152
steel, stainless, ageing degradation in LWRs, long term effects, fracture toughness 86−61233
superconducting magnet radiation limit considerations for fusion reactors 86−58722
superconducting magnets, applications, radiation energy release and radiation damage problems *(Bulgarian)* 88−1913
synchrotron radiation mirror, lacquer-coated, irrad. with undulator light, surface heating 87−26119
synchrotron radiation mirror, thermal distortion prediction with finite element analysis 87−26118
synthetic elastomers, radiation thresholds 86−34405
synthetic organic insulation and dielectrics, radiation effects response data 85−18512
TIBER-II reactor, superconducting magnets, radiation damage, sensitivity/uncertainty anal. 88−65102
US vibration excitation by charged particle pulse beams 85−10860
UV on flexible optical solar reflectors for satellite temp. control 87−52221
VLSI, process-induced radiation effects 86−21753
wiggler beam monochromator, distortion from synchrotron radiation thermal loading, finite element analysis 87−29415
$YBa_2Cu_3O_{9-x}$, AC Josephson effect obs. 87−53916
Ag-Se-S(Te) chalcogenide glasses, selective solubility 87−53200
Al etch, deep UV radiation effects on photoresist 88−7500
Al supercond. thin film, surface resist. reduction by microwave irradiation 85−56163
$Al/SiO_2/Si$ capacitor, radiation-induced interface traps 85−23565
AlGaAs/GaAs radiation hardened photodiodes 85−35623
AlGaAs/GaAs solar cells, radiation resist., space applications 85−65456
$Al_2O_3:Ti^{3+}$, spectral and lasing characteristics 86−54115
As-S films, Ag photodissolution, optical reflectivity 86−28151
As-S:Ag photodoping, energy expenditure determ. *(Russian)* 87−11626
As_2S_3 amorphous film, AC transport, photoinduced changes 88−19673
As_2S_3:Ag submicron resolution optical grid, Ag photodiffusion study 87−53199
As_2S_3:Zn films, photodoping, impurity diffusion, elec. and photoelec. props. 88−26041
$Bi_4Ge_3O_{12}$, correlation between thermoluminescence and radiation damage 85−43231
C fibre reinforced polymers, insulators for superconducting magnets, mech. props. after low temp. irrad. 85−33521
CO_2, positive impulse breakdown, electrode geometry effect, UV irrad. influence 85−24003
CO_2-N_2-He mixtures, self-sustained volume discharge with intense UV irradiation of cathode 85−18875
CaF_2-Si (111), UV irradiation-induced ordered struct., photoelectron spectroscopy study 87−1329

radiation effects continued
$Cd_xHg_{1-x}Te$, photo-metal organic VPE, low temp. growth method 86−7802
$Cd_{1-x}Mn_xTe$:In(Sb)-CdTe modulation-doped superlattice prep. by photoassisted MBE 88−50700
$Cd_{1-x}Mn_xTe$:Sb(In) film doping during photoassisted MBE 88−50700
CdTe:In, photoassisted MBE growth, low temp. electron mobility and FET characts. 88−49827
CdTe:Sb, photoassisted MBE growth, low temp. hole mobility and excitonic photolum. 88−49827
Cr-Mo-V steel shell for LWR, properties after radiation embrittlement, effects on service period *(Russian)* 88−17301
Cr-Ni-Mo steel metallurgy for VVER-1000 reactor manufacture 87−78346
CsI(Tl) scintillation material props. 85−31700
GaAS MESFET technology, radiation hard ccts. 88−39668
GaAs IC technology and devices, conf., Boston, MA, USA (Oct. 1984) 85−54034

EM heating using controllable microwave troughguide applicator for cancer treatment 87−71163
EM hyperthermia, hot spot form. by locally induced currents 87−4025
EM hyperthermia, temp. meas. technique using refl. method 87−57225
EM hyperthermia of intracavitary malignant tumours, rod radiators *(Russian)* 87−41995
EM hyperthermia of malignant neoplasms, set of devices *(Russian)* 87−41996
EM hyperthermia therapy, method of forming hot zone inside human body 86−5984
EM local heating with HF elec. fields, theoretical study and applicator design 85−38201
endocavitary X-ray units, radiation protection considerations 86−38846
endocavitory treatment system dosimetry 87−57248
endophotocoagulation probe, variable-magnification, fibre-GRIN lens variables, design algorithm 88−23102
endoprobe, ceramic, with Nd:YAG laser, design and clinical appl. 88−10415
endoscopic local hyperthermia using Nd:YAG laser 88−10422
endoscopic local hyperthermia with Nd:YAG laser, computer controlled Laserthermia 88−10417
endoscopic urology, ND:YAG laser use 88−48217
enteritis in children, therapy with He-Ne laser irrad. of acupoints *(Chinese)* 85−59336
excimer laser angioplasty, tissue ablation, arterial response and fibre optic delivery 88−8361
excimer laser system for corneal surgery and laser angioplasty 88−10428
exophthalmic goiter treatment with laser acupuncture and moxibastion *(Chinese)* 86−5977
external beam, on-line electronic portal imaging system 87−8897
external beam cancer therapy, equipment used 88−61423
female urethral polypus cured by Nd:glass laser, clinical report on 28 cases *(Chinese)* 85−59335
ferromagnetic thermoseed materials for tumor hyperthermia 87−63808
fibre optic delivery and detect. system for haematoporphyrin derivative photodynamic therapy 85−38193
fibre optic position verification device 87−29810
fibre optic probe, laser intravascular, for superficial telangiectasia treatment of lower extremity in man 85−38196
fibre optic techniques in medicine and biology, endoscopy, diagnostics and power transmission 87−41949
field penetration from electrically small hyperthermia applicators 88−16759
field-focusing hyperthermia and NMR imaging with a grounded probe and commercial NMR scanner 86−32353
filtered neutron beams for cancer therapy neutron capture therapy 86−65451
filtered neutron beams for treatment for brain tumours, radiation protection 86−65450
flatness and calibration monitor for acceleratorphoton and electron beams 86−50638
focused antennas for hyperthermia 88−4927
gamma therapy planning, SM-4 computer-assisted *(Russian)* 85−38190
gamma-ray beams, Co, electron contamination meas. method using a charge detector 85−53021
gastric ulcers, bleeding canine, endoscopic CO_2 laser photocoagulation 88−16781
radiation therapy continued
haematoporphyrin derivative photodynamic therapy, intravascular appl. using optical fibre 85−38194
head scatter data for several linear accelerators (4-18MV) 86−65453
heavy ion accelerators, biomedical appls. 86−25295
heavy ion beam radiation treatment, stereotactic placement, 3D graphics system 86−70429
helical coil applicators for hyperthermia, optimisation 88−30031
helical coil hyperthermia applicators, coupling efficiency 85−64624
helical coil microwave antennas, implantable, thermal dosimetry charactn. 88−61440
helical coils, expt. charactn. for use as hyperthermia applicators 88−30028
hematoporphyrin photoactivation via nonlinear excitation with tunable laser pulses 88−8381
HF techniques, deep heating with annular phased array 87−63826
horn antenna, exact image theory for field calc. in layered biological medium 86−12019
hyperthermia, clinical, practical use of thermocouples for temp. meas. 86−70383
hyperthermia, deep, through layered tissue, phased array design 86−56183
hyperthermia, deep and localised heating using ferrimag. reson. of ferrite-impregnated medium 88−61430
hyperthermia, EM dual waveguide applicator with temp. meas. 88−61429
hyperthermia, externally induced EM, microwave techniques and applicators 87−63825
hyperthermia, limb and torso, comparison of annular phase array and helical coil applicators 86−18372
hyperthermia, local, system using focused, scanned US 86−56179
hyperthermia, localised: scanned, focused, multiple transducer US system 87−41991
hyperthermia, medical, RF or microwave induced, fibre optic thermometry system 88−16720
hyperthermia, microwave, 2D model for thermal dosimetry, radiometric temps. 88−61432
hyperthermia, microwave, convergent effect change due to freq. shift 88−61431
hyperthermia, microwave and RF, ferromagnetic microparticles use 88−68463
hyperthermia, microwave and thermal aspects *(Dutch)* 86−32355
hyperthermia, noninvasive heating pot. estimation, conductivity mapping 86−32360
hyperthermia, Phase I regional device evaluation, microwave annular array vs. RF induction coil 87−29796
hyperthermia, regional, CDRH helical applicator physical evaluation 88−61437
hyperthermia, regional, comparative performance of 2 types of systems 86−18373
hyperthermia, RF twin-dipole application for intermediate depth 86−60809
hyperthermia, specific absorpt. rates in simulated tissue media for a 10×10 cm 915 MHz waveguide applicator 87−77682
hyperthermia and inhomogeneous tissue effects using an annular phased array 85−4352
hyperthermia applicator, coil and waveguide combined 87−63829
hyperthermia applicator, completely implantable, with externalised temp. monitoring: tests in cond. gel 87−29798
hyperthermia by combined capacitive and inductive applicators 88−61428
hyperthermia cancer therapy, power deposition within a microwave antenna array 85−38203
hyperthermia control, microwave camera appl., phantoms experimentation *(French)* 85−48250
hyperthermia device evaluation 88−30032
hyperthermia equipment eval., Univ. of Utah Institutional Report 88−30035
hyperthermia heating equipment, 430 MHz, using lens applicator 87−57226
hyperthermia induction in cancer treatment, microwave and ultrasound use *(German)* 86−50622
hyperthermia physics and technology, conf., Urbino, Italy (July-Aug. 1986) 88−6121
hyperthermia RF helical coil applicators, CDRH design 88−61434
hyperthermia system, 500 KHz current field, used with ophthalmic plaque radiotherapy 88−4985
hyperthermia system, clinical, deep-body, design based on coaxial TEM applicator 88−4994
hyperthermia system, computer controlled microwave 85−38207
hyperthermia system, computerised microwave, with two radiometers for thermal control and dosimetry 88−61433
hyperthermia systems eval., CDRH RF phantom 88−30033
hyperthermia treatment, blood perfusion rate changes meas. method 88−54603
hyperthermia treatment, EM energy transmission increase between media by interposition of adapting layers 87−57214
hyperthermia treatment equipment, feedback control and optimisation, present status and future needs 87−63828
hyperthermia treatment of cancer, comparison of microwave interstitial antennas 87−63823
hyperthermia treatment of cancer, equipment eval. 88−30034
hyperthermia treatment of cancer using a slotted coaxial antenna 86−44701
hyperthermia treatment on cancerous cells by EM waves *(Japanese)* 88−36505
hyperthermia treatment using 27 MHz waveguide applicator, relative heating patterns calc. 87−8945
hyperthermia using miniannular phased array, expt. charactn. 87−77681
hyperthermia using steerable annular phased arrays 88−61436
hyperthermic applicators, angled dual compact array 87−63812
hyperthermic cancer treatment using variably phased antenna arrays, improved temp. distribs. 86−44700
hyperthermic temp. sensing system using quartz resonator 87−3975
hyperthermic therapy of deep seated tumours: an annular array applicator rel. to a capacitively coupled RF system 88−48214
hyperthermic treatment, EM heating, absorption and nonlinear thermal models 86−32359
hyperthermic US phased array designs 87−4028
hypothermia inducing, near-field power transfer effects in small EM applicators 85−43422
imaging with high energy X-ray beams used for radiotherapy treatment 88−23113
implantable helical coil microwave antenna for interstitial hyperthermia 88−54606
implantable microwave antenna for interstitial hyperthermia, design and temp. distrib. charactS. 88−4997

radiation therapy continued
inductive applicator for inducing hyperthermia in cancer treatment 86−56184
inductive applicators for EM hyperthermia 87−50401
infants undergoing radiotherapy, instrument to indicate acute airway obstruction inremote anaesthesia 86−25178
insulated dipole applicator for intracavitary hyperthermia 88−36503
integral fibre tips, fabrication, appl. to laser surgery and photoradiation therapy 85−59345
integrated waveguide array for deep deposition of microwave energy in dissipative medium 86−64132
intersection of shaped radiation beams with arbitrary image sections 87−57212
interstitial EM applicator/temperature probes 87−63822
interstitial microwave antenna array hyperthermia system, SAR patterns 87−4033
interstitial microwave antenna array hyperthermia systems 88−61439
interstitial microwave antenna arrays, distrib. of power and heat prod. 88−48215
interstitial microwave antenna hyperthermia system, power deposition pattern control 87−4032
interstitial microwave antennas for thermal therapy 87−41992
interstitial microwave antennas used in hyperthermia, automated meas. of power deposition patterns 86−44699
interstitial microwave applicator design and calibration technique 87−63824
intracavital applicator for microwave cancer treatment 88−5001
intracavitary, optimum irrad. condition calc. using quadratic programming 88−61421
intracavitary multiapplicator for microwave hyperthermia and radiometry 88−61438
intracavity ultrasonic applicator for induction of hyperthermia in tumours 88−61427
intraoperative radiation therapy system using an orthovoltage X-ray unit, design and dosimetric props. 86−50626
ion chamber response to ^{60}Co, Monte Carlo simulation, interface anomalies 85−48362
ion chamber response to ^{6}Co, Monte Carlo simulation, wall correction factors 85−48363
irradiation planning system, robotron K 1630 microcomputer 85−38191
Japanese apparatus related to radiotherapy, survey of present state and utilisation 85−43428
LAN-based radiation oncology computer system 86−65455
large core optical fibre, near field output power distribution, medical appls. 85−35457
large waveguide applicator for deep regionalhyperthermia 86−60814
laser, dye, flashlamp-pumped, selection action in medical applics. 87−63815
laser ablation of calcified arterial plaque 88−8362
laser acupuncture, endodermal 3D thermal stress calc. 88−61424
laser angioplasty, clinical experience with Laserprobe system 88−23110
laser angioplasty, in-vivo, design criteria 88−23108
laser angioplasty with contact sapphire probe 88−23107
laser angiosurgery, multifibre optically-shielded catheter 88−23109
laser angiosurgery with optically-shielded laser catheter, quantitation of gas prod. 88−23105
laser application to medicine, status in Shandong Province China *(Chinese)* 85−64622
laser applications, Ar ion laser 85−38192
laser applications in medicine 87−42005
laser applications in medicine, present and future uses 85−59337
laser atrial septostomy, engng. problems 88−23104
laser balloon angioplasty, theory and techniques 88−23112
laser biology and medicine 85−59342
laser biostimulation, low energy, new med. applic. prospects 88−16774
laser biostimulation effect, mol. mechanism 88−61419
laser hyperthermia control with mag. reson. imaging 88−10425
laser in ophthalmology, state of the art and future prospects *(Italian)* 87−77676
laser irradiation, uniform wide angle, rough-ended optical fibre scatt. props. 85−2018
laser irradiation below vaporisation threshold, temp. distrib. calc. in cylindrical tissue vol. 88−10426
laser light distrib. in tissue 88−8357
laser medicine in USSR 86−25298
laser neurosurgery, review of 10 yrs. of applic. 88−16771
laser photodynamic therapy, external and interstitial illumination, comparison 85−48329
laser photomedicine, human tissue, optical properties, effects of visible and UV radiation 85−20949
laser posterior capsulotomy using Q-switched Nd:YAG laser *(Chinese)* 88−74863
laser radiation therapy, beam passing through fibre, dispersion 86−38807
laser therapy uses of gas lasers, current possibilities and prospects 88−68464
laser tissue fusion, review and status report 88−16776
laser vascular welding, Ar laser, thermal component 88−16777
laser-fibre optic microsurgical system, tissue effects due to Er:YAG laser with beam delivery via ZrF_4 fibres 88−23100
laser-tissue interaction, thermal and biological aspects of medical laser appl. 87−35434
lasers and fibres, team use in medicine 86−44646
lasers in medicine, conf., Cambridge, USA (Sept. 1986) 88−6091
lasers in medicine, markets and opportunities 88−16770
lasers in ophthalmology, current activity 86−18374
Laserthermia: a computer-controlled contact Nd:YAG system for interstitial local hyperthermia 88−30038
leaky wave structures for microwave hyperthermia and radiometry 88−45746
lexan track registration papers for ^{12}C, ^{16}O ions at neutron radiotherapy energies 87−29616
light distributor for endoscopic photochemotherapy of tumors 88−10408
linacs, photon and electron beam quality assurance, check instrument 85−59260
linear accelerator, computer-assisted set-up 85−31871
linear accelerator, high-energy, fault logic circuit modification for selectively coded, large-field wedges 87−57216
linear accelerator, Siemens Mevatron 77, accurate temp. controller 85−20959
linear accelerator, transmission of primary and leakage X-rays by concrete shielding 85−26826
linear accelerator for cancer therapy, engineering and marketing aspects 86−25293

radiation therapy continued
linear accelerator isodose distrib., off-axis energy change effect on TAR/SAR algorithm 85−38268
linear accelerators, effect of collimator backscatt. radiation on photon output 87−57217
linear accelerators, energy and angular distribs. of photons 86−5979
linear accelerators, long-term performance 85−59334
linear accelerators, X-ray dose rate outside shielding and in entry mazes 85−43350
lithotripsy, EM acoustic source for extracorporeal generation of shock waves 86−70433
lithotripsy, shock-wave induced using Nd:YAG laser, for kidney stone treatment 85−64619
local hyperthermia direct-contact microwave lens application with microcomputer control 86−60811
local hyperthermia induction, US phased array limitations and scanning requirements 87−4031
local hyperthermia treatment, microwave appls. *(French)* 86−32354
localised thermotherapy, monitoring changes in tumour blood flow 85−20961
Loma Linda medical accelerator injection septum magnet design and construction 88−68147
lossy dielec. media, 3D finite, boundary and hybrid element solns. of Maxwell eqns. 88−40459
low-power laser therapy, photobiological fundamentals 88−10409
lung tumours, contacting phased array for hyperthermic treatment 88−36508
macular degeneration, senile, and neovascular membrane, laser photocoagulation treatment *(Italian)* 87−77675
magnetotherapy, field tension control device appl. 88−4926
Maxwell and integral eqn. equivalency for 3D and 7D scatt. problems 87−33418
medical heavy particle accelerator, design *(Japanese)* 87−29811
medical radionuclide prod. by cyclotron at King Faisal Specialist Hospital and Research Centre 85−59263
MEDICYC, 6 MeV proton cyclotron and target system for neutron therapy 85−64631
megavoltage accelerators for radiotherapy, conf., London, England (May 1987) 87−58556
microcomputer upgrade for radiotherapy simulators 85−43425
microcomputers and radiographers in radiotherapy 88−30040
microdosimetry in neutron therapy by automatic readout of CR-39 SSNTDs 88−61487
microlens ended fibres for medical appls., laser-microfurnace fabrication technique 85−4345
microprocessor-leased system for radiotherapy apparatus 88−5000
microstrip applicators for therapy appls., EM characts. and thermal behaviour anal. 88−4996
microstrip microslot antennas for biomedical appls., freq. anal. of microwave performance 85−38198
microstrip slot applicator radiation into biological media, accurate anal. 88−4932
microstrip-microslot multiapplicator for microwave hyperthermia and radiometry 87−63830
microstrip-slot radiator for biomedical appls., transmission line model improvement 88−56894
Microtron, 10 MeV, 6 yrs. experience of use in radiation therapy 85−53090
microwave and RF therapeutic heating, IR fibre radiometer for thermometry 88−16713
microwave apparatus for producing uniform hyperthermictemperatures over large surfaces 86−12022
microwave applications in industry and medicine, conf., London, England (May 86) 86−52152
microwave applications in medicine 88−16733
microwave applications in medicine, conf., London, England (Apr. 88) 88−49386
microwave applications to therapy and diagnosis 88−54493
microwave diathermy, elec. impedance tomography for thermal monitoring of hyperthermia treatment 87−50324
microwave electron linear accelerators for radiotherapy history 85−48327
microwave energy, biological effects and medical appls., historical review 85−239
microwave focused heating in cylindrical targets for cancer therapy 86−44694
microwave heating system using lens applicator, computer-controlled config. for localized hyperthermia 86−18375
microwave hyperthermia, absorbed power distribs. from single or multiple waveguide applicators, theoretical model 86−65454
microwave hyperthermia, changes in heating patterns due to perturbations by thermometer probes at 915 and 434 MHz 88−48213
microwave hyperthermia, equipment requirements 87−42007
microwave hyperthermia, equivalent circuit of microstrip slot applicators 88−48226
microwave hyperthermia, localised, development of heating equipment with lens applicator 86−5985
microwave hyperthermia, minimising self-heating artefacts due to microwave irrad. of thermocouples 88−48212
microwave hyperthermia, new noncontact applicator 86−5986
microwave hyperthermia applicator, flexible resonant design 88−54617
microwave hyperthermia applicator fields and thermographic antennas response patterns, meas. using nonresonant perturbations 88−54616
microwave hyperthermia applicators eval. 88−54615
microwave hyperthermia controlled by microwave radiometry: technical aspects and first clinical results 85−38205
microwave hyperthermia for cancer therapy 87−63811
microwave hyperthermia in cancer therapy, effective field size meas. and quality assurance 88−54619
microwave hyperthermia system, robot-operated, for testing large surface tumors 87−8944
microwave hyperthermia system using spot beam antenna for tumour treatment 88−54618
microwave hyperthermia treatment, resonant cavity heating of cryopreserved tissue 88−54621
microwave hypothermia, analogue phase shifter for a 915 MHz phased array system 88−16756
microwave imaging approaches to remote thermal sensing in hyperthermia treatments 86−56182
microwave interstitial antenna, helical, for local hyperthermia, performance characts. 87−57215

radiation therapy continued
microwave interstitial applicators for hyperthermia, design with improved treatment vol. 87−35432
microwave interstitial applicators with improved longit. heating pattern 88−68462
microwave lens applicator for localised hyperthermia, 2450 MHz operation, design and testing 86−25294
microwave medicine in China 88−54673
microwave phased array applicator 86−56177
microwave radiometric systems for detectingelectromagnetic emission by a living body 86−32299
microwave thermographic data inversion by singular function method 86−11965
microwave thermographic imaging for use during hyperthermia treatment of malignant disease 85−38140
microwave thermographic mapping for use during hyperthermia treatment 85−26753
microwave thermography for diagnostic and hyperthermia treatment monitoring applics., tissue layering effects 88−54541
microwave-induced hyperthermia for cancer treatment *(German)* 86−50624
microwave-induced hyperthermia in the treatment of local recurrence of breast cancer 85−9227
microwave/RF hyperthermia, large volume, of locally advanced tumours, coaxial system design 88−54620
multifrequency water-filled waveguide applicator, 300-1000 MHz range, design and thermal dosimetry study 85−4354
multiloop concentric hyperthermia applicator with enhanced penetration depth, theoretical study 88−42573
multistepped waveguide applicators, open-ended, design and optimisation, for medical applications 85−38206
muscle tissue, focused RF heating using coaxial applicator, expt. and theoretical study 85−4353
myocardium, Ar laser ablation, electrophysiological correlates and thermal characts. 88−23111
myocardium, arrhythmogenic, Nd:YAG laser photocoagulation, optical delivery system limitations 88−16780
neonatal jaundice, laser photoradiation therapy 88−23114
neonatal phototherapy for hyperbilirubinemia treatment, effective methods and computer model 87−57223
neoplasm of eyelid treatment by low power CO_2 laser light *(Chinese)* 88−68461
nerve stimulation using magnetic fields 85−43430
neutron, scintillation spectrometer with gamma compensation 86−70371
neutron capture therapy, ^{10}B analysis, track etch thin layer chromatography methods 88−10412
neutron doses to personnel from a 24 MeV betratron 88−36524
neutron therapy apparatus with ^{252}Cf sources for intracavity radiotherapy 88−68465
neutron therapy dosimetry by automatic readout of CR-39 SSNTDs 86−25336
neutron therapy dosimetry by automatic readout of a solid-state nuclear track detector 86−50649
neutrons for therapy 86−5981
non-invasive piezoelectric lithotripsy, kidney stones location 88−10431
nuclear medicine, microcomputer-based image processing 86−32351
oesophago-cardial cancer, palliative therapy, endoscopic Nd:YAG laser use 88−48218
ophthalmic applicator for ^{125}I seeds, reusable, for intracular tumour treatment 86−44692
ophthalmic applicators, B-particle, calibration of US National Bureau of Standards 87−29797
ophthalmic therapy, argon laser coagulator use 87−8943
ophthalmic therapy, LAK argon laser coagulator design and use 87−8942
ophthalmic treatments exploit novel laser/tissue interactions 85−43420
ophthalmology, dye laser device appl. 85−31869
ophthalmology, laser use in therapeutic and diagnostic instrumentation 86−50490
optical fibre coupled CO_2 laser for medical use 87−42002
optical fibre techniques for medical appls., conf., San Diego, CA, USA (Aug. 1984) 85−32879
optical fibre technology in medicine 87−42003
optical fibres in medicine, conf., Cambridge, USA (Sept. 1986) 88−18296
optical fibres in medicine and biology, conf., San Diego, CA, USA (Aug. 1985) 87−36297
Orleans neutron therapy facility, Be target for CGR 680 cyclotron 85−64632
orthovoltage X-ray therapy machine, performance characts. 86−56175
orthovoltage X-ray therapy machine, performance characts. 88−10414
otorhinolaryngology, low-power laser therapy using fibreoptic instruments 87−14928
pacemakers containing CMOS circuitry, radiation therapy-induced failures 85−20963
PACS systems and radiation therapy planning, data and workstation requirements 87−29841
pancreatic carcinoma transplanted to mice, photodynamic therapy and local interstitial hyperthermia using Nd:YAG laser 88−10418
parametric imaging for the optimization of radiotherapy treatment plans 87−57222
patient dose in photon radiation field, Si semicond. detector appl. 88−10452
percutaneous laser discectomy for treatment of herniated lumbar discs 88−16769
personnel dose monitoring outside medical accelerator, TLD reading overresponse 86−6008
personnel dosimetry for radiotherapy operators of high energy LINACS 86−60845
photochemotherapy, in-vivo determ. of photosensitizing drugs using fibre optic probe 88−36506
photochemotherapy, radiation transmission 88−48222
photochemotherapy with hematoporphyrin derivative via two step excitation 88−8380
photocoagulation treatment for age related macular degeneration *(French)* 88−48220
photocoagulator based on an AR ion laser 85−48328
photodynamic cancer therapy laser radiation selective effect on cancer cells 86−38806
photodynamic therapy, diffuse energy transfer applic. to opt. dosimetry 88−10424
photodynamic therapy dosimetry theory, sensitiser photodestruction consequences 88−16761
radiation therapy continued
photodynamic therapy of malignant brain tumours, intra-operative, instrumentation and light dosimetry 86−44695
phototherapy of ulcers by coherent and incoherent radiation, comparison 85−59348
planning, past shortfalls and future needs 85−38208
planning and delivery rel. to imaging: use of CT, US and NMR 85−48242
planning using color graphics imaging workstation 86−32356
port wine stain therapy, optimal laser parameters 85−48331
port wine stains, laser treatment, anal. of exposure times 88−14324
port-wine stains, analysis of treatment by laser 88−14320
port-wine stains, laser treatment at 577 nm, clinical results 88−14321
port-wine stains treated by laser, dermatology handpiece to improve efficacy and safety 88−16760
prophylactic laser therapy in retinal detachment *(French)* 88−48221
proton beam line computer-controlled system for cancer therapy *(Japanese)* 88−42575
proton beam therapy on-line arrangement for clinicophysical complex *(Russian)* 88−16758
proton beam treatment centre, hospital-based, development 88−74864
proton linac, hospital based for radiotherapy 86−25297
proton radiotherapy facilities, present status in Japan 85−38212
proton therapeutic beams on JINR phasotron, flat-top depth-dose distribs. *(Russian)* 88−48224
Proton Therapy Facility, design and appl. 88−61425
proton therapy system 88−61426
prototype sector-vortex array applicator for hyperthermia treatment 88−61678
pulsed EM fields, interactions with biological materials 87−63817
pulsed radiation meas. from medical electron accelerators, using standard clinical dosimeter 88−42584
pulsed RF energy emitting portable module for wound healing, clinical evaluation 86−25303
pulsed short-wave therapy, mechanism and appls. 86−50623
radio oncology irradiation parameters, monitoring and documenting using Dynbaver systems 85−4348
Radiological Society of North America 70th meeting, Washington, DC, USA (Nov. 1984) 85−27924
Radiological Society of North America Annual Meeting, Chicago, IL, USA (Nov.-Dec. 1987) 88−24330
rectal monitor for use with afterloadingintracavitary radioactive implants 86−25334
recurrent malignant tumour therapy by N_2 laser *(Chinese)* 86−5978
regional hyperthermia for deep-seated malignancies using the BSD annular array 88−36504
regional hyperthermia phased array system 86−56176
retinal therapy, preselectable intensity distrib. in large-area laser coagulation by electronically controlled beam deflection 87−29808
RF and microwave hyperthermia system for cancer therapy *(Korean)* 88−48216
RF and US cancer hyperthermia systems, quality assurance 86−56180
RF energy, medical uses 86−25220
RF energy appls. in medical environment, shielding techniques 86−25221
RF exposure to operator, reduction, during short-wave diathermy treatments 86−25328
RF fields for bone healing and other medical appls. 85−53091
RF hyperthermia, 2-point control of tissue temp. profile 86−70430
RF hyperthermia applicator, 10-1000 MHz operation, lightweight design, biomedical appls. 87−77683
RF hyperthermia applicator, lightweight type, design and performance 88−30029
RF hyperthermia system for therapy of deep-seated tumours *(Korean)* 86−32352
RF hyperthermia techniques for tumour treatment *(Spanish)* 88−4999
RF irradiation of human body for hyperthermic therapy, temp. distrib. study 87−71164
RF needle applicators, design for optimum SAR distribs. in irregularly shaped tumours 88−54604
RF techniques, inductive and capacitive deep heating 87−63827
robotised scanning laser handpiece for dermatology, port wine stain appl. 88−54613
rotating beam splitter for tangential field breast treatment, dosimetric props. 88−10453
sand shielding for megavoltage therapy rooms 88−10454
scanned intensity modulated focused ultrasound system for tumour margin heating 87−57228
scleral applicator for irradiation of choroidal melanoma 88−61414
self-focusing piezoelectric high-power sound-pulser for painless disintegration of urinary calculi 88−10430
Sheffield stereotactic radiosurgery unit: phys. characts. and principles of operation 87−77677
shortwave therapy units eval. 88−30036
Siemens Mevatron 74 linear accelerator, leak detect. in sealed monitor chamber 85−53093
simulator, virtual 87−50400
skin, port wine stain treatment, laser therapy optimisation 85−59346
skin dose near compensating filters in radiotherapy 88−68468
slit beam rotation therapy with the computer assisted linear accelerator 85−43429
soft heating system design for local hyperthermia 88−61417
soft tissue injury treatment, double-blind clinical trial of pulsed 27 MHz 86−25304
soft tissue thermoacoustic imaging with 2.45 GHz microwave applicator 87−3974
software driven medical laser system for tissue fusion at 1.32 μm 88−10420
solar therapy device in public-health system 86−50625
stereostactic radiosurgery system using a linear accelerator 88−42574
stereotaxic radiotherapy technique for small intracraniallesions, diagnostic and therapeutic procedures integration 85−59340
stone ablation, laser induced, mechanisms 88−16762
structure transfer between sets of three dimensionalmedical imaging data 86−32357
superconducting cyclotron facility for neutron therapy 85−64629
superconducting cyclotrons for neutron therapy 86−25296
superconducting cyclotrons for neutron therapy magnet calcs. 85−64630
superficial tumours therapy, small-size betatron and its clinical testing *(Russian)* 88−30039
surface area-dose rate quantification and display 87−57224
teletherapy unit, ^{60}Co, modification for total body irrad. at 150 cm SSD 85−4356

radiation therapy continued
testing jig for sealed beam monitors 87−57218
THERAPLAN-L radiation therapy treatment planning system 85−4347
thermal dosimetry based on radiometry in multilayered media during microwave hyperthermia treatment 87−57227
thermoacoustic signals from phantom in 18 MeV electron beam for cancer therapy 86−11970
three-dimensional display of radiation therapy planning 88−4998
tibia nonunion, pulsed mag. field therapy, induced mag. and elec. fields, model 85−64626
tissue equivalent phantom materials for negative pions 87−35437
tissue volume ablation in deep seated brain sites, focused US system 87−71167
tissue-equivalent phantom distrib. of heating by US applicators 87−4027
tomographic system for radiotherapy planning 87−21549
tooth decay prevention, fibre optic transmission system for Nd:YAG laser 86−22077
tooth root canal wall dentin changes due to Nd:YAG laser irrad., in vitro quantitative analysis 88−61418
treatment plan optimisation 88−68460
treatment planning systems, acceptance testing using CT scan data 85−43423
treatment planning using concurrent programming 88−42572
tumor localisation and photosensitisation by hematoporphyrin derivatives 88−10410
tumour model, animal, Nd:YAG laser-induced hyperthermia efficacy w.r.t. delivery system 88−10419
tumour photodynamic treatment, optical monitoring of singlet O_2 generation 87−41930
UHF diathermia system with distance-sensitive applicators, power and freq. control 87−77684
UHF local hyperthermia system using indirectly cooled water-loaded waveguide applicator at 432 MHz 87−41990
ultrasound, diagnostic and therapeutic appls. 85−53017
ultrasound phased arrays for hyperthermia: new techniques based on the field conjugation method 88−61677
US, hyperthermia, apparatus and technical auxiliaries *(Russian)* 87−41994
US, spurious vibr. levels of radiator struct. elements 86−25321
US dental scale remover 88−68466
US equipment, meas. and characterisation of acoustic output 86−38760
US hyperthermia, digital readout wattmeter, performance evaluation 85−15346
US hyperthermia, temp. distrib., nonlinear propag. and tissue interfaces effect 87−71166
US hyperthermia applicator, multi-element, with independent element control 87−63813
US hyperthermia concentric-ring sector-vortex phased-array applicators 86−60743
US hyperthermia in vivo scanning speed effect on temp. and equiv. thermal exposure distrib. 86−60744
US hyperthermia temp. monitoring technique 87−71127
US phased array applicator for hyperthermia 85−15347
US phased array hyperthermia applicator 86−56178
US phased array hyperthermia applicators 88−61441
US physiotherapy transducers, performance of the NPL US beam calibrator 87−35438
US system incorporating real-time US scanning 87−71128
US therapy devices in Manitoba, survey 85−20948
US tissue assessment for cancer therapy using computer simulation 86−32361
US transducer devices for diagnostic and therapeutic systems, safety standardisation 88−68390
US tumour treatment, acoustic field synthesis by sector-vortex array 87−71165
UV blood irradiation equipment actinometry 88−74866
Varian Clinac 1800 linear accelerator, characts. of 6 MV photon beam 87−42029
vascular welding using Ar laser 88−16775
verification timer for AECL 780 Cobalt Unit 85−4355
veterinary medicine, low energy laser effects on bowed tendons in horses 88−16772
veterinary surgery uses of lasers 88−16773
water-immersed microwave antenna array for medical imaging and therapy, local field study 85−4351
waveguide applicators for cancer detection and treatment 85−48256
whole body treatment techniques using electrons 87−63834
wobbler facility for biomedical experiments 88−10413
X-ray detecting system response functions for therapeutic beam spectral analysis 86−38809
X-ray dose distrib. in teleradiotherapy *(Russian)* 88−5028
X-ray sets, therapeutic, emission spectra 86−25301
^{241}Am, encapsulated cylindrical sources for clinical intracavitary applicator, dose distrib. meas. 88−10451
^{10}B neutron capture therapy, head phantom expt. and calc. 88−68467
^{10}B neutron capture therapy, monitoring system for thermal neutron fluence and γ dose rates 88−54612
CO_2 laser used in gynaecological endoscopy *(French)* 88−54609
^{60}Co teletherapy unit, dose estimation by mimi-acrylic phantom 88−74869
^{125}I implants in brain tumours, computerised optimisation 88−74865
LiF thermoluminescent system for ^{60}Co teletherapy dosimetry 88−10448
Π^- and heavy ion therapy for cancer, radiobiological background 86−70432
Si photodiodes, miniature props. in 14.7 MeV neutron field, therapeutic dosimetry appl. 88−58356
^{90}Sr+^{90}Y β ophthalmic applicators, NBS calibration service 88−68508

public FM broadcasts, community reception, interference protection of cable networks 87−49231
quantum frequency and time standards appl. 87−3269
radio data system, audio and video broadcasting *(German)* 88−35640
Radio Data System, BBC initiatives 88−22255
Radio Data System in the UK 88−4145
Radio Europe, transmission developments 87−8379
radio receivers, book 88−69987
Radiodata, FM sound broadcasting service *(Italian)* 85−58305
radiosoftware: transmission and reception tests *(Italian)* 88−47254
radiosoftware data broadcasting service in FM sound channels *(Italian)* 88−29019
radiotelevision spectrum, freq. band utility optimisation, eval. and discussion *(Italian)* 87−76906
RAI (Italy) automatic spectrum monitoring centres for TV and radio transmissions 87−56316
random radio station interference, mathematical model 85−7675
RDS, EBU Radio Data System, development 87−70178
RDS, Radio Data System, for AR1 traffic information *(German)* 88−41793
RDS, Radio Data System, USW service in Germany and Europe *(German)* 87−56322
RDS, radio data systems, development in Western Germany *(German)* 88−60371
RDS radio data service, FM data coder *(German)* 86−43949
RDS radio data system, developments and experimental results *(German)* 86−43948
RDS Radio Data System, expt. results *(German)* 86−65044
RDS service, radio data system, for radio station identification *(Spanish)* 88−47266
RDS system, progress and expt. results 87−3266
regional and local radio stations, new frequency allocation in BRD *(German)* 87−3267
regulatory aspects and spectrum management 85−8515
RELEDOP: a full-scale antenna pattern measurement system for high-powered HF transmitting antennas 88−67714
RF exposure measurements in FM/TV broadcasting towers, by continuously recording instrument 85−38260
road traffic information broadcast system for the USA *(German)* 85−58274
roadside radio system for broadcasting onexpressway 86−4538
Rohde & Schwarz NU 115 10 W VHF multitransmitter system 87−41178
SAMDAS monitoring system for antenna systems, develop. 88−58946
satellite appl., multiplexing for audio-visual services *(French)* 85−25830
satellite broadcasting, spacecraft capabilities *(German)* 88−60072
satellite broadcasting digital filtering of audio signals *(French)* 86−55404
satellite broadcasting in German Federal Republic *(German)* 85−8522
satellite radio transmission and feeder links, international regulations *(Italian)* 86−59999
satellite sound broadcasting direct to portable and vehicle receivers 85−25982
Schomandl comparator-receiver EA 153 k, sender synchronisation *(German)* 87−49257
school broadcasts for mathematics *(German)* 86−26535
semi-automated assessment of shortwave broadcast coverage from multiple transmissions 88−67541
shortwave 500 kW transmitter evaluation by Voice of America 88−67538
shortwave broadcast transmitter with novel features, 500 kW 88−67536
shortwave radio broadcasting, 500 kW tetrodes 88−64177
shortwave transmitters, techniques for feeding several to one antenna 88−67539
signal transmission over digital circuits 87−56324
simplex operated AM-sound broadcasting system for digital information *(German)* 86−64851
single-sideband modulation for high power broadcasting transmitters, new Brown Boveri method 86−24039
solid state storage of broadcast sound 86−17544
Sony professional audio equipment *(Russian)* 88−41910

radio broadcasting continued
sound broadcast reception, state of the art *(German)* 87−34761
sound broadcasting, conf., Mannheim, Germany (Nov. 1985) 86−40368
sound broadcasting and data: joined in the ether. Programs are automatically identified *(German)* 85−8525
sound broadcasting signal level, maxima duration distribution 87−63104
sound broadcasting-satellite system for developing countries 85−20131
sound channels, supervision and reservation automation 85−37181
sound level meters and three-level tone test 86−17681
sound programme transmission using 2 Mbit/s multiplexing system 85−42702
sound radio broadcasting by satellite 86−59978
sound radio broadcasting using satellites 87−13829
sound studio technology, digital programming control centre *(German)* 88−67542
spectrum occupancy and signal levels in the continental USA and Western Europe 88−67519
SSB AM radio broadcasting 88−9709
SSB HF broadcasting, receiver characteristics and reception tests 85−63788
SSB sound broadcasting, high efficiency transmission 87−13863
standard broadcast directional array modelling using numerical electromagnetics code 88−40727
standard frequency and time signals broadcasting characts. analysis 85−4124
stereo AM MW broadcasting in Europe 87−63109
stereo sound program transmission, high quality, 1024 kbit/s digital transmission use 85−58290
stereo sound transmission over three-program distributionnetworks 86−37985
stereophonic broadcasting, FM and AM radio services 86−4792
stereophonic systems, develop. up to 1987 *(Polish)* 88−41915
studio techniques development, third generation requirements *(German)* 85−3567
subcarrier audio channel (SCA) data broadcast systems, queueing strategies anal. 88−41128
subscriber cable, radio broadcast wave induction voltage and pair unbalance 85−63410
SW broadcasting, effective field strength calculation 86−24012
SW broadcasting centre computerised control and monitoring 85−3622
SW communication technique *(German)* 88−9383
SW radio, 1984/87 WARC *(German)* 86−43947
SW radio, expectations, hopes and possibilities for 1987 conf. *(German)* 86−43938
SW radio frequencies redistribution, technical factors and planning procedure *(German)* 86−43937
SW receivers in apartments of buildings, voltage at input 85−8557
tape-cassette storage equipment of the partially automated continuity system of Radio Berlin International (RBI) *(German)* 87−34722
telephone hybrid device for information streams separation *(Russian)* 85−63393
terrestrial digital radio broadcasting by digital modulation *(German)* 86−43955
terrestrial networks, service concepts and frequency planning methods 88−67528
time signals detection for computer time-base synchronisation 88−35652
traffic information broadcasting systems on electronically tuned car radios, in Europe *(Japanese)* 85−3648
transmission line effects on AM radio broadcast antenna radiation patterns 86−48690
transmission of radio and TV programmes from Weissenstein to Solothurn through glass fibres *(French, German)* 88−67369
transmission system group channel, sound broadcast signal power reduction 88−41790
transmitters, developments 86−24041
tree-based broadcasting in multihop radio networks 88−4148
turntable vibration reduction methods 85−52578
TV and radio centre, remote control systems for monitor exchange *(Polish)* 85−3690
TV-SAT digital sound broadcasting system *(Spanish)* 87−48992
two-way radio communication in mountainous terrain, simulcasting solution 88−15329
UHF satellite sound broadcasting to mobile receivers using orthogonal FDM and convolutional coding 88−60114
UK national radio networks 86−11201
US international shortwave broadcasting, history from start of World War II 88−67514
USA, privately-licensed shortwave broadcast stations 88−67515
USW FM broadcasting, field strength calc. in hilly and mountainous terrain in 30 to 1000 MHz frequency band 85−8533
USW radio service, computer-based monitoring *(German)* 86−43950
variable dynamics, listening situation improvement *(German)* 87−8377
VHF car radios, frequency diversity and traffic broadcasting *(German)* 87−49256
VHF FM broadcast transmitters with mismatched antennas, parameters improvement 86−38006
VHF FM Transmitter SU 115 for sound broadcasting 85−25990
VHF sound broadcasting, radio data service 85−25980
VHF sound broadcasting planning, Regional Administrative Conference for Regions 1 and 3 85−52474
VHF stereophony, electronic circuits anal. *(German)* 85−31145
VHF stereophony, electronic circuits for radio transmission *(German)* 85−37179
VHF stereophony transmission, electronic circuits anal. *(German)* 85−31144
VHF-FM broadcast Es propagated signal polarisation obs. 87−33429
VHF-FM broadcasting system simulation model *(Polish)* 86−4802
VHF-FM radio, success or failure 87−13848
VHF-FM radio broadcast transmitter amplifiers with power MOSFETs, design and performance 86−62463
VHF/FM broadcasting, development of RDS European radio data system 87−34729
VHF/FM broadcasting, intermodulation between transmitters, protection of adjacent-band aeronautical services, report 85−47650
VHF/FM broadcasting transmitter networks, degree of coverage and complementary coverage *(German)* 86−38007
VHF/FM crosstalk signals, broadband distribution networks frequency plan *(German)* 88−4156
VHF/FM planning, theoretical considerations, equivalent area coverage 85−14384

radio broadcasting continued
VHF/FM receiver performance and implications on broadcastnetwork planning 86−64854
VHF/FM West German broadcast stations, private enterprise *(German)* 87−34732
voice activated microphones for broadcast appls. 86−30938
Voice of America, broadcasting organisation, multilingual word processing 88−35639
Voice of America, high performance radio broadcast antenna systems 88−66194
Voice of America, network control and automation 88−67522
Voice of America transmitter evaluation tests for re-equipment 87−28762
WARC/ORB geostationary satellite and space radio services plans *(German)* 85−47467
wertachtal shortwave broadcasting station 88−67523
West German Post Office radio monitoring service, role in freq. planning and assignment *(German)* 87−13813
WGBH-FM live direct-to-local station digital audio broadcast 86−49773
White Russian sound broadcasting MW synchronous networkshared with television 86−17550
wide-band packet radio technology, signal processing and network architecture design 87−34447
wide-band signals sound broadcasting over parallel digital channels 87−49227
worldwide developments 85−37186
Zurich's LoRa local radio station, development *(German)* 85−8520
Zurich-Letten traffic control centre, using decentralised process computer system 85−25234

radio direction finders *see radio direction-finding*

radio direction-finding
10 m direction-finding receiver, design *(German)* 87−49200
10 m direction-finding receiver for radio amateurs *(German)* 87−49199
acousto-optic signal processor based on Mach-Zehnder interferometer 86−15533
acousto-optical interferometer using Kosters prisms for RF direction of arrival meas. 87−26083
active direction finding antenna for bore holes in salt domes 86−69861
active direction-finding of completely-correlated targets, comparison of smoothing approaches 88−74078
active high-resolution multiple-target direction finding 88−74082
adaptive array algorithms, implementation 87−12787
adaptive array techniques, superresolution 86−30913
adaptive array techniques for direction finding 85−42677
airborne direction finding scanning antenna system K-band *(French)* 88−34470
aircraft landing guidance system *(German)* 85−58244
aircraft radio beacon systems 87−76896
AirLand Battle 2000, system development 85−31120
angle measuring systems, selection of false bearing intersections 88−4132
angle of arrival estimation, generalized approach 87−41064
antenna adaptivity by direction finding and null steering 85−57104
antenna array Fresnel zone radiation source location *(Russian)* 87−39510
antenna radiation patterns, directional anal. using vector spherical waves 88−4134
Argos satellite location system, platform transmitter terminal design and test 87−56106
array shape calibration using sources in unknown locations, max. likelihood approach 88−74080
Auto-Fox, design 85−63504
automatic whistler direction finder 86−68738
bearing estimation, EVD method optimality 88−74083
bearing techniques, basics *(German)* 87−41058
bridge automation, functional area integration on merchant and research vessels 88−35611
calibration-free bearing estimation for arrays with randomly perturbed sensor locations 88−74085
car navigation in West Germany *(German)* 87−20634
circular array DF capability in multipath environments 86−30911
circular arrays, superresolution appl. 88−2873
circular scanning, resolving power calcs. 87−49203
closed-form least-squares source location estimation from range-difference measurements 88−14678
coherent multipath environment, direction finding, vector space approach 87−8368
coherent signals resolution using random array 88−74004
coherent source directing finding, Toeplitz approx. approach 87−20636
communication signal near-field scattering TDOA errors 87−33512
correlation of DF bearing measurements with radar tracks 88−15710
COSPAS-SARSAT search and rescue system trials and long-term prospects 87−41144
crossed dipole array bearing estimation and arctan processing 88−40988
data-based matrix decomposition technique for high-resolution array processing of coherent signals 87−76877
Datong Model DF package, review 88−41761
daytime whistlers, absolute intensity meas. by direction finding, latit. var. obs. *(Japanese)* 86−29388
decameter-wave propagation, two-hop, max. observable frequencies calc. 86−48588
DF, high resolution, adaptive array techniques 87−41149
DF high resolution algorithms simulation on T80 transputer 88−60346
DF sky wave algorithms using circular array of loop antennas, expt. comparison 88−47242
Dick Smith Electronics kit for DIY 86−69843
differential GPS data broadcast, marine radiobeacons 87−41107
differential GPS network, radio beacon-based, coverage anal. 88−41770
differential GPS positioning for geodetic appls., results 85−37142
differential Navstar GPS, visually impaired aid 88−60302
DiffStar, differential GPS in northern Norway 87−76893
DiffStar, differential GPS project, Norwegian development 87−41102
digital signal processing techniques for radio direction-finding appls. 87−39835
direction estimation, three high resolution techniques, anal. 87−62051
direction finder with FM signal, spectral characts. of angular noise 88−22235
direction finding arrays, sensor positioning errors, calibration algorithm 87−28707
direction indications probability for two unresolved signals 85−37122
display system, alternative to CRT 86−23992
distress signals for emergency location in costal waters 87−41098

radio direction-finding continued
dolphin and turtle tracking by ARGOS telemetering systems *(Japanese)* 86−32285
Doppler positioning using new data processing method 87−21746
dual-channel space quadrature-interferometer system 88−9674
eigenstructure methods, with sensor gain and phase uncertainties 88−74081
eigenvector beamforming, progress 87−13014
eigenvector matrix partition and radio directionfinding performance 87−3255
eigenvector methods implementation 85−31119
EM direction finding from antenna array near elliptic cylinder 88−35597
EM emission detection, earthquake prediction 86−69860
empirical comparison of high resolution bearingestimators 86−30876
EPIRB experiments, satellite communication systems, simultaneous reception number, estimation methodology *(Japanese)* 85−47476
ESM (electronic support measures) systems, DLVAs appl. 85−11053
EVA, self-sufficient position and navigation system for land vehicles *(German)* 86−69844
experimental system for multiple source DF signal processing 86−65033
fibre optic transversal filters for RF direction finding 87−34676
fibre optic transversal filters for wide-band electro-optic direction-finding processor 87−25957
fibre-optics matched delay filter for RF direction finding 85−51019
GDOP of hyperbolic navigation systems and satellitenavigation systems *(Japanese)* 85−58252
general purpose receiver, RG81, microcomputer-controlled config., operation and appls. *(Japanese)* 85−57930
Geoloc long range spread spectrum accurate radiolocation system operational results 87−41096
GEOSTAR RDSS spread spectrum receiver, implementation 88−47241
Global Positioning System, DOD policy issues 85−37132
Global Positioning System, operational control segment overview 85−37133
Global Positioning System for precise satellite tracking and geodesy 86−37953
Global Positioning System for vehicle navigation and position reporting 88−67500
Global Positioning System/sonobuoy system for determining missile impact points, development 85−31127
global search and rescue by beacon and satellite 85−52290
goniometry, narrow-band array source direction finding in multiple paths, Toeplitz approx. method *(French)* 88−22239
GPS, clock coasting and altimeter error anal. 86−4771
GPS, codeless dual-band, three-coordinate positioning within 1 part in 10 million 87−41093
GPS, differential, optimal locations of pseudolites 87−76892
GPS, differential mode, hydrographic surveys 87−41084
GPS, highly precise positioning system *(Japanese)* 88−4128
GPS, near Earth orbit determ. and rendezvous navigation 87−41086
GPS, ocean surveying impact 85−37129
GPS, phase III anal., computer simulations *(Japanese)* 86−65034
GPS and DGPS, Geoloc hybridisation for long-range dynamic radiolocation 87−63095
GPS and strapdown inertial system, integrated navigation, flight test results 87−41088
GPS applications to the space station 87−41061
GPS as component in land mobile navigation 87−49207
GPS C/A code, precision 87−41090
GPS carrier phase for centimeter-level surveys, initial results 87−34675
GPS Doppler processing for precise positioning in dynamic applications 87−34674
GPS failure detection by autonomous means within the cockpit 87−76895
GPS for high precision geodetic surveys, highlights and problem areas 87−41094
GPS for time and frequency reference 88−47394
GPS for time and frequency standards distribution 88−60526
GPS in the year 2000 and beyond 87−62901
GPS integrity achievement and degraded performance elimination 88−41769
GPS integrity channel 87−34672
GPS ionospheric time delay algorithm for single frequency users, design and characteris. 87−41100
GPS ionospheric time delay algorithm for single-frequency users, eval. 87−41089
GPS navigation system with 18 satellites *(German)* 87−13797
GPS navigator, development of commercial type *(Japanese)* 86−43915
GPS observables, meas. errors 87−76894
GPS orbital improvement and precise positioning, multi-pass multi-station approach 85−37141
GPS performance and utility, field test results 87−41101
GPS performance improvement, pseudo-satellites appl. 86−4772
GPS position fix using single frequency reception, ionospheric propagation delay *(Japanese)* 87−56295
GPS radionavigation for dynamic applications, Doppler processing technique 86−60949
GPS receiver architecture for navigation and position fixing by satellite *(French)* 86−59966
GPS receiver used for vehicle navigation system 88−47240
GPS relative geodesy, ionosphere effects 87−41092
GPS shipping receiver, position fixes accuracies *(Japanese)* 88−67497
GPS system field testing 85−25851
GPS UE data generator 87−41087
GPS user equipment, relativity correction 87−41085
GPS user equipment, tactical appls. 85−25854
GPS user receivers and oscillators 85−58259
GPS-based geodesy in California, Mexico and the Caribbean 87−41091
GSP standard Positioning Service, terrestrial eval. 87−34673
guidance and radio direction-finding systems, mathematical anal. *(French)* 87−49205
Hall-effect compass/radio direction-finder for urban navigation, Index *(French)* 88−41766
HF circular array for direction finding with null steering capabilities 87−8367
HF DF system, computer modelling of ionospheric errors 86−30908
HF direction finding, travelling ionospheric disturbances and their effects 85−42666
HF direction finding and null steering system employing a four element circular array 88−47243
HF direction finding and null steering using adaptive circular array 85−41797

radio direction-finding continued
HF direction finding and single site location systems, accuracy limitations of ionospheric propagation 85−46569
HF direction finding using a wide aperture circular array with minimum antenna elements 88−47244
HF remote sensing using compact direction-finding antenna 85−24959
history of radio aids in 1920s 87−8369
hybrid bearing estimating system with noise, analysis *(Spanish)* 87−76899
hydrographic positioning accuracy improvement using multiple lines 88−5198
ILS glideslope calcs. for terrain irregularities 88−10476
INMARSAT Council meeting, sea safety for aeronautical community 85−8363
integrated navigation system for robotic vehicle appls. 88−41771
integrated radio direction finder with electronicradiation-pattern stabilization 86−30906
interferometer direction finding systems, effect of mutual coupling 85−42678
JTIDS, navigation aspects 86−55387
Kumaresan-Prony algorithm limitation 85−3532
land vehicle location and navigation using OMEGA/VLF radiolocation 87−49208
land vehicles, devices and systems for positioning and navigation *(German)* 86−69845
Landsat-5 GPS Package, performance 85−37140
LF position determ. error caused by nearby mountain 88−35599
LF waves on the sea, effect of nearby mountain, direction finding errors study *(Japanese)* 86−54296
lightning, EM meas. in frequency and time domains 88−60844
lightning strike location using radio direction finding 86−4776
lightning stroke into thin wire structures, transient process calculation 88−8515
linear direction-finding arrays, adaptive interference and multipath rejection 87−28705
linear motor vehicle, position detection using inductive radio system, influence of transmission line cross-talk *(Japanese)* 87−56300
linear phased array direction-finding using eigenanalysis techniques 88−28992
location system with direction finding stations, systems parameters influence on accuracy *(German)* 86−37952
LORAN-C, cellular systems provide vehicle tracking 87−41060
Loran-C, US Coast Guard precision navigation programs 85−31126
Loran-C chain, Mediterranean Sea, reliability, period 1977-85 87−41097
Loran-C chains, extent of cover determ. 88−60300
Loran-C in the 21st century 87−41099
Loran-C receiver, aircraft flight experiment *(Japanese)* 85−58204
Loran-C time difference meas. correction *(Japanese)* 86−65035
low-profile antenna improves DF accuracy 87−8370
Luneburg lens direction finder, equipment design with liq. cryst. detector *(Japanese)* 85−3543
Marconi Messenger monopulse secondary surveillance radar system 88−9638
marine appl., development trends 86−49742
maximum likelihood angular resolution of multiplesources 87−8344
maximum likelihood direction finding of stochastic sources: a separable solution 88−74084
microwave landing system−a favoured alternative to currentILS 86−43914
microwave landing system for aspects 85−64680
missile guidance, multiple unresolvable targets, simulation 86−17534
MLS, development and phased arrays appl. 87−33548
MLS, installation and implementation considerations 87−41051
MM-wave technology and system appls., state-of-the-art review 86−1336
monopulse, influence of interchannel connections in receiver amp. cct. 88−28997
monopulse direction finding method using antenna patterns comparison technique 88−60345
moving target coordinates, optimum filtering, accuracy characts. 88−40952
multichannel direction-finding receivers for missile seekers, component realisation by application specific MMIC techniques 88−63918
multiparabolic ionospheric model for single site location HF direction finding systems 88−40550
multiple hypothesis approach to direction finding bearing meas. association with radar tracks 88−15508
multiple narrowband sources, sensor pattern and position perturbations effects on direction finding 88−74079
multiple signal resolution with uncertain signal subspace 87−8346
MUSIC algorithm, performance anal. 87−27438
MUSIC DF function methods obtaining without eigenanalysis, noise space projection 87−56306
navigation and positioning techniques, development 87−63092
navigation satellites, orbit determ. 87−3134
NAVSTAR antennas, adaptively controlled, performance simulation in battlefield scenarios 85−25956
Navstar Global Positioning System, overview/current status 85−37131
Navstar GPS, automatic null-steering antenna appl. *(Dutch)* 85−7766
Navstar GPS, international future navigation needs, options and concerns 88−41767
NAVSTAR GPS, NATO tactical operations, potential impact 85−25852
Navstar GPS (USA) and Glonass (USSR) satellite navigation systems comparison 88−4135
Navstar GPS adaptive antenna systems 87−39523
NAVSTAR satellite constellation, coverage and buildup 85−25853
NAVSTAR-GPS, navigation and position finding system, operating principles and characts. *(French)* 86−55393
New Jersey Bell network for tracking lightning 88−20931
noise-space projection, MUSIC function without eigenvectors 87−63085
nonlinear eigenstructure generator 88−4136
nontracking multichannel, for unknown signal source, synthesis 86−49747
novel optimum energy solution in iterative constrained restoration 87−56218
nuclear materials vehicle, dynamic precise positioning technique 88−41578
OMEGA Navigation System, position-fix accuracy assessment 86−4769
on-board data bases, non-precision approach guidance improvement 86−4773
optimal threshold and weight sorting of directionreadings for a fading direction-finding signal 86−37961
parameter estimation via rotational invariance, ESPRIT approach 87−8347
PDOP (Position Dilution of Precision), geometrical determination 86−4774
phase direction finders, statistical optimisation, priori uncertainty 85−25953
radio direction-finding continued
phase interferometers for direction-finding receivers, Varian miniature four-channel subsystems 88−4129
phased array direction finding algorithms, severe multipath conditions, expt. performance 86−30912
phased arrays, direction-finding algorithms with high resolution, expt. performance 87−39525
phased arrays, some properties of fast projection methods of the Hung-Turner type 87−56220
Philips high accuracy direction finding systems using interferometry 86−30910
point signal sources, comparison of effectiveness of various algorithms 86−17528
polarization error in single-pulse direction finders 85−8452
polarization mismatch errors in amplitude comparison direction finders 85−14380
position, location and navigation, conf., San Diego, CA, USA (Nov. 1984) 85−32918
position fixing, accuracy considerations 86−4767
position-fixing needs of merchant ships, Portland Bill to Thames Estuary area assessment 88−29000
positioning systems for hydrographic surveying *(Japanese)* 85−32002
potential noise immunity anal. using omnidirectional scanning 86−49748
radiation sources with parametric uncertainty, detection and direction-finding 86−48946
radio source azimuth estimation by maximum likelihood method 88−40989
random field sources, a priori uncertainty regressive expts. design 88−15708
RDF and early IFF, development 85−58230
reflected waves, direction finding algorithm using small size data series *(Japanese)* 88−60306
research at Air Defence Research and Development Establishment, historical account 86−11144
RFI sources, directions of arrival, search method 87−20638
Rhode & Schwarz PA 2000 search and DF system, HF to UHF short-duration signals interception 88−35600
road vehicles, satellite communication appl. 87−49013

LAN radio data networks for industrial sites 87−2851
land based mobile service, link design *(Spanish)* 88−21992
land mobile communications system, high capacity, radio link control *(Japanese)* 87−28410
land mobile radio , equipment and system design, book contrib. 88−73813
land mobile radiotelephone system, medium-capacity, radio link control program design *(Japanese)* 85−20065
land mobile telephone system, medium capacity, software structure and performance evaluation for radio link control *(Japanese)* 85−20066
library automation and digital networks 88−35197
light guard system for radio relay link antennamasts 86−36862
line crew bucket truck fibre-optic radio control system 88−41706
line equipment operating at 8.448 Mbit/s as feed system for radio links *(German)* 85−36913
line of sight radio relay links, design optimisation 88−28680
line-of-sight, optimum section lengths 86−37748
line-of-sight, statistical calc. of power characts. 87−47183
line-of-sight digital links, book 88−55815
line-of-sight digital radio channel, online meas. of transmission distortion 87−34386
line-of-sight links, influence of radiation pattern width on operating stability 86−17195
line-of-sight radio links, prediction method for cross polarisation discrimination *(Japanese)* 87−76572
line-of-sight radio paths, co-index of refraction, meteorology, and fading *(French)* 88−34333
line-of-sight transmissions, comparison of MM and IR wavelengths 87−55985
linear equalization theory in digital data transmission over dually polarized fading radio channels 85−30132
linear motor vehicle, position detection using inductive radio system, influence of transmission line cross-talk *(Japanese)* 87−56300
link budget calc. 88−21908
link crosstalk calculation based on harmonic analysisof group delay frequency response 86−37750
load management and tariff control system using radio teleswitching of meters 87−50905
local radio distribution systems in built-up areas, propag. path visibility 86−69593
log PCM via QAM over Gaussian and fading channels 88−2939
long-distance radio links, operating freqs., automatic selection *(Czech)* 86−69596
low power radio data network 87−28406
M-QAM digital radio receivers, times-four carrier recovery 87−48865
Marconi's early long distance wireless communication 87−62835
maritime propagation expt. at 36 GHz *(French)* 88−34332
median level depression effect on channelling arrangements 87−40722
medium-capacity land mobile radio telephone, link control program, design and evaluation 86−23752
megabit packet radio system 86−55230
meteor burst, data storage and control unit 87−48905
meteor burst communication, digital modulation techniques comparison 88−28823
meteor burst communication, meteors arrival rate prediction 87−20388
meteor burst communication at short ranges 88−15436
meteor burst communication channel, high latitude, Doppler spreads and multipath 88−9517
meteor burst communication channels, performance 87−34342
meteor burst communication line parameters *(Russian)* 87−69893
meteor burst communication system from RAE, BLOSSOM 88−47016
meteor burst communication systems evolution 87−56107
meteor burst communication with a buried antenna 86−30597
meteor burst communications *(Japanese)* 88−41604
meteor burst communications, bits per burst performance bounds 87−8247
meteor burst communications, update 88−46883
meteor burst communications in tactical intelligence support 87−40710
meteor burst communications system, space diversity reception 88−47017
meteor burst data, database anal. approach 87−34528
meteor burst propagation and system design 87−26797
meteor scatter communications, intermittently served discrete time queue 88−22062
meteor scatter communications system from Vaisala 87−8168
meteor scatter data communications for reliable long-distance links using VHF radio signals 86−23684
meteor-burst communications, protocol analysis 87−27728
meteor-burst data communications, theory and practice 87−20477
microprocessor based packet-switching radio system for electric utility 88−53120
microprocessor-based data transmission system using VHF radio for county power dispatching *(Chinese)* 88−36749
radio links continued
microwave communication techniques and microwave devices conf., Budapest, Hungary (Aug. 1986) 88−55816
military mobile radio relay network, management *(Dutch)* 85−8333
mirror antenna, small, for 20 GHz radio networks *(German)* 87−61489
mobile digital system for 900 MHz *(German)* 86−17255
mobile system, autonomous radio link control with decentralised base stations 87−69987
modern networks appl., basic conceptual considerations 85−25743
modulated RF signal measurement setup 88−14386
modulated RF signal measurement setup, propagation effects determ. 87−14517
MORO locomotive research robot, global design concepts 87−40313

transmission for telecommunications, IEE Summer School, Birmingham, England (July 1985) 86−7394
transmission networks appl. 86−10970
transmission of radio and optical signals to/from industrial machines *(French)* 87−20378
transmission technology develop. trends in West German electricity supply network telecom. system *(German)* 88−35340
transmitter for digital link *(French)* 86−30628
transmitters, radiation power optimal control, errors in channel state estimation 86−17200
transversal equalisers, decision-directed, for terrestrial digital radio 86−69589
tree attenuation at 869 MHz derived from remotely piloted aircraft measurements 87−26767
TRIFFID Band 3, effective use 86−37755
troposcatter and line of sight radio links, computer simulation 85−47431
troposcatter radio-relay links, current state and future developments 87−69894
tropospheric communication links, impulse noise suppression 86−36744
tropospheric radio links, fast signal fades rate distrib. 87−19196
tropospheric refractivity meter for radiocommunication links 88−5156
trunk link routes, station and system control *(Norwegian)* 86−4489
TV broadcasting, radio control technology appl. *(German)* 87−63103
TV outside broadcast links aerial developments 85−42715
UHF digital link across English Channel, propag. data 87−47191
UHF digital radio relay system DRS-2,-8/2500, 2 and 8 Mbit/s transmission, config. and charact. 88−35374
UHF satellite communications, status, transceiver/terminal development and trends 87−40800
UHF scanning telemetry frequency plan development for UK 88−59563
UHF/TDM communication link for Worldwide Airborne Command Post system, feasibility study 85−8334
UHF/UHF radio relay links, reliable obstructed path coverage determ. 87−20393
UK army fixed telecommunication system, modernisation 88−59740
UK radio relay systems, role *(German)* 87−62833
underwater EM communication links, applicability to offshore oil/gas production 87−55984
unprotected digital radio relay systems, max. hop length, graphical eval. 87−40720
unreliable dynamic networks, performance optimisation 88−52321
urban environment point-to-point 60 GHz microcellular system, propagation studies 86−69599
US Air Force antijam communications architecture 85−25722
VF channels, increase of nonlinear noise level due to different lengths 86−37751
VHF communication for rural power network *(Chinese)* 85−14110
VHF propagation in mountain environment, experimental characterisation 88−8463
VHF SSB mobile radio links, speech actuated AGC *(Spanish)* 87−69990
VHF wideband, impulse response meas. 88−53165
VHF/UHF links calc. using Bullington-Rice method using HPL/1C programmable calculator *(Spanish)* 85−42428
VHF/UHF military radiocommunication links, jamming resistance, techniques 85−25696
voice communication with computers via telephone and radio links *(German)* 88−41565
wideband signal propag. in three-layer tropospheric medium, anal. and PSK communication channel model 88−34297
wind power generator rotors, strain measurement with radio telemetry *(German)* 86−31263
wireless digital carrier for the rural local loop 88−28561
wireless local networking−a market perspective 86−54958
wireless terminals: fast access to data power *(Swedish)* 85−3343
worst month rain statistics, theory and expt. 87−54552
GaAs FET power amplifier for 6 GHz SSB radio 85−40255

radio networks
2 GHz digital microwave link radio network for electricity supply industry, Belgium *(French)* 88−35372
13.8 kV distrib. network sectionalization using radio controlled switches 87−57632
18 GHz radio system using 4 FSK for local and regional networks 87−34411
30-1000 MHz band radio networks design, radio-wave propagation, statistical model 87−62819
adaptive HF data network, design and simulation 88−46896
adaptive HF networks in benign and stressedenvironments 86−30585
adaptive hybrid ARQ algorithm for radiochannels 86−23210
adaptive routing in radio communication networks 86−43767
ALOHA channel throughput degradation under dependent sources 87−33861
Aloha network, simulation performance study 88−53142
AM radio links for TV and radio transmission *(German)* 85−52463
analog and digital radio relay networks of the Finnish State Railways 85−20033
antennas for local network radio 88−27601
artificial intelligence assisted packet radioconnectivity 87−3038

radio networks continued
AT&T multifunction operations system support for cellularnetworks 86−23760
AUSSAT '86 New Horizons conference, Sydney, NSW, Australia (Nov. 1986) 87−58540
automated HF networks, real time frequency management 88−46906
automated pulse reflectometry, accuracy increase 87−3384
AUTOPLEX cellular networking functionality and application 87−69972
Band III mobile data services 88−60058
Band Three Radio, new option for business mobile communications 88−60057
battlefield communications, survivability aspects 85−47413
Belgian frequency-hopping combat net radio 88−41558
BK-radio distribution network, receiver technology *(German)* 85−31172
BOTE radio data transmission system for message transmission and storage *(German)* 86−69612
British Rail's distributed Band III radio network 88−46948
broadband optical fibre network in London, to include TV and sound channels 87−70062
broadcasting, problem anal. and protocol design 86−30079
C450 mobile radio system, signalling and cellular functions *(German)* 86−17247
C900 mobile radio telephone system with optimum freq. utilisation 85−3370
C cellular radio network, shared-channel interference reduction *(German)* 86−23728
C cellular radio network of West German Post Office, radio transmission technology *(German)* 86−23727
C cellular radio network of West German Post Office, tasks and structures of exchange station *(German)* 86−23725
C cellular radio network of West German Post Office, tasks and structures of fixed station *(German)* 86−23726
C multicellular radio network of West German Post Office *(German)* 86−23707
C network of West German Post Office, network synchronisation and connection charges *(German)* 86−23730
C network of West German Post Office, relative range finding *(German)* 86−23729
C network radiotelephone service of German Post Office, central signal transmission *(German)* 86−69613
C-network, experiences after 1 year operation *(German)* 87−55998
C-network mobile telephone, construction *(German)* 87−55999
C-network subscriber equipment, test station appl. *(German)* 87−56000
capacitated facility location, book contrib. 87−20073
carrier sense access, two interfering channels environment 87−28359
CDMA multihop networks, acknowledgement protocols, performance comparison 87−33846
CDMA multihop packet radio networks, throughput anal. 86−17219
CDMA packet radio network, multi-hop, throughput performance anal. 88−41516
CDMA packet radio networks, code-assignment for multi-receiver nodes 86−55176
Cellnet, cellular radio network, system overview 85−63537
cellular ALOHA network for mobile radio communication, spatial distrib. of traffic 88−41539
cellular direct sequence and hybrid spread-spectrum radio networks, throughput and packet error tradeoffs 88−9462
cellular mobile, traffic investigations 86−10989
cellular mobile data network, spatial distrib. of traffic 87−56015
cellular network interconnection by satellites 86−11011
cellular network planning, system economy maximisation 88−9424
cellular plan for practical operating network 85−63560
cellular radio, hand-off algorithms influence on perform. 87−76623
cellular radio, transmission planning of UK network 86−23704
cellular radio integrated network CAD *(German)* 86−23719
cellular radio network planning, GRAND program package 86−43741
cellular radio network planning, integrated approach 86−4526
cellular radio networks, economical appl. *(German)* 86−23710
cellular systems design strategies 86−69678
cellular telephone operation, making the most of partners 87−56030
channel assignment, distributed dynamic algorithm 88−52662
clustering techniques for large mobile packet radio networks 87−56017
code switching technique for distributed spreadspectrum packet radio networks 86−16615
collision detection and multitone tree search for multiple-access protocols on radio channels 87−75972
collision-free access protocol for packet radio networks 88−46858
combat radio network system using packet switching techniques 87−34444
communication channels utilisation improvement for radio computer networks *(Polish)* 85−51966
communication system for penal institutions 86−4479
COMSAT's TDMA traffic terminal 86−4576
cordless local area networks 87−8069
CSMA multihop packet radio networks, throughput anal. 87−40649
CSMA/BT-CD multihop packet radio network, modelling 85−13679
DARPA packet radio network protocols 87−33832
data transmission over a cellular network 88−46951
digital links, spectrum efficiency *(Italian)* 87−69905
digital microwave network, evolution 87−48912
digital radio links for network appls., principles and measurements, review 87−28385
digital radio network planning, basic criteria *(Spanish)* 88−15337
digital radio networks using radio modem technology 87−55977
digital radio route design 88−3834
digital repeaters, development 86−69569
distributed algorithm for reorganization and communication scheduling in mobile multi-hop radio networks 87−56018
distributed protocols for mobile radio networks 85−63149
distributed simulation and prototyping testbed for radio communication networks 88−35350
distributed spread spectrum packet radio network, acknowledgements effect on perform. 86−64391
distributed spread spectrum packet radio networks, acknowledgements effect 87−34366
distributed spread-spectrum packet radio networks, spreading code protocols 88−41131
DYANET, dynamic channel assignment and routing for digital satellite networks 88−46983
dynamic ground, hierarchical routing 85−63586
dynamic parameter selection in packet radio transmissions 87−40049
dynamic radio networks organisation by overlapping clusters 86−30610

radio networks continued
electronics in mining, conf., Randburg, S Africa (Sept. 1984) 85−39434
Elsam's radio monitoring network for HV power transmission networks *(Danish)* 86−12366
EMC, VHF-FM broadcasting networks, computer-aided analysis 86−15944
ERIGEN power supply system for Swedish State Railways track radio network 88−9387
European cellular radio network, operation and management problems 88−53182
European mobile radio network, position and prospects *(Norwegian)* 87−8198
European service integrated mobile radio network, architecture and signalling *(Norwegian)* 87−8200
EW resistant short-pulse agile transmission feasibility for combat net radio 86−17253
FeSTa digital system for remote signalling in broadband communication networks *(German)* 86−59557
FM broadcasting, network planning for Spanish mainland *(Spanish)* 86−4797
forwarding schemes in a single-hop multi-stationpacket-radio network 86−30607
frequency assignment in communications channel, nonlinear programming model 87−62817
frequency planning of digital radio-relay networks 87−8170
frequency-hop multiple-access packet radio network with noisy side information 87−55971
frequency-hop radio networks, statistical dependence and noisy side information, packet error probabilities 87−34361
frequency-hop transmission for satellite packet switching and terrestrial packet radio networks 87−13182
frequency-hopped spread spectrum packet radio networks, packet error probabilities 88−59366
frequency-hopped spread-spectrum packet radio networks, random access protocol, throughput anal. 88−21935
frequency-hopping networks, Monte-Carlo mutual-interference-anal. algorithm 86−30608
functional radio connection systems for agricultural appls. *(Croatian)* 88−60003
grouped network technique for future-oriented service radio communication networks *(German)* 88−28664
GSM specification, European industry implications 88−60051
HF naval appls., networking techniques 85−30943
HF network design specification, modelling 88−46912
HF packet network, automated robust system simulation 88−21929
HF radio link processor with adaptive frequency management 88−46910
HF radio network design considerations 87−40684
HF radio systems and techniques, conf., London, UK (Apr. 1988) 88−43595
high-level protocols for packet radio 86−69570
Hungarian national VHF/UHF radiotelephone network establishment *(Hungarian)* 88−34969
hurricane data collection 87−77854
hybrid networks and their uses in radio-frequency circuits 85−20019
Indian Army Radio Engineering Network 88−41506
industry radio networks for own subscribers *(German)* 86−23741
inhouse paging system, status and future prospects *(Japanese)* 88−21983
integrated multiple access radio network system for electric power utilities 86−49491
integrated small ground station network, efficient multiple access protocol use 87−49008
INTELSAT TDMA network, 120 Mb/s QPSK modem use 86−4587
INTELSAT TDMA/DSI network, alignment, testing and maintenance principles 86−4588
international telecommunications using radio relay systems *(German)* 87−62834
IP protocol, fragmentation disadvantages 88−59351
Irish digital radio link network, provision 85−57961
IRT 1500 integrated telephony system based on 1.5 GHz TDMA radio system, rural telephony and urban data appls. 85−19704
Italian wide-area land radio communications network 88−21968
LAN applications 87−69654
land mobile satellite system, integrated voice/data demand-assigned multiple-access protocol 85−14140
link allocation protocol for mobile multi-hop radionetworks 86−54605
link scheduling, optimal, decomposition method, for multihop radio network 87−40705
local broadcast transmitters in The Netherlands, frequency planning *(Dutch)* 87−63124
local cellular radio network for 60 GHz digital voice and data transmission 86−23779
local cycle generation in multihop radio networks 88−21408
Low Cost Packet Radio characteristics 85−42433
Macquarie Satellite Network (Australia) philosophy and system features 87−62915
Macquarie Satellite Network (Australia) system design 87−62914
Matra Communication pan-European digital cellular system for mobile telephones 88−60028
MATS-D land mobile radiocommunication, basic characteristics of hybrid system approach 87−20425
maximal throughput in a tandem multi-hop radionetwork 86−54607
microwave multiple-hop network, rain attenuation, outage performance prediction 88−21943
microwave predistortion networks using digital circuits, design and performance 85−14127
microwave propagation and high capacity digital systems, French network 86−69607
microwave radio, local and junction network appls. 85−57979
microwave radio system for digital transmission capacity expansion 86−43730
military digital radio networks, spread-spectrum techniques and jamming/interception aspects *(Spanish)* 85−52279
military mobile radio relay network, management *(Dutch)* 85−8333
MINI-LINK in the Swedish network 86−4484
mirror antenna, small, for 20 GHz radio networks *(German)* 87−61489
MM-wave wideband FM/FSK radio system using 50 GHz freq. band 85−20024
mobile, coverage evaluation for a particular area 85−58031
mobile, link allocation protocol 86−59803
mobile automatic telephone systems, switched network interfacing 85−63561

radio networks continued

JRC NRD-525 communication receiver 87−62837
JRC NRD-525 receiver 87−3071
JVC high-performance AM/FM receivers, digitally programmable tuning, IR control *(German)* 85−3639
JVC NRD-525G world receiver *(German)* 87−34737
K-band receiver, cryogenically cooled HEMT for radio astronomical obs. 87−34696
Ka band receiver, microwave ceramic circuit components 86−8515
Ka-band dual-channel tracking receiver converter 87−6152
Ka-band front-end integrated with monolithic mixer 86−8480
Ka-band high-power receiver, passive protection for high reliability 88−25428
Ka-band MMIC receivers, development of monolithic ccts. 87−59887
Ka-band receiver front-end, module design using IC techniques 86−23965
Kenwood Basic T2 tuner, harmonics manipulation *(German)* 85−20318
Kenwood R-500 SW receiver, test report *(German)* 87−62816
Kenwood RZ-1 receiver 88−41512
Kowloon TRF cct. 86−37729
Kowloon TRF receiver, construction details 86−23754
L-band monolithic microwave receiver design 88−63930

radio receivers continued
land mobile radio, baseband SNR improvement in thermal noise, selection diversity 85−14134
land mobile radio , equipment and system design, book contrib. 88−73813
land mobile receiver RF intermodulation immunitymeasurement using two signal generators 86−37767
land vehicles, satellite navigation systems 87−41112
LF band and direct-conversion receiver 86−23675
LF channels, digital signal conversion appl. *(Polish)* 85−20327
LF/MF tuner, ZN414 IC based receiver, 190-500 kHz, design and construction 86−24046
light powered radio receiver, AM band 85−58302
long-loop phase locked-receivers, synchronisation loss in presence of large interf. carrier 86−37709
long-loop phase-locked receivers, CW interf. effect, performance study 86−30614
loopstick technology 88−8599
loose-locked oscillator, microprocessor control for freq. stabilisation, radio receiver LO appl. 87−59241
Loran-C and Omega navigation receivers, integrated sample-and-hold polarity detector design 86−62791
LORAN-C radionavigation for automatic vehicle location 86−69859
LORAN-C radionavigation system for land mobile environment 86−69858
low power, low voltage receiver integrated circuits 88−28743
low-noise concepts and techniques, evaluation 85−227
Lowe HF-125 HF band unit 87−40752
LSI for Radio Data System broadcasting receiver *(Japanese)* 88−29044
M-QAM digital radio receivers, times-four carrier recovery 87−48865
mains on/off for battery radios 87−73290
Marconi 1017 vintage communications receiver, review 85−25700
matched-filter receiver optimisation, for frequency hopping code acquisition in jamming 86−30579
mean level receiver for frequency hopped-multilevel FSK mobile radio, anal. 88−21999
Melodic RX46 HiFi stereo controller, development *(German)* 85−52500
MESFET monolithic mixers, 12 GHz operation, DBS receiver appl. 85−34176
Meteosat convertor for VHF receiver for amateur radio, DIY *(German)* 88−28758
MF receivers, two multiplierless designs 87−20382
MFSK, frequency-hopped random, follow-on and partial-band noise jamming, performance 87−39590
MIC transmitter/receiver, 26 GHz operation, FSK, TDMA switch, digital radio subscriber systems 85−25702
MIC transmitter/receiver, FSK, 26 GHz operation, design for digital radio subscriber system 85−20027
microprocessor-based car radios, configs. and operational aspects *(French)* 86−38010
microprocessor-based frequency synthesizers for car radios, design using COP 420 L microcontroller *(French)* 86−38011
microstrip Ku band receiver for point-to-multipoint radio 87−20406
microwave digital radio, adaptive receiver techniques 87−20403
microwave dual polarisation receiver, using superconductor-insulator superconductor junction, 2.5K cryostat design 85−34189
microwave FM receiver systems, MMIC limiting amplifier design 85−55168
microwave mixers using superconducting junctions, limiting sensitivity 86−49458
microwave receiver noise *(Polish)* 86−23679
microwave receiver quieting test, ATE system, config. and operation 85−63987
microwave scanning superheterodyne receiver, 0.5-18.5 GHz, microprocessor-controlled, CS-2002 system from Condor 86−17193
microwave transmitter and receiver, design 86−59760
MIL-STD-462, fast approach to test method CS03 88−14429
military radio sets, EMI test standard MIL-STD-462 modifications 87−26820
millimetre and submillimetre wave detection, low-noise receiver research in Europe, review 87−73766
millimetre wave technique develop. at Helsinki University of Technology, Finland *(Finnish)* 87−48908
millimetre-wave receiver with superconductor/insulator/superconductor diode mixer, radioastronomy appls. *(German)* 85−58263
miniature radios, tuning system for LV appls. 88−12416
MM and sub-MM wave detection techniques 88−29622
MM wave downconverter, 40 GHz 88−19393
mm wave monolithic ICs progress, oscillator, W-band mixer, distributed amplifier and receive module design 87−45295
mm wave personal radio using advanced communications satellite 85−8551
MM-wave Gunn oscillators, 70-115 GHz tuning range, designs for radiotelescope receiver appls. *(German)* 87−17372
MM-wave integrated receiver front-end in E-plane config., design, charact. and performance 87−24461
MM-wave MMICs, fabrication techniques and technologies, receiver and transmitter appls. 86−47081
MM-wave monolithic ICs, development and communications appls. *(Dutch)* 88−25518
MM-wave monolithic integration technology for communications and radar appls. *(German)* 88−56939
MM-wave monolithic MM-wave IC for radio and radar systems *(German)* 88−25523
MM-wave radiometer, 145 GHz, receiver design using superconducting mixer, radiotelescope appl. *(German)* 87−13809
MM-wave receiver for radio astronomy, 85-115 GHz, Pb alloy superconducting tunnel junction mixer 85−37152
MM-wave receivers for EW appls., advanced system concept 86−55184
MM-wave SIS mixers for low-noise heterodyne receivers, design and equiv. cct. anal. 88−44380
MMIC 30 GHz receiver for satellite feed array appl., design and charact. 88−19406
MMIC for receiver systems 86−62848
MMIC receiver, 30 GHz, config. and charact. 87−32073
MMIC receiver, 30 GHz configs. for Ka-band satellite transponder appls. 88−71081
MMIC receiver front end design for high-volume production at low cost 86−67507
MMIC/MIC 8-channel phased array receivers operating in I/J band 87−47404
mobile communication equipment, direct conversion FSK receiver, sensitivity simulation results 88−73846
radio receivers continued
mobile radio, switched-diversity 64 kb/s FSK receiver in freq.-selective Rayleigh fading 85−3367
mobile radio receiver distribution systems, signal dividers design 85−63581
mobile radio receivers, IC components NE 602/4 *(German)* 87−69918
mobile radio receivers, large signal behaviour and performance criteria *(German)* 85−14135
mobile radio receivers, modulation and channel coding schemes 88−14849
mobile radio unit, frequency stability enhanced synthesizer by received signal 88−73839
mobile radio voice and data transmission for power system appls. 86−49490
mobile satellite communications, four receivers, digital implementations comparison, BPSK, DPSK and SS modulations 85−47493
mobile satellite receiver, dual pilot tone calibration technique for multipath fading reduction 87−3133
modular VHF monitor receiver 88−35361
modulation receiver for signal processing in cross-shaped antenna array *(Russian)* 86−22842
modulation tracking loop with varactor detectoras a synchronous FM-receiver at 12 GHz *(German)* 86−17188
monolithic ICs appl. *(Czech)* 85−8326
multi-channel clock radio/controller senior design project final report 88−12543

sensitivity anal., input device frequency characts. 86−59766
sensitivity testing, convergence of shielded room error analysis usingimage antenna theory 86−29428
SHF, extremal parameters of transmission and passive elements noise calc. *(Spanish)* 85−63805
SHF receiver front-end, 20 GHz low noise design using MIC functional modules 87−3044
shipboard receiving subsystem adaptive interference cancellation 85−30945
short wave radio for amateurs for 160 m and 80 m bands *(German)* 85−52272
short wave receiver for £15, DIY 88−15335
signal processing principles, acoustooptic FM receiver demonstration for student laboratory tutorials 85−36260
signal processors *(German)* 87−2503
signal source specs hold key to receiver tests 87−29147
signal strength meter for SX-200N receiver 85−31498
simulation for serial high-speed digital transmission *(Chinese)* 86−64848
single sideband receivers, design simplified by ICs 86−49795
single-chip, Valvo and Plessey models *(Czech)* 86−24070
SKR 500 stereo radio recorder *(German)* 85−26127
SKR 700 stereo radio receiver, review *(German)* 87−3343
SKR 700 stereo radio recorder *(German)* 87−34759
sleep mode for transistor receivers 87−34734
solar battery power supply for home radio equipment, economic advisability for conversion 87−30770
Sony AIR-7 receiver, review 87−3288
Sony ICF2001, computer-controlled radio receiver system using BBC microcomputer 86−17574
Sony ICF-4900 with nine wavebands ideal for travel *(German)* 85−52488
Sony ICF-7600DA, review 88−60404
Sony ICF-7600DA receiver 87−70208
Sony ICF-PRO80 radio receiver 88−35365
Sony ICF-SW1S portable radio system 88−53415
Sony SRF-201 miniature USW receiver *(German)* 88−74114
Sony Walkman cassette and radio unit, and other miniature radio cassettes *(Polish)* 87−14039
sound broadcast reception, state of the art *(German)* 87−34761
Sound Clock clock radio *(German)* 85−42732
split-loop phase-locked receiver, freq. tracking characts. study 87−33686
SPM 84 HF-signal level measuring instrument *(German)* 88−47631
spread spectrum, 200 MHz, with narrowband interference rejection, SAW filter appl. 87−3049
spread spectrum, frequency hopped feature extraction using compressive receivers 87−28372
spread spectrum receiver, code synchronisation using SAW convolver *(Japanese)* 86−69587
spread spectrum receiver, direct realisation using SAW convolvers 86−30583
spread spectrum receivers, nonlinear device to suppress strong interfering signals with arbitrary angle modulation 85−36907
spread spectrum receivers, novel canceller for strong CW and angle modulated interferers 85−30892
spread-spectrum, composite sequences for rapid acquisition of synchronisation 86−64862
SR10 Nante pocket stereo radio, review *(German)* 88−60400
SR 2410 stereo control unit, review *(German)* 85−37240
SRX-30D modifications for improved performance 87−28429
SSB HF broadcasting, receiver characteristics and reception tests 85−63788
SSB low-noise receiver with cryogenic Schottky-diode mixer for 200-260 GHz 86−24002
SSB three-band receiver, design 88−73786
SSMA communications, multipath diversity reception 88−15318
SSTV decoder for radio picture reception with SW or VHF receivers *(German)* 87−13905
ST800, antient and modern, radio receiver construction 87−20386
ST900 receiver construction 88−28717
standard RF magnetic field from rotating field generator, for radio receiver testing 87−14494
state-of-the art ICs simplify SSB-receiver design 87−13559
station identification provision without auxiliary signals *(German)* 86−49812
stereo decoder circuit A 4510 D *(German)* 86−52737
stereo decoders, switched capacitor, for TV and radio receivers 86−11241
stereo earphones for amateur receivers 88−9830
stereo FM radio, single-chip 85−37263
stereo FM receiver, digital signal processing type 86−69969
stereo radio cassette recorder with twin mechanism *(Japanese)* 87−34873
stereo radio receiver, SKR 500, base width control using fourfold op. amps. *(German)* 85−26007
stereo radio recorder type SKR700 (service instructions) *(German)* 87−14020
stereo radio recorders SKR700 and 701, description *(German)* 88−9837
stereo TV sound receiver, constructional details and setting-up procedure 86−11347

radio stations continued
construction in sub-zero temperatures 87−34706
data transmission on FM radio station subcarrier basebands 85−63385
deregulation of low power stations in Japan *(Japanese)* 88−67524
diesel-electric power supply units for radio transmitter stations 87−42685
distance and bearing programs for the ZX81, BBC-B and HP41C/V 85−30851
diversity reception techniques development, S/N improvement methods *(Czech)* 85−20081
Dutch world radio broadcasting station *(Dutch)* 86−4800
electric power consumption normalization studies *(Russian)* 88−60383
EMC and MF broadcasting, Middle East practical case study 87−12742
FCC AM review, effect on Canadian stations 88−41784
FIPS, frequency information and planning system, railway appls. *(German)* 87−76922
frequency synthesizer for radio relay station receiver 5.8 to 6.7 GHz 88−56954
frequency-forming equipment in TV radio stations, recent development 88−67507
generic shortwave broadcast relay station, modelling methodology 88−67540
heterodyne for microwave transceivers in radio relay station 88−44353
HF broadcast relay station of BBC, planning and operation 88−47277
HF broadcasting, transmitting stations number estimation *(Japanese)* 85−51523
HF station, simplified, adaptive processor use 88−46898
high capacity land mobile communication system, base station/vehicular antenna design techniques 87−48951
high power radio broadcasting transmitters and receivers, collocation 88−67560
lightning protection of radio masts *(German)* 85−53350
local broadcast transmitters in The Netherlands, frequency planning *(Dutch)* 87−63124
local radio stations, operation *(German)* 85−8521
local stations Radio Basilisk and Radio ExtraBE, implementation 85−37156
mountaintop radio repeater station, solar powered 88−41571
NHK local stations, new master control system development 85−52524
packet radio operator simulation 87−76557
power supplies for radio link stations, design *(Spanish)* 86−19389
PRIMUS computerised control for identification, monitoring and supervision *(German)* 86−43951
Radio Gong private station in Munich *(German)* 85−58273
Radio Operating Technology GmbH at Nuremberg, monitoring and reception station development *(German)* 86−43981
RDS service, radio data system, for radio station identification *(Spanish)* 88−47266
receivers providing station identification without auxiliary signals *(German)* 86−49812
regional and local radio stations, new frequency allocation in BRD *(German)* 87−3267
relay station transmitter, 11 GHz, with IMPATT diodes 87−56339
S-ALDHA multi hop networks, throughput and delay 88−41577
shortwave 500 kW transmitter evaluation by Voice of America 88−67538
shortwave transmitter facilities power distrib. design, Voice of America radio service 88−61918
shortwave transmitters, techniques for feeding several to one antenna 88−67539
SIRIO for linking receiving and transmitting stations in Rome 85−58056
solar powered, world's first in South America 88−5602
sound studio technology, digital programming control centre *(German)* 88−67542
standby diesel generators modernisation in telephone exchanges, radio and repeater stations, British Telecom 86−61330
SW broadcasting centre computerised control and monitoring 85−3622
Teledialog equip. for phone-in radio programmes *(German)* 86−10908
TN-S power supply system for Swedish Telecom's radio stations 88−30837
transmitting stations, electromagnetic field strength distribution meas. 85−14402
USA, privately-licensed shortwave broadcast stations 88−67515
USW radio service, computer-based monitoring *(German)* 86−43950
VHF radio station FM-300 of system DRS-3 *(Russian)* 85−20064
VHF sound broadcasting planning, Regional Administrative Conference for Regions 1 and 3 85−52474
VHF/FM West German broadcast stations, private enterprise *(German)* 87−34732
Voice of America, high performance radio broadcast antenna systems 88−66194
VSW radio stations parameters meas., using microcomputer-based system *(Slovak)* 86−23674
wertachtal shortwave broadcasting station 88−67523
WGBH-FM live direct-to-local station digital audio broadcast 86−49773
Zurich's LoRa local radio station, development *(German)* 85−8520

radio studios
All India Radio broadcast studio acoustic design 87−41161
All India Radio broadcast studios, acoustic design 86−69876
All India Radio studios, R/T charects. 86−17554
audio mix-down automation 87−28743
Audiodat, new system with higher data rate *(German)* 87−49244
CDs in radio broadcasting 88−22373
CIHI and CKHJ-FM station facilities in Vancouver, Canada 85−3554
commercial radio station in Boston, control using computer-driven touch screen system 87−28742
computerised meas. *(German)* 87−49237
digital audio facilities for TV and radio broadcasting, building principles 88−60379
digital sound for radio and TV studios 88−29164
digital sound studio complexes *(Russian)* 87−41174
GDR Radio, reference listening rooms requirements 88−60378
Georgian Radio-TV Centre, innovation activity *(Russian)* 86−69884
Indian music studio, optimum R/T values 86−17555
insulation of sound studios in multistorey buildings, design and acoustical characteristics 86−17543
maintenance changes necessitated by technological developments 87−56317
microcomputer-controlled semi-automatic programme sequence system for radio broadcasting studio, APA-RBI S 2000 *(German)* 86−43960
modular construction, and acoustic performance 87−13850
multimeter with electronic scale selection *(Russian)* 88−22687
Music Studio 2 at Hessischer Rundfunk, renovation *(German)* 87−49393
outside broadcast vehicles, acoustical considerations 87−13853

radio studios continued
Silk Sound studios in London, audio equipment and engineering 85−20398
sound studio technology, digital programming control centre *(German)* 88−67542
sound studios for private use, costs and concepts *(German)* 87−76916
sound studios for private use, safe and reliable *(German)* 87−76917
technical maintenance services, influences of changing technology *(German)* 87−49236
voice activated microphones for broadcast appls. 86−30938

radio systems
see also mobile radio systems
1.5 GHz transmitter-receiver for Digital Radio Concentration System (DRCS) 86−64850
6.2 GHz channel simulator, realisation in microstrip technique 88−59989
6 GHz 90 Mb/s digital radio perform. on long highly dispersive fading path 85−20049
6-/11-GHz digital radiosystems, performance monitoring 85−14117
11 GHz small capacity digital radio relay system, 11S-24M 86−59781
11 GHz SS entrance link, design 87−28401
12 GHz low-noise FET amplifiers for earth stations radio communication systems *(German)* 85−47469
13 GHz digital radio system for urban area 88−15339
16 and 64 QAM digital radio under multipath fading conditions, communication efficiency 85−14124
16 QAM 140 Mb/s digital radio field expt. 85−19134
16 QAM 140 Mb/s high capacity digital radio system field tests 86−30634
16 QAM 140 Mbit/s radio system, frequency reuse with 7 bit/s/Hz 87−34400
16 QAM and 64 QAM digital radio, transversal decision feedback equalisers for multipath fading 85−20041
16 QAM digital radio, IF-predistorter for TWTA-linearization 85−14107
16 QAM digital radio, performance on radio path with double passive reflectors 87−40721
16 QAM digital radio baseband signal processing system, 140 Mbit/s 88−59983
16 QAM digital radio equipment, high capacity field trials in Australia 87−34428
16 QAM digital radio with maximum power combiners, diversity perform. modelling 85−14123
16 QAM radio system, U6 GHz, linear power amp. design 87−34420
16 QAM-140 Mbit/s systems using rolloff 0.19, spectrum efficiency, orthogonal cochannel operation 87−48855
16-QAM digital, adaptive multiplication-free transversal equalisers design 85−42452
16-QAM digital radio systems, adaptive multiplication-free transversal equalisers design 85−36912
18 GHz 280 Mb/s radio relay expt., perform. charects. 85−20046
19 GHz precipitation scatter expt. 87−54564
20 G-D 2 20 GHz digital radio system *(Japanese)* 85−3347
24 GHz transmit-receive system, phase locking of Gunn diodes 86−64873
30-10000 MHz radio link systems, analytic methods of propagation calculation *(Spanish)* 85−57968
34 Mbit/s FSK digital transmission on standard 4 GHz microwave radio system, performance study 87−3050
45 Mbit/s digital radio system using thin film GaAs technology 87−69889
49 QPRS 90 Mb/s digital radio with decision feedback equaliser, dispersive fade perform. 85−14122
64 QAM 4 GHz 90 Mb/s digital radio system 85−14120
64 QAM 6 GHz 135 Mb/s digital radio system in Alabama, measured performance 86−55193
64 QAM 6 GHz 135 Mb/s radio system design and perform. 85−14118
64 QAM 90 Mb/s radio system, adaptive transversal equaliser 85−20042
64 QAM digital microwave radio with one-frequency repeating 86−55173
64 QAM digital radio, transmission field test results 86−30636
64 QAM digital radio systems, GaAs FET power amplifier design 86−27608
64 QAM digital radio transmission system integration and perform. 85−14119
64 QAM microwave digital radio relay system, 6 GHz, 140 Mbit/s, design and performance 88−28685
64 QAM modem design and meas. techniques 87−34421
64 QAM RD-4A and RD-6A digital radio systems design and appl. 85−14121
64 QAM system for the special requirements of 2 GHz and 6 GHz private radio applications 88−3829
64-QAM digital microwave radio, system performance and DR 6-30-135/DR 11-40-135 equipment models 85−14090
64-QAM radio systems, digital adaptive quantisation 87−48862
64/256 QAM high-level multicarrier digital radio system, feasibility considerations 85−14125
64QAM radio relay system, 140 Mbit/s, main system parameters optimisation 87−34394
64QAM radio systems, full digital adaptive equalisation 87−34377
64QAM transceiver, 140 Mbit/s, design and realisation in 4 GHz band 87−34399
140 Mbit/s digital radio relay systems eval., operation in 19 GHz band 87−34418
140 Mbit/s microwave link systems 85−42455
140 Mbit/s radio system, planning *(German)* 87−8151
256 QAM digital radio system with a low rolloff factor of 20% for attaining 6.75 bps/Hz 88−3842
256 QAM microwave digital radio system, predistortion linearisation circuit design 86−55171
256 QAM modem for digital radio system, performance 86−55194
256 QAM modem for high capacity digital radio systems 85−42438
256 stepped-square QAM digital radio system, 6 GHz, 140 Mbit/s, repeater development and performance 88−28686
256-QAM performance in distorted channels 85−47302
256QAM multicarrier 400 Mb/s microwave radio system field tests 88−3843
800/900 MHz digital radio channel performance charects., propagation meas. 88−3805
900 MHz radio system for telecontrol of electric utility equipment 85−42459
ACSB radios, servicing 85−20010
adaptive HF system, computerised performance eval. 88−46905
adaptive HF systems, channel occupancy monitoring 85−30912
adaptive HF systems, real-time channel eval. method 88−46902
adaptive signal processing for radio communications 85−25137

radio systems continued
Africa, rural telecom., technological revolution 88−67235
agricultural education in Zambia, radio farm factors 88−31344
algorithm for optimal versions choice 86−17206
Aloha multi-access radio channel protocol, instability and geometric transience 88−41148
alternative communications systems, methodology for choosing between them 85−30887
AM TV-Tn/12300 radio relay system for centralised distrib. of broadcasts *(German)* 88−15730
AM TV-Tn/12300 radio system pilot project *(German)* 87−28739
amateur packet radio 88−28678
amateur packet radio, basics 86−30556
amateur packet radio operation 87−40638
amateur packet radio operation 88−46879
amateur packet radio primer, introduction 87−34340
amateur television, technology overview 88−15797
AMTOR system for improved radio transmission of data *(Danish)* 85−36905
anal. and design of radio systems devices and circuits 85−8305

Australian intercapital digital transmission network, devel. 88−59978
Australian telecommunications, digital radio and fibre optics 88−46857
automated factory environment, wireless communication 88−67223
automatic HF system, adaptive control and channel encoding 88−46899
automatic signal acquisition system 86−64864
automatic test system for radio testing 85−63535
automobile keyless entry system with radio card transponder 87−43618
bandlimited digital communications, voiceband modems and digital radio trends and appls. 86−64498
baseband transversal equaliser for digital radio systems, novel config. 87−34369
battlefield electronic communications-electronics operating instructions 87−76548
BER performance parameters at 64 kbit/s and radio system bit rate, relationships 87−34424
binary frame synchronisation sequences for packet radio 88−3291
Botswana rural telecom. 88−59495
broadband communications, radio local distribution systems appls. *(Japanese)* 85−30863
broadband digital radio relay systems, modern, outage prediction 87−34395
broadband down converter for 4- and 6-GHz radio systems , design and performance 88−73796
broadband HF system design for Naval ships 85−30944
broadband networks for LAN and radio appls. 88−73411
broadband radio channels, multipath fading characts. 85−47419
broadband radio systems, multipath propagation in hilly regions *(German)* 87−40665
broadband transmission systems, development *(Japanese)* 85−30551
business services in urban and rural environments, digital system 88−46884
C^3 and microwave technology, systems overview 87−28363
CAD, components complexity estimation 86−30564
CAD workstation for railway radio systems *(German)* 87−56555
calling system with message transmission 86−23671
CCIR Volumes IX and IV/IX on fixed radio relay and satellite services, review 88−15319
channel characterisation by three tones 87−48858
CLASS radiosonde system, appl. of adaptive polynomials for real-time data editing 87−63945
co-transmission of digital data and FM signals, radio data system 88−35371
combat net radio, frequency hopping interference prediction, simulation 87−40696
communication satellites for packet radio 86−69702
communication system for penal institutions 86−4479
communication systems, interference cancellers study by computer simulation 88−53161
communication through rock 87−76529
communications system with repeater, structural adaptation 87−55960
complex systems parameters determ. with fuzzy initial information 87−47451
Computer Aided Radio Design System (CARDS) 87−48890
computer assisted monitoring and location of satellite radio, connections *(German)* 86−17317
computer-aided engineering line for designing line-of-sight radio relay links 88−28681
consumer electronics, conf., Rosemount, IL, USA (June 1987) 88−11553
continuous phase freq. switched radio signals, energy characts. 88−3049
coverage area definition and prediction 88−15724
crisis management in tactical military arena coding strategies 88−46894
cross-pol canceler architectures for microwave radio applications 88−3845
cross-polarization cancellation and equalization indigital transmission over dually polarized multipathfading channels 86−29656
data monitoring by low power radio 86−55148
data system, signals generation and transmission *(German)* 87−76532
data transmission by radio, Turbo Pascal programs *(German)* 87−40658
Datatrak vehicle location and reporting system 88−15711
delay-line-type inductive diffusion cable forroadside radio communication systems 85−63479
delta modulation, continuously variable slope, voice radio intelligibility characts. 86−29804
desensitisation effects, anal. 85−63530
design, experimental-analytical method 86−30149
developments in telecommunications, hearing and viewing *(German)* 88−28169
differential offset-QPSK modulation/demodulation technique for point-to-multipoint radio systems 88−45852
digital, appl. of adaptive multiplication-free transversal equalisers 85−8301
radio systems continued
digital, crest factor interference and noise, error probability estimation 86−30611
digital, error gauging, quality aspects 87−55950
digital, high capacity systems, effects of waveguide echoes 86−55172
digital, high performance low capacity system for 2 and 10 GHz bands 86−23693
digital, low and medium capacity, cost and performance 88−3816
digital, low capacity system, LR4 series using OQPSK modulation 86−23694
digital, modulation and transmission characts. 86−55152
digital communication systems, transmission and channel evaluation techniques, review 85−25730
digital CPFSK FM radius, effects of narrowband interference 88−28673
digital high-capacity radio systems, high-speed signal processing techniques 85−20022
digital microwave radio, outage time calc. methods 87−40707
digital microwave radio, statistics of time dynamics of dispersive multipath fading 86−30578
digital microwave radio, system meas. technique 87−28399
digital microwave radio system *(Japanese)* 85−8312
digital microwave radio system, DRL 2300, 8 and 34 Mbit/s 86−4482
digital microwave radio system, error perform. effect of angle diversity 88−52215
digital microwave radio system, propag. characts. of 100 km overwater span in Japan 87−13588
digital microwave radio system meas., dispersion signature anal. 87−48899
digital microwave radio systems, dispersion signatures 87−34427
digital microwave radio systems, freq. diversity effects, prediction method *(Japanese)* 88−21922
digital point-to-multipoint radio system, 19 GHz, for local distribution 86−23690
digital QAM systems, with bandpass nonlinearity signal processing, cointensity spectra determ. 87−34337
digital radio, 11 GHz high capacity QPSK system perform 86−30635
digital radio, field test results for 16 QAM and 64 QAM 86−59774
digital radio implementations, conf., London, England (Apr. 1987) 87−43810
digital radio links, design and calc. for a system *(Spanish)* 85−42429
digital radio network planning, basic criteria *(Spanish)* 88−15337
digital radio receiver dynamics: a new robust receiver 88−53137
digital radio relay quality compared with new CCIR objectives 87−34425

BRT transmitter surveillance system 86−38005
CB radio microphone 85−47432
cellular mobile radio, relationship between basic station transmitter multicoupling requirements and frequency planning strategies 85−58002
cellular mobile telephone, digital control of transmitter power 87−3099
channel combiners for RF transmitters 86−4807
CJOY/CKLA joint AM/FM transmitter 85−3624
C.M. Howes' transmitter and receiver kits 87−62853
coaxial power amplifier for the 13 cm band using tubeTH 6885 86−53302
coherent multichannel signals, spectral-density distortion, modulating interference presence 87−19690
coupled-line VSWR meter 87−49816
coverage area, PC automated prediction using topographic terrain data 88−2578
CTX80/CVF80 3.5 MHz band low power transmitter and VFO kit 85−57949
CW transmitter low power output stages 87−20387
data terminal unit using switched capacitor filters 87−48876
Datatrak vehicle location and reporting system 88−15711
DFSK 1200 baud paging transmitter, modulation waveform 87−69979
diesel-electric power supply units for radio transmitter stations 87−42685
digital methods of single-sideband signals power amplification 87−44616
digital radio links transmitters, PLL techniques utilisation 87−34733
digital radio links use *(French)* 86−30628
digital radio links with nonlinear transmit amplifiers, performance anal. 87−48904
digital radio performance, transmitter spectral shaping following power amplifier 87−40648
digital radio performance when the transmitter spectral shaping follows the power amplifier 87−34376
digital satellite radio, measurement-transmitter concept *(German)* 88−15420
digital transmitters use of 4 to 12 GHz band TWTs 85−34434
double-sideband transmitters, polyharmonic mode realisation 86−23661
Drake L4B conversion for 3XC1200A7 power amplifier tube 86−20312
duplex feed cct. design for MW radio broadcasting 85−58292
Eastern bloc jamming transmitters, influence on planning *(German)* 86−43968
ECM transmitter, antenna and amplifier component charact. and developments 87−40657
EER (envelope elimination and restoration), spurious emissions anal. 86−38009
EHF satellite communication technology−transmitters and receivers 85−8344
EHF solid-state broadband transmitter, 5 W design, satellite ground station appl. 86−23803
electric field strength distribution due to broadcast transmitters, evaluation in urban areas 86−5445
electroexplosive devices, influence of EM fields, hazards in vicinity of powerful radio transmitters 87−10112
EM field danger effect on electric fuses *(German)* 86−43980
emergency beacon, automatic morse transmitter design, vehicle appls. *(Spanish)* 87−56340
emergency communications using remote transmitter 87−20416
energy saving using dynamically controlled AM *(German)* 86−43977
energy/bandwidth-saving transmitting methods *(German)* 85−14404
extraneous radiation meas. 86−43727
failure rate parameters estimation in radio reception with unintentional interference 86−30973
fast antenna tuners 87−61533
feeding several shortwave transmitters to one antenna 88−67539
fixed-based RF and microwave radiation biological hazards 86−18381
FM stereophonic transmission codecs. 86−49788
FM test transmitter with microphone *(German)* 85−8542
FM transmission of digitalized daily newspaper for blind people 85−42719

radio transmitters continued
FM transmitter, one transistor cct. design for walkie-talkie appls. 85−58016
French telephone networks, local line, interference caused by high power radio transmitters *(French)* 85−8044
frequency, instantaneous determ., wide bandwidth 86−4806
frequency allocation for mobile radio telephone system 88−60040
frequency selection algorithm for radio facility collective 88−41781
FSK system for serial data transmission *(German)* 85−47428
FSK transmitter, design using 13 GHz FET oscillator with dielec. resonator 88−56985
GB3PT RTTY repeater, development 85−51964
general-purpose solid-state power amplifier for FM broadcasting 87−66555
generic shortwave broadcast relay station, modelling methodology 88−67540
grounding grid maintenance during electrical system construction 87−8387
helix TWT, 14 GHz, 600 W for satellite ground station *(Japanese)* 87−66841
Hessischer Rundfunk's 'Hoher Meissner' transmitting station *(German)* 88−22265
HF 420B-1 500 kW transmitter, computer control and monitoring 88−67537
HF broadcast relay station of BBC, planning and operation 88−47277
HF curtain antennas with irregular foregrounds, performance calcs. 88−40754
HF curtain arrays, anomalous effects 88−40753
HF dipole curtain antenna array for radio broadcasting, with vertical and azimuthal beam control 88−66218
HF or VHF, reduction of intermodulation products *(French)* 85−8294
HF SSB transmitters, cartesian feedback appl. 85−31166
HF transmitter ccts., EMC charact s., statistical modelling 86−37726
HF transmitter using HV MOSFETs, ultra-lightweight design for portable AC powered use 86−23672
HF transmitters, meas. of field strength in vicinity 85−2465
HF transmitters, performance and design develops. 87−63119
HF-Cartesian-loop transmitters, phase delay compensation 88−47278
hidden electronics detection using microwave transmitter and receiver config. 88−71016
high power AM broadcast transmitters 88−9718
high power broadcast radio transmitters, future trends 85−3633
high power radio broadcasting transmitters and receivers, collocation 88−67560
high power shortwave transmitter, pulse step modulator 88−67535
high-power RF transmitter EMP protection by metal-oxide varistors and saturable magnetics 88−29039
Howes CTX 80 QRP CW transmitter kit 85−30864
HV substation earthing systems, radio antenna mast 88−55567
identification in Berlin car radio *(German)* 86−69616
independent sideband HF transmitter, TM223A/B, all solid-state config. with microprocessor and remote control *(Japanese)* 85−57929
inductive radio paging with antenna loops *(German)* 88−15358
integrated microwave radio for rural communications, point-to-multipoint subscriber system 88−60005
INTELSAT TDMA transmission subsystem-1, traffic terminal and associated equipment 87−8233
intermodulation in radiocommunication *(Danish)* 87−2314
ISFET pH sensitive FM transmitter using hybrid fabrication techniques 86−55719
Kansas City Keyer KC-1 for continuously variable speed control 86−23657
land mobile radio services, investig. of intermodulation products generated by antenna towers at radio sites 87−13631
land mobile service frequency and space separation limits for three-transmitter interference 88−3884
lightning strikes to radio transmitter towers, upward streamer production 88−9710
local broadcast transmitters in The Netherlands, frequency planning *(Dutch)* 87−63124
LORAN-C network expansion and further applications 87−41131
low-power, FCC standards 85−63529
LW AM radio transmitter design 85−3634
MF broadcast transmitters, solid state Pye TVT range 86−60000
MF radio transmitters, power saving, AM companding digital implementation 87−13860
MF transmitter lightning arresters 86−49789
MIC transmitter/receiver, 26 GHz operation, FSK, TDMA switch, digital radio subscriber systems 85−25702
MIC transmitter/receiver, FSK, 26 GHz operation, design for digital radio subscriber system 85−20027
MIC upconvertors, design for microwave solid-state transmitter appls. 87−17387
microphones as transmitters, broadcast ancillary services problems 85−37211
microstripline high power amplifier design 86−41345
microwave communications, 3-11.7 GHz, principles and techniques *(French)* 85−30868
microwave transmitter and receiver, design 86−59760
microwave transmitter design, shipboard and ground, signal processing and computer impact 85−25745
MM-wave MMICs, fabrication techniques and technologies, receiver and transmitter appls. 86−47081
MM-wave monolithic ICs, development and communications appls. *(Dutch)* 88−25518
MM-wave multiwatt level transmitters using varactor diode power freq. multipliers 88−32445
mobile land service transmitter, range control *(French)* 87−13615
mobile radio base station multicouplers, origins and minimization of intermodulation outputs 85−2612
modulator automatic signal level limiter 87−49241
multi-mode architecture 86−38008
multibeam communications satellite, onboard transmitter and receiver *(Japanese)* 87−34476
multibeam communications satellite, onboard transmitter and receiver 87−48989
multimicroprocessor system for radio-communication facilities operating frequencies selection 88−74107
multiport power combining transmitter design for multibeam satellite communications *(Japanese)* 86−49536
multiresonator klystron microwave transmitter, power control processes study 87−70193
mutual interference effect in radio communication systems using broadband transmitters 87−26812

radio transmitters continued
MW aerial masts, metallic corrosion prevention 87−8386
MW and LW, high power, inductive elements cooling 85−8538
MW broadcast transmitters, digital AM 88−60390
NEC automatic measuring equipment for shortwave broadcast transmitters *(Japanese)* 88−4159
NEC radio paging transmitter, development *(Japanese)* 88−21988
network planning, use of digital topographic mapping and databases *(German)* 86−43966
non-intrusive testing using programme statistics 86−49792
nonlinearity analysis and solution *(French)* 85−3352
one-transistor FM transmitter cct. 86−24043
oven controlled quartz crystal oscillator, low-power integrated design for SARSAT buoys 87−31752
PAM microtransmitter, SAW-stabilized 88−15363
paper mill, radio control system for equipment control 88−73542
peak envelope power measurement, two-tone oscillator construction instructions 86−17991
personal microphone link and transmitter *(Spanish)* 88−60488
phasing SSB transmitter, config. and operation 86−23666
pi-network oscillatory system, design and anal. 87−59224
plantwide monitoring and control appl. 86−30314
Polish conspirational activities, use of radiocommunication by underground forces *(Polish)* 85−3351
portable radios, EMI source detection 87−68819
power amplifiers, class A versus class AB 87−41179
power amplifiers, noise-to-signal ratio variation 86−14028
power line harmonic radiation, contrib. to unintentional man-made modification of magnetosphere 86−25594
power system remote control, HDO transmitter, transient phenomena in static frequency convertor-by-pass transformer circuit *(Czech)* 85−43527
programmable VHF-driver transmitter *(German)* 88−29040
PSM radio transmitter, SSB operation 87−13862
pulse-step modulation transmitter equip., further developments and appls. 85−3632
quasiperiodic ionospheric array, radiowave scatt., phase fluctuations and correl functions 86−3512
radiation hazard level of transmitter, effect on detonator leads 87−2322
radiation power optimal control, errors in channel state estimation 86−17200
radio control for a toy torpedo boat, PWM transmitter and receiver design *(Spanish)* 87−17280
RDS, EBU radio data system 88−15342
receivers providing station identification without auxiliary signals *(German)* 86−49812
receivers with transmitter identification without additional signals *(German)* 86−43978
remote control of radio emissions parameters *(Polish)* 88−28314
remote control transmitter for tracked vehicle, mixer cct. design 85−11103
RF and microwave radiation sources and health risks, surveillance and protection *(Italian)* 85−48341
RF safety standards evolution; impact on mobile and portable transmitters 86−69663
RF test set for broadcast transmitters 85−3626
RF transformer for wideband transmitter antennas *(Romanian)* 88−32507
Rohde & Schwarz NU 115 10 W VHF multitransmitter system 87−41178
satellite digital communications service, 30/20 GHz Earth station *(Japanese)* 87−34471
satellite ground stations, helix TWT appl., 6 GHz, 3 kW *(Japanese)* 87−66840
satellite networks, BPSK and QPSK system performance, effects of transmitter-satellite and receiver instabilities 86−23821
satellite relay system, USSR and DDR *(German)* 88−28778
SAW stabilised microwave transmitters, stable and low cost 87−992
semi-automated assessment of shortwave broadcast coverage from multiple transmissions 88−67541
seven-channel radio control transmitter switching by single joystick 85−34104
SGDRA-type broadside arrays for transducers withunbalanced output 86−36845
SHF, extremal parameters of transmission and passive elements noise calc. *(Spanish)* 85−63805
ship shortwave radio transmitters, matching devices 88−46854
shortwave 500 kW transmitter evaluation by Voice of America 88−67538
shortwave broadcast transmitter with novel features, 500 kW 88−67536
shortwave radio broadcasting, 500 kW tetrodes 88−64177
shortwave transmitter facilities power distrib. design, Voice of America radio service 88−61918
Siemens TBB 200 CMOS PLL chip for 900 MHz transmitter equipment *(German)* 88−32295
single-sideband modulation for high power broadcasting transmitters, new Brown Boveri method 86−24039
single-sideband signal components, separate amplification, nonlinear distortions anal. 87−44617
single-valve units 86−23753
Siple VLF transmitter, use as multi-freq. probe of Earth-ionosphere waveguide 88−34308
solid-state transmitter/modulator for the mode select airport beacon system sensor 87−77822
special nuclear material tracking using radio/radar transmitters 88−41751
spectral correlation analysis *(Slovak)* 87−47654
speech signal processor design for peak amplitude levelling, amateur radar transmitter appl. *(Spanish)* 86−10290
SSB AM radio broadcasting 88−9709
SSB amateur unit, design and constructional details 86−69580
SSB and CW, 2382 spectrum analyser appl. *(Italian)* 87−14231
SSB sound broadcasting, high efficiency transmission 87−13863
SSB transmitters, advantages 88−22264
step charging power-supply for radar system RF transmitters 85−27520
supervision and control system SNU 163 *(Croatian)* 86−49791
SW high-power transmitters, output balanced circuits, in-phase wave anal. 87−63120
SW radio communications centre, transmitting and receiving, remote control equipment 86−23660
SW transmitter, automatic characteristics meas. *(Japanese)* 86−55183
SW transmitter, high-power, output oscillatory system tuning above resonance frequency 87−49242
SW transmitter output circuit operation, antenna-feeder and oscillatory-system parameters effect 87−63121

radio transmitters continued
SW transmitters and expansion programs, computer program appl. *(German)* 86−43967
switchable filters design 85−8539
tactical radio environment, parameter sensitive interference prediction model 87−28434
technical trends of transmitting equipment *(Japanese)* 86−4808
technology, computer use *(German)* 86−43970
telecontrol, transmitter/receiver system for remote control *(Spanish)* 85−63814
temperature meas. transmitters, design 87−63554
testing, software package, programming with menus and forms *(German)* 87−76530
three-antenna interferometric direction finders, algorithms 88−58963
train radio installations using common-freq. transmitters, setting and meas. procedures *(German)* 86−10987
transmatch SPC unit 85−57948
transmitting and receiving systems with centralised supervision and control, backup concept 88−35672
transportable 1-kW AM radio broadcast transmitter using 'SIT' 87−34730
trunk communication radio transmitter test equipment 86−44088
trunk communications, frequency synthesizer for quality meas. 87−76937
TWT-based advanced broadband transmitter 85−55411
UHF frequency doubler using Si diode multipliers, design for high-power transmitter appl. 87−45253
UHF mobile communications, digitally processes multimode modulation/demodulation system for narrowband voice signals 85−30942
undesirable oscillation suppression by parametric modulation 87−62821
unijunction FET cct. replacements for vacuum tube stages 86−17571
US international shortwave broadcasting, history from start of World War II 88−67514
USW transmitter, transistorised 5 kW, with high degree of operating reliability *(German)* 86−43969
vertical antenna with counterpoise for 21 and 28 MHz 87−47340
VHF and UHF range wireless H-fieldprobe with laser as optical transmitter *(German)* 86−10074
VHF broadband, matching unit anal. 85−8540
VHF FM broadcast transmitters with mismatched antennas, parameters improvement 86−38006
VHF FM compact transmitters with forced air cooling 86−30962
VHF FM Transmitter SU 115 for sound broadcasting 85−25990
VHF power amplifiers with broadband input circuitry 85−599
VHF SSB transmitter employing cartesian feedback 85−57960
VHF transmitting equipment for several transmit frequencies with different radiation patterns 88−47274
VHF-FM 1kW broadcast transmitter 88−47271
VHF-FM radio broadcast transmitter amplifiers with power MOSFETs, design and performance 86−62463
VHF/FM broadcasting, intermodulation between transmitters, protection of adjacent-band aeronautical services, report 85−47650
VHF/FM broadcasting transmitter networks, degree of coverage and complementary coverage *(German)* 86−38007
VHF/UHF field strength predictions, computer-aided 88−66059
Voice of America transmitter evaluation tests for re-equipment 87−28762
voice recognition systems, IBM PC-XT based, comparison 88−52404
VSWR measurement of transmitter by using coupler and short 86−38528
W-band transmitters, 90-100 GHz, design using Si IMPATT diode power combiner, performance 87−40639
wertachtal shortwave broadcasting station 88−67523
wireless stereo link, design 88−35658
GaAs FET power amplifier for 64 QAM digital radio transmitter, design 88−1014

radioactive age determination *see radioactive dating*

radioactive chemical analysis
For applications of radioactivity to chemical analysis, see chemical analysis by nuclear reactions and scattering
see also neutron activation analysis; radiochemistry
fuel reprocessing, isotope dilution anal. of input samples, automatic system, design, safeguards appl. 87−70406
nuclear instruments appl. to process meas. and control *(Czech)* 85−8887
power plant component wear meas. by surface layer activation 87−59039
radioassay of dual-labeled samples with a Cherenkov counting technique 88−29883
radiochromatographic attachment to liquid scintillation counter, for ^{3}H and ^{14}C concentrations meas. 86−60595
semiconductor technology, radioanalytical techniques appl. 87−38054
T concentration determ., optimised cell for liquid scintillation radiometer 87−56893

radioactive dating
accelerator mass spectrometry, graphite target preparation for radiocarbon dating 87−77588
accelerator mass spectrometry, symposium, Niagara-on-the-Lake, Ontario (April 1987) 88−18293
conference, accelerator mass spectrometry, Zurich, Switzerland (April 1984) 85−20762
isotope ratio meas. using fast beam pulsing system, ^{13}C dating corrections 85−20779
laser microprobe $^{40}Ar/^{39}Ar$ dating of mineral grains in situ 85−43471
low energy negative ion cyclotron for radioisotope dating 85−20862
low-level counting facility for ^{14}C dating 87−14743
LR-115 Kodak SSNTD, α-counting efficiency and thermoluminescence dating appl. 87−29661
sediment age and deposition rate determin. equipment for automated radiometric method 85−64702
target preparation for radiocarbon dating by tandem accelerator mass spectrometry 85−20792
C, sample prep. for radiocarbon dating, tandem accelerator mass spectrometry 85−20796
^{14}C dating, automatic control using ZSS computer *(Chinese)* 85−54934
^{14}C gas-proportional-counting method, appl. of pulse-shape discrimination 87−77826
^{14}C, sample props., radiocarbon dating by accelerator mass spectrometry 85−20797
^{14}C target prep. for accelerator mass spectrometry expts. 85−20795

radioactive pollution
airborne radionuclides from FRG nuclear plants, quality control meas. 88−17269
Canadian Nuclear Society annual conference, Toronto, Ont., Canada, (June 1986) 87−50953

radioactive pollution continued
Chernobyl−ethical and environmental considerations 88−23670
Chernobyl accident, causes and consequences *(French)* 87−35759
Chernobyl accident, Hungarian population irradiation and pollution *(Hungarian)* 87−71179
EEC nuclear power overview−Chernobyl implications 88−36963
electret passive environmental Rn monitor, principles and practical appls. 88−57893
environment and health, effects of nuclear power *(French)* 88−23621
licenced radioactivity release levels from French nuclear facilities *(German)* 87−35723
liquid effluents from operating nuclear power plants, effects on water sector 88−17281
LWR reactor containment accidents, aerosol behaviour, large-scale expts. 88−62112
milk samples, ^{90}Sr-^{90}Y, ^{89}Sr activity meas. by proportional counter *(Spanish)* 88−42411
noble gas components determ. in nucl. power plant gas samples *(Hungarian)* 87−63979
nuclear fusion, environmental aspects, hypothetical radiation leak effects *(Dutch)* 88−17302
nuclear power station cooling reservoirs, radioactivity of sediments *(Russian)* 88−23627
Oyster Creek emergency off-site dose assessment, ocean breeze inclusion 87−22037
Paks nuclear power plant, radioactive emissions control *(Hungarian)* 88−69101
power plant severe accidents, aerosol behaviour simulation codes, distrib. fn. 88−62036
relative population exposures from coal-fired and nuclear power plants in India 87−64358
SSNTD technique for Rn and thoron meas. in the environment 87−29673
TMI-2, LWR accident source terms, implications in design 88−62113
^{14}C, particulate contamination at Pickering generating station, origin and control 88−75296
^{14}C, particulate contamination control at Pickering generating station 88−75297
Pb-scintillator large volume detector for γ-radioactivity meas. in H_2O 88−61113
Pu in sea sediments, α-track meas. using cellulose nitrate films 87−50180
^{22}Rn, electrostatic integrating monitor for environmental monitoring 88−36525

radioactive sources
Advanced Photon Source at Argonne, bulk shielding design 88−54386
Aurora electron beam accelerator for X-ray and γ-ray source simulation 88−54014
automated source wells for instrument calibration 85−20800
conversion electrons scattering processes, Monte Carlo simulation 88−29778
cylinder radioactive source for slow-positron beams 85−64428
Hermes III 20 MV accelerator for X-ray and γ-ray source simulation 88−54014
high energy γ-ray source using Am-Be neutron source 86−70300
industrial irradiation process, X-ray and γ-ray source comparisons 87−50200
ion beams, radioactive, extraction from K500 cyclotron 88−47945
ion sources at Daresbury, operating experience 86−38687
level measurement using ionisation radiation *(German)* 85−4166
NBS radon-in-water standard generator 86−60544
Netherlands nuclear power plant hypothetical accident effects rel. to source term and plume rise 85−4747
photon detectors, standard sources for efficiency calibration in energy range 5 to 40 KeV 86−44546
production, certification and application of standard radiation 87−14698
sealed radioactive check sources for liq. scintillation counters, American standards 87−21374
spherical, gamma exposure rate, attenuation factor, rel. to distance *(Rumanian)* 86−5732
standard spectrometric sources, internal conversion coeffs. meas. of gamma transitions in ^{57}Co 86−25106
thin 4π β-sources for absolute meas., preparation method 87−8814
γ ray buildup factors for monoenergetic sources, bibliography 88−36335
^{241}Am radioisotope preioniser, design concepts for excimer laser systems 87−68571
^{241}Am source, Np, X-ray transitions, relative intensities 88−47916
^{211}At, production and complexation with crown ethers 87−14709
^{11}C radioisotope, extraction from TRIUMF Isotope Production Facility 86−25103
^{14}C standardization using liquid-scintillation coincidence counting technique 87−77527
^{252}Cf, calibration using Si diode *(Czech)* 86−32149
^{252}Cf fission-fragment sources 88−74691
^{244}Cm fission-fragment sources 88−74691
^{60}Co irradiator at Hiroshima Univ., dose rate distrib. *(Japanese)* 87−29829
^{60}Co source, activity meas. and build-up factor determ. *(Chinese)* 88−68196
^{51}Cr 746 keV neutrino source for solar neutrino detector calibration 88−29784
$^{57}Fe/^{57}Co$ Mossbauer source with Pd matrix, industrial preparation 88−29790
^{3}H beta-ray spectroscopy, source thickness influence, Monte Carlo simulation 88−61199
^{22}Na encapsulated sources, positron emission yields 88−47921
Ra and actinide samples for α-spectroscopy by electrodeposition *(Spanish)* 87−29683
^{222}Rn decay products generator 88−36336
T source for neutrino mass meas. 85−59146
^{201}Tl, production for medical use 87−14697

radioactive tracers
cerebral blow flow measurement techniques, review 87−63741
diffusion from crystal surfaces, using automatic electromechanical device 86−28094
flow measurement by transit time method using radioactive tracers *(Finnish)* 87−35246
flowmeter, NMR, front sampling parameters effect on systematic error 87−35008
flowmeters calibration, using radiotracers and acoustic methods 88−60979
hydrological investigation, appl. of artificial radioisotopes 88−68643
medical isotope production, bombardment target telemetry 85−59261

radioactive tracers continued
medical radionuclide prod. by cyclotron at King Faisal Specialist Hospital and Research Centre 85−59263
molecules, RF and microwave labelling techniques in chem. reactions 85−31835
nuclear wet steam turbine expansion curve determ. by radioactive tracer meas. of moisture *(Croatian)* 87−42583
positron emitting labelled compounds for cardiology PET studies, rapid prod. by cyclotron 85−59264
production using fragmentation of ^{14}N beams from K500 cyclotron 85−59262
pump efficiency analysis by $^{137}Cs/^{137m}Ba$ radioactive tracer 87−21284
radiomicroscopy using Si microdetector, appl. to beta tracers 87−29728
radiopharmaceutical quality control, computerised radiochromatographic system 85−15296
radiopharmaceutical solution preparation, dose reduction to workers by simple shielding equipment *(Japanese)* 87−50464
^{3}H-labelled gas, radioactivity meas. using proportional counter, elimination of end effect 87−50123
^{3}H-labelled methane, radioactivity meas. 87−50124

radioactive waste
see also fission reactor materials; fusion reactor materials; materials handling; waste disposal
activated carbons, PWR exhaust air filters, aging investigations 85−65098
aerosols, remote sampling methods 88−17246
American Nuclear Society, 1988 annual meeting, San Diego, USA (June 1988) 88−49349
assay methods at power plants, gamma-ray emitter conc., radiochemical techniques 88−36947
automated US inspection system for verifying transuranic waste container integrity 85−26923
automatic systems for radiation monitoring of nucl. power stations 85−43711
backfit modifications, engineering and planning 86−25338

meteor burst communication system modelling, observations and predictions 86−30599
meteor burst communication systems, polarisation rotation 86−59878
meteor burst communication systems evolution 87−56107
meteor burst communications, bits per burst performance bounds 87−8247
meteor burst communications, update 88−46883
meteor burst communications system, space diversity reception 88−47017
meteor burst data, database anal. approach 87−34528
meteor burst model with time-varying bit errorrate 86−30598
meteor burst polarisation trials 86−15872
meteor burst propagation and system design 87−26797
meteor radio scatter studies, BMS handbook 86−45962
meteor scatter communications, intermittently served discrete time queue appl. 88−41605
meteor scatter communications, intermittently served discrete time queue 88−22062
meteor scatter data communications for reliable long-distance links using VHF radio signals 86−23684
meteor scatter radio communication at high latitudes 86−59086
meteor-burst channels, coding performance 88−2968
meteor-burst communication, survey *(Chinese)* 85−7995
meteor-burst data communications, theory and practice 87−20477
meteorological maritime communications, radiowave appls., review *(French)* 86−23708
metropolitan area radio zone design using visibility estimation for local distrib. systems 85−20035
MFJ-949C Versa Tuner II, antenna tuner 87−75637
microcomputer-controlled radio channel arrangement conveying transmit power level information 88−35355
microwave amplifier for 23 cm band 88−7256
microwave complex modulation testing of components and systems accomplished using new tools 87−43954
microwave doubly-balanced mixer 88−7036
microwave interference levels estimation over land in clear air conditions 85−3361
microwave link, planning, applicability of geometrical optics methods, error anal. *(Hungarian)* 85−57939
microwave radio communication, historical development 85−238
microwave radio equipment, second-generation 550 series, low power consumption 85−8315
military appl., technology developments in electronic warfare 85−58200
military command and control systems, telecommunications and processing, user needs in 21st century 85−3383
military communications, conf., Monterey, CA, USA (Oct. 1986) 87−36325
military communications, sequential adaptation technique and its application to the MARK XII IFF system 87−20399
military radio systems, transmission security 88−23229
mining, underground EM propagation 85−41685
MM wave communications, overview 85−8311
MM-wave, conf., San Diego, CA, USA (Aug. 1983) 85−5623
MM-wave technology and system appls., state-of-the-art review 86−1336
mobile data communication, block codes decoding, performance of Chase's second algorithm *(Japanese)* 88−41569
mobile digital radio communications, effects of urban impulsive noise, bit error rate estimation 86−43764
mobile radio channel transfer function time and freq. depend. under multipath propag. *(German)* 85−41599
mobile radio Satcom system for US Navy 85−25782
mobile satellite communication, error correction with interleave study *(Japanese)* 87−49004
mobile systems, local ALOHA radio communications with capture andpacket buffers 86−55225
mobile tactical radiocommunication for Belgian Army *(Dutch)* 88−35408
multi-link microwave system, thermal noise due to rain, statistical distrib. model 86−30647
multihop packet radio networks, channel spatial reuse and access protocols 87−33833
multilevel CPFSK systems availability with modulation pulse shaping during multipath propagation 86−3748
multilevel modulation radio system, anal. using waveform factor of multipath degradation 85−36914
multilevel QAM modem system, power penalty caused by two simultaneously existing impairments 87−76551
multipath dually polarised fading channels, cross polarisation cancellation and equalisation 87−55968

radiocommunication continued
multipath fading outage estimates incorporating path and equipment characteristics 85−47420
multipath phenomenon in line-of-sight digital transmission systems 85−8313
multiple access broadcast communication channel, terminal-priority contentionless access (TPCA) protocol perform. anal. 85−42032
multiple-access systems, erasure, capture and random power selection 87−55398
multiprocessor signal processing module, TSM 32010 or 32020 based, architectures *(French)* 88−19247
narrowband data transmission, simple simultaneous carrier and bit synchronisation system 85−36909
narrowband interference excision, comparison of weighted and nonweighted transform domain processing systems 85−30891
national grid conversions 86−43729
natural radio noise, mini-review 85−2588
negative electronic key, inline invertor 87−73270
noise immunity, systems with single sideband and angle modulation 87−55949
nonGaussian signals, distinguish using average signal power 88−21176
NTT radio communication trends 88−21950
optical fibre cables, transmissions medium for electro-optic communication signals *(German)* 86−17378
optimal distribution number determining of available number of channels on three stations *(Croatian)* 87−55945
optimal distribution number determining technique of available number of channels on more stations *(Croatian)* 87−40642
optimal signal processing system design, allowing for component deviations from ideal 85−14105
OQPSK signal design with predetermined eye diagram *(Portuguese)* 86−43134
overcrowding of radio spectrum, future system design 88−41779
Pacific island nations, telecommunication links improvements 85−8337
packet bulletin boards, tips for users 88−59507
packet picture transfers, amateur packet radio 88−59994
packet radio bulletin board operation and amateur prospects 87−48852
packet radio channels, adaptive link level protocol 86−59397
packet radio error correction basics 87−39656
packet radio introduction, commands and interconnections 88−59971
packet radio terminal node controller and HF modem 87−48907
packet transmission in network using ALOHA random multiple-access system 86−23668
Parakeet's ideal habitat 86−30666
personal communication radio coverage in buildings at 900 MHz and 1700 MHz 88−60035
point-to-multipoint communication over broadcast links, link control protocols 85−7960
point-to-zone radio systems in VHF-UHF bands, numerical method for calc. and planning *(Spanish)* 86−10966
Poland digital telephone line apparatus for national communication works *(Polish)* 87−40629
polar meteor scatter propagation, 45-104 MHz band, statistical anal. 88−52228
Polish conspirational activities, use of radiocommunication by underground forces *(Polish)* 85−3351

SAW/FET programmable transversal filter with 100-MHzbandwidth and enhanced programmability 87−836
Scarab RTTY system, review 87−7985
shaping filters for advanced digital modulation systems, design 87−24307
simulation of radiofrequency components, education, communications laboratory 88−37887
single-phase unidirectional SAW filter in UHF range, fabrication technique 85−61362
SNR improvement, nonlinear techniques 87−5687
spread spectrum communication systems, programmable RF signal processors design 85−47414
spread spectrum systems, direct sequence type, narrowband noise elimination, suppression filter design 86−59775
SS-TDMA, regenerative repeater, for communications satellite, integration and testing 87−70000
SSB radio, mode detector 88−3803
stepped-impedance resonator band-pass filter for mobile communication appl. 88−56877
stopband filter for VHF converter 88−56733
subminiature diplexing filter for 900 MHz cellular radio 86−17263
surface shear wave resonators for VHF rangeutilizing reflection at edge surfaces 86−2549
SW reception, audio filter appl. 87−66317
switch mode power supplies, RF interference suppression *(German)* 87−10686
switched capacitor high-Q band-pass filters for IF appls., design and charact. 87−17221
thick film VHF/UHF circuit elements *(German)* 85−1196
tone control unit for amateur radio 87−69936
transmitters, switchable filters design 85−8539
tunable VHF to SHF bandpass filter 87−17211
TV, domestic receivers, flicker reduction methods *(German)* 87−49282
TV IF SAW filter, design and fabrication *(Korean)* 85−22984
TV IF SAW filter, diffr. effect compensation; simulation program *(Korean)* 85−22985
UHF bandpass filter using direct-coupled quarter-wavelength coaxial dielectric resonators 88−19259
UHF filter, diode tuned, 50W/CW 87−5962
UHF high-power bandpass filter, 800 MHz, TM_{110} mode dielec. resonators, cellular radio appl. 88−70890
ultrasonic phased-array scanner, image restoration 88−46315
upconversion receiver, noise optimisation in radio input stages 86−4833
VHF 800 MHz band dielectric channel dropping filter usingTM_{110} triple mode resonance 86−8347
VHF FM receiver, RF filter design 86−49798
VHF monolithic filters using ion etched fundamental moderesonators between 60 and 100 MHz 86−42061
VHF pagers, use of RF narrowband double mode SAW filters 86−59790
video frequency active RC filters using NICs, design and performance 85−17658
voltage tuned filter system for a 900 MHz band radiotelephone receiver 87−40777
wideband chirp-transform adaptive filter 87−843
wideband timing tank filters for digital transmission systems, miniature ladder type using $LiTaO_3$ resonators 87−31985
Yaesu Musen's FRG-7 receiver, modifications 85−8302
ZX Spectrum software for bandpass filters designs *(German)* 86−27440
GaAs two-pole switched capacitor band-pass filter chip, design and charact. 85−49984
$LiNbO_3$ SAW filterbank 87−1840
$LiNbO_3$ SAW filters, low-loss, design using distributed acoustic reflection transducers 87−60747
$LiNbO_3$ SAW/GaAs FET hybrid programmable transversal filter 87−837
$LiTaO_3$ UHF low loss SAW filters for front end applications 87−67679
ZnO/SiO_2 thin diaphragms on Si for UHF bulk-acoustic-wave-filters 86−42075

radiofrequency heaters *see radiofrequency heating*

radiofrequency heating
2.45 GHz continuous and pulsed microwaves, effects on epoxy/carbon black composites *(French)* 88−62775
1100 kW HF generator for pipe seam induction welding 87−16205
AC to AC HF induction heating system using cycloconvertor link 85−10228
annular applicator for hyperthermia of deep seated tumours 88−68469
annular slot antenna in lossy biological medium, theoretical study 85−43421
applicators for drying and heating, resonance charact. and Q-factors 86−66491
bacon cured with sucrose/dextrose mix, sensory props. after conventional and microwave cooking 85−39400
biological body EM local heating with HF elec. fields, theoretical study and applicator design 85−38201
biomass feedstock drying using microwave heating 88−62770
cancer treatment, RF and microwave energy appl. 88−54614
cancer treatment by RF heating, appl. of microwaves 86−5980
cancer treatment by selective microwave hyperthermia using ferrimagnetic resonance 88−61415
cancer treatment using RF techniques 87−29789
capacitance RF hyperthermia, model for impedance determ. and power deposition charactn. 87−41985
capacitive RF hyperthermia, model for impedance determ. and power deposition charactn. 87−41984
capacitive RF hyperthermia, skin toxicity minimisation using saline bolus 87−14927

radiofrequency heating continued
ceramic alumina joining using microwave heating technique *(Japanese)* 88−38268
ceramic windows of HF microwave heater, mech. reliability 85−10826
ceramic windows of HF microwave heater, temp. and stress distrib., computer calc. 85−10825
cereal based food baking and drying using dielectric heating 87−51683
cereal grains and soybeans, dielectric constants, math. models 87−51639
chemical reacting materials, microwave processing and dielec. diagnosis in single-mode cavity applicator 88−29609
class-E amplifier for RF process heating, construction 88−44059
class-E switching-mode power amplifier for HF process heating 87−23945
clinical hyperthermia, changes in heating patterns due to perturbations by thermometer probes at 915 and 434 MHz 88−48213
clinical RF hyperthermia, 2-point control of tissue temp. profile 86−70430
coal, magnetic separation of pyrite after microwave heating 87−26727
complex wave excitation and detection for microwave hyperthermia and radiometry 88−34289
continuous microwave drying of plane products at moderate temperature *(French)* 88−62772
convenience/home prepared foods heating, with microwave oven and electric cooker, comparison of energy required 85−60556
cutoff-waveguide applicators for hyperthermia, radiation characts. study *(Japanese)* 88−74871
cylindrical targets, focused microwave heating 85−65621
deep tissue heating, resonant RF helical coil system 88−61435
diathermy RF capacitive applicators, assessment of unwanted radiation 85−9229
die attach adhesives and conformal coatings in IC packaging, in-line automated curing 86−13498
dielectric heater, simplified model of coupled circuits 88−11495
dielectric heating and drying technology in Europe 88−11496
dielectric heating equipment characteristics and assessment guidelines 87−58463
dielectric heating in the food industry 86−13181
dielectric-loaded waveguides as biomedical antennas for tissue heating, energy penetration depth calc. 87−77680
dielectrics, HF heating equipment, computer model *(Russian)* 85−16427
domestic microwave ovens, magnetron model 2M172A, from Toshiba, design 85−34431
driver circuits for MOSFETs in RF induction heating invertor 85−54661
E- and H-plane converging lens applicator, design or deep and localised microwave hyperthermia *(Japanese)* 86−44697
electric heating, anal. and control methods for vacuum tube oscillators 88−37752
electric heating for thermal processing and drying, conf., Montreal, Que., Canada (Nov. 1987) 88−55840
electric power for industrial processes using dielectric heating 88−31208
electroheating, comparison and features of techniques *(French)* 85−60548
electroheating of industrial materials, unified approach to teaching 85−39451
electrosurgical dispersive electrodes, modelling of thermal patterns, burns prevention appl. 86−50610
electrothermal unit and ultrasound medical instrument microprocessor control for automation 88−16699
electrothermy technology and electric heating methods *(French)* 86−66483
elliptical reflector antennas for near-field applications in microwave thermography and hyperthermia 88−36467
EM hyperthermia, temp. meas. technique using refl. method 87−57225
EM power deposition for operator exposure to RF induction heaters 88−40457
epoxy resin, curing using pulsed or continuous microwaves *(French)* 88−62774
ethanol evaporation under low pressure and microwave irradiation 88−11497
ethanol heated by microwaves, power adsorption instabilities anal. and permittivity measurements 85−60559
field penetration from electrically small hyperthermia applicators 88−16759
frozen foods thawing in microwave ovens *(Japanese)* 85−60576
FTU, lower hybrid coupling struct. 85−28700
furnaces, effectiveness increasing measures *(Czech)* 85−27797
fusion devices, radiofrequency heating expts., technological requirements 85−21952
gyrotron appls. in fusion research 87−24677
gyrotron development in the framework of the European Fusion Programme 87−24678
health hazards 86−38836
heating generator dynamic impedance, amplifier using triode 88−11494
helical coil applicators for hyperthermia, optimisation 88−30031
helical coils, expt. charactn. for use as hyperthermia applicators 88−30028
Helios thirty-beam ultrasound device for deep-tumour hyperthermia, performance characts. 87−57229
Heliotron E currentless plasma, neutral beam injection and RF heating expts. 85−32808
HF techniques, deep heating with annular phased array 87−63826
HF welded tube quality improvement by generator current negative feedback 87−51665
HF welding of agricultural seeding machines, equipment development, Soviet Union 85−22010
HF welding of thermoplastic materials, problems energy eval. 87−58457
HF welding of thin wall pipes for irrigation systems, equipment development in Soviet Union 85−22011
HF welding of tubes, current frequency selection for heating regime optimisation 87−72628
high frequency heating and welding processes using industrial robots 86−19658
high power RF electron tube, heater power supplies 87−37770
high voltage capacitors for microwave ovens *(German)* 86−33577
high-purity glass, continuous skull-melting of glass 86−13851
human body irradiation for hyperthermic therapy, temp. distrib. study 87−71164
hygroscopic materials drying using microwave heating 88−62783
hyperthermia, deep and localised heating using ferrimag. reson. of ferrite-impregnated medium 88−61430
hyperthermia, EM dual waveguide applicator with temp. meas. 88−61429
hyperthermia, medical, RF or microwave induced, fibre optic thermometry system 88−16720
hyperthermia, microwave, 2D model for thermal dosimetry, radiometric temps. 88−61432
hyperthermia, microwave, convergent effect change due to freq. shift 88−61431
hyperthermia, microwave and thermal aspects *(Dutch)* 86−32355
hyperthermia, noninvasive heating pot. estimation, conductivity mapping 86−32360
hyperthermia, specific absorpt. rates in simulated tissue media for a 10×10 cm 915 MHz waveguide applicator 87−77682
hyperthermia applicator, 10-1000 MHz operation, lightweight design, biomedical appls. 87−77683
hyperthermia applicator, coil and waveguide combined 87−63829
hyperthermia applicator, lightweight type, design and performance 88−30029
hyperthermia by combined capacitive and inductive applicators 88−61428
hyperthermia heating equipment, 430 MHz, using lens applicator 87−57226
hyperthermia induction in cancer treatment, microwave and ultrasound use *(German)* 86−50622
hyperthermia physics and technology, conf., Urbino, Italy (July-Aug. 1986) 88−6121
hyperthermia RF helical coil applicators, CDRH design 88−61434
hyperthermia RF techniques, inductive and capacitive deep heating 87−63827
hyperthermia system, clinical, deep-body, design based on coaxial TEM applicator 88−4994
hyperthermia system, computerised microwave, with two radiometers for thermal control and dosimetry 88−61433
hyperthermia systems eval., CDRH RF phantom 88−30033
hyperthermia treatment, blood perfusion rate changes meas. method 88−54603
hyperthermia treatment equipment, feedback control and optimisation, present status and future needs 87−63828
hyperthermia treatment of cancer, comparison of microwave interstitial antennas 87−63823
hyperthermia treatment using 27 MHz waveguide applicator, relative heating patterns calc. 87−8945
hyperthermia using miniannular phased array, expt. charactn. 87−77681
hyperthermia using steerable annular phased arrays 88−61436
hyperthermic applicators, angled dual compact array 87−63812
hyperthermic therapy of deep seated tumours: an annular array applicator rel. to a capacitively coupled RF system 88−48214
ICRF heating, 1.5 MW generator and tube design and testing 85−32810
ignition and detonation hazards, British Standards and probabilistic factors 86−66589
implantable microwave antenna for interstitial hyperthermia, design and temp. distrib. characts. 88−4997
induction coils for HF welding of tubes 85−53965
induction heating generators, efficiency improvement 88−37754
inductive applicator for inducing hyperthermia in cancer treatment 86−56184
inductive applicators for EM hyperthermia 87−50401
industrial application of capacitive and induction heating *(Spanish)* 87−22908
industrial ceramic triodes for radiofrequency appls., Brown Boveri range 87−37806
industrial microwave heating, 50 kW 900 MHz circulator 85−28909
industrial RF heating apparatus as source of radio interference 88−8523
infrared and ultra-violet systems for heating and curing 88−55727
infrared electric heating, energy resource conservation and industrial space heating appls. 86−19607
insulated dipole applicator for intracavitary hyperthermia 88−36503
interstitial EM applicator/temperature probes 87−63822
interstitial microwave antenna arrays, distrib. of power and heat prod. 88−48215
interstitial microwave applicator design and calibration technique 87−63824
IR electric heaters, design and characts., technical appls. 87−72593
IR heating by EM radiation 87−58462
JET ICRF antenna system for plasma heating 85−30106
JET ICRF system automatic matching procedure 87−33470
Kamaboko (fish cake) fabrication, use of microwave power 85−10294
klystron for JT-60, super high power 86−41475
klystrons for present and future lower hybrid reson. appl. 85−28908
layered biological struct., power deposition of microstrip applicator 88−30030
loaded microwave ovens, resonant frequencies determ. using transmission-line matrix method 85−5541
localised thermotherapy, monitoring changes in tumour blood flow 85−20961
low hybrid reson. heating, RF coupling struct. 85−32811
lower hybrid RF heating system for ASDEX Tokamak 85−32809
man, specific absorption rate distribution in a model of man at various polarizations 85−20977
man model, full-size, specific absorption rate meas. 86−18387
medical applications of microwaves, conf., London, England (Apr. 88) 88−49386
medical hyperthermia, Phase I regional device evaluation, microwave annular array vs. RF induction coil 87−29796
medical microwave diathermy, elec. impedance tomography for thermal monitoring of hyperthermia treatment 87−50324
medical RF and US cancer hyperthermia systems, quality assurance 86−56180
medical RF hyperthermia system for therapy of deep-seated tumours *(Korean)* 86−32352
medical RF needle applicators, design for optimum SAR distribs. in irregularly shaped tumours 88−54604
medical thermocouple system for continuous thermometry in RF hyperthermia 85−26742
metal disk heating in a waveguide 85−62877
microstrip applicators for therapy appls., EM characts. and thermal behaviour anal. 88−4996
microstrip microslot antennas for biomedical appls., freq. anal. of microwave performance 85−38198
microstrip-microslot multiapplicator for microwave hyperthermia and radiometry 87−63830
microwave, food processing industry appls. 88−37756
microwave and RF heating, advantages and appls. 88−49292
microwave and stir-fry methods for cooking pork, comparison 86−66493
microwave applicator development to dry thin structs. 86−52060
microwave cavity applicators, single-mode or controlled multimode design 87−66504

radiofrequency heating continued
microwave characterisation of dielectric rods with simultaneous heating 85−7107
microwave cooked foods, polyvinylidene chloride wrap effects on quality 85−4254
microwave curing of epoxy in sweeping resonant cavity, dielec and temp. meas. 87−79214
microwave drying of polymers, technical feasibility 85−60560
microwave drying techniques for food processing appls. *(Romanian)* 88−62834
microwave energy, biological effects and medical appls., historical review 85−239
microwave field, spatial struct. determ. using cholesteric liquid crystal detector, method 85−8949
microwave heated dielec., complex permittivity and temp. depend., automated meas. method 86−11683
microwave heated porous inorganic material, dehydration and permittivity meas. 88−60877
microwave heating, sintering, design principles 87−43660
microwave heating and drying for textile processing 86−45870
microwave heating applications, historical review and radiation safety aspects 85−240
microwave heating experiments for educational appls. 88−55875
microwave heating facility in student laboratory 88−62781
microwave heating for construction materials production, computer simulation and measurements 85−39331
microwave heating furnace system for radioactive waste disposal, 3D anal. of EM fields 87−72597
microwave heating system using lens applicator, computer-controlled config. for localized hyperthermia 86−18375
microwave heating system with square type furnace, 3D anal. 88−18218
microwave hyperthermia, equipment requirements 87−42007
microwave hyperthermia applicator, flexible resonant design 88−54617
microwave hyperthermia applicator fields and thermographic antennas response patterns, meas. using nonresonant perturbations 88−54616
microwave hyperthermia applicators eval. 88−54615
microwave hyperthermia for cancer therapy 87−63811
microwave hyperthermia in cancer therapy, effective field size meas. and quality assurance 88−54619
microwave hyperthermia system using spot beam antenna for tumour treatment 88−54618
microwave hyperthermia treatment, resonant cavity heating of cryopreserved tissue 88−54621
microwave hypothermia, analogue phase shifter for a 915 MHz phased array system 88−16756
microwave lens applicator for localised hyperthermia, 2450 MHz operation, design and testing 86−25294
microwave medicine in China 88−54673
microwave oven for heating samples for instrumental analyses 86−60373
microwave oven leakage, automated survey systems, eval. criteria and procedures 87−31083
microwave oven load power density distrib. models 88−24271
microwave oven power generation and regulation 88−24272
microwave oven power meas. using thermometer with sliding scale 88−24273
microwave oven survey instruments eval. 85−60558
microwave ovens, fifth harmonic radiation, countermeasures for interference suppression with TV waves from BS 86−3594
microwave ovens, magnetron reliability 87−22904
microwave ovens, new compact microwave-energy sealing apparatus *(Japanese)* 85−27830
microwave ovens for defrosting food, in domestic situations *(Japanese)* 85−60575
microwave ovens loaded with lossy process materials, transmission-line matrix analysis method 85−27798
microwave paper drying, chemical-physical describing model 85−39392
microwave plasma at atmospheric pressure, macroscopic model *(Polish)* 88−37749
microwave plasma system for thin film deposition 86−34388
microwave sintering of perovskite type materials for capacitors *(French)* 88−62776
microwave techniques and applicators for externally induced EM hyperthermia 87−63825
microwave thermography for diagnostic and hyperthermia treatment monitoring applics., tissue layering effects 88−54541
microwave-convection, forces-air convection and conventional ovens, comparison 86−66492
microwave-induced hyperthermia for cancer treatment *(German)* 86−50624
microwave/convection ovens, comparison with electric range ovens 86−61819
microwave/RF hyperthermia, large volume, of locally advanced tumours, coaxial system design 88−54620
multifrequency water-filled waveguide applicator, 300-1000 MHz range, design and thermal dosimetry study 85−4354
multiloop concentric hyperthermia applicator with enhanced penetration depth, theoretical study 88−42573
multimagnetron industrial microwave drier 87−22900
muscle, papillary, subjected to rapid temp. steps, pot. meas. using isolated microelectrode amplifier 87−57153
muscle tissue, focused RF heating using coaxial applicator, expt. and theoretical study 85−4353
one-piece RF work coil and feedthrough for Pb/Sn evaporation 85−44776
operator exposure survey for RF dielec. heaters in Australia 86−44722
optical fibre preform manufacturing, homogeneous heating technique in MCVD 87−18635
optical fibre preform manufacturing using microwave plasma *(Polish)* 87−62978
organ preservation for transplantation, dielec. props, of cryopreserved tissue, microwave warming 86−56173
paint/enamel drying, industrial, using medium wave infrared radiation *(Spanish)* 85−21953
paper drying using microwave heating, kinetic model using linear diff. eqns. 88−62830
pasteurized homogenized milk microwave treatment, for extending shelf life 85−39398
pharmaceutical granule drying by microwave tray dryer 86−40344
phased array design for deep hyperthermia throughlayered tissue 86−56183
pill-box shaped vacuum window connected with circular waveguides; theory and anal. 87−75497
plasma heating, mm-wave irrad., high power mode conversion for linearly polarized HE_{11} hybrid mode output 87−24705
plasmas, neutral beam heating, gridded RF power tubes design *(French)* 85−40415
PLT, ICRF ridged waveguide coupler study 88−19323
polar liquids evaporation using microwaves *(French)* 88−62773
polymeric materials, diffusion enhancement using microwave heating processes 88−56329
porous material drying control by supplementary microwave power *(French)* 88−62786
power cables, heat treatment in microwave electromagnetic field 85−48594
power calculations in closed microwave systems 85−16438
R-7500 automatic food recognition microwave oven, review *(Japanese)* 85−53930
radial comb type slow wave system, impedance approx., anal. 88−20894
rectangular resonant activities for microwave heating, mode counting 85−39347
rectangular waveguides, symmetrically placed tapered ridges, TEM propagating wave cutoff wavelength and field components 85−990
regional hyperthermia for deep-seated malignancies using the BSD annular array 88−36504
regional hyperthermia phased array system 86−56176
RF and microwave radiation sources and health risks, surveillance and protection *(Italian)* 85−48341
RF power supplies and matching networks for plasma excitation for sputtering 87−18017
ridged waveguide applicators for uniform microwaveheating of sheet materials 85−60557
roast beef lipid oxidation, effects of storage and microwave reheating on flavour and smell 85−39399
rubber cylinder microwave irradiation and thermal runaway criteria *(French)* 86−63476
semiconductor ribbons and wafers, heating with traveling microwaves, applicator design 87−24997
soft tissue thermoacoustic imaging with 2.45 GHz microwave applicator 87−3974
soft-tissue-simulating materials, thermoacoustic emission filtering 87−3925
solid-state power devices and ccts. for HF elec. process heating appls., review 86−67019
superhigh-freq. heating of moving metallic conductors, electrical and electrothermal processes *(Russian)* 88−62778
temperature controlled combined microwave-convection drying of polyurethane foam 87−36254
thawing of frozen dressed tuna by microwave heating *(Japanese)* 85−53931
therapeutic microwave and RF heating, IR fibre radiometer for thermometry 88−16713
thermal dosimetry based on radiometry in multilayered media during microwave hyperthermia treatment 87−57227
thermal wave imaging using RF induction heating for thickness meas. and depth profiling 85−10890
thermometric consideration for RF and microwave research in food engineering 87−36253
tissue phantom, IR camera, appl. for imaging heating effect of RF applicators 87−50266
tokamaks, ICRF heating, dielectric-filled rectangular waveguide launcher study 88−19311
UHF diathermia system with distance-sensitive applicators, power and freq. control 87−77684
UHF local hyperthermia system using indirectly cooled water-loaded waveguide applicator at 432 MHz 87−41990
vegetables/fruits dielectric props. in 0.1 to 10.0 GHz frequency range 85−39401
VHF coaxial line outer conductor temp. field estimation *(Russian)* 87−40633
welded straight-seam tube current distrib. and electrical resistance calc. 85−53969
YJ1600 magnetron for microwave heating up to 6 kW 87−11290
Al_2O_3-based ceramics, dielectric props. rel. to widow appls. in RF heating 88−70366
Nb-Ti multifilament superconductor, recovery current calc., Tokamak microwave heating facility *(Slovak)* 86−63580
Si MOS structures, interface degradation by homogeneous microwave heating of channel carriers 88−32936
Si solar module production using microwave heating 88−18008

radiofrequency interference

VHF radio noise meas. near roadway carrying 10000 vehicles per hour 86−15898
VHF-FM broadcasting system simulation model *(Polish)* 86−4802
VHF-FM radio receiving system noise factor determ., arbitrary antenna impedance mismatch 88−52286
VHF/FM radio system desensitization, computational method 86−30609
VHF/UHF EM noise from corona on power-line conductors 88−40589
VHF/UHF receiver front-end design, strong-signal performance 85−52498
voltage generation by small commutator motors, computer-aided anal. 86−19320
voltages meas. on 150 ohm V-network and 50 ohm, 50 μH artificial mains network 86−10129
weak radio signals processing, nonlinear methods, background of stationary nonGaussian interference 87−19715
weak signals in nongaussian noise of unknown power, video detection rules 85−20342
West German radio and TV reception interference laws *(German)* 88−29016
wideband HF interference and noise model based on measured data 88−40604
wideband MF atmospheric radio noise, meas. and statistical anal., data impact on bandwidth and system performance 86−48613
wideband power amplifiers, impact on spectrum occupancy 85−612
wideband receiving system for impulsive noise parameters meas. 86−64853
Y-C separation and enhancement technique with two-dimensional adaptive features *(Japanese)* 88−74120
Ag based alloy contacts, radio noise characts., alloying elements effect 86−3534
Ag contact breaking arc and composite noise generator, statistical meas. of 1 MHz induced noise *(Japanese)* 86−33561
Au, Ag, Pd, and W contacts, breaking showering arcs and radio noise anal. 86−3569
C fibre reinforced plastics, RF props., aircraft structures appl. 85−57070
Cr-Cu-Cr vapour deposited laminate for EM interference/RF interference shields 88−2596

radiofrequency-microwave double resonance *see magnetic double resonance*

radiofrequency oscillators
3-transistor CW transmitter cct. 87−34454
40 meter tube transmitter, design 85−36900
amateur radio 23 cm transmitter convertor for SSB and ATV for 1.3 GHz, DIY *(German)* 87−8228
BFO design for SSB transmission detection *(Spanish)* 87−37053
bipolar transistor oscillator, 500 MHz, design and characts. *(German)* 85−11079
Chandigarh Variable Energy Cyclotron, RF oscillator, design, operation 88−74679
classical superregenerators, anomalous noise factor and additional reception channels 87−44692
CMOS crystal oscillator, 2 MHz, 3 μm p-well LV process implementation and characts. 88−56499
CMOS gate oscillators using fundamental/overtone crysts., 1-50 MHz, design techniques 88−18990
CMOS RF oscillator, configs., principles and characts. for 1-10 MHz range *(Spanish)* 85−11089
CMOS VCO, 30 MHz max. freq., design with low-jitter and high-linearity 88−18964
CMOS voltage-controlled crystal oscillator for FM stereo decoders, design and implementation 88−56500
cryogenic UHF FET oscillator for magnetic resonance detection 88−18963
crystal calibrator unit 87−77314
crystal oscillator cct., computer model for complex parameters determ. 87−16939
crystal oscillator compensation technique for HF stable freq. sources 88−18993
crystal oscillator phase-locked to standard freq. station, freq. stability considerations 87−550
crystal oscillators, compensation technique for stable freq. sources 87−59240
crystal oscillators, design considerations 87−18440
crystal oscillators, vibration-induced phase noise suppression by tuning 88−18986
crystal oscillators with fundamental freqs. in UHF and microwave regions, design procedure 88−12587
crystal-controlled oscillators using HCMOS ICs, design and performance 86−20341
CW side-tone oscillator 87−69931
delay line oscillator using interdigital transducer 87−9045

radiofrequency oscillators continued
dielectric split-ring resonators, struct., props., filter and oscillator appls. 88−70996
dielectric-resonator oscillator, L-band, electronic varactor tuning, 1325 MHz, design for airborne appls. 88−50381
digital oscilloscope, programmable time-base *(Spanish)* 87−77317
digitally-tuned oscillator using broadband hybrid varactor-tuned VCO with DAC 87−543
direct digital synthesis and the numerically controlled, modulated oscillator 87−37064
DL 6 HA 001 2 m converter, oscillator circuit improvement 88−15326
DM-4061 dip meter, review 88−10041
electric heating, anal. and control methods for vacuum tube oscillators 88−37752
entertainment electronics using crystal oscillator circuits *(German)* 88−597
FET circuits, parametric instability 85−33696
FET dip oscillator kit modification 87−56721
FET DIP oscillator uses from PW 86−14039
FM signal distortion in nonlinear oscillatory cct. 87−65949
frequency synthesizers, automated phase synchronization and control of multiple signal generators 87−70666
heating generator dynamic impedance, amplifier using triode 88−11494
HF oscillators matching to common resonant load 85−6208
HF power distribution, broadband four-channel device 88−27692
HF power oscillators, dimensions calc. *(German)* 86−14034
HF quartz cryst. oscillators for avionics, vibrational sensitivity, meas. system and exptl. study 87−60722
high-power RF generation using GaAs optically activated bulk switches 88−71154
indoor propagation and bit error rate measurements at 60 GHz using phase-locked oscillators 88−72560
inter-injection-locked oscillators for power combining and phased arrays 87−10716
inter-injection-locked oscillators with applications tospatial power combining and phased arrays 87−6100
intercoupled, self-excited, pulsed oscillation spectra 88−63569
interinjection-locked oscillators anal. for integrated antenna phased arrays 87−75620
intervalley electron transport diode oscillators, stochastic LF oscillations 85−633
Josephson contacts, bridge-type, relaxation oscillators 88−58024
L-band dielec. resonator stabilised microstrip oscillator, low noise design and characts. 87−73729
LC oscillator design, stability considerations 87−44670
Leader LSG-216 RF signal generator 85−20630
local oscillator leakage cancellation cct. for RF mixer operating outside IF freq. range 86−20378
local oscillators for 2-4-6-8 GHz frequency bands 88−21945
local RF oscillator freq. control in TV receiver, automatically stabilised tuning unit *(Spanish)* 87−41191
loose-locked oscillator, microprocessor control for freq. stabilisation, radio receiver LO appl. 87−59241
low noise crystal oscillators using a 50-ohm, modulator amplifier sustaining stages 87−31748
low noise radio frequency oscillators, 450 MHz, design and performance 87−59239
low-noise feedback oscillator design, general procedure 87−37059
low-noise oscillator design using CAD tools 87−23978
magnetic-thyristors radio-pulse generator circuit, design 86−20365
noise generator, circuits for converting an LC oscillator 88−38415
octave and multioctave YIG and varactor tuned oscillator design 87−44672
octave band VCOs with varactor tuning 87−44671
oscillators for mobile digital radio-relay systems 86−64885
oven controlled quartz crystal oscillator, low-power integrated design for SARSAT buoys 87−31752
oven-controlled cryst. oscillators, Vectron Series CO-505SL2 with SC/IT cut crystals, performance 87−44667
paging receiver architecture using modulated local oscillator 86−64888
peak envelope power measurement, two-tone oscillator construction instructions 86−17991
phase noise in freq. synthesis, model definitions and sources 88−18959
phase noise prediction 86−57707
Pierce oscillator, fundamental mode type with bulk acoustic wave resonators, 250-300 MHz operation 85−22694
piezoelectric ceramic-resonator oscillators, designed and anal. 88−18985
plate-grid modulation, energy efficiency optimisation 88−63562
PLL oscillators with delay lines, modules for 2 m band 86−14046
power oscillators, analytic design using two-part devices 86−27139
power spectrum of an oscillator signal under nonstationary phase instabilities *(French)* 87−44659
precision type, SC-cut crystals, SAW devices and packaging 87−44668
pseudo SAW resonator for UHF range VCO 86−15321
quad 3200 Hz oscillator frequency/phase synchronisation 87−5710
quantum well oscillators, power-optimised design 88−39371
quartz crystal oscillator, model 2000A, 10 MHz, Colpitts design, characts. and performance 87−52438
quartz crystal oscillators, acceleration sensitivity, review 88−20218
quartz crystal oscillators, review of revised military specifications 88−18991
quartz crystal oscillators as freq. references, resonator characts. 87−52437
quartz HF resonators with anharmonic oscillations, dynamic inductance 88−6693
quartz oscillators for airborne electrical equipment using long-cable method, reference-phase channel *(Russian)* 87−21757
quartz SAW UHF-range stable resonator for CATV local oscillator 87−67675
quartz SAW/MIC integrated downconvertor 87−67677
quartz-stabilised ECL pulse generators *(German)* 88−56513
radar master oscillator, coherence 87−28684
receiver frequency synthesisers and standards , book contrib. 88−70593
regenerative receiver and the synchronous oscillator 88−18977
satellite relay system, USSR and DDR *(German)* 88−28778
satellite subassembly for generating a short-term VHF-signal *(German)* 88−3921
SAW 674 MHz driven oscillator phase noise near injection locking threshold 87−1852
SAW miniature hybrid oscillator in all-quartz package 87−1851
SAW multimode oscillator, config. and realisation, TV IF filter testing appl. *(German)* 88−26641
SAW oscillators, UHF, temp. compensated, performance characts. 86−2543

radiofrequency oscillators continued
SAW resonators and filters, appl. in Hewlett-Packard instrumentation 87−67680
SAW resonators for fixed-frequency oscillator control 86−28581
signal generator cct. as test oscillator 86−40938
solid-state oscillator for optogalvanic spectroscopy, NO detection using overtone transition 87−5707
spectrum of oscillator signal under non-stationary phase instabilities, theoretical study 87−31746
stable frequency sources in communication technology *(Polish)* 86−67073
stable VFO on PCB, Colpitts config., 1.8-10 MHz range, design and construction 86−62478
strip-type resonators, oscillator cct. conditions 86−816
superheterodyne receiver impact ccts. design, synchronous operation calc. using TI-58 *(Czech)* 85−20020
superheterodyne single conversion receiver front end, 10 kHz-30 MHz 87−55964
SW transmitter, high-power, output oscillatory system tuning above resonance frequency 87−49242
synchronised self-excited oscillator, engineering estimate of signal build-up time 86−34606
temperature compensated crystal oscillator, digital technique, design and operation *(French)* 88−44087
temperature-compensated cryst. oscillator, CMOS LSI digital compensation cct. 88−18988
thin film etching monitoring using SAW oscillator 88−20228
tunable oscillators, cct. design using power transistors 86−67075
two-mode crystal oscillator with digital thermal compensation 88−1844
UHF 600 MHz crystal oscillator, active stabilisation of FM noise using dielec. resonator 85−22695
UHF Colpitts oscillator config. for low temperature MOSFET regenerative detector 87−37086
UHF monolithic film resonator stabilised oscillators, design and eval. 87−73367
UHF oscillator frequency stabilisation, auxiliary resonator use 88−600
UHF oscillator performance using thin film resonator based topologies 88−18984
VCO, RF type utilising voltage-depend. transistor junction capacitances, anal. and performance 86−57709
VCO subsystems, design considerations for post-tuning drift reduction 87−23977
VCO time varying freq. characts., meas. technique 88−18975
VCO TV oscillators with ZnO/ELINVAR structures 86−15308
VDS-M PLL radiofrequency synthesizer 87−5708
VHF Colpitts oscillator CAD using S-parameter technique *(Portuguese)* 87−65925
VHF cryst. oscillator cct. using harmonic emitter coupled config., design and performance 87−44669
VHF crystal oscillators, phase noise performance study *(German)* 88−50054
VHF crystal oscillators for airborne applications, configs. and resonator selection criteria 88−18987
VHF harmonic crystal oscillator ccts. survey 87−37062
VHF oscillator, single Ni-Cd cell powered, tunable, design and characts. *(German)* 86−67068
VHF oscillator spectral degradation due to quartz resonator short-term instability 87−1861
VHF quartz crystal units, parameters determ. using Fr meter fixture *(Japanese)* 88−26630
VHF quartz feedback oscillators, high stability, phase fitter-noise model for design appl. *(German)* 85−49771
VHF wobbulator using dual-gate MOSFET, meas. *(German)* 85−622
VHF/UHF cryst. oscillators, design and anal., BASIC program 88−18989
voltage-controlled tuned wideband oscillators 87−31745
GaAs monolithic downconvertor using UHF LO/mixer config., TV tuner appl. 86−38031
$LiNbO_3$ multifrequency pulsed injection-locked oscillator using low-loss SAW comb filter 87−67676
$LiTaO_3$ bulk wave resonators with high Q, meas. of flicker noise 88−51148
ZnO-SiO_2-Si thin-film temp.-compensated resonator for VHF voltage-controlled oscillator 87−1862

radiofrequency spectra of diatomic inorganic molecules *see radiofrequency and microwave spectra of diatomic inorganic molecules*

radiofrequency spectra of inorganic solids
see also nuclear magnetic resonance; paramagnetic resonance
heterojunction laser, refractive index dispersion and intermode beat RF spectra 87−2124
probing semiconductor superlattice transport by submillimeter wave cyclotron resonance 88−25953
YIG film, unusual RF behaviour study 87−60796

radiofrequency spectra of organic molecules and substances *see radiofrequency and microwave spectra of organic molecules and substances*

radiofrequency spectra of polyatomic inorganic molecules *see radiofrequency and microwave spectra of polyatomic inorganic molecules*

radiofrequency spectrometers

power line support wind induced vibration damage detection using radiography 87−50831
power plant equipment, nondestructive inspection 86−34422
products with complex configuration, X-ray inspection, optimum conditions selection 85−49626
projection radiography developments 85−4317
projection X-ray system, charged Se plate, preliminary experience 85−4277
proton, solids study by radiation physics, apparatus for comprehensive meas. 87−59034
proton radiography, contrast sensitivity calc. 85−49639
pulsed X-ray equipment, MIRA-2D, optimum regime determ. 87−36829
pulsed X-ray flaw detectors, transistor converter 86−65156
PWB X-ray inspection meets increased PWB throughput, density challenge. I 88−32608
PWB X-ray inspection meets increased throughput and density challenge 88−32614
radiation inspection of surfaces of metals and comp. of layered structs., differential characts. of albedo of γ-rad. 86−558
radioisotope relay device, apparatus spectrum shape, data processing algorithm 88−6542
radiometric NDT devices, nonlinear conversion of pulses of spectrometric flaw detector 87−36827
real-time imaging, conf., San Francisco, USA (Aug. 1985) 86−52132
real-time radiographic imaging using photographic documentation 88−22523
real-time radiography, concepts and systems 87−44424
real-time TV radiography system for materials examination 88−49915
REBUS system, automatic evaluation of radiographs *(German)* 87−44431
reference source in radiometric monitoring, high energy component use 85−17024
relativistic electron beams, laser-guiding technique, X-ray radiography appls. 88−54196
rubber, vulcanization, X-ray tomography applic. to NDE 88−63408
scanning means for radiational quality control 86−57501
screen materials, image quality, inherent unsharpness for 8 MV X-rays and ^{60}Co γ-rays 88−18778
selectively absorbing objects, computerised X-ray tomography, image reconstruction 88−70384
semiconductor technology, radioanalytical techniques appl. 87−38054
sequential X-ray images generation code, principle and appls. 88−52460
signal detection theory in medical imaging, limitations and applications, review 85−4314
signal display unit for X-ray television introscope 85−49637
simultaneous dynamic neutron and gamma radiography 87−65599
SMT inspection, automated real-time X-ray imaging and interpretation 88−32668
SMT process verification through real-time X-ray imaging 88−12838
solid rocket motors, radiographic linear accelerator appls. 85−54574
SSNTD, radiographic imaging performance, image quality factors 87−29664
steel, austenitic, welded joint, radiographic inspection, ghost defect images 85−6046
steel, austenitic stainless, PWR piping, thermal fatigue cracks, in-service radiographic inspection 86−26943
steel, C, computer assisted tomography scanning of H-induced cracks 87−36849
steel, flaw detection by industrial fluorography, nuclear industry standards 85−17023
steel, mild, butt welds, NDE, comparison of radiography and HS exam. 86−13855
steel, mild, offshore structures, corrosion pitting, Compton backscatt. imaging 86−34420
steel, power plant components, welded joints, X-ray flaw inspection optimisation 88−70388
steel, radiography, rapid information using X-ray papers 85−6037
steel, void detection using Compton scattering imaging device with gamma source 88−18802
steel component inspection, radiation microtronic flaw detector design 88−6555
stepped photographic density standards, prep. method 88−31878
stimulated radiation components in gamma-albedo monitoring 85−49638
streak camera, soft X-ray, for laser-fusion studies, developments *(French)* 86−5872
streak camera, soft X-ray, for laser-fusion studies, electronic image readout devices *(French)* 86−5092
substations gas insulated components, 1200 kV, diagnostic techniques 86−51854
technique for L shaped object generation by computer program 87−343
tomograms of moving object, dynamic synthesis method and equipment 87−361
tomography for NDT and medical appls., review 86−34429
tumour edges detection method, in X-radiographics *(Chinese)* 85−4263
two channel radiometric flaw detector, surface inhomogeneities effect reduction by signal delay 85−49644

radiography continued
video images, digital enhancement techniques 87−31610
video-fluoroscopy assembly, low-irrad., sheep rumino reticulum appl. 86−5912
weld defect detectability by radiography and US methods 85−10837
weld defects, X-ray inspection, automatic image analysis *(German)* 86−52581
weld defects, X-ray inspection, automatic image analysis 87−36825
weld defects radiographic inspection, image processing system for defect pattern recognition *(Japanese)* 85−49669
weld inspection by X-ray real-time imaging 88−12102
weld inspection using X-ray radiography, develop. trends 88−43977
weld penetration recognition, macro model controlled method and sampling pitch estimation *(Japanese)* 87−5558
welded joints, flaw detection automation X-ray TV display, image processing 85−49645
welding, radiographic inspection, penetrameter pattern recognition, model-controlled method 88−4308
welds, flaw position, shape and dimensions, nondestructive radiometric scanning technique *(German)* 87−73202
welds, radiographic inspection of welds using knowledge-based interactive pattern processing system 87−44438
Wiener filtering for the tomographic reconstructionof radiographs 86−38782
X-Chron 540 picosecond X-ray streak camera 86−11468
X-ray apparatus monoblocks with direct tube voltage, design 86−52550
X-ray appl. to fault diagnostics in welds 88−18831
X-ray backscatter inspection system, high-sensitivity 88−18824
X-ray contrast inspection of contact area of contact joints using moire method, accuracy 87−360
X-ray CT, sensitivity, effect of discretisation and interpolation 85−49618
X-ray CT scanners, TOSCANER-4200 and -4300 systems, configs., operation and inspection appls. 87−77114
X-ray flash radiography images restoration 88−10296
X-ray image intensifier with large input format, image processing diagnostic system appls. 85−1251
X-ray image intensifier-TV system 85−4293
X-ray image restoration, Compton scattering suppression 88−8860
X-ray image sensors based on optical time-delay-and-integration CCD imager 87−14818
x-ray micro-radiography for real-time imaging of microelectronic failure sites 87−10134
X-ray primary exposure standard 30-150 keV 85−26735
x-ray radiographic inspection of rotary workpiece by continuous exposure method 88−18833
X-ray real-time imaging for weld inspection, methods and equipment 87−23765
X-ray scanner system, dynamic spatial reconstructor, imaging characts. 85−4318
X-ray scatt., coupled electron/photon Monte Carlo calcs. 87−36847
X-ray screens, using electrophotolum. in radiation inspection 86−557
X-ray tube assemblies, effective prefiltration, specification in Al equivs. *(German)* 85−4285
X-ray TV fluoroscopy, real time radiography, present status assessment 88−56336
X-ray videodensitometry, expanding the dynamic range using ordinary image digitizing devices 85−2869
X-raying articles with complex configurations determ. of optimum regimes by method of simplex planning 86−559
Al castings, NDT using Compton scattered X-rays *(German)* 87−73203
Al, embedded voids and inclusions, 2D images using gamma-ray compton scanner 88−31874
Al_2O_3 fibre reinforced Al plates, fatigue damage, nondestructive evaluation 85−54550
Al_2O_3, photon CT scanning applic. for flaw, crack and density gradients exam. 88−496
C fibre reinforced epoxy laminates, fatigue damage assessment 85−478
C fibre reinforced epoxy laminates, notched, compression fatigue, delamination, radiography 85−480
$CaWO_4$, dye containing fluoresc. intensifying screen, resolving power, X-ray defect monitoring 88−43962
Mn-Mo-Nb steel, B influence on stress relief cracking *(Chinese)* 86−11904
Se electroradiographic plates, cyclic fatigue *(Russian)* 86−28969
Si_3N_4 and SiC, microvoids detection using microfocus X-radiography and scanning laser acoustic microscopy 88−24810
U, defect inspection by X- and α-radiography 87−73197
Y_2O_2S:Tb phosphor screens, X-ray efficiency under fluoroscopy conditions 86−9671

PET camera, multiframe data acquisition using on-line microprocessor based system 86−50492
PET camera performance design eval. for BGO and BaF_2 scintillators 88−68366
PET image reconstruction, expectation maximization, VLSI architecture 88−61254
PET instrumentation developments, review 87−77652
PET transmission meas., rotating pin source, scatter suppression 88−61275
position sensitive detector appl. 85−15216
position sensitive γ-ray detector for nuclear medicine, efficient design 87−8911
position-sensitive scintillation detector, performance, positron emission tomography appl. 85−59266
POSITOLOGICA II, a whole body positron emission tomography, count rate characts. and count loss correction *(Japanese)* 87−77656
Positome IIIp, a dynamic positron emission tomograph, imaging performance obs. 87−29720
positron camera, HIDAC, for PET imaging, clinical applics 88−61292
positron camera, HIDAC, for PET imaging, clinical eval. 88−61303
positron camera, multiwire proportional chamber, development of high-efficiency cathode converters 87−21544
positron camera, MWPC prototype RAL, clinical trials at Royal Marsden Hosp. 88−61291
positron camera, rotating, double-headed 86−50527
positron camera, rotating, increased sensitivity and field of view 85−9169
positron camera, scintillator, photomultiplier temp. depend. response 86−38771
positron camera for longit. emission tomography, clinical evaluation of prototype 85−15284
positron camera system, high resolution, design 86−50493
positron camera using position-sensitivedetectors: PENN-PET 86−65411
positron camera with high density avalanche chamber 88−48111
positron camera with high-density avalanche chambers 88−74809
positron computerised tomography, high resolution, development 85−43366
positron computerised tomography camera using MWPCs as detectors *(Chinese)* 88−68354
positron CT *(Japanese)* 87−35396
positron detection system for biochem. studies on living human brain 87−21542
positron emission computed tomographs, high resolution, analytical study of performance 85−43365
positron emission computed tomography, HEADTOME-III (SET-130W) *(Japanese)* 85−38099
positron emission computed tomography, principles, applications *(Chinese)* 88−23068
positron emission CT, quantitation, technique to reduce noise in accidental coincidence meas. and coincidence efficiency calibration 87−8904
positron emission CT, review 86−44634
positron emission tomograph, construction using 2.4 mm scintillation detectors 86−50491
positron emission tomograph for whole-body, Positologica III, performance characts. 86−18306
positron emission tomograph HEADTOME III, design and evaluation 86−18305
positron emission tomograph prototype, high spatial resolution, first expt. results 88−54536
positron emission tomograph simulation, high spatial resolution, based on multiwire proportional chambers, imaging capabilities 87−77645
positron emission tomography, coincidence aperture function of narrow BGO crystals 86−60762
positron emission tomography, image processing 85−38138
positron emission tomography, knowledge-based multi-grid reconstruction algorithm 88−68396
positron emission tomography, stationary high resolution, BGO detector unit 87−8905
positron emission tomography, wedge-shaped BGO scintillation cryst. 85−4292
positron emission tomography, wedge-shaped scintillation crysts. 86−65412
positron emission tomography imaging, clinical requirements of MWPC 88−61290
positron emission tomography scintillation detectors, anal. 85−43367
positron emission tomography system, high resolution, computer controlled 88−48146
positron emission tomography system for small vol. imaging, SHARP prototype performance 88−61297
positron emission tomography using high-density scintillator cryst., design considerations 85−48239
positron emission tomography with time-of-flight information, expectation maximisation reconstruction algorithms 85−48234
positron emitting labelled compounds for cardiology PET studies, rapid prod. by cyclotron 85−59264
positron imaging camera, EGS code for Monte Carlo calcs. 85−48262
positron scanners, commercial, latest generation, physical performance 88−61270
positron tomograph with 600 BGO crystals and 2.6 mm resolution 88−61259
positron tomographic imaging, time-of-flight method and detector technology 85−4316
positron tomographs, cylindrical shaped scintillation camera design 85−48235
positron tomography, matrix-based image reconstruction methods 85−48229
positron tomography, orbiting transmission source 88−61273
positron transmission tomograph, performance anal. 85−48236
prophilographic detection system, design, for anal. of kidney fn. in children *(Czech)* 88−29963

astronomical sum/difference radiometer, 5 cm TW maser 88−26998
atmosphere remote sensing, IR limb scanning instrument for satellite 88−61652
atmospheric absorption error reduction by differential emission meas. with ground-based microwave radiometer 86−6120
atmospheric temp. profiles meas. using continuously tuned 53-59 GHz radiometer 85−15425
atmospheric vertical moisture profile retrieval from microwave radiometric obs. 86−6121
attenuation monitoring using switched heterodyne radiometer, in circular waveguide network 86−44377
AVHRR-2 on NOAA-7 calibration scheme 88−16928
ballistic expts. with hypersonic flight of bodies, optical studies 86−44319
balloon-borne radiometer, attitude determ., use of two-sided limb scanning 87−71333
Bhaskara-II microwave radiometer meas. of atm. precipitable water, performance 86−18578
broadband correlation radiometer, thermal and spatial resolution, medical microwave thermography appls. 85−59250
calibration, by reference source method *(Slovak)* 86−18159
cloudless atmosphere radio emission fluctuations 88−22240
coaxial thermal noise standards, radiometer with IF attenuation *(German)* 85−15004
comparison radiometer, computer fast sampling demodulation technique 88−29333
compensated radiometer with periodic calibration, optimum digital filter synthesis *(Russian)* 88−22519
computer controlled radiometer for coaxial noise source calibration 86−31623
computer-interfaced display systems, linearisation using radiometric procedure 88−68383
continuous comparison type, design using quasi-optical techniques and computer-controlled calibration 85−25958

radiometers continued
cryogenic radiometer and electron storage ring BESSY, primary radiometric standard intercomparison in visible, near IR 86−65193
cryogenic radiometer for absolute radiometricmeasurements 86−4937
cryogenic radiometer for the realisation of anabsolute radiometric scale 86−24807
detection of pedestrian and bicycle traffic, MM wave radiometer 88−29627
Dicke-type, 4-GHz band low-noise measurement system 87−49903
Dicke-type radiometers from Odam Bruker *(French)* 88−29682
digital image radiometer for heliostat eval. at Solar One, development and performance 86−55557
digital integration of envelope-detected noise 87−40656
digital radiation meter using nonlinear ADC 85−14866
digital radiometers, non-optimal detection losses 88−74428
digital solar edge tracker for the Halogen Occultation Experiment 87−71354
direct sequence spread spectrum signals with adaptive narrowband interference exciser, transform domain processing radiometer appl. 87−28373
dual colour calibrated imaging radiometer , high-sensitivity, high-resolution design 88−74427
dual waveband imaging radiometer 87−3500
dual waveband imaging radiometer 87−49758
dual-frequency 183/380 GHz receiver for airborne application, cryogenic heterodyne config. 88−41777
Earth observation satellite multiple spectrum scanning radiometers *(Japanese)* 86−6061
Earth Observing System, moderate resolution imaging spectrometer, preliminary system concepts 87−63908
EHF radiometer integrated with freq. hopped communication receiver for propag. loss meas. 85−20028
electrically calibrated absolute radiometer suitable formeasurement automation 86−38375
electrically compensated radiometer for meas. of solar radiant flux 86−38395
electronically steered thinned array radiometer (ESTAR) 87−57436
environmental noise detection between vegetation canopy and radiometric sensor 88−68652
error of illumination measurement by RPCh-1radiometer, use of UPR-1 checking apparatus 86−31686
ERS-1 nonSAR instruments, processing 87−77852
eye-hazardous UV irradiance meter development *(Japanese)* 86−32391
ferrite waveguide switches for radiometer in 11 GHz band *(Czech)* 86−67470
fibre optic four-channel radiometer, detonating explosives temp. and extent of reaction determ., 88−36298
fibre optic radiometer, performance calc. 87−49740
five-millimeter band multichannel radiometer forremote thermal probing of the atmosphere 86−50108
flames radiance meas. using thermal imaging radiometer 88−4664
four-channels microwave radiometer for biological temp. retrieval 88−36469
geological thermal emission spectrometer for geological field use 87−71284
Greenland Sea marginal ice composition variation obs. with scanning multichannel microwave radiometer 86−6139
ground-based microwave radiometer for atm. temp. profile determ. 85−64735
high resolution radiometer, apparatus for characts. expt. meas. 86−5318
high-speed spectrally scanning radiometer (SPERAD) for cloud optical props. meas. from aeroplanes 87−71308
hyperthermia system, computerised microwave, with two radiometers for thermal control and dosimetry 88−61433
IF modulated radiometer sensitivity increase, by heterodyne power control 87−56702
image data from satellites, recording and provision 86−55279
imaging of hot spots in tissues, synthetic aperture radiometry 88−29991
imaging spectroscopy, airborne, conf., San Diego, USA (Aug. 1987) 88−49338
Improved Stratospheric and Mesospheric Sounder IR multilayer coating design and disposition 88−68637
induced absorption spectra meas., at room temp. and at 77 K 88−67797
invariant Dicke radiometer, synthesis 86−50107
IR, mounting, protection and interfacing 88−4439
IR and visible radiometer for Japanese meteorological satellites *(Japanese)* 85−59482
IR black body calibration sources 86−24548
IR fibre radiometer for thermometry in therapeutic microwave and RF heating 88−16713
IR imaging radiometer, data anal. technique 88−74470
IR imaging radiometer, proof-of-concept design , US Navy calibration 88−74419
IR radiometer for background noise investigations *(Russian)* 87−49752
IR thermography, what wavelength to choose? *(French)* 87−63269
Josephson point contacts, noise props. at microwave freqs., 8.6 GHz, radiometer appl. 85−1882
L band radiometer head, design and construction *(Spanish)* 86−17981

microwave imaging by multiprobe radiometry for breast exploration, data processing problems 88−54542
microwave imaging radiometer, high-resolution, using 2-reference-noise AGC and digital data smoothing *(Japanese)* 88−60891
Microwave Limb Sounder 183 GHz radiometer 87−35488
microwave noise generators, calibration by IF comparison method 88−981
microwave radiometer for 11 GHz band, design and operation *(Czech)* 86−50075
microwave radiometer for soil moisture meas. 85−64761
microwave radiometer for thermal radiation, for dual polarized radiation 87−42212
microwave radiometer-scatterometer with degenerative parametric amplifier, investig. 88−74370
microwave radiometers, effects of rain on surface 87−4131
microwave radiometers, low-noise receiver configs. and parameters 86−60238
microwave radiometers devel. in West Germany 88−10520
microwave radiometers with sparse aperture for terrestrial remote sensing 88−54743
microwave radiometry for medical applics., state-of-the-art 86−56118
microwave remote sensing, passive and active, problematical aspects 86−56248
Microwave Scanning Radiometer obs. as part of MOS-1 airborne verification expt. 88−10523
microwave sensors, satellite borne, Earth Observation appls. *(German)* 87−21777
microwave thermography for diagnostic and hyperthermia treatment monitoring applics., tissue layering effects 88−54541
microwave vehicle sensor based on radiometry 87−70633
microwave waveguide switch for a low-noise radiometer 85−14997
military research roles 86−11601
millimetre-wave space radiometers 86−56249
miniature globe thermometer for mean radiant temp. estimation and comfort modelling 87−49978
mismatched semiconductor devices, accurate noise temp. meas. 85−12234
mm-band radiometer with variable point contact 88−74365
MM-wave, airborne, for atmospheric water vapour sounding and rain detection 86−38955
mm-wave, spectrum analyser with SAW component 87−63310
MM-wave cryogenically cooled radiometer for 900 GHz, Schottky diode heterodyne receiver config. 88−1002
mm-wave imaging sensor, aircraft appl., radiometer system 87−8541
MM-wave radiometer, 145 GHz, receiver design using superconducting mixer, radiotelescope appl. *(German)* 87−13809
MM-wave radiometer imaging systems for remote sensing 88−68618
MM-wave radiometer system for remote sensing appls. 3 mm operation, aircraft/helicopter installation 87−15034
MM-wave radiometric imaging, contrast-reversal problems 86−38956
MM-wave transducers and radiometric sensors technical advances 86−37940
modulation radiometer, optimum struct. and potential sensitivity *(Russian)* 88−74430
MOMO-1, Marine Observation Satellite-1, MESSR development *(Japanese)* 88−54751
MOMO-1, Marine Observation Satellite-1, system development *(Japanese)* 88−54750
MOS-1 multispectral electronic self-scanning radiometer, airborne verification 87−57336
MOS-1 VTIR data processing software *(Japanese)* 87−41507
multichannel heterodyne radiometer, for computerised meas. of Tokomak plasma 86−5500
multispectral pushbroom scanner, advanced CID array 85−64033
multiwavelength scanning radiometer, appl. to airborne meas. of scattered radiation within clouds 87−63946
NBS photodetector spectral response calibration transfer program, using Si photodiode 88−67630
Nimbus-7 Scanning Multichannel Microwave Radiometer for sea surface temp. meas. 86−32568
Nimbus-7 SMMR, antenna pattern correction 86−42919
noise adding radiometer for radioastronomy 87−63100
noise processor for modulation radiometer 88−60655
noise temperature measurement system for mismatched noise sources 85−20538
noise temperature measurements at the National Bureau ofStandards 86−18170
ocean surface backscatter signature meas. by X- and Ka-band airborne scatterometer/radiometer 86−6134
ocean surface wind estimation from Nimbus-7 scanning multichannel microwave radiometry 86−6113
ocean surface wind speed, Seasat radar altimeter, scatterometer and scanning multichannel microwave radiometer obs. compared 86−6114
open-cell photoacoustic radiation detector 88−22550
optical radiation meas., conf., San Diego, CA, USA (Aug. 1984) 85−49251
optoelectronic scanners, reproduction quality, effect of spatial frequency charact. 86−50101
parasitic signal compensation 86−4782
passive IR systems and technology, conf., Hague, Netherlands (Apr. 1987) 88−24320
phase analyser using multielement radiation receiver 85−56437
photodiode array radiometer, linearity of response 85−3985
photodiode quantum efficiencies and performances in 5 to 1000 eV range 88−22597
photothermal radiometer for concentrated sunlight intensity measurements 87−15071
photothermal radiometer for concentrator solar cell meas. 86−45664
Polycorder, data collection routines for infrared thermometers and multiband radiometers 88−67699
portable diagnostic radiometer, microwave, battery-operated with on-board microprocessor and LCD display 87−50285
prediction of temperature differences in background scenery 88−30166
primary radiometric standards comparison, cryogenic radiometer vs. electron storage ring BESSY 87−14351
printed circuit type dichroic plates for meteorology and remote sensing 88−29376
pyroelectric detector, with lens-conical condenser, source follower and op. amp. 86−44318
pyroelectric detector and imaging developments 87−14336
pyroelectric radiometer for intermediate IR radiation 85−47983
radiation sensors for reinforced composites testing 88−24855

radiometers continued
radiation thermometry principle, advantages and appl. 87−63557
radiothermometer for human body temp. meas. 86−18315
RATAN-600 radio telescope-radiometer system, development of 'relay with zoning' method 87−34687
reflector antenna, brightness temp. meas. by scanning with microwave radiometer *(Japanese)* 85−26461
rotating shadowband radiometer, microprocessor-based, 86−50109
satellite remote sensing, microwave imaging radiometer 88−29626
scanning, determ. optimum transfer charact. 85−14811
scanning radiometer for irradiance meas. in marine environment 85−59496
scanning radiometer operating in synchronous Earth orbit, two-dimens. scan anal. *(Chinese)* 85−31988
scanning radiometers for point source detection, transfer charact. determ. 86−50102
selective radiometers with photoelectric radiation detectors, stability obs. 86−31432
sensitivity for weak noise signals, calcs. *(Russian)* 88−22603
sensor package for aircraft microwave radiometry of land 88−10609
sequential filter imaging radiometer for Earth obs. 88−30144
sHF waveguide semiconductor modulator for space radiometric systems 87−57362
Shuttle Orbiter leeside surface IR imagery, during atmospheric entry, comprehensive analysis 87−14169
SIRIO propagation and telecommunication experiments in Finland 87−62876
site diversity measurements with radiometers at 20 and 30 GHz 87−54563
soft X-ray CCD TV sensors, sensitisation using rare earth convertor screen 88−22653
soft X-ray fluorescence ultrahigh vacuum compatible proportional counters for EXAFS in surface studies 88−23022
soft X-ray imaging using CCD sensors 88−22654
soft X-ray microscope detector systems for high photon rates 88−23021
soft X-ray radiation sensitivity of film emulsions, detective quantum efficiency 88−23020
soft X-ray radiometry source and detector standards 88−23019
solar radiance meter for circumsolar radiation meas. 87−21266
solar radiometer and polarimeters (80, 35, and 17 GHz) at Nobeyama, design and appl. 85−63778
solid state submm radiometer, charact., astron. appl. 87−35101
solid-state spectral transmissometer and radiometer, applied to oceanic chlorophyll meas. 86−6132
space research, role of US Navy, past, present and future 85−8470
spaceborne radiometer antenna reflector, MM wave, development 87−12827
spaceborne remote sensing systems (book) 87−22975
spectral radiance calibrations 88−29672
spectral solar irradiance data and instrumentation for PV device measurements and analysis 88−37409
spectroradiometer, automated two-channel 87−63241
spectroradiometer, CCD transient, development *(Chinese)* 88−42090
spectroradiometer for ground-based atm. meas. related to visible remote sensing from satellite 86−6094
sphere-scanning radiometer, for rapid directional meas. of sky and ground radiance 86−38945
spherical monitoring radiometer for heat flux meas. 86−65291
SPOT HRV sensors, radiometric calibration 85−64019
stability, characterisation and meas. by Allan-variance determ. 85−14818
Stanford University ELF/VLF radiometer project, EM noise global distribution meas. 86−29464
Stefan Boltzmann constant determ. by cryogenic radiometry 86−24271
submersible-electric motor diagnostics, IR radiometer *(Russian)* 85−65286
submillimeter detector for radioastronomy satellite, using solid-state devices 86−4781
submillimetre absolute rocket-borne to meas. diffuse astronomical sources 87−28708
submillimetre spectroscopy and appls. conf., Cannes, France (Dec. 1985) 87−16247
superconducting bolometers, state of art review 86−5322
superheterodyne Dicke-switched radiometer for microwave background meas. 88−35623
temperature measurement from opt. radiation meas. methodology 86−60253
thermal anomalies of buildings detection, aerial thermography and spot radiometer appl. 85−52897
thermal detectors, elec. calibrated, of optical radiation, absolute radiometers 86−24546
thermal detectors of radiation, anal. algorithm 87−29121
thermal noise temperature measurement standards, automation impact 86−38599
thermal target detection using correlation radiometer 88−40942
thermocouple-type radiometer, design and charact. 87−29342
thermoelastic stress analysis, SPATE camera for use on nucl. plant components 88−17321
thermoelastic stress analysis, SPATE data interpret eqns., for laminated fibre reinforced composites 88−12116
thermoelastic stress analysis, SPATE system operational experience on nucl. plant components 88−17322
thermoelastic stress analysis technique, SPATE equipment and NDT applics. 88−12117
thermoelastic stress analysis technique, spectral analyser for response of solids to LF dynamic loads 88−15940
thermopile type radiometer with uncovered refl. and absorb. surface 88−9989
thermopile-based, electrically calibrated, directional heat losses, calc. 86−55727
THF radiometer components 87−17373
TIROS/NOAA satellite meteorological systems *(Polish)* 88−15430
total-radiation radiometers and pyrometers study 87−56693
transpiration radiometers for fire characterisation, operating parameters 87−3610
Tropical Rainfall Measuring Mission (TRMM) 88−30168
TV system resolving power, influence of bandwidth and noise of video transceiver channel 86−31011
TV systems, resolving power determ. 86−38066
twin-antenna water vapour radiometer for troposphere meas. *(Japanese)* 86−38960
UV rocket-borne radiometer for stratospheric ozone meas. 86−44800
variable focal length, for aerosol particle size meas. 86−31660
wavelength selection for indirect temp. meas. *(French)* 87−63268

radiometers continued
X-band microwave radiometer, design and fundamentals 88−53675
$AgCl_xBr_{1-x}$ IR fibres for low-temp. radiometric measurements 86−38377
GaAsP photodiodes, real-time microcomputer-assisted array spectroradiometer for photobiological weighting of irradiance 88−48152
$In_2O_3/SiO_x/Si$, photodiode, absolute radiometer with 100% internal quantum efficiency 88−74409
Si, photodiode radiometer, calibration, irradiance scales intercomparison 85−52777
Si(Li) photon counters, spectral efficiency and resolution, 0.3 to 5 keV 88−22978
T concentration determ., optimised cell for liquid scintillation radiometer 87−56893

radiometry

RATAN-600, feeder surface accuracy check 86−37963
RATAN-600, focusing ring system parameters for zenith obs. 88−15713
RATAN-600, geodetic adjustment of antenna panels position 88−15714
RATAN-600, instrumental linear polarization of S sector with flat 86−43924
RATAN-600, polarimeters for linear polarization meas. 86−43923
RATAN-600, radioholographic testing 86−43921
RATAN-600, signal accumulation by image tracking 86−43922
RATAN-600 dynamic range 86−37962
RATAN-600 feeder drive automatic control system 86−37964
RATAN-600 radio telescope, 1.35-cm spectral receiver 87−34684
RATAN-600 radio telescope, acousto-optical spectrometer *(Russian)* 85−3550
RATAN-600 radio telescope, acousto-optical spectrometer design and appl. 87−34679
RATAN-600 radio telescope, azimuthal aperture synthesis of Sun in 'south plus periscope' mode 87−34688
RATAN-600 radio telescope, development of 'relay with zoning' method 87−34687
RATAN-600 radio telescope, IKAR-16 automated solar spectral-polarisation complex 87−34680
RATAN-600 radio telescope, improvement of surface precision of primary mirror reflecting elements 87−34685
RATAN-600 radio telescope, new technique for extended tracking of radio sources 87−34686
RATAN-600 radio telescope, receiving unit of 21-cm spectrometer 87−34689
RATAN-600 radiotelescope, aperture image synthesis 85−8512
RATAN-600 south sector with periscopic reflector, directional patterns 86−43925
RATAN-600 telescope, adjustment using laser levelling device 87−34682
reflecting surface adjustment, laser level design 85−25960
reflector antenna system, 64 m, design and performance *(Japanese)* 86−36830
reflector surface measurements of the IRAM 30-m radiotelescope 86−37968
RT-3 Torun radio telescope, performance and applications, of UHF and SHF receivers *(Polish)* 85−8501
Schottky diode receivers, harmonic response, calibration for mm obs. 86−4780
Second Haystack Observatory Meeting, Westford, MA, USA (June 1987) 88−55768
self-calibration techniques for interferometric data 88−29008
SHF radiointerferometer, instrumentation complex, astrophys. appls. 85−8509
Siberian Solar Radio-Telescope, operation characts. 86−37967
SibIZMIR solar observatories complex in E Siberia, appl. to obs. of solar activity 86−30918
simulation using ISRSIM block oriented simulation language *(German)* 85−37153
SIS mixer array components for 350 GHz, radiotelescope appls. 88−32465
slot antenna array at 31 GHz for imaging 87−19323
solar radio acousto-optic spectrograph, 230-300 MHz 88−8007
solar radio interferometer at Nobeyama, angular resolution improvement 85−20289
solar radiometer and polarimeters (80, 35, and 17 GHz) at Nobeyama, design and appl. 85−63778
solar radiotelescope, real-time image processor for 8 cm radiohelioscope 86−69875
SSB low-noise receiver with cryogenic Schottky-diode mixer for 200-260 GHz 86−24002
strained radiotelescope reflectors, phase distortions compensation, automatic control 87−34692
submillimeter astronomy, low noise heterodyne receiver 87−20646
submillimetre and millimetre interferometer of polarizing type, for astronomical use 87−20643
submillimetre astronomy focal plane optical devices 86−43930
submillimetre heterodyne array receiver 88−60352
submillimetre heterodyne receiver for KAO, detect. of CO 372 μm line in OMC-1 and W3 88−35625
submillimetre spectroscopy and appls. conf., Cannes, France (Dec. 1985) 87−16247
submillimetre-wave radio telescopes, review 86−4787
submm horn antenna for diffuse sources, sidelobe response 87−26994

radiotelescopes continued
submm radiometer and horn antenna for rocket experiments 87−28708
submm radiotelescopes, quasi-optical components 87−20650
superconducting low noise receiver for mm and sub-mm wavelengths 86−2627
superconducting tunnel detectors 86−48007
superconductor mixer radioreceiver 88−15720
superconductor-insulator-superconductor heterodyne receiver at 230 GHz, low-noise design for radioastronomical appls. 87−76902
superconductor-insulator-superconductor mixer, saturation 88−15718
superconductor-insulator-superconductor mixer heterodyne receiver, low noise, 215 to 250 GHz, for radiotelescope 88−56928
superconductor-insulator-superconductor mixers integrated with slot antennas, imaging array 87−33559
superconductor-insulator-superconductor quasioptical heterodyne receiver for submillimeter astronomy, broadband low-noise design 88−71067
superconductor-insulator-superconductor receiver, 36 GHz 85−3549
Sydney University, Australia, improvements to Molonglo and Fleurs synthesis telescopes 86−30923
system stability meas. and characterisation 87−20657
three-antenna interferometric direction finders, algorithms 88−58963
Tidbinbilla interferometer, upgrading to X-band 87−34695
Torun Observatory 32 m radiotelescope for VLBI *(Polish)* 88−29011
torus primary feed in reflector antennas, theoretical end expt. study 88−2908
Toyokawa 80 mm radioheliograph back-end processor characts. 88−60347
two-element synthesis telescope (TEST) 87−49212
UK-NL millimetre wave telescope, thermal behaviour simulation 85−42688
UK/Netherlands mm wave telescope, antenna design 85−42693
UK/NL EHF telescope spectrometer system 87−20652
Universe boundaries determ. *(German)* 86−43929
University of Cologne 3 m telescope at Gornergrat Observatory, performance 87−34699
URAN-1, steerable antenna with circular-polarisation, optimal scheme selection 88−34485
URAN-1 interferometer, ionosphere effects on HF obs. 85−8505
USA National Radio Astronomy Observatory facilities 85−63776
USSR VLBI network at 18 cm *(Russian)* 86−30929
Very Large Array and VLBA radiotelescopes, construction and image processing developments 87−49214
very long baseline interferometers, number of readings as factor in radio sources coordinates, meas. 85−42681
very long baseline interferometry 86−69865
very long baseline radiointerferometer, signal/noise ratio 85−42682
VLBI, correction of systematic errors originating in radiotelescopes and atmospheric fluctuations 86−69873
VLBI, Japan-US joint experiments *(Japanese)* 86−4783
VLBI arrays, appl. to quasar and radio galaxies studies 85−42689
VLBI collimation tower technique for time delay studies of ground antennas 85−47618
VLBI work done by Nobeyana 45 m radiotelescope in Japan 86−69872
Westerbork Synthesis Radio Telescope, effect of atmospheric scintillation on decimetre-wave obs. *(Dutch)* 86−24004
wideband acousto-optical Bragg cell developed for aradio astronomy spectrometer 86−54018
GaAs FET receiver for Dominion Radio Astrophysical Observatory 26 m radio telescope 88−74088
H I calibration meas. at Arecibo Observatory 86−69866
Nb-AlO_x-Nb SIS mixer receivers, dual channel design for Nobeyama MM-wave array 88−15717
NbN based superconductor-insulator-superconductor junction, heterodyne mixing expts., for radiotelescopes 87−60848

radiotherapy *see radiation therapy*

radiowave interferometers
astronomical mm wave aperture synthesis instrument, Nobeyama Millimeter Array *(Japanese)* 88−35629
astronomical radiotelescope patrol instrument using FFT processor as a 'digital lens' 87−28717
astronomical very long baseline radio interferometer, cm-band, coherent conversion of signals 85−25963
Crimea-Pushchino radio interferometer based time service 86−4779
dual-channel phase systems, polarisation errors in phase interferometry, anal. 88−2675
dual-channel space quadrature-interferometer system 88−9674
Evpatoriya radio telescope, RT-70 interferometer element 88−35627
interferometer angle accuracy, variance estimator use 88−60270
ionosphere irregularities appl. 85−51441
Jodrell Bank wide-band interferometers, appl. to surface profile meas. of telescopes 87−34694
low-frequency space-borne radio array, design and appls. 88−47247
MERLIN systems, observational performance and potential for radioastronomical research 87−13810
microwave polar interferometers using four-probe operation *(Chinese)* 88−22761
Miyun Metre-wave Aperture Synthesis Radiotelescope, 1D image-correlation analysis for self-calibration 88−29010
MM- and sub-MM-wave selectable finesse Fabry-Perot interferometer for freq. meas. 88−29625
multi-baseline spaceborne interferometric SARs 88−10538
Ooty Synthesis Radio Telescope, visibility phase vars. due to ionospheric refr. effects 88−47248
parallel digitized, 35 GHz, for transient process phase meas. *(Chinese)* 88−74567
phase interferometers for direction-finding receivers, Varian miniature four-channel subsystems 88−4129
phase switched interferometer for nearfield detection of buried objects 88−4144
principles and characteristics (book) 87−22980
QUASAT, space borne radiotelescope for worldwide VLBI 86−69874
Quasat VLBI program 87−56307
SHF radiointerferometer, instrumentation complex, astrophys. appls. 85−8509
Siberian Solar Radio-Telescope, operation characts. 86−37967
side-looking type, aperture synthesis 85−8513
solar radio interferometer at Nobeyama, angular resolution improvement 85−20289
submillimetre and millimetre interferometer of polarizing type, for astronomical use 87−20643
THF and EHF interferometers and interferometry 88−60348
three-antenna interferometric direction finders, algorithms 88−58963
Tidbinbilla interferometer, upgrading to X-band 87−34695
time scale synchronisation and Earth rotation meas. 85−4437
Torun Observatory 32 m radiotelescope for VLBI *(Polish)* 88−29011
transmitters, frequency, instantaneous determ., wide bandwidth 86−4806
ultralong-base design, primary data processing 85−8514
very long baseline interferometers, number of readings as factor in radio sources coordinates, meas. 85−42681
very long baseline radiointerferometer, signal/noise ratio 85−42682
VLBI, by 45 m radiotelescope 86−69872
VLBI, correction of systematic errors originating in radiotelescopes and atmospheric fluctuations 86−69873

radiowave interferometry
1D image-correlation analysis for self-calibration in aperture synthesis 88−29010
astronomy, generalised projection theorem for mapping with radio interferometers 85−52459
astronomy, theory of phase-defined ground-orbital aperture synthesis system 85−58261
bearing techniques, basics *(German)* 87−41058
crossed-orbit interferometry remote sensing with SIR-B 88−74015
Deep Space Network enhancement for the Galileo mission to Jupiter 88−60118
digital VLBI correlator performance improvement 88−15712
dynamic wet troposphere, radio interferometric meas. 87−56309
Evpatoriya radio telescope, RT-70 interferometer element 88−35627
geodetic and geophysical applications of very long baseline interferometry 87−42228
global radio VLBI network for VEGA balloons data collection *(Russian)* 86−30928
global tracking networks for crustal dynamics 88−36649
Goldstone Deep Space Stations as ground-based SAR system for obs. of Venus 88−67502
Jupiter's radio emission, HF-band phase fluctuations meas. with VLBI system 86−30930
low-noise interferometer for microwave radiometry, cosmic background radiation obs. appl. 88−60700
microwave interferometric radiometry, signal-to-noise ratio for geodetic appls. 88−16880
minimum relative entropy method as soln. to missing short-baseline problem 87−28711
mm-wave instrumentation for radioastronomy, advances 87−76904
Multi-Resolution CLEAN, appl. to short spacing problem in astronomy 88−66610
multiple SAR images and surface shape reconstruction 88−10539
phase interferometers for EW systems, specification, calibration and testing 88−36704
phase interferometry, polarisation error anal. 88−2675
phase vars. due to ionospheric refr. effects, anal. for Ooty Synthesis Radio Telescope 88−47248
principles and characteristics (book) 87−22980
QUASAT, space borne radiotelescope for worldwide VLBI 86−69874
radar image rectification appl. 87−57349
radioastronomical, mm wave interferometry, influence of troposphere 86 GHz phase noise 85−25961
radioastronomical obs. at decimetre wavelength, effect of atmospheric scintillations, Westerbork Synthesis Radio Telescope Obs. *(Dutch)* 86−24004
radioastronomy, interferometry and image reconstruction techniques *(French)* 85−14383
radioastronomy high-resolution mapping with Fleurs Synthesis Telescope 86−43931
radiotelescopes, aperture synthesis, radio interferometric techniques 85−8504
SAR interferometry for digital terrain models 88−10537
Second Haystack Observatory Meeting, Westford, MA, USA (June 1987) 88−55768
short arc orbit determination for low-Earth orbits, interferometric method 88−60299
THF and EHF interferometers and interferometry 88−60348
VLBI, by 45 m radiotelescope 86−69872
VLBI, correction of systematic errors originating in radiotelescopes and atmospheric fluctuations 86−69873
VLBI, effect of freq. standard on radiointerferometric meas. 85−42684
VLBI, number of readings as factor in radio sources coordinates, meas. 85−42681
VLBI, signal/noise ratio in radiointerferometer 85−42682
VLBI analysis, software suite for Earth rotation parameters determ. 87−42222
VLBI correlators, signal loss due to imperfect fringe rot. 87−28710
VLBI for astrometry, geodesy and interplanetary navigation *(Polish)* 87−70161
VLBI geodesy and astrometry, observing techniques and data anal. *(Polish)* 88−60354
VLBI interferometry in geodesy, review 87−77837
VLBI international time comparison, instrumental delay calibration, zero baseline interferometry 88−15715
VLBI observations with orbiting radiotelescope 87−28712
weak objects imaging in conditions of poor phase stability 87−63097
H maser at Shanghai Observatory 88−20526

radiowave propagation
see also electromagnetic wave propagation
1.5 GHz earth-space links, ionospheric scintillation meas. 85−57040
1.91 MHz echoes from mag. conjugate point after propag. through magneto-ionic duct 87−33430
1-350 GHz sea level attenuation, dry air and water vapour effects determ. algorithms 87−19191
1-m irregularity auroral backscatter, Doppler spectrum anisotropy observations 85−62769
2.2 and 3.3 mm wavelengths atmospheric radiation distribution meas. during snowfalls 88−66084
2 GHz link, fading probability, impact of differing antenna height *(German)* 86−23676
2D impedance tunnel with T-junction, EM wave excitation study *(Japanese)* 86−29387
3.5 MHz amp. for propag. studies 87−526
3-layered media, calcs. 88−2568
4.5 GHz digital troposcatter link, dispersion and system performance meas. 85−24850

radiowave propagation continued
5 GHz sea reflection multipath propag. 85−24849
6.2 GHz channel simulator, realisation in microstrip technique 88−59989
6.7 GHz line-of-sight path, anomalous propagation conditions 85−41635
6 GHz 140 Mb/s digital radio system, Peru propagation tests 88−46892
6 GHz 90 Mb/s digital radio perform. on long highly dispersive fading path 85−20049
6 GHz propagation meas. over 51 km path in UK 88−34330
10 GHz multirelay link rain attenuation outage time calcs. 87−26758
10 GHz satellite earth paths, influence of atmosphere on radiopropagation 85−62785
10 km 11 GHz digital radio link, expt. results *(Italian)* 88−46882
10 meter meteor scatter communication 88−41499
10 metre band for radio communication 87−8156
10 to 20 GHz satellite communications, rain attenuation calcs. 88−20903
10 to 40 GHz earth-space satellite link propag characts. 86−59817
10-40 GHz range satellite propagation, eval. *(Polish)* 88−67326
11.6 GHz downlink, annual and worst month statistics for attenuation, depolarisation and rain rate 85−19143
11.6 GHz satellite systems, rain attenuation, duration and rate of change, dynamic characts. 87−62868
11.6 GHz Sirio satellite-Earth link, rain attenuation successive fade durations, statistical anal. 86−54290
11 GHz high capacity digital radio system, experimental results *(Italian)* 85−36924
11 GHz satellite link, 5° elevation, propagation phenomena investing. 87−54566
12 GHz band, atmospheric attenuation meas. using radiometry, results for 1976-85 *(Czech)* 87−75437
12 GHz down-link, sky noise temperature meas. by simple receive only systems *(Japanese)* 86−37848
12 GHz propagation expt. *(Hungarian)* 86−15873
12 GHz satellite-to-ground RF attenuation meas. 86−59063
12 GHz site and orbital diversity, meas. and predictions 87−62882
12 GHz tropical region links, radiometric meas. 86−29401
12 GHz/350 GHz radiometer rain attenuation prediction 86−64000
13 GHz Earth-space paths, fade rate distributions 87−26759
14.3 GHz rain scatter expts. 86−63997
14 GHz band rain scatter experiment, interference evaluation, data acquisition *(Japanese)* 86−36719
14 GHz FM-CW/pulse compression radar for obs. of satellite-Earth path precipitation *(Japanese)* 86−37945
14/11 and 14/12 GHz satellite communication systems, depolarisation compensation 86−17303
14/11 GHz path depolarisation and rain attenuation, system implications, impairments prediction 86−59819
14/11 GHz path depolarisation and rain attenuation, system implications, impairments reduction 86−59820
14/11 GHz satellite link with low elevation angles, site diversity expts. *(Japanese)* 86−49519
16 QAM 140 Mb/s digital radio field expt. 85−19134
16 QAM 140 Mb/s high capacity digital radio system field tests 86−30634
16-QAM 140 Mbit/s digital radio links, performance anal. of IF channel equalisers in multipath fading *(Spanish)* 87−40659
16-QAM 90-Mb/s digital radio, adaptive transversal equalisation of multipath propagation 85−14114
18 GHz 280 Mb/s radio relay expt., perform. characts. 85−20046
18 GHz band digital microwave links, propagation effects 85−25749
18 GHz propagation and rain intensity expt. study 88−67242
18 GHz wideband, LOS multipath experiment 86−30644
19 GHz precipitation scatter expt. 87−54564
20 GHz band propagation through rain, characts. estimation *(Japanese)* 85−2552
20 GHz band propagation through rain, characts. estimation 85−25740
22 GHz atmospheric phase fluctuation meas., Nobeyama MM-wave interferometer appl. 86−68766
22 GHz band Earth-space path in rainy weather, atmospheric gases and rain attenuation characts. *(Japanese)* 87−26779
22 GHz Earth-space path, attenuation in rain 88−28775
22 GHz tropospheric phase fluctuations, interferometric meas., 27 to 50 m antenna spacings 86−63989
24 kHz MSK Doppler receiver at Faraday, Antarctica 86−64007
30 GHz precipitation scatter expts. 88−52219
30-10000 MHz radio link systems, analytic methods of propagation calculation *(Spanish)* 85−57968
30-1000 MHz band radio networks design, radio-wave propagation, statistical model 87−62819
30/20- and 14/12-GHz satellite-to-Earth paths, rain attenuation ratios 88−60100
34.5 and 11.5 GHz propagation between ETS-II satellite and Kasima ground *(Japanese)* 86−48579
36 GHz maritime propag. expt. *(French)* 88−34332
37 GHz attenuation in dust storms 88−14385
40 GHz 14 km link in arid climate, amplitude scintillations meas. 88−27512
45-104 MHz band high latitude meteor scatter propagation parameters, characts. 86−59087
50 MHz amateur radio propag. 87−2306
50 MHz auroral Doppler spectra dynamics during Harang discontinuity 85−62771
55 GHz 4 km urban path across central London, propag. studies 86−36725
60 GHz mobile radio propag. studies 86−36727
60 GHz propag. effects in urban environment 86−48597
60 GHz propag. meas. for dig. microcellular systems 86−48599
60 GHz transmitter using mobile radio equipment, path loss characts. study 86−10094
64 QAM digital radio, transmission field test results 86−30636
96 GHz links, observed phase delay through rain 88−52220
96 GHz moist air atten. over 21 km line of sight path 88−27510
100 MHz to 3.5 GHz propagation loss prediction 87−2297
100 years, development 87−54567
100-year history 85−36012
140 Mbit/s 16-QAM radio-relay systems, multiplexing factor, multipath fading influence 85−42448
140 Mbit/s 64QAM radio relay systems, parameter optimisation 87−76560
140 Mbit/sec. 8 PSK dig. radio link, propag. effects *(French)* 86−29370
144-10368 MHz amateur bands, extreme range statistics 85−41636
250 MHz/GHz scintillation parameters, equatorial, polar and auroral environments 87−34480
300 MHz freq. range propag., comparison between measured and calculated field intensity values *(Polish)* 88−58860

radiowave propagation continued
500 m experimental range for propagation studies at millimetre, infrared and optical wavelengths 88−8472
500 m range for MM wave propagation studies 85−41622
800 MHz band fading signal envelope covariance function 86−48591
800 MHz radio transmission in and around houses and large buildings, cross polarisation coupling 86−69693
800 MHz radio transmission in and around houses and large buildings, cross-polarisation coupling 86−4531
800 MHz transmission in and around houses and buildings, cross-polarisation coupling meas. 86−36703
800 MHz urban link, energy spectrum of delays 87−61385
800-MHz attenuation meas. in and around suburban houses 85−3009
800/900 MHz digital radio channel performance characts., propagation meas. 88−3805
800/900 MHz fading radio channels, high angle propagation through dense foliage, characts. meas. 87−34481
815 MHz radio attenuation meas. within commercial building 87−26783
850 MHz radiowaves in building environments, time delay spread and signal level meas. 87−12708
850 MHz waves in building environments, time delay spread meas. 86−54297
900 MHz cellular band propag. meas. 87−47204
900 MHz digital mobile radio system, propagation meas. *(French)* 85−25780
900 MHz mobile radio system *(German)* 86−23720
900 MHz signal envelopes, mobile base station site received, crosscorrelation 87−3063
900 MHz urban mobile communication path, expt. results on multipath propag. *(Japanese)* 88−35417
920 MHz transmitter diversity, field test meas. in multipath fading environment 85−30925
1605-1705 kHz broadcasting conference, skywave propagation study 85−57022
Ku-band atmospheric attenuation model 87−34639
M-profile ray tracing technique for multipath propagation 87−26760
absorber in EM field, anal. *(Japanese)* 86−54248
absorption at high latitudes 85−13138
absorption fading at 18 GHz rel. to radio path direction *(German)* 87−33437
absorption of waves refl. from sporadic-E layers 85−51424
absorption prediction in lower ionosphere 86−59061
active electric network, radiowave scattering, stability eval. 87−37448
active-passive radar, convective clouds integral characts. determ. 87−70133
adaptive antennas for tropospheric radio-relay links 86−16032
adaptive arrays, multipath propagation and optimal SNR 88−72706
adaptive data link protocols: design and performance over automated HF skywave links 88−46897
Advanced Receiver Research TR10GA 10 GHz transceiver 88−67220
aeronautical mobile satellite system, digital modulation 88−46996
aeronautical satellite channel, propag. expts. 87−70012
S Africa, point rain rate distrib., determ. from attenuation of radiowaves *(Afrikaans)* 85−41615
air-to-ground propagation at 900 MHz 86−4535
airborne interception radars, influence of rain on range in SHF band *(Czech)* 86−49716
airborne receiver performance in interference environment, computer model 86−54306
airborne satellite communication systems design, influence of ionospheric irregularity shape and velocity 86−59874
aircraft communications , book contrib. 88−73814
Alaska 398 MHz phased array radar, radar auroral echo heights investigation 85−63733
Alexandria, point rain rate and attenuation statistics 85−20051
algorithm for optimum reception when there is fading and signal-delay dispersion 87−61384
algorithm for ray tracing through a realistic ionosphere 88−66076
altitudinal profile of auroral radar backscatter 85−63734
AM broadcast groundwave signal amplitudes, location statistics 86−65040
AM broadcast reradiation from buildings, numerical modelling and MF field strength meas. 86−48572
AM field strength meas. data, systematic bivariate anal. 86−65240
AM standard broadcast, history of ground wave propagation prediction curves 86−55409
amateur radio operation on the 10 m band 88−28640
amplitude distortion on a 1 GHz bandwidth duringmultipath propagation: frequency diversity *(French)* 86−29363
amplitude scintillations during the early and latephases of evolution of irregularities in the nighttimeionospheres 85−62779
angle diversity on line-of-sight microwave paths using dual-beam dish antennas 88−3837
angle diversity reception for LOS digital microwaveradio 86−30641
angle diversity with two antennas, model and expt. results 88−3839
anisotropic magnetically-oriented inhomogeneities, radiowave scatt., intensity 85−2576
anisotropic random medium, two-layer, mean dyadic Green's function, nonlinear approx. to Dyson equation 86−68782
anisotropic stochastic ionosphere, satellite-Earth communication in polar domains 87−75448
anomalous clutter interference in relation to inversion layers 85−52404
anomalous radiowave propag., effect on microwave freq. communications and radar 86−3521
anomalous refraction due to moist air pockets, effects on astron. obs. 88−2558
anomalous refraction in lower atmosphere, effect on EM wave propagation 88−40560
Antarctic ice cap influence on VLF propagation, diffraction round ice cap 87−26772
antenna gain reduction, random media inhomogeneous fluctuation, anal. 85−62787
antenna gain reduction anal., due to ionospheric and atmospheric turbulence 86−68866
antenna height dependence of 800 MHz attenuation measured in houses 86−15874
antenna pattern for microwave diffraction propagation, space-time fluctuations 86−59139
antenna theory and surface EM wave propagation 88−58861
antennas, performance anal. 85−2650
antennas and accessories for amateur radio communication 86−29579

close-spaced diversity antenna for HF transmission 86−29565
cm and mm wave propagation, tropical raindrop size characts. and effects 87−33438
CM and MM waves rain induced attenuation and phase shift, tropical raindrop size distribution model 86−68772
CM waves, diffraction propagation study 85−24832
CM-waves, rain attenuation characts. 87−47176
co-channel frequency reuse for hand-held radiotelephones, 3D modelling 86−17248
coal seam detection by radio wave propag., inverse problem 85−51429
cochannel interference between point-to-point urban microwave radio systems 88−53145
coded signals, adaptive reception in fading environment 87−69233
cofrequency interference compensation study *(French)* 86−54310
coherent multipath environment, direction finding, vector space approach 87−8368
common volume modelling for the prediction ofinterference due to scattering by hydrometeors 86−29403
communication and radar systems, auroral oval density and velocity fluctuations impact 88−53375
communication channels, digital simulation, overview 85−24846
companded PCM, Gaussian and Rayleigh fading channels, transmission errors anal. 85−2734
computer-aided engineering line for designing line-of-sight radio relay links 88−28681
computer-aided radio propagation models, comparison with field test data 88−72558
COMSTAR 20/30 GHz beacon meas., fade duration statistics 86−4562
conducting sphere, short radio pulse scattering, signal processing 86−36715
confined spaces and tunnels, conf., London, England (Mar. 1986) 86−33960
conical-helix antenna, wide circularly polarised wave generation 87−47277
constant modules adaptive filter, data equalisation 87−19783
cosmic gamma-ray bursts 86−42844
COST 210 activities to model transhorizon cochannel interference paths in Europe 87−54620
countermeasure techniques for digital radio systems inthe presence of selective fading *(French)* 86−29369

radiowave propagation continued
cross polar cancellation, conf., London, England (Dec. 1985) 86−19753
cross polar cancellation for system structures classification 86−22693
cross polarisation, propagation theory in adaptive cancellation 86−23833
cross polarisation meas. at 4, 6 and 11 GHz, abrupt changes obs. during thunder 85−51423
cross polarisation statistics observed at CS-2 expt. earth station, 19.45 GHz signal, seasonal variation 88−52206
cross-polar cancellation, review 86−22694
cross-polarised, sweep meas. of multipath effects and space diversity 85−42465
cross-polarized signal phase prediction theory 86−3506
crosspolar cancellation for partial frequency reuseEarth stations 86−49513
CS-2 experimental earth station, cross-polarisation discrimination meas. 88−3941
CS-2 expt. earth station with satellite tracking capability, XPD meas. accuracy *(Japanese)* 88−60104
curtain antenna, high power wideband antenna, outline 85−24813
cylindrically layered media excited by point source, recurrence relations for potential distrib. 87−47212
D-region, artificial periodic inhomogeneities formation, attachment and recombination processes 87−33423
D-region, electron density profiles estimation with VLF reflection coeffs. 85−36009
D-region, LF propagation, Leonid meteor shower effects 85−41596
D-region induced LF phase retardation for 1979 February 26 total solar eclipse 86−36713
D-region winter anomaly at high and middle latitudes planetary waves induced 85−62773
Danish and US geophysical meas. in Greenland, Arctic radio propagation related 86−59079
daytime Earth-ionosphere waveguide, height profiles of transverse electric VLF signals 86−27533
daytime whistlers, absolute intensity meas. by direction finding, latit. var. obs. *(Japanese)* 86−29388
decameter band radio signal, statistical props. modelling 88−2570
decameter-wave propagation, two-hop, max. observable frequencies calc. 86−48588
decimeter wave propagation investig. at high geographic latitudes 86−29373
delay dispersion of wideband ground wave signals due to propagation over a rough ocean surface 85−7643
delay measurement for signal traversing dispersely inhomogeneous ionosphere layer, accuracy 87−12711
delay power profile in mobile environment, amplitude variations, effect of coherence length 87−7528
delay spread and time delay jitter for the UHF factory multipath channel 88−72561
depolarisation coefficient variance, theoretical and expt. anal. 87−54554
depolarisation distrib. prediction on Earth-space path 86−64006
depolarisation due to multipath propag., expt. *(Chinese)* 87−61374
depolarization by small-scale ionospheric inhomogeneities 87−68778
DF sky wave algorithms using circular array of loop antennas, expt. comparison 88−47242
dielectric sheet, small local inclusions detection, radiopolarisation method 88−43963
differential GPS, ionospheric and multipath errors 88−15706
differential GPS kinematic positioning, accurate, phase data use 87−41110
differential phase contrib. and rain crosspolarisation cancellation at 10 GHz and above 87−2299
differential propagation phase shift and rainfall rateestimation 86−48581
diffraction by rounded obstacle, theory 85−57039
diffraction method of complex quality control of cond. surfaces and dielec. coatings 87−16738
diffraction-tropospheric propagation conditions, radio signal characts. 88−14389

EHF radiometer integrated with freq. hopped communication receiver for propag. loss meas. 85−20028
EHF satellite communication, frequency hopping spread spectrum 87−62908
EHF telecommunication system engineering model, line-of-sight communication system design 88−34331
EHF water vapour absorption coeff., comparison of summer and winter meas. 85−2560
EHF waves, scatt. and propag. in atm., conf., Florence, Italy (May 1986) 86−57093
EISCAT science, conf., Bad Lauterberg, W Germany (1987 March) 88−49330
electron collision frequency profile for lower ionosphere 86−68760
elevated refractive layers fine structure, over-the-horizon propagation and radar sounding systems implications 85−26901
ELF, broadside excitation by horizontal dipole beneath sporadic E environment 86−29382
ELF ionospheric heater beam scanning 88−23181
ELF propag. in earth-ionosphere waveguide, ionospheric conductivity parameters 85−62783
ELF propagation at shorter distances, simplified formulae 86−59060
ELF propagation variations at mid and high latitudes 87−33433
ELF radio wave scattering on global inhomogeneities of earth-ionosphere cavity 87−19187
ELF radiowave propag., effects of local inhomogeneity in ionosphere 86−3516
ELF signals, focusing and shadowing 86−59059
ELF signals, ionospheric effects during polar cap absorption, theory and expts. 86−59084
ELF wave generation by HF electron heating of lower ionosphere 85−62767
ELF wave propag. in shell between Earth and ionosphere 85−13131
ELF-ULF EM signal transmission technique *(French)* 88−20915
ELF/VLF radiation, ionospheric heater beam scanning 88−58865
ELF/VLF radio wave pulse propag. in auroral ionosphere 88−20904
eLF/VLF/LF propagation and system design 87−26795
EM and acoustic wave propag. above and below sea surface, conf., London, England (Nov. 1985) 86−19754
EM field, polarisation characts. determ. 86−42716
EM fields, semi-infinite tunnel, line source excitation 85−62788
EM pulse transmission, optimum, through good conducting media 85−19168
EM scattering and depolarisation, irregular stratified media, full wave soln. 86−68746
EM spectrum from 30 kHz to 3 THz *(German)* 88−52207
EM surface waves, formulas and appls. 86−22674

radiowave propagation continued
EM wave guidance by highly conducting surface in uniform motion 87−7532
EM wave propag. basics 88−21002
EM wave rain-induced amplitude/phase scintillation, spectral distribution, microwave links 86−54288
EM waves, National Radio Science symposium, conf., Cairo, Egypt (Feb. 1983) 85−16589
EM waves propagation 88−40555
EM waves propagation, anal. 87−54551
EM waves scattering from surface with small and shallow inhomogeneities 85−13122
EM waves with large relative bandwidth, theory and technology 86−15878
embedded HF channel probes/sounders 86−30588
environment for universal digital portable communications 87−26789
equatorial areas, nonionised media characts. 88−34314
equatorial ionospheric irregularities, short-term magnetic field alignment variations 88−66081
equatorial radio wave scintillations, geomag. disturbance effect 86−59041
equatorial region, ionospheric characts. 88−58868
equatorial scintillation intensity, model construction 85−51443
equatorial spread-F 86−15876
ERP calcs. and 50 MHz, antenna design 87−7609
error correcting system for adaptive modem, theoretical and experimental results *(French)* 85−25041
error floors in digital mobile radio systems due to delay distortion 88−72563
error rate performance of high level modulationtechniques in selective fading periods *(French)* 86−29367
ERS-1 altimeter, ionospheric correction calcs. 87−47199
EST-II satellite and Kashima station, propag. characts. at 34.5 and 11.5 GHz 86−68740
European propagation experiment with Olympus satellite, Spanish participation *(Spanish)* 86−3524
evaporation duct over sea surface, radiowave propagation models comparison *(Bulgarian)* 88−66057
evaporation ducting assessment, develops. 88−34391
evening type transequatorial VHF propagation, waveguide model, Euro-African sector expt. comparison 88−72540
experimental study of propagation characteristics on roads on a snowy mountain 88−52210
extinction properties of visible-, IR- andmm radiation (94 GHz) 87−2307
extrapolation of point distribs. of rain intensities *(Polish)* 88−52214
f_0F_2 at low latitudes over a solar cycle, day-to-day var. 85−62766
F_2 layer, electron content and f_0F2 over Indian zone, var. 86−29375
F_2-layer, hourly variability estimation at low latitude station 87−33434
F_2-layer, max. usable freq. depend. on global effective sunspot number IG_{12} *(Chinese)* 86−3500
F_2-layer, wave perturbations due to ground explosions 87−39375
F_2-layer critical freq. estimation from reflection altitudes 85−15419
F_2-layer radiopenetration frequency, hourly and monthly forecasting at low-latitude 87−47218
F_2-layer visualisation, eleven years of ionospheric chronograms 87−12706
F-region, artificial turbulence diagnostics by oblique sounding 88−34305
F-region, auroral ionosphere, plasma density structuring 85−63763
F-region, cross-correlation analysis and interpretation of spaced-receiver measurements 88−54742
F-region, cross-spectral analysis of spaced-receiver measurements 88−54741
F-region, disturbance due to HF wave propag. 85−13120
F-region, high latitude, small scale irregularities 86−59074
F-region, propag. anal. and equatorial irregularities characts. determ. 85−7641
F-region, structure in dayside auroral oval, relationship to HF backscatter signatures attributed to polar cusp 86−60944
F-region irregularities at plasmapause and auroral latitude 86−59065
F-region irregularities near auroral oval, magnetic storm effects 88−52230
F-region main trough, variability and predictability using digital ionospheric sounder data 86−59075
F-region parameters determ., resonance scattering method 87−26771
facsimile signal transmission in digital mobile radio 88−73540
fading of long distance HF ionospheric communications, scintillation theory 87−75433
fading phenomenon near wind energy convertors, two-path model *(German)* 85−24816
fading reduction by space or frequency diversity, theoretical limitation 86−29378
fading simulator using digital signal processor 87−62823
FFH/CDMA cellular mobile radio system, fading induced capacity reduction 87−76576
FH communications, HF differential propagation delay effect 87−40683
field strength estimation for RF planning *(German)* 86−48589
field strength prediction methods and data loggingtechniques in relation to mobile radio services 86−48595
field strength predictions for BBC bands II, IV and V 86−49766
finite element analysis of wave propagation in tunnel 87−54561
FIR equaliser, modified adaptive, FM transmission, multipath echo cancellation 87−34346
fixed indoor radio channels, comparison of radio propagation characts. at 910 MHz and 1.75 GHz 88−67231
flexible digital radio system outage model based on measured propagation data 87−34392
FM car radio reception, multiple antenna diversity 88−2583
FM microwave radio systems, multiple diversity 86−55179
FM microwave trunk, transmission characts. 88−53156
FM radio links, automatic equalising system, tropospheric scatter link *(Japanese)* 85−25735
FM radio transmissions, multiple path distortion *(Spanish)* 86−68750
FM-CW weather surveillance radar expts. on ESA Olympus satellite 88−15626
FMICW ground-wave radar for remote sensing of ocean waves and currents 88−15678
forest slab, relative permitt. and cond. eval. from lateral wave attenuation const. data 87−12710
forest slab permittivity and conductivity estimation by inverse method 86−68757
forest-to-clearing path calc. 87−39369
forests, HF effective permeability and permittivity of a forest 87−61373
forward-scattered diffracted RF field 86−42851
free space field strength calcs. 88−27595
free space propagation, anal. 88−14387

radiowave propagation continued
frequency coherence function and power delay profile statistics of the UHF mobile radio channel and their effect on system performance 88−28741
frequency diversity for digital radio 86−55168
frequency planning of digital radio-relay networks 87−8170
frequency reuse radio channel, cross polarisation interference canceller techniques *(French)* 87−40637
frequency-selective fading, impact on phase-modulated mobile radio 87−39389
frequency-separated cm radio waves propagation over sea, spatial-temporal characts. 86−63992
Fresnel zone locations and dimensions, calcs. 86−3507
FSK signals propagating in ionospheric and tropospheric channels with quadratic phases distortion, distortion and optimum detection 85−19488
geodetic range measurement errors due to radiowave propagation effects 85−2547
geomagnetic field effects in colour CRT, correction *(Japanese)* 88−52213
geometrical theories of wave propag., review 86−42841
Global and CCIR models for rain rate statistics estimation, evaluation 85−62775
global positioning system, noise components, multiple ref. stations 87−28704
GMSK modulation, 1.2 GHz band premises data transmission system 88−45703
Goose Bay HF radar, obs. of very high latitude ionospheric irregularities 86−59940
GPS, ranging errors due to multipath wave, reduction method using multipath suppression cct. *(Japanese)* 88−22237
GPS calibration of French LORAN chain 88−4138
GPS ionospheric time delay algorithm for single frequency users, design and characteris. 87−41100
GPS ionospheric time delay algorithm for single-frequency users, eval. 87−41089
GPS position fix using single frequency reception, ionospheric propagation delay *(Japanese)* 87−56295
GPS relative geodesy, ionosphere effects 87−41092
grey-line DX path predictor 87−68781
groove guides, propagation characts. 88−34293
ground conductivities world atlas, high latitude region emphasis 86−59085
ground conductivity of Bangladesh for MF coverage planning 85−24814
ground-based tropospheric ducts, terrain obstacles effect 86−68768
ground-wave propagation over irregular surfaces 85−41637
groundwave field-strength calc., empirical formula 85−2549
hail causing microwave attenuation, theoretical calcs. 87−12712
hailstones, radar polarimetric backscatt. props. at 10 cm 85−13114
Heaviside layer expts. in early 1900s 85−24825
Heinrich Hertz. (1857-94) and the discovery of radio waves 88−18541
Hertzian waves, tropospheric diffusion influence *(French)* 85−24840
HF, FMCW radar for ionospheric sounding 86−25430
HF amateur radio bands use 86−4481
HF antenna array, polarisation and Doppler effect on fading *(French)* 88−40573
HF backscatter echo spectra from ionosphere *(Chinese)* 86−3501
HF backscatter ionogram, discrete scatterer echoes, ground distance calc. 87−54574
HF backscatter ionogram, scatterer ground distance determ. *(Chinese)* 88−34292
HF backscatter studies of high-latitude ionosphere 85−13134
HF basic circuit reliability, estimation from modal parameters 85−36014
HF beam wave propagation in turbulent stratified ionosphere 88−2582
HF broadcast coverage calcs. in presence of noise and interference 88−40575
HF channel, combined eval. and simulation system 87−54570
HF channel evaluation, optimised data transmission 85−30907
HF channel model, meas. and verification 85−30918
HF channel selection, real time, use of embedded prediction program 87−26802
HF communication, embedded microcomputer for real time frequency management 85−30905
HF communication, optimal signalling rates 87−40682
HF communication satellites for amateur radio 85−31014
HF communication system design, spectral congestion influence 87−13198
HF communications, general concepts 87−40681
HF communications, introduction 87−12722
HF communications appl., ionospheric mode detection system, experimental investigation 85−24844
HF communications at high latitudes, problems 85−13132
HF communications frequency management, FOT prediction procedure 85−30156
HF communications system, path and frequency diversity connectivity improvement 85−30904
HF communications system design, propagation impact, conf., Brussels, Belgium (Apr. 86) 87−10044
HF communications system frequency management at high latitudes 87−28733
HF computer link 88−46638
HF data link, propagation and performance assessment 85−30917
HF data transmission, coded frequency diversity system 86−23656
HF data transmission in the presence of interference 85−30911
HF DF system, computer modelling of ionospheric errors 86−30908
HF digital radio systems at high latitude, optimisation *(French)* 86−59776
HF digital transatlantic propagation experiments, multipath and Doppler observations 85−24843
HF direction finding, effect of travelling ionospheric disturbances 85−37123
HF direction finding and single site location systems, accuracy limitations of ionospheric propagation 85−46569
HF Earth/satellite telecommunication signals degradation 85−30962
HF effect on ion-cyclotron modes in auroral ionosphere 88−58857
HF field, tripole antenna received, meas. and anal. 87−54722
HF field approx. near a caustic, introduction to Maslov's method 85−2568
HF field strengths and max. usable frequencies, day-to-day variability 87−48917
HF frequency management, conf., London, England (Nov. 1986) 87−23018
HF frequency management, oblique-incidence-sounders appl. 88−46907
HF global radio propagation, ray structure of focal spots 88−8478
HF ground wave propagation, Earth electrical props. estimation using CW and FMCW 88−20902
HF ground-backscatter spectra, measured ionospheric distortion 86−54293
HF ground-wave radar, progress in ship tracking 88−15523
HF groundwave and skywave propagation 87−26796

radiowave propagation continued
HF heaters, ionospheric modifications 86−59077
HF high-resolution time of arrival meas. (1981-1985) 88−66077
HF interference model 87−26800
HF ionospheric channel simulator using digital signal processing 85−30916
HF ionospheric forecasting program 85−57044
HF ionospheric propagation, effects of industrial explosions 87−39376
HF ionospheric propagation simulator with frequency hopping *(French)* 87−39388
HF ionospheric skywave channel. high-resolution probing, F_2-layer results 85−51433
HF link simulator design 85−63536
HF link technology and characts. 87−62828
HF meas., routine ionospheric observation appl. *(Japanese)* 85−46567
HF modem performance eval. using software ionospheric channel simulator 88−46787
HF networking to counteract propagation disturbances 85−13136

microwave line-of-sight link, multipath fading 87−47165
microwave line-of-sight links, elevated atmospheric duct, multipart fading anal. 87−26766
microwave line-of-sight multipath components, identification 88−34325
microwave line-of-sight propagation, for hilly terrain in India 86−10098
microwave line-of-sight relay links, propag. conditions study and fading prediction *(German)* 87−7537
microwave link, multipath fading channel, two-parameter signature definition 86−55190
microwave link during dust storms, attenuation at 2 and 7.5 GHz, obs. 87−28390
microwave link over the horizon, Bullington's tropospheric reflection 88−21960
microwave link rain attenuation, radiometeorological data logging and processing system for freq. over 10 GHz *(Polish)* 87−39385
microwave links, 10 to 30 GHz range, propagation factors 86−30624
microwave links, digital, high bit rate, effects of tropospheric refraction *(French)* 85−19122
microwave links, digital, high capacity, atmospheric propag. props. *(French)* 85−19121
microwave links, digital system error rate for multipath propagation 86−17234
microwave links, diversity improvement prediction 88−53157
microwave links, hydrometeor cross-polarisation, adaptive cancellation, appl. of propag. theory 88−52211
microwave links, improved Prony algorithm to identify multipath components 87−75425
microwave links, prediction of attenuation due to rainfall statistical anal. *(Spanish)* 87−19190
microwave links, rain intensity in given area 86−43723
microwave links, rain outage predictions 88−3830
microwave links, Rayleigh fading occurrence estimation considering duct effects 88−2579
microwave links, seasonal variation of multipath parameters in Egypt 87−34375
microwave links, transhorizon propagation at 6 GHz, fading, field strength *(German)* 86−4486
microwave multi-relay links, rain attenuation distribution, estimation method using lognormal distrib. model *(Japanese)* 85−2578
microwave multiple-hop network, rain attenuation, outage performance prediction 88−21943
microwave multirelay links, estimation method for rain attenuation distrib., compound lognormal distrib. model 86−69591
microwave propag. and depolarisation *(Polish)* 86−59062
microwave propagation, realistic anal. of effect of dust storms 85−19145
microwave propagation, short-pulse, high-power, atmospheric breakdown 88−66074
microwave propagation and high capacity digital systems, French network 86−69607
microwave propagation characts. along Earth-space paths in 1-100 GHz range, computer model 88−67333
microwave propagation expts. at 20-50 GHz using Olympus and Italsat satellites, Italian participation *(Italian)* 86−36702
microwave propagation in 13 GHz band, fadings, rain and hail effects *(Czech)* 87−61386
microwave propagation in dust storms, review 86−48574
microwave propagation in Great Lakes area of N America, degradation due to atmos. boundary layer 87−40724
microwave propagation in sand and dust storms 86−68770
microwave propagation in troposphere and refractiveindex *(Polish)* 86−22690
microwave propagation modelling in troposphere, parabolic eqn. method 88−72541
microwave propagation problem, studies and techniques 88−66086
microwave propagation test system, automatic system of collecting and processing propagationdata *(Polish)* 86−15879
microwave propagation through ionospheric turbulence, scalar anal. validity 87−75447
microwave radar, meteorological echoes 88−66091
microwave radio, multipath dispersion of amplitude and group delay at 6 GHz in 30 MHz bandwidth 85−20048
microwave radio path horizontal space diversity, measured performance 86−55191
microwave radio signal attenuation, rain rate profiles 88−40566
microwave rain attenuation for Earth-space paths at K-band freqs. 86−36705
microwave rain attenuation from various raindrop-sizedistributions 86−68752
microwave rain attenuation in 12-GHz satcom links, expt. results 86−17304
microwave rain attenuation on slant paths, study of radiative transfer through raincells 86−22689
microwave rain attenuation prediction from rain-rate distribution model for S Africa *(Afrikaans)* 86−10105
microwave refractive index for snow 85−30025
microwave refractivity profile meas. systems, helicopter/rocket probes 88−40561
microwave SAR degradation effects of rain 87−63046
microwave satellite links, ionosphere total electron content effects 86−22675
radiowave propagation continued
microwave scattering by surface waves on water 86−42855
microwave scattering by surface waves on water 86−63985
microwave scattering characts. of ocean surface with oil spills, theoretical investig. 88−2585
microwave scattering from bare soil, modelling 87−57386
microwave scattering from irregular surfaces 88−45681
microwave scattering from sea surface, modelling 86−22698
microwave scattering in urban environment, depend. on orientation of city blocks, expt. study 87−75423
microwave scattering properties of heterogeneous two-component mixtures, appl. to soil and snow water inclusions 87−57339
microwave scintillation in space-Earth links, influence of ground level refractivity 88−66053
microwave spectrum management in 1990s, propagation model requirements 88−60018
microwave system design, statistical anal. of rainfall rate and duration 88−58842
microwave systems, high bit rate, reliability improvement *(Chinese)* 86−17207
microwave technology, conf., Rome, Italy 88−11599
microwave terrestrial links, depolarisation rel. to antenna height 86−30616
microwave troposcatter experimental Delhi-Pilani link, fading characts. and space diversity signals anal. 86−37754
microwave wireless office communications 88−46942
microwave zenithal attenuation due to mol. oxygen and water vapour in freq. range 3 to 350 GHz 86−54289
microwave-band EM wave scattering, probability density of angular and azimuthal noises of target 88−45695
microwave/millimeter wave appls., modelling approach to year-to-year rainfall variability in USA 85−13113
microwaves, refraction by precipitation at X-band, theoretical and expt. study 86−59050
microwaves and MM waves, atmospheric absorption by tails of O_2 resonances 87−39373
mid-latitude ionosphere irregularities, meas. using radio interferometer 85−51441
military HF system requirements 87−13572
military microwave satellite communications, Conf., London, England (Mar. 1987) 87−36351
military systems, communications analysis and planning 87−76678
millimeter wave utilisation, status and prospects *(Japanese)* 85−24824
millimeter wavelengths, propagation effection 86−30590
millimeter-wave characteristics of phase-correcting Fresnel zone plates 88−27500
millimetre wave propagation based on long term rain data in Riyadh, reliability anal. 86−48578
millimetre-wave propag., attenuation and depolarisation due to rain scatter, theoretical study 88−66093
millimetre-wave propagation through hydrocarbon flame, expt. study 87−39372
millimetre-wave rain induced attenuation, theory and expt. 86−63984
mine communication system using EM propagation of phased modulated carrier 88−53126
minimum and nonminimum phase fading transitions, decision feedback equalisation influence 85−41614
minimum distances of continuous phase modulated signals transmitted in a microwave fading radio channel 88−60012
mining, underground EM propagation 85−41685
mining industry, microwave radio in mines and tunnels 85−42495
mixed Nakagami-lognormal distribution−a feasiblestatistical model of fading in mobile radioenvironment 85−62786
MM wave, rain attenuation and rainfall characts. 85−41624
near mm wave absorption influenced by UV solar radiation 85−7640
MM wave amplitude fluctuation distribution, absorption band model 87−28393
MM wave amplitude scintillation probability distrib. meas. in absorption region, 36 and 55 GHz 85−19140
mm wave and far IR anomalous absorpt. due to non-equilib. H_2O species 85−7639
mm wave attenuation due to H_2O vapour in troposphere, 94 GHz 88−72544
MM wave attenuation due to rain, measurement methodology 88−2569
mm wave backscatter and attenuation in falling snow and rain 88−58845
MM wave communications, overview 85−8311
MM wave defence-electronics systems, design 87−3059
mm wave excess attenuation at window region due to atm. water vapour 86−63949
MM wave fog attenuation estimation 85−2556
MM wave frequencies, scattering parameters calculation 85−41623
mm wave phase fluctuations in absorpt. region, differential phase scintillations 86−63948
mm wave phase noise in troposphere and implications for radioastronomy interferometry 85−25961
mm wave propagation at street level in cities 88−58849
MM wave propagation in moist air, model 86−3526
mm wave propagation in poor weather conditions 88−58847
mm wave propagation in rain, fog, snow and humid atmos. 88−58844
mm wave propagation through anisotropic turbulent atmos., theory 86−48571
MM wave radio links in rain climatic zones, global hop length analysis 88−9409
mm wave rain attenuation during monsoon 86−63999
mm wave scintillation in atmosphere surface layer, due to turbulence 88−58846
MM wave transmission under severe multipath conditions 85−25755
mm wavelength Earth-space paths, propag. predictions 87−39391
mm waves, specular refl. coeff. meas. under strong refr. conditions 86−3515
MM waves and optical waves, attenuation forecasting in snowfall 88−21952
MM waves multiscattering effects, bistatic radar for rain meas., Monte Carlo simulation 88−52229
mm-band satellite system propag. data 86−37862
MM-wave and SMM-wave, history 85−232
MM-wave atmospheric phase scintillations in absorption region, meas. 85−46562
mm-wave atmospheric propag. calcs. *(Croatian)* 88−34315
MM-wave attenuation and delay for fog event 88−27511
MM-wave communications, air-to-air appls. 88−21951
MM-wave in urban environment, propag. studies in region of O_2 absorption band 88−28728
MM-wave links, attenuation due to atmospheric particles 88−3823

radiowave propagation continued
mm-wave links in tropical location, rain attenuation 87−47196
MM-wave mobile cellular radio, fading and propag. characts. study in urban environment 87−56005
mm-wave propag., conf., London, England (Jan. 1986) 86−33953
mm-wave propag. characts. of atmosphere *(German)* 87−33419
mm-wave propag. expts. over terrestrial paths 87−47195
mm-wave propag. studies over 500 m range 86−36724
MM-wave propagation and application in military communication systems 88−34328
MM-wave propagation in sand/duststorms, particle-size distribution role 87−26764
mm-wave propagation through vegetation, expts. and theory 88−58848
MM-wave radar system trade-offs 88−60257
mm-wave scattering from hydrometers, calcs. 86−36728
mm-waves, specific attenuation by rain 87−47194
mm-waves propagating through rain, distortion calcs. 87−75446
mobile communication, base station polarisation diversity characts. study *(Japanese)* 87−56013
mobile communication, propagation study, reminiscences *(Japanese)* 85−36947
mobile communications channels, ultrashort-wave characts. in urban conditions 86−37771
mobile data link field trials, eval. for advanced train control system 88−72555
mobile land service transmitter, range control *(French)* 87−13615
mobile multipath fading channel, system bit-rate selection, analytic model 87−76581
mobile propagation, unifying expression of environmental structure effect 86−69690
mobile radio, digital fading simulator design 88−73825
mobile radio, field strength prediction techniques 86−48594
mobile radio channel, statistical modelling 87−3087
mobile radio channel transfer function time and freq. depend. under multipath propag. *(German)* 85−41599
mobile radio coverage evaluation for a particular area 85−58031
mobile radio in nonurban areas, seasonal signal intensity variations 88−46933
mobile radio multipath fading, digital simulator 86−30687
mobile radio multipath propag., spread spectrum techniques 86−11003
mobile radio multipath propagation effects, UHF wideband statistical model and digital simulators 85−57996
mobile radio propagation characteristics, 800 MHz, comparison of prediction methods 86−43750
mobile radio propagation in Auckland, New Zealand, at 851 MHz 87−13604
mobile radio propagation in urban environment, conf., London, England (April 1986) 86−45945
mobile radio propagation loss characts. over sea path at 250 MHz band *(Japanese)* 88−45700
mobile radio reception, normalised prediction chart 85−41634
mobile radio station location, automatic position determ. techniques, VHF/UHF propag. aspects *(German)* 85−52280
mobile radio systems, 800/900 MHz range, coverage prediction 88−60042
mobile radio systems, coverage and co-channel interference estimation 86−37799
mobile radio systems, frequency-time selection of multiplicative interference 87−56009
mobile radio systems, performance bounds, large area characterisation of urban UHF multipath propagation 85−36946
mobile radio systems, radio channel meas. and future predictions 88−28695
mobile radio systems, radio-electrical problems *(Italian)* 87−33443
mobile radio systems in Rayleigh fading environment, switched diversity perform. 85−30926
mobile radio systems propagation loss prediction, diffraction losses statistical estimation 86−17251
mobile radio transmission *(Norwegian)* 88−15377
mobile satellite communication systems, error rate monitoring 88−3903
mobile satellite communications, channel simulation for research facilitation 87−34485
mobile satellite fading channel, communications by vocoder 86−4566
mobile satellite propagation data management system 87−70013
mobile satellite service, terrain shadowing severity assessment 86−55239
mobile satellite system performance, non-Gaussian impulsive noise and multipath fading impact 88−9500
mobile stations, antennas and propagation *(Japanese)* 86−68870
mobile urban radio, propagation factors controlling mean field strength 85−7638
modified wave-hop method to calculate field-strength in the MF-range when using a horizontally polarized steeply radiating transmitting antenna *(German)* 88−58867
modulated RF signal measurement setup, propagation effects determ. 87−14517
molecular absorption and dielectric permeability of atmospheric admixture gases in the millimeter range 87−75439
monostatic pulse-Doppler HF radar, meteor trail detection rates 85−42658
mountain ranges causing reflection of VLF waves 85−36020
MTRS (Main Transmit and Receive Station), radiowave propagation experiments *(Japanese)* 86−37846
multi-link microwave system, rain attenuation and thermal noise calcs. 88−2588
multi-link microwave system, thermal noise due to rain, statistical distrib. model 86−30647
multibeam array antennas with max. feed efficiency, beam forming networks synthesis 87−54751
multibeam satellite link for frequency reuse, estimation of carrier to interference ratio 86−64950
multicylindrically layered medium, point source response 88−8441
multidimensional spectral anal., ionospheric mode structs. decomposition 87−19817
multihop packet radio networks, throughput anal. theory 85−13680
multilayer interference systems, radio pulse action, recurrence method 86−29390
multilevel CPFSK systems availability with modulation pulse shaping during multipath propagation 86−3748
multilevel modulation radio systems, unified anal. of multipath degradation 86−69574
multilink microwave system, statistical distribution of thermal noise 88−2562

radiowave propagation continued
multiparabolic ionospheric model for single site location HF direction finding systems 88−40550
multipath, mobile radio environments, wideband modelling, stochastical approach 86−36723
multipath channel selectivity, path length effect *(French)* 88−52203
multipath channels, theoretical analysis *(French)* 86−29364

transhorizon anomalous propagation conditions, modelling 87−54581
transhorizon microwave signals over troposcatter path in Northern India, fading statistics 85−19142
transhorizon propagation, interference anal. *(German)* 86−68745
transillumination of the ionosphere at the limit of radio transparency 87−50558
transionospheric 20 MHz signals, beyond-the-horizon propagation from satellite *(Chinese)* 86−63977
transionospheric geostationary satellite signals, scintillation characts. *(Chinese)* 87−61378
transionospheric propagation, spectral broadening of VLF transmitter signals and sideband struct. 87−68770
transionospheric signal scintillation, by single scatt. theory 88−66071
transionospheric signal time delay, variability at high latitudes near solar minimum 86−59873
transionospheric sounding at radiotransparency boundary 85−13111
transionospheric VHF signal scintillation, due to Feb. 1986 mag. storm *(Chinese)* 88−72537
transionospheric VHF signals, Faraday polarization fluctuations near mag. equator 87−75434
transionospheric VHF signals, nighttime scintillations and Faraday polarization 88−66072
transionospheric VLF signals received by spinning satellite, spin modulation of spectrally broadened signals 87−68771
transmission line matrix method, microwave line appls. *(French)* 88−66114
transmission lines, summation of solutions method, multiple reflections principle *(Spanish)* 85−41667
transmission loss and service area predictions in hilly woodland 87−47205
transmission loss calculation, computer program CARDIF 88−34324
transmitter coverage area, PC automated prediction using topographic terrain data 88−2578
transportation radio systems, multibeam channels, statistical parameters of broadband signals 88−35397
tree attenuation at 869 MHz derived from remotely piloted aircraft measurements 87−26767
tree attenuation at 870 MHz, remote sensing along simulated Earth-satellite paths 87−54556
tree cover effect on propagation losses in ground-air communications *(Czech)* 88−34312
TRIFFID Band 3, effective use 86−37755
tropical environment, EM wave propagation, 1 to 300 GHz, rain induced depolarisation 87−47173
tropical raindrop size distrib. modelling for microwave and mm wave appls. 85−41607
tropical station, disdrometer dropsize meas., rainfall parameters 87−40978
troposcatter and line of sight radio links, computer simulation 85−47431
troposcatter links, multipath dispersion meas. and predictions 85−25751
troposcatter radio-relay links, current state and future developments 87−69894
troposphere, attenuation and refractive dispersion due to atm. water vapour, meas. at 80 and 240 GHz 85−51426
troposphere, dielectric properties of mixtures with inhomogeneous scatterers 88−8479
troposphere, distribution of radiometeorological parameters in theSouth Baltic area 86−29397
troposphere, effects of refr. on radio meas. of satellite vel. 88−29655
troposphere, effects of temp., humidity and wind 85−57024
troposphere, microwave, refractivity gradient calcs. 87−75440
troposphere, microwave ranging, water vapour delay estimation using expert system 88−60296
troposphere, raytracing techniques for fields prediction 85−41629
troposphere, refr. index during SW monsoon onset phase over Bombay 85−13119
troposphere, refractive index profile from satellite signals frequency meas. 88−72550
troposphere, refractivity index calc., bootstrap resampling plan 86−29398
troposphere, scatt. from acoustic waves in radioacoustic sounding technique *(Russian)* 86−32533
troposphere, SHF propagation, effects of dust and sand 85−57025
troposphere, surface partial specular refl., effects on rainfall meas. by radar *(Chinese)* 85−4454
troposphere, ultrashort wave waveguide propagation over sea, conditions detection by lidar 86−48584
troposphere, VHF clear-air radar meas. of anisotropic permittivity structure 86−22685
troposphere, water vapour correction in GPS baseline determ. 87−8993
troposphere, water vapour effect on vertical crust motion determ. via mobile VLBI and GPS 87−8991
troposphere, water vapour effect on VLBI meas. of vertical crust motion 87−8992
troposphere line-of-sight radio paths, co-index of refraction, meteorology, and fading *(French)* 88−34333
troposphere microwave delays affecting geodetic baselines determined by Global Positioning System 88−58858
troposphere propagation 88−72549
troposphere radio refractive index meas., instrumentation comparison 87−71313
troposphere radiowave propag. anal. 88−5169
troposphere water vapour fluctuations, effects on interferometric radioastronomy obs. 88−45692
tropospheric amplitude scintillation, simulation technique for communication systems 86−3522
tropospheric amplitude spectra due to absorption and scattering in Earth-space paths 85−41620
tropospheric attenuation on terrestrial radio relay links at 11 GHz and 18 GHz *(German)* 85−2577
tropospheric dispersion *(Spanish)* 87−75436
tropospheric ducting medium, wide bandwidth signals transmission 85−24837
tropospheric microwave range correction for SEASAT altimeter 85−19123
tropospheric microwaves, evaporation duct model 85−62777
tropospheric multipath microwave propagation, angle of arrival and amplitude of rays determ. 87−47168
radiowave propagation continued
tropospheric propagation at low latitude areas 87−33439
tropospheric propagation modelling, waveguide mode method 87−54582
tropospheric radio channel fading statistics 87−68779
tropospheric radio links, fast signal fades rate distrib. 87−19196
tropospheric radio propagation, 0.02 to 20 GHz, Longley-Rice and Johnson-Gierhart programs 86−48575
tropospheric radiowave propagation, interference potential evaluation 85−13112
tropospheric radiowave propagation assessment, review 85−46566
tropospheric refractivity meter for radiocommunication links 88−5156
tropospheric scatter links, antenna directivity influence on signal props. 88−58869
tropospheric scintillation in the 14/11-GHz bands on Earth-space paths with low elevation angles 88−66065
tropospheric turbulence and wind vel. meas. 85−2569
tropospheric waveguide, modal equation, roots instability 87−33432
tropospheric waveguide, short radiowaves, numerical solution 88−27507
tropospheric waveguide inversion layer multimode propagation *(Japanese)* 86−63996
tunnels, ground to vehicle data communications using natural microwave propag. 87−69957
tunnels, radiation pattern calcs. 88−2586
tunnels, RF propagation and radio coverage investig. 87−20408
turbulence characteristics from microwave amplitudescintillations 87−2305
turbulent atmosphere, statistical characts. determ. 87−47214
turbulent ionosphere, reflected waves, numerical study 86−68748
turbulent media correlation in freq. fluctuations 85−51445
TV, mobile reception, picture impairments due to multipath propagation 86−4831
TV and USW FM broadcasting, field strength calc. in hilly and mountainous terrain in 30 to 1000 MHz frequency band 85−8533
TV broadcasting, 4 GHz PAL and 12 GHz B-MAC comparison in Australia 87−13833
TV signal propagation at VHF, far beyond primary service zone 87−19185
two-mode ionospheric signal, expt. study of field parameters 88−40568
two-path model for the description of the frequency and time dependence of the transfer function in radio channels *(German)* 85−47409
UHF band mobile radio propag., polarisation characts., expt. study *(Japanese)* 88−35416
UHF band mobile radio propag. characts. in residential area for low antenna height base station *(Japanese)* 88−21995
UHF clutter props. over Arecibo, radar obs. of middle atmosphere 85−52400
UHF communications through forested propagation channels 85−24842
UHF digital link across English Channel, propag. data 87−47191
UHF emission, characteristic, plasma parameters determ. with low average intensity 86−22702
UHF factory radio channel, charactn. 87−75424
UHF field in city, average intensity calc. 86−22686
UHF lateral wave loss in forests, four-layered media modelling 87−39368
UHF link propag. characts. for low antenna height base stations 86−48590
UHF mobile radio, field strength measurement system 86−43765
UHF mobile radio at 500 MHz, propagation 85−57994
UHF multipath propag. in urban areas, large-scale characterization 85−24847
UHF multipath propag. simulation 85−24851
UHF over-the-horizon propagation above the sea 88−72545
UHF path loss prediction, diffraction based theoretical model 88−34323
UHF radio loss in forest, layered media and anisotropic slabs modeled 87−26785
UHF radio waves in tunnels, propag. attenuation consts. determ. 85−57023
UHF radiowave signals within externally illuminated multi-storey buildings, modelling 88−27503
UHF satellite communication systems, ionospheric scintillation prediction model 88−67331
UHF satellite to land mobile communication, propagation theory and meas. 85−63585
UHF systems, nomograms for trans-horizon path loss calculation 85−36011
UHF terrestrial mobile radio channel, meas. and modelling 86−37798
UHF TV and radio reception due to changing atmospheric conditions *(German)* 86−24051
UHF-band path loss prediction within small buildings by ray method *(Japanese)* 88−40572
uHF-band radio propagation characteristics in built up areas for land mobile system using low antenna height base station *(Japanese)* 87−69947
UHF-band radio propagation characteristics within large buildings *(Japanese)* 88−20908
UHF/GHz scintillation, 1980-2 Ascension Is. obs. 85−51439
UHF/SHF SATCOM propagation and system design 87−26798
UHF/UHF radio relay links, reliable obstructed path coverage determ. 87−20393
UHF/VHF radiowave propag. meas. in 150, 450 and 900 MHz band *(Dutch)* 87−26778
UK cordless telecommunications, development 85−36608
ULF signals, long-distance ionospheric propagation during mag. storms 88−40551
ultrashort waves per unit length attenuation calc. in presence of superrefraction 85−51444
uncertainty function for 3-parameter scattering 86−42843
underground street, experimental tests 85−62789
underground street crowded with pedestrians, radiowave propag. characts. *(Japanese)* 88−20909
underground streets and corridors 86−63990
undersea radiocommunication, influence of seabed on subLF radiowaves 87−68751
United Kingdom, correlation properties of rainfall rates 88−40552
upper ionosphere, diffuse reflection meas. 86−42846
urban areas, models 86−10108
urban environment, performance of 38 GHz radio link 85−42467
urban environment point-to-point 60 GHz microcellular system, propagation studies 86−69599
urban mobile radio, characts. of antenna pattern diversity branches *(Japanese)* 87−8206
urban mobile radio channel delay-Doppler responses, physical optics estimation 88−21965
urban mobile radio propag., fast-fading charactn. at 855 MHz 86−3505
urban mobile radio systems, propag. characts. study of EM waves in groove guides *(Japanese)* 87−7539

radiowave propagation continued
urban mobile radiocommunication, effects of directive antenna radiation pattern on multipath fading *(Japanese)* 85−47442
urban radio propagation in mobile radio frequency bands 86−69686
USA satellite link attenuation prediction from rain-rate distribution model for S Africa 86−10106
USW backward scattering by slopes of mountain peaks and ridges 88−34295
vector correlation detection type interference canceller 88−52248
vector radar equations, EM polarisation in random media 86−69808
vegetation layer, microwave backscattering from randomly oriented disks 87−19182
vehicular communications technology, conf., Philadelphia, PA, USA (June 1988) 88−69998
vehicular technology, conf., Dallas, USA (May 1986) 86−66535
vehicular technology, conf., Tampa, FL, USA (June 1987) 87−65070
Venus atmosphere, refractive index altitude profile 86−22688
very low level radar tracking 87−56207
VHF, antenna height gain meas. 87−54575
VHF air-ground propagation paths, tree-cover effects, computer modelling 86−68776
VHF amplitude scintillation and long period fading, for satellite beacon signal 87−54550
VHF auroral backscatter, magnetic aspect effects, statistical study 85−62770
VHF band, mobile-service designing methods 87−20407
VHF Doppler radar backscatter, diurnal var. over Colorado and Alaska 86−23981
VHF field strength prediction method based on geometrical theory of diffraction 87−47193
VHF ground reflections, meas. *(German)* 88−53439
VHF intensity scintillation of transionospheric signals, due to F- and E-regions 85−2563
VHF ionospheric scintillation over Northern Europe 87−47201
VHF long distance propagation by the *Es* layer *(Japanese)* 87−54555
VHF lunar reflections, near-space unwanted RF environment obs. 85−62801
VHF mobile radio propag. prediction models 88−27517
VHF mobile radio propagation in urban areas 86−37797
VHF multipath propag. modelling 88−14392
VHF night-time scintillation at equatorial and low latitudes, geomagnetic effects 87−47202
VHF omnidirectional range, sea reflection interference suppression, terrain selection 86−68774
VHF point to point connections anal. using Fresnel diffraction, programable HP41C appl. *(Spanish)* 85−51448
VHF propag. model for Buenos Aires, Argentina *(Spanish)* 88−2571
VHF propagation charact. around Buenos Aires, field intensity meas *(Spanish)* 87−68780
VHF propagation in mountain environment, experimental characterisation 88−8463
VHF propagation on mixed sea-land paths, EM field level 86−29399
VHF propagation path loss, effect of tree cover on air-ground path 87−7535
VHF radar signals, relationship between scattered power and correlation time 85−42635
VHF radio scintillations at Bombay 86−15877
VHF radio waves, angle-of-arrival meas. in land tactical environment 88−4133
VHF range, field strength prediction, methods comparison 87−75431
VHF satellite-earth link scintillation indices 87−75443
VHF signal fading in a metropolitan city 87−26780
VHF sporadic-E propagation, ionisation patch sizes investig. 87−54572
VHF transionospheric signal time delay at subauroral latitudes, electron density charact. determ. 87−12709
VHF TV signal transhorizon propagation at Warangal, India 86−10099
VHF wideband radio links, impulse response meas. 88−53165
VHF-FM broadcast Es propagated signal polarisation obs. 87−33429
VHF/UHF broadcast services planning, prediction techniques developments 85−42714
VHF/UHF communication links, solar max. and min. periods, ionospheric constraints 88−58864
VHF/UHF diffraction attenuation, numerical integration calcs. 87−47192
VHF/UHF field strength predictions, computer-aided 88−66059
VHF/UHF fundamentals 86−10107
VHF/UHF mobile reception in urban areas, prediction models 87−47206
VHF/UHF propagation by diffraction, calc. by numerical integration 88−34321
VHF/UHF propagation modes 86−10103
VHF/UHF propagation modes, survey 86−15881
VHF/UHF radiowave propag. Charact. for mobile communications in suburban areas 86−54295
VHF/UHF range, rugged terrain, propagation loss meas. and prediction comparison 85−24845
VHF/UHF short range propagation, theoretical model and expt. meas. 87−54559
VHF/UHF signal loss predictions and terrain topography 87−47207
VHF/UHF tropospheric propag. modes 85−57028
VHF/UHF tropospheric propag. principles 85−57029
VHF/UHF vertically and horizontally polarised waves, propag. in 3-100 m range *(Japanese)* 87−7538
VHF/UHF wideband signal propag. 86−10096
VHF/UHF/microwave LOS terrestrial propagation and system design 87−28405
VLBI, state-of-the-art survey and appls. *(Japanese)* 86−49761
VLF, invariant imbedding appl. 85−62776
VLF, quasi 3-D propag. model 85−57034
VLF atmospherics, vertical mag. field component as influenced by Earth interior props. 87−54469
VLF direction finding, azimuthal angle meas. error due to wave polarisation, expt. study *(Japanese)* 86−69856
VLF monochromatic waves in turbulent ionosphere, freq. broadcasting 86−63983
VLF Omega signals, anomalous interference on E to W equatorial paths 85−2564
VLF propagation at high southern latitudes, from sferics observations 87−26773
VLF propagation at high southern latitudes using sferics 86−59083
VLF propagation on E-W paths, TE mode excitation *(Chinese)* 88−58838
VLF propagation on trans-polar paths 86−59044
radiowave propagation continued
VLF radio signals in multimode Earth-ionosphere waveguide, space correlation 86−3510
VLF radiowave phenomena from DE-1 and ISIS satellites, comparative study 88−45688
VLF radiowave propag., whistler-mode signals detection, intensity charact. study *(Japanese)* 88−20910
VLF reflecting props. of ionosphere at sunset for auroral link 86−63982
VLF reflection data, conducting profiles determ. of disturbed polar ionosphere 86−59082
VLF reflections from distant mountain ranges 85−36020
VLF signals from Siple transmitter and assoc. sidebands, DE 1 obs. 85−51428
VLF signals reflection height, assoc. electron density var. 87−33428
VLF transionospheric propagation, spectral broadening due to quasi-electrostatic effect 85−36018
VLF waves in Earth-ionosphere waveguide, perturbations due to electron precipitation-induced ionisation enhancement 87−26775
VLF waves on trans-polar paths, propag. disturbances due to flares *(Japanese)* 86−3527
VLF/ELF radiation from modulated ionospheric current systems 85−57037
Voice of America, high performance radio broadcast antenna systems 88−66194
Walsh signals, quasi-optimal reception, noise immunity 87−19186
water vapour attenuation, meas. from 1 to 350 GHz over Indian sub continent 87−68768
wave-tilt sounding of tropospheric ducts above the sea 88−52222
wavefront distortions in turbulent atmosphere, effects on ranging of radiation sources 86−48585
waveguide wave propagation charact., errors influence in specifying medium 86−36779
whistler field strength and polarisation at ground level *(Japanese)* 85−24834
whistler mode waves, propagation through low-latitude ionosphere *(Chinese)* 86−22668
whistler mode waves, three-dimens. ray tracing in non-dipolar magnetosphere 86−29377
whistlers, amplitude oscill. and freq. modulation in magnetospheric cavity 85−24812
whistlers, energy propagation direction 86−68744
whistlers in non-dipolar magnetosphere, 3-D ray tracing calcs. 86−68758
wide-band measurement of the land mobile radio channel at 900 MHz 88−28740
wide-band packet radio for multipath environments 88−53181
wide-bandwidth radio transmission loss over irregular terrain, prediction 86−68775
wideband digital radio transmission within buildings using diversity, performance 86−55166
wideband HF channels, modelling 88−52226
wideband HF skywave propag., characterisation and prediction 86−29392
wideband measurements of the UHF mobile radio channel 87−47203
wideband MF atmospheric radio noise, meas. and statistical anal., noise power temporal structure and distrib. 86−29380
wideband mobile radio, channel simulator *(French)* 88−46928
wideband multipath propag. modeling, environment-dependent approach 86−48596
wideband radio channel at 910 MHz, impulse response measurements from moving vehicle 86−37761
wideband signal propag. in three-layer tropospheric medium, anal. and PSK communication channel model 88−34297
wideband signals, time delay spread to multipath propag. within building 85−7636
wideband TDMA signals reception in multipath environment 86−37795
wideband UHF multipath propag. modelling, environment-dependent approach 88−27515
wind waves influence on radar reflection by sea surface 88−72546
worldwide noise predictions, reliability improvement 85−2557
worst month quotient Q variability distribution 86−11676
worst month rain statistics, theory and expt. 87−54552
worst month statistics of rain attenuation at 35 and82 GHz 86−63998
X-band Earth-space propagation, amplitude scintillation statistics 87−49015
X-band low elevation Earth-space paths, amplitude scintillations 86−29408
O_2, atmospheric, nanosecond pulses compression, radiowave absorption 87−68769

radius measurement *see diameter measurement*

radius of curvature measurement *see curvature measurement*

radomes *see antenna accessories*

rail traffic
see also railways; traffic control
3-phase AC drives for light rail vehicles in Alberta, control system *(French)* 87−79090
40 GHz radio link for train control, German Federal Railways 85−8316
AC railway electrification, digital computer simulation 88−37702
advanced train control system communication architecture and mobile radio data transmission 87−69965
ALPS low pollution automated urban transportation system, peripheral equipment, supply and control *(Japanese)* 86−7243
Amsterdam Metro, centralised traffic computer control system *(German)* 86−26355
anti-skid device, Faiveley AEF 83 P, for trailing passenger rolling stock *(French)* 86−51995
ASME/IEEE conf., Norfolk, Virginia, USA (April 1986) 86−61858
asynchronous traction motor drives for rail vehicles, invertor fed with PWM, EM processes 86−39777
BC Rail's advanced train control system 88−5968
bulk shipment railways in Canada, enhanced tractive effort performance locomotives *(French)* 87−79082
central control centre, Denmark, for safety system and traffic control 87−22849
Chiba Electric Power Section of Japanese National Railways *(Japanese)* 86−56984
coal rail car aerodynamic drag meas. using suspended body method *(French)* 87−79084
computer-based control system developed by Meidensha 85−5448
computerised interlocking signalling system SMILE, develop. 87−36221
computerised organisation and central *(German)* 85−32767
control, fibre optic autonomous decentralised double loop network system 87−20488

Nagano district (JNR) snowfall damage and countermeasures *(Japanese)* 86−51963
Nagoya privately operated railway signalling and crossing protection *(Japanese)* 86−51998
Naka-Ishida railway crossing accident due to equipment failure *(Japanese)* 88−18170
Naples and Milan metros, inverter fed substations for braking requirements, supply system *(Italian)* 87−51530
Narashino railway district track circuit with noninsulated turnout section *(Japanese)* 88−31133
Narashino Station short-circuit problems in track circuit, train detection and control *(Japanese)* 88−18169
natural commutation invertor fed synchronous motor drive systems and appl. in industry and railway traction 88−18128
Neubaustrecke Hannover-Wurzburg elec. railway, commissioning of Fulda-Wurzburg section, substations *(German)* 88−55678
new five-partite multiple-unit trains for ISAP Athens, design and construction *(German)* 85−16312
noninsulated track circuit on commuter line *(Japanese)* 86−66451
nonsymmetrical and deforming regime induced in power system by electrified railway, calc. algorithm *(Rumanian)* 87−57476
Novocherkassk Electric Locomotive Plant economic experiment for management and work improvement 87−51794
Novocherkassk locomotive works' role in USSR railway electrification *(Russian)* 87−5014
NSB overhead contact system for railways using series capacitors for voltage increase *(German)* 87−64858
Nurnberg-Lauf railway line electrification, construction and adaptation requirements *(German)* 88−24219
office automation using personal computers *(Japanese)* 86−52003
Oh-ita District AT feeder circuit resonance control using CR equipment *(Japanese)* 88−11434
Ohmiya Electric Power Dept., Japanese National Railways *(Japanese)* 86−56988
on-board computer system for traction energy consumption reduction 88−76023
operation control systems, European countries *(Japanese)* 87−72512
optical data highway system for railroads 86−54912
optical fibres, telecommunications in metro systems *(French)* 87−34594
optical fibres for railway signalling installations, prospects 85−58116
optical transmission ITV monitoring and control system for station premises *(Japanese)* 88−28872
optimum power feed voltage control for cost reduction *(Japanese)* 86−7230
opto-electric axle mounted pulse generators, design 85−21894
optoelectronic system, for model railway control *(German)* 85−12750
Osaka monorail system, Japan, specification 88−49227
Oslo tram system, articulated multiple units with chopper control *(German)* 85−32757
Otira railway tunnel electrification, New Zealand 88−5965
overhead conductor, in Swiss Alps, construction and development trends *(German)* 85−21890
overhead contact lines for high speed operation, static and dynamic criteria *(German)* 87−16127
overhead contact system for Danish State Railways main line electrification 87−72488
overhead contact wire maintenance vehicles *(German)* 85−5456
overhead current collection systems, wear simulation 86−5162
overhead line supports for electrification in narrow tunnels *(German)* 87−64862
overhead lines, safe working for personnel *(German)* 88−5942
overhead lines for electric railways, optical measurement of contact wire position *(German)* 85−27718
overhead railway catenary system Re 250 utilising Al and stainless steel nuts and bolts *(German)* 87−22845
overhead railway electrification, design and drawing by computers 87−43590
overhead wire displacement and stress anal. by FEA 87−36222
overhead-catenary and pantograph system, contact losses reduction method 87−58422
pantograph collector damage by pull-off fitting ear section interlock faults *(Japanese)* 87−36208
pantographs aerodynamic tests for SNCF *(French)* 87−16126
Paris (France) Transport Authority rolling stock electronic equipment maintenance *(French)* 86−66443
Paris Metro, inverters for maintenance of service *(French)* 87−36217
Paris-Austerlitz passenger train information centre and telephone exchange *(French)* 87−76449
passenger coach battery voltage standardisation *(German)* 86−56991
passenger coach central power supply system *(German)* 86−33799
passenger coach electrical and air-conditioning equipment *(German)* 86−33798
passenger coach LV equipment components *(German)* 86−33800
passenger coaches, electrical and air conditioning equipment design modifications for improved availability and reliability *(German)* 85−16324
passenger coaches, utilising Pb/acid accumulators *(German)* 85−16300
passenger compartment air conditioning, use of microprocessors *(German)* 86−33802
passenger door control system using microprocessors *(German)* 86−33803
passenger information display system at the Swiss Federal Railways' (CFF) station in Lausanne 85−30743
passenger information systems for rail travellers 87−79149
passenger train power supply from central busbar *(German)* 86−33801
passenger vehicle air conditioning and auxiliary power supplies 87−79148
passenger waiting time at transit stops 85−54245
PCM transmission system for railway networks 86−49118
people mover, urban commuter system and Maglev traffic system, develop. perspectives *(Japanese)* 87−79024
permanent magnet alternator for electrodynamic railway brake 86−33366
persistent current switch for magnetic levitation superconducting magnet energisation 87−5064
persistent-current switch for superconducting coils of Maglev vehicles 88−69637

single track line, centralised computer control of two-way working, Toulouse to Saint-Sulpice *(French)* 87−72509
single track line, monitoring and automatic block using microprocessors 87−79143
single track lines, computerised block equipment for safety *(French)* 88−62707
Skoda type CS-7 high-power electric locomotive for Soviet railways 85−44231
SMILE and μ-SMILE computerised railway signalling systems, safety and reliability characts. 88−37676
SMILE-safety multiprocessor system for interlocking equipment, for railway signalling control 85−53888
SNCF computerised installations for train management and signalling 87−51547
SNCF power facilities *(Japanese)* 87−79025
SNCF TGV dispatching office *(Japanese)* 87−79022
SNCF wagon traffic system, ETNA, design and operation *(French)* 88−11453
snow damage and snow melting on railway equipment *(Japanese)* 86−66409
software validation for railway signalling and train control systems 87−79139
SOPHO-NET in Belgian Railways' RESELEC system 86−4304
South African Railways, remote computer controlled load dispatch systems *(German)* 86−7246
Soviet electrical railways, customised power equipment prod. 88−76014
Soviet railways, automated system for operational control and locomotive crew deployment 88−18165
Soviet railways, CS7 and CS8 electric locomotives *(German)* 86−40237
starting signals dimming *(German)* 87−79064
static DC convertor for auxiliary power supply for railway vehicles 87−79147
static DC traction power feeding system employing thyristorised cct. breakers 85−5445
static on-board power convertors for The Netherlands' railways *(Dutch)* 85−60478
static traction convertors for railways using GTOs 87−79146
static VAr compensators and harmonic filters for Central Queensland railway electrification project 87−43589
static VAR compensators for balancing the single phase traction loads in Central Queensland 87−30010
static-invertors auxiliary power sources for rolling-stock, new series *(Japanese)* 88−5956
station lighting, automatic system controlled by trains *(Japanese)* 86−66418
station online network system in Hanshin Electric Railway for centralised train control *(Japanese)* 88−31113
steel weldment defects, quantification techniques by US normal beam testing 87−9052
stray current corrosion on DC railways, Vienna underground *(German)* 87−9913
streetcar power supply, microcomputer-based remote control *(Hungarian)* 87−72504
Stw-vB signalling equipment for Dachau-Altomunster line *(German)* 88−24235
substation, interlocking signal system, microelec. technology, remote control *(Japanese)* 88−31110
substation control system data flow structure for software maintainability 86−45765
substation earthquake detectors and alarm systems, Japan *(Japanese)* 86−66430
substation facilities, transformers, distribution equipment, Si rectifiers, transmission cables *(Japanese)* 86−66116
substation installation in narrow urban district *(Japanese)* 86−66118
substation Si rectifier parallel operation voltage characteristics *(Japanese)* 86−51982
substations, HV switches and distrib. lines remote supervisory control, Tetsuken B-type *(Japanese)* 88−18151
substations and three-winding-type Scott connection transformer *(Japanese)* 87−58389
suburban trains with asynchronous drives, power supplies and double floor design *(French)* 87−5032
suburban transport vehicles with convertors, energy saving current supply installations *(German)* 88−11441
subway car using induction motors, traction drive EM phenomena *(Russian)* 87−36210
subway railcar prototype for Japan, linear induction motor driven 85−49166
superconducting magnetic levitation project on Japanese National Railways 85−53902
superconducting magnetically levitated vehicles, cryogenic system *(Japanese)* 87−72508
surface/underground rail transportation and traffic in Dusseldorf, planning and management *(German)* 85−44238
Swedish State Railways, 130 kV power supply network *(Swedish)* 88−49226
Swedish State Railways' new high speed train, bogies, tilting systems and propulsion system 87−58382
railways continued
Swedish State Railways electric operation in 1985 *(German)* 87−5009

millimetre wave attenuation, cloud contrib. meas. using radar and radiometers 88−34298
millimetre wave propagation based on long term rain data in Riyadh, reliability anal. 86−48578
millimetre-wave propag., attenuation and depolarisation due to rain scatter, theoretical study 88−66093
millimetre-wave rain induced attenuation, theory and expt. 86−63984
MM wave attenuation in rain, measurement from characteristic radiation 88−2569
mm wave backscatter and attenuation in falling snow and rain 88−58845
MM wave frequencies, scattering parameters calculation 85−41623
MM wave propagation, rain attenuation and rainfall characts. 85−41624
mm wave propagation in poor weather conditions 88−58847
mm wave propagation in rain, fog, snow and humid atmos. 88−58844
mm wave rain attenuation during monsoon 86−63999
MM waves attenuation and cross polarisation, incoherent scattering effect, spherical raindrops at 34.8, 82, 140 and 245.5 GHz 85−13072
MM waves multiscattering effects, bistatic radar for rain meas., Monte Carlo simulation 88−52229
MM-wave band, coherent attenuation due to rain 85−2521
MM-wave links, attenuation due to atmospheric particles 88−3823
mm-wave links in tropical location, rain attenuation 87−47196
mm-wave propag. expts. over terrestrial paths 87−47195
mm-waves, specific attenuation by rain 87−47194
mm-waves propagating through rain, distortion calcs. 87−75446
MTI radar raingauge system, development and evaluation tests 85−47587
MTRS (Main Transmit and Receive Station), radiowave propagation experiments *(Japanese)* 86−37846
multi-link microwave system, rain attenuation and thermal noise calcs. 88−2588
multi-link microwave system, thermal noise due to rain, statistical distrib. model 86−30647
multibeam satellite link for frequency reuse, estimation of carrier to interference ratio 86−64950
nadir-looking radar for simultaneous ocean cross section and rainfall meas. 87−63969
near-IR extinction meas. with single detector system 87−61389
nitrate and sulphate wet deposition obs. in eastern United States 86−60983
oceanic rain rates measurement, satellite passive 37-GHz scatt.-based method 86−70529
Oklahoma, areal precipitation estimation, appl. of radar 87−4137
OLYMPUS and ITALSAT expts., Italian participation 86−64911
S Ontario, rain and snow boundaries in storms, radar meas. 88−22199
operational satellite station antenna at C-band, adaptive cancellation of rain depolarisation 86−23834
optical rain gauge based on forward scattering, operating principle and data processing algorithm 85−38344
orbital and site diversity systems in rain environment: radar-derived results 85−46565
orbital diversity in communication systems affected byrain 86−29407
orbital diversity in resource-shared satellite communication systems above 10 GHz 87−56051
OTS and SIRIO expts., rain attenuation statistics in worst month, COST 205 project 86−17288
OTS and SIRIO satellites, frequency and polarisation scaling of rain attenuation, COST 205 project 86−17287
partial mesh small terminal satellite system for low-density voice and data communications 87−70021
path-integrated rain rate over ocean, determ. from airborne microwave radiometer data 87−71317
point rain-rate distribs., extrapolation technique, microwave communication system engineering appl. 85−57018
polarisation-diversity radars, effects of propagation through rain 85−41617
polarization diversity radar in 3 to 35 GHz range for remote sensing of rain 85−7644
polarization of centimeter band thermal radiation fromrain 86−48583
portable salinity salinity meter using FET, differential amplifier, for rainwater anal. 86−32541
precipitation and RF propag. expts. *(Polish)* 87−47179
precipitation attenuation and depolarization of communication signals, remote sensing appls. 88−46893
precipitation index validation in African countries, using satellite data 87−50550
precipitation pattern motion meas. using radar, communication systems attenuation 87−2296
precipitation studies, COST 205 project 86−17284
radar backscatter from rain disturbed sea surface, experimental study 85−47556
radar backscatter obs. and remote sensing method 9 to 95 GHz 88−61637
radar data adjusted by sparse gauge obs. for surface rainfall meas. 86−50744
radar measurement of rain, radiowave propagation study 85−57026
radar measurements, reduction of errors due to melting snow 87−71336
radar meteorology and rain forecasting with FRONTIERS radar system 86−32547
radar method for rain measurement, bistatic dual polarisation mode 85−9371
radar predicted attenuation at attenuating frequency, interpretation and anal. 85−42640
radar rain clutter cancellation using circular polarisation 86−17429
radar rain data analysis, functional box-counting and multiple elliptical dimensions 87−63960
radar rain patterns, automatic extraction, collection and description for modelling 87−63032
radar rain-gauge system *(Japanese)* 85−4451
radar rainfall data simulation method 86−30867
radar rainfall estimate, clutter rejection and calibration 86−32549
radar reflectivity and rainfall rate, relationship 86−69805
radar reflectivity-rain rate relationships in Brazil 87−71380
radar remote sensing method for clouds and rain, at 94 GHz 88−61636
radar remote sensing of rain-rate profiles, algorithms for dual wavelength radar 88−42648

rain continued
radar weather clutter, Doppler spectra shape obs., using phased-array radar system 85−52386
radio link, 38 GHz, performance in urban environment 85−42467
radio link worst month rain statistics, theory and expt. 87−54552
radio links, MM wave, in rain climatic zones, global hop length analysis 88−9409
radio scattering, common volume model for interference prediction 86−29403
radio systems engineering, rainfall rates prediction 88−15316
radio wave propagation parameters prediction, comprehensive meteorologically oriented methodology, appls. beyond 10 GHz 87−61382
radiopropagation, rain attenuation prediction 85−13128
radiowave absorption fading at 18 GHz rel. to radio path direction *(German)* 87−33437
radiowave attenuation, relationship of raindrop-size distribution 88−27476
radiowave attenuation at 11.6 GHz, duration and rate anal., Italy 86−68741
radiowave attenuation at 140 GHz, propag. expt. 85−13127
radiowave attenuation by rainfall and atmospheric gases at tropical station 85−2559
radiowave attenuation on Earth-space paths for fair and rainy weather 88−45694
radiowave attenuation statistics, depend. of spatial correlation function of rainfall rate on elevation angle *(Japanese)* 88−45696
radiowave attenuation statistics in Earth-space links, comparative anal. of prediction methods 85−36023
radiowave depolarisation at centimetre and millimetre wavelengths, freq. scaling 85−19119
radiowave propag., differential phase contrib. and rain crosspolarisation cancellation at 10 GHz and above 87−2299
radiowave propag., rain attenuation rel. to depolarisation 85−2550
radiowave propagation, extrapolation of point distribs. of rain intensities *(Polish)* 88−52214
radiowave propagation, precipitation intensity and 18-GHz-propagation *(German)* 85−19128
radiowave propagation, rain attenuation prediction, factor of safety concept *(Japanese)* 88−72554
radiowave propagation, statistical prediction of rain attenuation 87−26788
radiowave propagation at the 20 GHz through rain, characts. estimation *(Japanese)* 85−2552
radome enclosures, effects of rain, performance study 1-40 GHz 87−2384
rain-induced cross polarization: calculations at wavelengths from 1 to 30 millimeters 85−7635
raindrop size distrib. by coherent polarimetric radars, three-parameter characterisation 85−41618
raindrop size distrib. meas. in 10 μm size range, results from IR attenuation 88−48324
raindrop size spectrometers, corrections for horizontal drag forces effect on rain trajectories 87−71310
raindrop velocity spectrometer for drop chemistry investigations 87−71311
rainfall data processing using FATEC 3520 system *(Japanese)* 85−32000
rainfall onto bare soil, L-band emissivities 85−64719
rainfall rate distribution model for radio system design 85−24822
rainfall rates determ. from cloud radiance meas., use of pattern recognition algorithm 87−71319
rainfall research field station, instrumentation and data acquisition 86−32539
rainfall type identification from weather radar data 88−74974
rainscatter interference studies, use of dual-polarisation radar 85−41653
rate estimation, differential propagation phase shift 86−48581
rate estimation from radar polarisation meas. 88−61642
rate measurement by radar, effects of surface partial specular refl. *(Chinese)* 85−4454
rate profiling by airborne dual-frequency microwave scatterometer/radiometer 86−6119
remote sensing, anal. of dual-wavelength surface reference radar techniques 87−71295
remote sensing, appl. of passive microwave techniques for meteorology and atmospheric physics 85−38346
remote sensing, millimeter-wave radiometer for water vapour sounding and rain detect. 86−38955
remote sensing characts. *(Japanese)* 88−16892
remote sensing of rain, spaceborne radar appl., sea clutter effect calculation 85−59501
remote sensing satellite planned for mid-1990s, TRRM satellite 88−61635
RF spectrum use, cross polarisation cancellation and propagation meas. accuracy improvement 86−22695
Riyadh, Saudi Arabia, millimetre wave propag., rain and sand storms effect 86−48577
road vehicles safety evaluation, thin water film thickness modelling and meas. 88−60908
route diversity systems, rain outage performance anal. 87−68774
SAR measurement of precipitation, beamwidth and precip. sensitivity 88−16906
satellite circuits, error performance, influence of rain attenuation 86−17334
satellite communication link, power margin prediction algorithms 86−69740
satellite communications, cross-polarisation due to precipitation, COST 205 project 86−17292
satellite communications, influence of rain *(Spanish)* 87−61381
satellite communications, rain attenuation dynamic characts., COST 205 project 86−17289
satellite communications, rain attenuation in spaced sites, joint statistics COST 205 project 86−17290
satellite communications, rain attenuation prediction method and appl. *(Spanish)* 88−3913
satellite fixed services communications, effects of precip. attenuation at freqs. above 20 GHz 88−53189
satellite link, rain attenuation and diversity effects, simulation study 88−3902
satellite link attenuation predictions, inhomogeneous rain attenuation model 85−19138
satellite links, 20/30 GHz band, adaptive methods to counteract rain attenuation effects 85−7637
satellite links, rain attenuation model describing spatial inhomogeneity of rain rate 85−24817
satellite links, rain differential phase shift cancellation using rotating polariser 87−7529
satellite links, rain fade duration, prob. distribution calcs. using lognormal Markov model 87−47189
rain continued
satellite links, rain scattered interference, method to predict desired-to-undesired power ratio 86−69724
satellite links, S band meteorological radar for slant path rain profile statistics meas. 85−52415
satellite links analysis using microcomputer-based workstation 88−3954
satellite links and rain-rate cumulative distribs. 86−43770
satellite links in 11 GHz band, amplitude scintillations occurring simultaneously with rain attenuation 85−42557
satellite radio links, rain attenuation prediction method 88−66064
satellite relay systems, rain attenuation statistics in 10-100 GHz band prediction 86−49523
satellite slant-path rain crosspolarisation discrimination ratio/plane prediction using radar data 85−46561
satellite systems, digital, adaptive forward error control and time-frequency resource sharing techniques 85−30981
satellite systems, K_a-band, efficient adaptive forward error control schemes 87−34488

Raman lasers
amplifier gain enhancement, role of transiency 88−72424
amplifiers, multiline dispersion angular compensation 88−72427
anti-Stokes Raman laser, generation of short-wavelength coherent radiation *(German)* 88−33916
$CaCO_3$, calcite, stimulated emission and radiation amplification under stimulated Roman scatt. conditions 85−41502
cascade Raman soliton fiber ring laser 88−14238
clock, error sources study 88−22408
cold electron beam sources for Raman FEL 87−2149
collective (Raman) free electron laser gainmeasurements 87−2187
differential absorption lidars with Raman lasers for O_3 profiles meas. 87−63067
diffraction influence on induced Raman emission of light beams in resonator *(Russian)* 86−3237

Raman lasers continued
dye laser, Nd:YAG pumped, pulsed tunable for spectroscopy *(French)* 87−18934
dye laser radiation, efficient, high brightness Raman conversion 86−3295
far IR CW Raman and hyper-Raman lasers 88−33926
FEL, collective regime, electron beam temp. effect on gain 88−2299
FEL, electrostatic wiggler, Raman dispersion equation 88−8236
FEL, high density, thick beam type 88−58579
FEL, optical guiding 88−2305
FEL, power and sideband studies 87−75143
FEL oscillator, gain meas. and spectrum 86−48449
FEL oscillator, MM-wave regenerative gain 88−2296
fibre, synchronously pumped, anal. 87−12429
fibre amplifier characts. for optical transmission systems 87−61227
fibre amplifiers, SIN ratio, appl. to recirculating delay lines 86−63635
fibre lasers, pumped at 1.06 μm, cascade Raman generation and soliton-like pulse formation 88−51780
fibre meas. using time-domain reflectometry with SiO_2:P_2O_5 fiber Raman laser 88−33629
fibre Raman amplifier, amplified spontaneous Raman scatt. and gain 86−3290
fibre Raman amplifier, direct optical amplification *(Japanese)* 88−27300
fibre Raman amplifier, optical signal amplification, bit error rate 85−29900
fibre Raman amplifier module with semiconductor laser pump source 88−45394
fibre Raman amplifier pumped by high-power semicond. lasers, 1.5 μm, amplification of WDM signals 87−39032
fibre Raman amplifiers at 1.5 μm, noise meas. 86−36453
fibre Raman gyroscope, synchronously pumped, inertial rot. detect. calcs. 85−35494
fibre Raman laser, N_2-laser-pumped, multimode, multiple-order Stokes pulse generation 86−42501
fibre Raman laser, synchronously pumped with self-phase modulation 87−75052
fibre Raman laser pumped by a Nd:YAG laser, subpicosecond pulse generation 88−27108
fibre Raman lasers, chirp from cross-phase modulation 88−2205
fibre Raman oscillator, self-phase modulation and stimulated Raman scatt. in single mode fibre 87−54405
fibre Raman oscillator having fibre grating reflector 88−39889
fibre Raman oscillator-amplifier system, high efficiency UV freq. conversion 86−42618
fibre Raman soliton laser, cross-phase modulation 87−68134
fibre Raman soliton laser pumped by Nd:YAG laser 87−39047
fibre Raman soliton laser theory 87−54370
fibre soliton laser, theory *(Japanese)* 87−12343
fibre transmission system operating at 1.5 μm, CW pumped Raman preamplifier 85−35858
fibres, pulse compression and Raman amplification 88−58147
fibres, stable CW backward Raman amplification, stimulated Brillouin scatt. suppression 86−42619
fluoromethane, FIR laser, simultaneous tunable Raman and fixed frequency oscillations 87−33082
fluoromethane, resonant four wave mixing, superradiant reson. FIR Raman conversion 86−42636
fluoromethane amplified spontaneous emission laser, tuning behavior 88−27080
fluoromethane pumped by CO_2 laser, tunable FIR generation by resonant four-wave mixing 88−2164
fluoromethane Raman laser, FIR superradiant, pump polarisation effect 85−51117
fluoromethane Raman laser, high press. CO_2 laser pumped, tuning characts. 86−63753
fluoromethane Raman laser, high pressure CO_2 laser pumped, efficiency 86−68439
fluoromethanes, $^{12}CH_3F$ and $^{13}CH_3F$, tunable far-infrared lasers 87−26321
free electron laser, Compton and Raman regimes, Hamiltonian model 87−33220
free electron laser, Compton and Raman stability properties, cold electron beam propagating through helical mag. wiggler 86−3228
free electron laser, electron beam velocity spread meas. *(Chinese)* 87−54351
free electron laser, frequency modes observation *(Japanese)* 88−34058
free electron laser, parametric optimisation, electronic efficiency for cusp and EM wiggler 88−51841
free electron laser, Raman and Compton regimes *(Japanese)* 87−2209
free electron laser, Raman regime, gain, beam energy spread effects 86−48446
free electron laser, Raman type, 2D model, oscill. characts. anal. 87−54352
free electron laser, Raman-type, optimisation of beam configuration 86−3203
free electron laser, Raman-type, using 2 D hollow beam, optimum beam thickness 85−41418
free electron laser, Raman-type, using TM pump wave, 2D mode anal. 87−54353
free electron laser, tunable, in combined axial and wiggler mag. fields, microwave emission 85−51204
free electron laser oscillator, efficiency enhanced design 86−22416
free electron laser using 2D hollow beam, optimum beam thickness calc. 85−18959
free electron laser wiggler coil shape calc. *(Japanese)* 86−48444
free electron laser with tapered undulator, efficiency and sidebands study 88−65749
free electron lasers, Raman regime, frequency resolved radiations, temporal evolutions 87−33216
free electron Raman laser, dielectric-loaded, mode analysis 88−72340
free-electron laser, exptl. study 87−46928
free-electron laser, Raman, 3D simulation 88−34061
free-electron laser, Raman-type, two-dimens. mode anal. for case of TM pump wave *(Japanese)* 86−9890
frequency-shift laser with intracavity arrangement, high conversion efficiency of first Stokes order 88−45497
gases, low-pressure, in light guides, as high-power forward Raman amplifiers 87−12563
half-resonator, forward and backward Raman waves 88−65834
high-power, freq. tuning and efficiency enhancement 85−35706
IR Raman lasers, development of cryo-cell, isotope enrichment appl. *(Japanese)* 85−29755
light amplification using backward Raman pumping 88−65856
low emittance diode for Raman scatt. FEL 86−48443

Raman lasers continued
methane, XeF laser pumped, high-efficiency first-Stokes generation 87−12572
methane, XeF laser pumped, Stokes generation, beam parameters 87−12571
methane high-power forward Raman amplifiers employing low-press. gases in light guides 87−12569
methane laser, waveguide, Raman, synchronously pumped, operation at 1.54 μm 88−33945
methane Raman laser, capillary waveguide, as source of mode-locked pulses at 1.54 μm 86−54101
methane waveguide Raman laser, low-threshold operation at 1.54 μm 87−54222
methyl fluoride Raman FIR laser, short wavelength operation 85−29756
missile control, eye-safe Raman laser range finder 88−15689
mode competition in Raman free electron lasers 87−2191
multimode pump laser, stimulated Raman scattering, weak dispersion effect 85−41366
noise properties of Raman optical amplifier 86−48482
optical fibre, Raman radiation at 1.4 μm, single pass solitonlike compression 88−20747
optical fibres, Raman amplification in 1.06 to 1.36 μm range 85−51280
parametric second Stokes generation in Raman amplifiers, closed form soln. 88−58654
phase correlation in a Raman amplifier, pump beam temporal struct. effects 87−12568
pulse delay meas. using Raman generating fibre 85−35445
relativistic electron beam in waveguide, parametric up-conversion of microwaves 88−34060
ring Raman laser, all-fibre low-threshold synchronously pumped 87−33229
ring-laser, chaotic pumping, noise reduction 87−68554
short-pulse intracavity Raman laser 88−72301
short-wavelength coherent radiation generation by anti-Stokes Raman laser 88−40344
single-mode pulse compression with amplification 87−18605
soliton Raman fibre-ring oscillator 88−45495
soliton Raman process, femtosec. pulse generation in single mode optical fibres 88−40333
Stokes amplification and conversion valid at large gain, approx. theory 86−63867
submillimetre Raman electron laser using a high quality electron beam 85−24594
synchronously pumped soliton Raman fibre ring laser, expt study 87−54271
tunable Raman far IR lasers, recent advances 88−27078
tunable subpicosecond synchronously pumped fiber-optics stimulated-Raman laser 88−20613
UV- and VUV-radiation generation, antiStokes Raman process 87−7444
VUV radiation generation by antiStokes Raman laser process 87−7430
wavelength conversion developments for remote sensing appl. 87−39243
$Ba(NO_3)_2$ laser radiation wavefront correction in pulsed operation with plane-plane resonator 87−39198
$Ba(NO_3)_2$, radiation generation in resonator under stimulated Raman scatt. conditions 87−26523
$Ba(NO_3)_2$, stimulated emission and radiation amplification under stimulated Roman scatt. conditions 85−41502
$CaCO_3$, radiation generation in resonator under stimulated Raman scatt. conditions 87−26523
Cr^{3+}:$BeAl_2O_4$, alexandrite laser pumped tunable intracavity Raman laser 87−46836
D_2 gas-in-fibre Raman lasers, 1.5 μm, single-pass mode-locked or Q-switched pump operation 85−56529
D_2O laser at 385 μm, development for plasma diagnostics 88−2163
GaP epitaxial Raman laser, characts. 86−68494
GaP semiconductor Raman laser, low-threshold 85−29797
GaP-$Al_xGa_{1-x}P$ Raman laser operation 87−68453
GeO_2 fibre Raman laser, appl. to chromatic dispersion meas. 86−58781
GeO_2 glass fibres, fibre Raman laser emission 88−65656
GeO_2-core optical fibre efficient linearly polarised Raman generation 88−13802
H_2 Raman amplifier, Stokes phase preservation 87−12567
H_2 Raman amplifier, beam cleanup of severely aberrated XeCl pump laser 85−51095
H_2, Raman beam combination of two-line XeF laser sources 87−12562
p-H_2, Raman conversion from far-wave mixing of CO_2 laser 87−12558
H_2 Raman generator, stimulated Raman scatt. linewidth, quantum fluctuations 88−58675
H_2 Raman generators, spatial mode struct. of stimulated Stokes emission 87−12570
p-H_2 Raman laser at 16 μm, parametric study 85−35674
H_2 Raman laser, continuously tunable sequential Stokes conversion 86−68618
H_2 Raman laser, high-power, with multiple-pass cell, characts. 86−36380
para-H_2 Raman laser, polarisation enhancement of anti-Stokes emission 85−29768
H_2 VUV anti-Stokes Raman line generation using excimer lasers 87−33259
H_2, VUV radiation generation by stimulated Raman scatt. in kW power region 85−7513
H_2, amplifiers, efficient high-gain, beam cleanup and low-distortion amplification 87−12566
H_2, compressed stimulated Raman scatt., excitation by XeCl low divergence laser 87−33287
H_2, high press., frequency expander threshold, output energy and transfer efficiency expt. *(Chinese)* 86−58968
H_2 high-power forward Raman amplifiers employing low-press. gases in light guides 87−12569
H_2 para rotational Raman laser, high power room temp. operation 86−15604
H_2, pulse compression with externally pumped intracavity Raman oscillators, high efficiency 85−7536
p-H_2 rotational Raman power conversion of CO_2 laser pulses 85−2404
H_2, stimulated Raman scatt. of unpolarised long pulse XeCl excimer laser radiation *(Chinese)* 86−68616
He-K, XUV laser radiation generation by stimulated Raman scattering 87−46971
He-Ne CW Raman laser, optical characts. at 650 nm 86−36370
KrF laser pulse combining and compression in light guides 88−72425
KrF laser pulses in methane, pulse compression by Raman scatt. 86−3286
Li vapour hyper-Raman laser, tuning behaviour 86−42629
$LiIO_3$ Raman laser for optical range, quasi-CW high power 87−12441
NH_3 Raman FIR laser, broadly tunable, CO_2 laser pumped 88−27027

Raman lasers continued
NH_3 Raman laser, CW 12 μm, gain saturation 85−24437
NH_3 Raman laser, FIR superradiant, pump polarisation effect 85−51117
NH_3 Raman laser amplifier, CW, 12 μm, high-power 87−46749
NH_3 Raman laser, continuously tunable, pumped by CO_2 laser 86−22305
NH_3 Raman laser, far infrared, continuously tunable, high power, CO_2 laser pumped *(Chinese)* 88−45338
NH_3 Raman laser, homogeneously broadened, single mode, mode splitting 85−56483
NH_3 Raman laser, single- and multimode, instabilities and chaos obs. 86−22503
NH_3 Raman lasers, CW, 12 μm, operation 86−48348
NH_3, Raman lasers, single mode and multimode, self-pulsing instability 85−56532
NH_3 far-IR Raman laser-emission, frequency tunable CW laser construction 85−29751
NH_3 laser, single-mode homogeneously broadened, self-pulsing instabilities 87−7276
NH_3, optically pumped FIR pulsed laser line emission *(Chinese)* 88−27008
NH_3 optically pumped mid-IR laser, dynamics at high pump power, Raman gain and AC Stark shifts 85−2208
NH_3, resonant four wave mixing, superradiant reson. FIR Raman conversion 86−42636
NH_3 superradiant Raman FIR laser with nonlinear reson. four-wave mixing generation of medium IR emission 87−26527
NH_3, tunable, 60 to 150 microns wavelength region, pumping by multiatmosphere CO_2 laser 87−68373
Na vapour, gain/feedback approach to optical instabilities 88−72411
Na vapour, gain-feedback approach to optical instabilities 88−33951
$NaNO_3$, radiation generation in resonator under stimulated Raman scatt. conditions 87−26523
Nd:glass Raman laser, tunable, for DIAL applications 88−20626
Ne Raman laser, CW, gain and noise characts. 87−75001
P_2O_5 doped fibre Raman laser, OTDR for single-mode fibre appl. 87−18604
S atomic laser, VUV, antiStokes Raman 87−12360
Se VUV anti-Stokes Raman laser at 158.7 nm and 167.5 nm 86−22316
Se anti-Stokes Raman laser, high-power, radiating at 169 and 146 nm 87−26314
Se atomic laser, VUV, antiStokes Raman 87−12360
SiO_2 fibre Raman laser, UV short pulse, excimer laser pumped 87−46817
SiO_2 silica fibres, Raman amplification meas. in 800 cm^{-1} band 88−58145
Tl, anti-Stokes Raman laser, tunable UV radiation generation 85−51121
Tl-Ar exiplex lasers, Raman, collision-induced and weakly bound 86−48344
Tl-He exiplex lasers, Raman, collision-induced and weakly bound 86−48344
Tl-Xe exiplex lasers, Raman, collision-induced and weakly bound 86−48344
Tl-Xe mixture, optically excited, Raman and atomic resonance lasers 85−29766
XeCl-pumped Raman amplifier, gain enhancement 88−72299

Raman scattering *see Raman spectra*

Raman spectra
see also molecular rotation; molecular vibration; Raman spectra of inorganic solids; Raman spectra of organic molecules and substances; Raman spectroscopy; stimulated Raman scattering; surface enhanced Raman scattering
cathode surface charactn. using Raman scatt. 87−66810
electronic materials characterisation, recent trends *(Japanese)* 87−5556
epoxies, Ag-filled, for die attachment, elec. reliability 86−15094
fibre optic Raman temperature sensor for SiO_2 optical fibre temp. distrib. meas. 85−50910
fibre optic Solc filter for use in Raman amplification of light 85−24644
fibre Raman amplifiers, amplified spontaneous Raman scattering 87−12124
free electron laser, induced emission in undulator, collective effects 85−56673
free electron laser, Los Alamos, Raman spectra of generated light 86−3199
free electron laser, Raman-scattering, diode design *(Chinese)* 85−62610
free electron laser, spontaneous emission coeff., stimulated Raman emission 85−46420
free electron laser with cylindrical regions, linear theory 85−12889
high-current relativistic electron beams, stimulated radiation 88−52138
IR laser, far, optically pumped, Raman and line-centre oscillations 85−12799
microelectronics, analytical problems, Raman microprobe appl. 87−23798
on-line instrument for N_2 concentration meas. in natural gas *(German)* 88−74629
optical fibre preform, dopant conc. profile meas. by Raman spectra *(Chinese)* 88−58069
optical fibres, spontaneous Raman scatt. and polarisation mode coupling 88−1937
particle discrimination and background suppression in photon-correlation laser velocimetry 85−8964
phase-sensitive fluorescence spectroscopy, appl. of gain-modulated avalanche photodiodes 86−15576
polymer film integrated optic waveguide sensors, scatt. light intensity characters. at waveguide surface 88−45205
semiconductor superlattices, synthesis by MBE *(Japanese)* 87−5419
transient Raman amplifier control 88−72391
WDM optical fibre transmission system, Raman crosstalk meas. at 1.5 μm 85−42578
Li/SO_2 cells, discharged and stored at high temp., product anal. 88−11355
SiO_2 based fibres, soliton-Raman processes, femtosecond pulse generation 88−72046
SiO_2-F glass single-mode fibre, radiation induced loss reduction by P addition 86−42312
ZrF_4-based optical fibres, scattering loss meas. 87−7071

Raman spectra of inorganic solids
diamond semiconductive film, glow discharge prep. and charactn. 88−70353
diamond thin films, deposited using plasma enhanced CVD, commercial aspects 88−63375
electronic materials deposition and charactn., conf., Manchester, UK (July 1987) 88−43535
fabrication damage of GaAs wafers, evaluation 87−74152
fibre optic waveguide pulsed excitation, spontaneous light scatt. 85−46189
films, crystn. and dopant activation by light annealing 86−8809
films, epitaxial regrowth using ion implantation amorphisation 88−56228
glass:Cds waveguides, nonlinear, props. 88−33735
glass, Raman spectroscopic characterisation 87−38729
microcrystalline thin films, RF glow discharge deposition, charactn. 88−31858

Raman spectra of inorganic solids continued
microstructures on CMOS gate arrays, direct laser writing, Raman microprobe anal., modelling of nucleation phase 86−63448
optical fibres, Raman spectroscopic characterisation 87−38729
semiconductor, ion implanted, Raman and Rutherford backscatt. spectroscopy obs. 88−44642
semiconductor, photolum. and Raman spectroscopy characteris. 88−44615
semiconductor charactn. by both photolum. and Raman spectroscopy 88−7446
semiconductor superlattice, modulation doped, possibility of solid state travelling plasma wave amplifier 88−7355
semiconductor superlattices, thermal instability introduced by annealing Raman spectroscopy study 85−34454
semiconductors, laser processing, Raman microprobe quantitative anal. 86−41638
semiconductors, laser-based methods for studying struct. props. 86−41511
silica glass optical fibres under high tensile stress raman study 86−9449
silicide formation on Si, initial nucleation processes 87−10459
SOI thin films, props. after laser focused beam processing 87−17970
superlattices, microstructs., microdevices, conf., Chicago, USA (Aug. 1987) 88−31275
thin films, growth by electron-assisted CVD, charactn. 86−46378
Al-GaAs (100) Schottky barrier contact, interface reactions, vac. annealing effects *(Chinese)* 86−41589
Al-GaAs Schottky barrier contacts, MBE grown, interface reactions, vacuum annealing effects 87−24915
AlAs/GaAs heterostruct., phonon parameters, IR and Raman spectra studies 87−53258
$(AlAs)_n(GaAs)_n$ superlattices, CVD layers, Raman and photolum. spectra 86−8837
AlF_3-YF_3-RF_2, glasses for IR optical window and fibre materials, physical props. in rel. to chem. comp. 88−7837
AlF_3-YF_3-ZrF_4-RF_2, glasses for IR optical window and fibre materials, physical props. in rel. to chem. comp. 88−7837
AlGaAs, at. layer epitaxial growth using pulsed vapour phase method 88−18715
$Al_{0.22}Ga_{0.78}As$, reactive ion etching damage, Raman study 87−67121
$Al_xGa_{1-x}As$, MBE growth, RHEED controlled, Rayleigh and Raman scatt. study 88−24701
$Al_xGa_{1-x}As$ and GaAs MBE growth, phase-locked epitaxy using RHEED oscillations 85−10678
$Al_xGa_{1-x}As$ nonequilibrium phonons and disorder 87−45603
n-$Al_xGa_{1-x}As$:Si, epitaxial, optical phonon-plasmon coupling, Raman spectra 85−23433
AlGaAs/GaAs heterostructures, OMVPE growth, Raman study 85−54446
AlGaAs/GaAs heterostructures, OMVPE growth in vertical multichamber apparatus 86−46311
AlGaAs/GaAs superlattice heterostructures, OMVPE, multichamber apparatus, TEM, Raman spectra, photolum. 88−24720
$Al_xGa_{1-x}As$/GaAs superlattices, ion-implanted, defect structure and intermixing 86−21193
$Al_{0.48}In_{0.52}As$, epitaxial, photoluminescent linewidth 85−24389
Au-Ge-GaAs, ohmic contact struct., rapid thermal processing, Raman scattering 88−44594
BN, CVD prep., struct. and elec. props. 88−44562
B_2O_3-Li_2O-Li_2SO_4 fast ion cond. glasses for micro-solid-state batteries, spectroscopic characteris. 88−49119
BeO ceramic waveguide, losses in 10.6 μm region, IR refl. and Raman spectra 85−7274
Bi_2O_3 bistable switches and resistors for neural networks, chem. constitution, Raman obs. 88−44411
(Cd,Hg)Te of all comps., THM growth, alloy disorder, photolum. and electronic Raman scatt. meas. 86−7734
$Cd(In_xGa_{1-x})_2S_4$, growth, optical, elec. and lattice dynamical studies 85−16917
CdS microcrystallite-doped sputtered thin film glass waveguide characts. 88−33720
CdSe/polysulphide liquid-junction solar cells, open-circuit, photoinduced aging 86−7002
CdTe films, epitaxial growth on InSb (100) by RF sputtering 88−409
CdTe, ion implanted, Raman and Rutherford backscatt. spectroscopy obs. 88−44642
CdTe surfaces, excess Te removal, Raman scatt. study 85−6823
CdTe:B, heavily implanted, optical and struct. charactn. 88−32790
Cu, corrosion inhibition complex study using Raman microscopy 87−23792
$CuInSe_2$ films, laser-induced synthesis, struct., optical and elec. props 86−57484
Eu doped glasses, 87−61260
$FePS_3(Si_3)$ intercalation cpds. for micro-solid-state batteries, spectroscopic characteris. 88−49119
GaAlAs epitaxial layers, compositional variation related to growth process 88−56229
$Ga_{1-x}Al_xAs$, ion-implanted, defect creation 87−11603
$Ga_{1-x}Al_xAs$:Si, ion implantation, disorder and annealing behaviour, Raman study 86−41676
$Ga_{1-x}Al_x(In_x)As$, anodic oxides, precipitates, laser Raman studies 86−2052
GaAs, MBE growth on Si, Raman and TEM studies and a GaAs p-i-n photodetector 88−38200
GaAs and related cpds., conference, Heraklion, Crete, Greece (Sept. 1987) 88−55832
GaAs cap layer struct., stress characts. using Raman spectroscopy 85−34454
GaAs, electron-LO phonon dynamics, subpicosecond Raman spectroscopy 87−24792
GaAs epitaxial layers in GaAs/Ge/Si and GaAs/Ge/SiO_2/Si regions, Raman microprobe obs. of struct. props. 88−44580
GaAs, epitaxially induced stress on V-grooved Si and GaAs substrates 87−65513
GaAs, heteroepitaxial, MBE growth and charact. on $(Ca,Sr)F_2$ 86−453
GaAs, high dose implanted, annealing with halogen lamps, Raman scatt. and TEM meas. 85−12166
GaAs, ion implantation, of Be, two step rapid thermal annealing process 88−44651
GaAs, ion implanted, Raman and Rutherford backscatt. spectroscopy obs. 88−44642
GaAs, ion implanted, pulsed laser annealing, Raman study 85−12115
GaAs, ion-implanted and neutron-transmutation doped, rapid thermal annealing, Raman studies 87−60270
GaAs, laser pyrolytic etching in CCl_4, residual local strains 86−21404
GaAs, metal organics vapour phase epitaxy, Raman studies 85−60973

Raman spectra of inorganic solids continued
GaAs molecular beam epitaxial growth on CaF_2 substrate, Raman and photolum. spectra characterisations 86−62220
GaAs oxidation, surface As growth, Raman backscatt. studies 88−26069
GaAs, passivation, by a-P and alkali metal polyphosphides 87−17979
GaAs, passivation by plasma CVD AlN films 88−1545
GaAs, plasma etching damage, Raman scatt. study 87−24783
GaAs, polish-induced surface strain, Raman study 85−1499
GaAs, reactive ion etching damage, Raman study 87−67121
GaAs spectral transmission characts., temp. depend study 88−16077
GaAs surface characts. modification due to dry plasma processing 85−23690
GaAs surface passivation, a-P overlayer, Raman and photolum. spectra studies 86−2049
GaAs surface passivation by amorphous P overlayer, Raman and photolum. spectra 85−18242
GaAs, surface passivation obs. using Raman scatt. 88−44676
GaAs:Ai, highly doped, MBE growth 86−413
GaAs:Be, shallow implantation, rapid thermal annealing effects 85−23631
GaAs:Be(Si), maskless ion implantation technology 85−45539
GaAs:Cd, heavily implanted, dye-laser-annealed, Raman studies 86−15034
GaAs:H, ion implanted, damaged layers, IR Raman probing 87−32386
GaAs:P, ion implanted and pulse laser annealed, Raman study 87−1392
GaAs:Si, halogen lamp annealing, Hall effect, photolum., Raman, and DLTS meas. 86−53523
GaAs:Si, implantation and annealing, amorphisation, Raman scatt. study 86−41677
GaAs:Si, implanted, elec. activation and local vibr. modes 85−28955
GaAs:Si, impurity activation, two-step rapid thermal annealing technique 85−61800
GaAs:Si, ion implantation, Raman scattering studies, MESFET fabrication 88−19793
GaAs:Si, ion implanted, Si_3N_4-capped, excimer and dye laser annealing 88−1364
GaAs:Si, ion implanted, crystalline particle sizes, laser Raman spectroscopy 85−1483
GaAs:Si-GaAlAs:Si implanted superlattices, compositional disordering by rapid thermal annealing 88−19691
GaAs:Sn, heavily implanted, dye-laser-annealed, Raman studies 86−15034
$GaAs/Al_{0.3}Ga_{0.7}As$ modulation doped superlattice, intrasubband excitations, reson. Raman profiles 86−53429
$GaAs/Al_xGa_{1-x}As$:Be quantum well structs., shallow acceptor transitions, reson. Raman spectra 86−35403
GaAs/AlAs short period superlattices, MBE grown, interface broadening, Raman scatt. 85−61715
GaAs/AlGaAs quantum well heterostructures, OMVPE growth 86−26831
GaAs/Au-Ge alloyed ohmic contacts, Raman scatt. study 88−7360
$GaAs/Ga_{1-x}Al_xAs$ single quantum well, reson. Raman scatt., elec. field effects 86−58304
$GaAs/Ga_{1-x}Al_xAs$(AlAs), short period superlattices, MOCVD growth, Raman scatt., AES, X-ray diffr. 87−11402
GaAs/dielectric film interface, Raman spectroscopy evaluation 86−14961
GaAs-Ag(Au) Schottky barrier form., elec. field induced Raman scatt. obs. 86−1806
$GaAs-Al_xGa_{1-x}As$, multiple quantum well struct., expansion of electron-hole plasma 87−74090
$GaAs-Al_xGa_{1-x}As$ quantum wells, parabolic, light scatt. studies 87−32318
GaAs-AlAs quasiperiodic heterostructures, MBE growth, struct., electronic and vibr. props. 87−36715
GaAs-AlAs, superlattices, mixing, ion implantation, rapid thermal annealing, Raman scattering 87−25099
GaAs-AlGaAs modulation doped multiquantum wells, coupled layer plasmons, Raman meas. 88−19715
GaAs-Si MBE heterojunction, cross doping and defect control and charactn. 88−49814
GaAs-Si, metalorganic vapour phase epitaxy, influence of water traces, Raman spectroscopy and X-ray diffr. study 88−6447
GaAs-thermal oxide interfacial chem. reactions, Raman spectra, AES 87−11469
$(GaAs)_7(AlAs)_7$ superlattices grown by MBE, effects of growth stops on interfaces, Raman spectroscopy 88−31732
$(GaAs(Sb))_{1-x}(Ge_2)_x$ metastable semicond. growth and phase stability, review 86−13786
$Ga_xIn_{1-x}P$ layers, MOVPE, photolum., comp. and growth temp. depend. 87−16595
$Ga_{0.5}In_{0.5}P/GaAs$ interfaces, OMVPE growth 88−31755
GaP spectral transmission characts., temp. depend study 88−16077
GaP/GaAs LPE systems, large lattice mismatch accommodation 87−60151
GaSb-AlSb strained layer superlattices, Raman scatt. 85−34558
GaSb-AlSb superlattices, electronic struct., resonant Raman scatt. studies 86−8859
Ge epitaxial layers in Ge/Si and $Ge/SiO_2/Si$ regions, Raman microprobe obs. of struct. props. 88−44580
Ge, heteroepitaxial films on Si (100)-2×1 surface, structural props. 88−31750
n-Ge, ion-implanted, laser annealed, phys. props. 86−8739
Ge, microcrystalline, crystallisation, doping, orientation and grain size 86−27855
Ge thin films, ion beam sputtered, struct. investig., Raman and X-ray studies 86−27856
Ge-Si alloy microstruct. fabrication by direct laser writing, comp. anal. using Raman microprobe spectra 87−58964
Ge-Si superlattices, structure, electronic and optical properties *(German)* 88−1417
$a\text{-}Ge_xSe_{1-x}$ films, short range order, vibrational studies 85−11954
$GeSe_2$ chalcogenides, spin-on-glass technique prep., IR and Raman spectra studies 88−56281
Ge_xSi_{1-x}/Si, strained layer superlattice, MBE, Raman scatt. 87−45733
$Ge_xSi_{1-x}/Si(Ge)$ strained layer MBE, layer synthesis and evaluation, structural studies 86−13782
HgCdTe epitaxial layers, noncontact electrical characterisation 86−67684
HgTe, anodic oxide films, Raman spectroscopy 86−2039
In-Se amorphous films, flash evaporated, elec. and struct. props. 86−14871
$InAs_xP_{1-x}$, thermal oxidation, Raman scatt. study 85−12173
InGaAs, low temp. LPE, optical and elec. characts. 86−26834
$In_{0.53}Ga_{0.47}As$:Si, halogen lamp annealing, Hall effect, photolum., Raman and DLTS meas. 86−53523
InGaAs/InP heterointerface, LPE, SIMS, Raman obs. 87−52128
$In_{0.9}Ga_{0.1}P$, thermally grown native oxide films, Raman study 86−41706
InP (110)-Sb interface, ohmic behaviour at large Sb coverages 88−13015

Raman spectra of inorganic solids continued
InP, implanted and thermally annealed, photoluminesc. and Raman scatt. 86−1991
InP, ion beam etching, surface characterisation 86−53541
InP, ion implantation, rapid annealing, Raman scatt., luminescence study 85−12169
InP spectral transmission characts., temp. depend study 88−16077
InP, surface recomb. vel., Raman spectroscopy study 85−34454
InP surfaces, sputter etched, optoelectronic and structural props. 87−6577

ramp generators
electrostatic scanning generator with separately shaped antiphase deflecting voltages 88−608
inexpensive accurate ramp generator using 4 ICs 87−23989
low-cost cct. using 1 Kbit RAM 87−10728
noninverting ramp generator, cct. 86−8051
push-pull off-chip drivers, implementation, charact. and open-loop gain limitations 87−44708
push-pull off-chip drivers, open loop gain limitations 87−573
simple ramp generator as trigger aid for fast digital storage oscilloscope 86−31480
slide projector controller using antiphase stereo channel recordings *(German)* 88−7002
stepping motor efficiency comparison using parabolic and linear ramping 88−62396
symmetrical ramp waveform generator using 4-bit shift register, cct. description 86−20360
variable frequency, design 85−33714
vibration suppression, approach to control signal synthesis 86−14055
voltage-controlled ramp function generator with automaticslew rate change and direct-readout functions *(Japanese)* 85−58728

random-access storage
0.8 μm CMOS technology for high performance ASIC memory and channelless gate array 88−64774
1 Kbit Josephson high-speed memory 88−12383
1 M SRAM with full CMOS cells fabricated in a 0.7 μm technology 88−38533
1 M-bit CMOS dynamic RAM, structure *(Japanese)* 88−6842
1 Mb dynamic RAM evaluation 88−19150
1 Mbit 60 ns pseudo static RAM with high-speed modes 87−24209
1 Mbit chip technology *(German)* 87−17063
1 Mbit CMOS DRAM from Toshiba *(Italian)* 86−28484
1 Mbit DRAM 1.2-μm double poly, double level metal process 85−49877
1 Mbit DRAM chips from Japan, availability, 4 Mbit development 85−28509
1 Mbit DRAM controller chips 86−52909
1 Mbit DRAM controller for streamline high-speed systems 86−46789
1 Mbit DRAM from Toshiba 86−14156
1 Mbit DRAMS, integration techniques 85−54879
1 Mbit DRAMs, SRAM simulation using controller 87−59471
1 Mbit dynamic, with folded capacitor cell 87−17066
1 Mbit pseudo-static RAM from Hitachi, config. and charact. *(Japanese)* 87−37294
1 micron CMOS 1MB DRAM 87−5895
1-Mb CMOS DRAM, fabrication technology 86−46853
1-Mbit CMOS error-corrected DRAM 87−59473
1-Mbit DRAMs in speciality packages 88−50131
1-Mbit video RAMs offload host CPU 88−6815
1-Mbit virtually static RAM, config. and charact. 87−10860
2-bit/cell storage DRAM for macro cell or memory-on-logic appl. 88−63683
2D memory systems for image processing, design theory *(Japanese)* 88−3204
3.5 ns, 2W, 20 mm^2 16 Kb ECL bipolar RAM 87−17083
3 ns 32K bipolar RAM 87−17081
3D DRAM cell; of stacked switching-transistor in SOI 86−46858
3D FET DRAM technology 87−17097
3D integration using SOI structures, technological key points and possible appls. 87−46244
3D nanotechnology, current and future developments *(Japanese)* 87−25411
3D SRAM, 256-bit 86−52832
4 Mb DRAM with double-buffer static-column architecture *(German)* 87−59482
4 Mb pseudo/virtually SRAM *(German)* 87−59485
4 Mbit CMOS DRAM, on-chip voltage convertor for submicron high-density chips 87−24206
4 Mbit CMOS DRAM, on-chip voltage reduction ccts. 87−24205
4 Mbit DRAM, As diffusion from solid source, appl. to trench capacitor 88−20150
4 Mbit DRAM, As doping of trench capacitor cell with As doped SOG 88−20149
4 Mbit DRAM design including 16-bit concurrent ECC 88−768
4 Mbit DRAM memory LSIs, submicron design 87−66178
4 megabit dynamic RAM in submicron CMOS technology with a FOBIC trench cell 88−12374
4-byte 18 ns ECC for hard and soft correction 85−61285
4-Mb CMOS DRAM using submicron CMOS technologies 86−46855
4-Mb DRAMs using deep-trenched capacitor technology 86−46854
4-Mbit DRAM, trial manufacture by Hitachi *(Japanese)* 88−6844
4-Mbit DRAM trench transistor cell, model 88−26539
4-Mbit DRAMs 87−66160
4-Mbit pseudo-SRAM and virtual-SRAM, trial manufacture by Oki Electric *(Japanese)* 88−6845
5.4 μm^2 sheath-plate-capacitor DRAM cell with self-aligned storage-node insulation 88−19167
5.4 μm^2 stacked capacitor DRAM cell with 0.6 μm quadruple-polysilicon gate technology 88−19168
7 ns/0.95 W 16K ECL RAM 86−46823
7C122 super-high-speed CMOS-RAMs out-perform bipolar RAMs in rapidity *(German)* 85−11228
8K×8-bit SRAM in three stacked CMOS technologies, process and performance comparison 86−21819
10 μW standby power 256K CMOS SRAM 86−14220
13 ns/350 mW 2 Kw×9 b RAM using Hi-BiCMOS technology 87−24208
13 ns/500 mW 64 Kb ECL RAM using Hi-BiCMOS 87−17082
15 ns 64K bipolar SRAM 86−14218
15 ns/250 mW 64K static RAM, hi-biCMOS technology 86−46822
16 Mb DRAMs, cct. technologies 87−59486
16K CMOS RAM for amateur radio appls. 86−52840
16K CMOS SRAM, single-event upset rate estimates 86−35880
16K NMOS SRAM *(Chinese)* 87−17060
16K RAM card for the Apple II, cct. anal. 85−40074
17 ns 64K CMOS RAM with a Schmitt trigger senseamplifier 86−14222
18 ns 8 KW×9 b NMOS SRAM 87−17077
20 ns color lookup table for raster scan displays 86−8249
21C16 16K CMOS SRAM 86−8210
25 ns 1 Mb CMOS SRAM 87−59505
32 Kbit high speed on-chip DRAM for digital signalprocessor 86−1063
34 ns 1 Mb CMOS SRAM using triple poly 87−59504
42 ns 1 Mb CMOS SRAM 87−59503
45 ns 256K CMOS SRAM with tri-level word line 86−14221
64 and 256K devices with redundancy feature, design and yield improvement by Mostek *(German)* 85−11241

random-access storage continued

CMOS DRAM, 1 Mbit, advanced n-well technology for VLSI chip 86−8243
CMOS DRAM, 1 Mbit, config. with design-for-test fns. 87−17091
CMOS DRAM, 1 Mbit, design with distrib. sense and unique restore cct. 88−6837
CMOS DRAM, 1 Mbit, with divided bitline matrix architecture 86−20528
CMOS DRAM, 1 Mbit, with fast page mode and static column mode 86−20529
CMOS DRAM, 1 Mbit×1/256 Kbit×4, 50 μA standby, design with high-speed sense amplifier 87−10857
CMOS DRAM, 1 Mbit device with design-for test fns. 87−10856
CMOS DRAM, 1 Mbit device with on-chip error correction 87−59513
CMOS DRAM, 1 MW×1 bit/256 KW×4 bit, design with 50 μA standby current 87−17092
CMOS DRAM, 1-Mb, divided bitline matrix architecture 86−8260
CMOS DRAM, 1-Mb, fast page and static column modes 86−8265
CMOS DRAM, 4 Mbit, 60 ns, design with built-in self-test fn. 88−6822
CMOS DRAM, 4 Mbit, 65 ns, design with twisted driveline sense amplifier 88−6820
CMOS DRAM, 4 Mbit, design with cross-point trench transistor cell 87−10854
CMOS DRAM, 4 Mbit, design with folded-bit-line adaptive sidewall-isolated capacitor cell 88−6819
CMOS DRAM, 4 Mbit, expt. design with high alpha-particle immunity 87−10852
CMOS DRAM, 4 Mbit design with cross-point trench transistor cell 87−17093
CMOS DRAM, 4 Mbit device, expt. design using trend cells, reliability aspects 87−17095
CMOS DRAM, 4 Mbit device with 16-bit concurrent ECC, design and charact. 88−32194
CMOS DRAM, 64 KW×4 bit, 47 as access time, design with relaxed timing requirements 87−17089
CMOS DRAM, 64K×4, high-speed device using on-chip self-timing techniques 87−10859
CMOS DRAM, latching-node clock design in half-VDD bit-line CMOSsense amplifier 86−41096
CMOS DRAM, perform., design *(Chinese)* 88−56618
CMOS DRAM, plate-noise anal. of on-chip generated half-V_{DD} biased-plate PMOS cell 86−34780
CMOS DRAM, row address buffer and decoder circuits 86−1046
CMOS DRAM, trigger cct. with hysteresis 86−57820
CMOS DRAM cell with increased packing density 86−34765
CMOS DRAM controller chip implementation 87−52579
CMOS DRAM controller for WE32100 family 86−1062
CMOS DRAM power-on clamp circuit for on-chip biased N-wells 86−52830
CMOS DRAM process, 4 Mb, using folded bitline adaptive side-wall isolated capacitor cell 87−44845
CMOS DRAM technology 85−49851
CMOS DRAM trench-capacitor isolation, double epitaxial process 88−6818
CMOS DRAM with bipolar speed *(Italian)* 87−38521
CMOS DRAMs, 4 Mbit, vol. prod. technology 88−56629
CMOS DRAMs, 64K, design, features and cache memory appl. *(German)* 86−46793
CMOS DRAMs, delay block technique for cct. charactn. appl. 87−5866
CMOS DRAMs, half-V_{DD} bit-line sensing scheme 85−777
CMOS DRAMs, high performance sensing scheme 88−766
CMOS DRAMs, high-speed sensing scheme 88−32196
CMOS DRAMs, Inmos devices with improved address multiplexing *(French)* 86−20517
CMOS DRAMs, megabit type, cct. design and reliability of output buffers 88−56616
CMOS DRAMs, optimisation for speed 87−5893
CMOS DRAMs, radiation-tolerant, for Mars Observer Camera 88−25200
CMOS DRAMs, set clock ccts. 87−31871
CMOS DRAMs, simple wordline boosting cct. 86−34767
CMOS DRAMs, static memory speeds 86−20525
CMOS DRAMs using on-chip generated half-VDD biased-plate PMOS cell 86−20560
CMOS dual port memory with serial read/write function for graphic systems 87−10872
CMOS dual port RAM array, 16K, HM 65231, microprocessor/microcontroller linking appl. *(German)* 87−37268
CMOS dynamic RAM, 1 Mbit, with built-in error checking and correcting cct. 85−22876
CMOS dynamic RAM, 1 Mbit capacity, technology and line/column-redundancy-based design *(German)* 85−11240
CMOS dynamic RAM, 256K, design, features and appls. *(German)* 85−33898
CMOS dynamic RAM, 256K, design and performance 85−22873
CMOS dynamic RAM controller ICs 87−37267
CMOS error-corrected DRAM, 1 Mbit 87−73448
CMOS FIFO buffer, 1K×9 high-speed device, IDT7202, dual-port RAM cell 86−20558
CMOS full static RAM cell struct. 85−49876
CMOS gate array series, 1 ns 20K devices with 15 ns 12K configurable memory 86−8186
CMOS gate array with easily testable three port RAMs 85−33857

random-access storage continued
CMOS gate array with static RAM, Hitachi HG61H series, design and performance 86−41021
CMOS gate arrays, CAD tooling, interfaces and development costs *(German)* 87−37183
CMOS half-V_{CC} sheath-plate capacitor DRAM cell with self-aligned buried plate wiring 88−63675
CMOS high-speed gate array incorporating static RAMs, TC17GM61, design and charact. 85−22784
CMOS low-power programmable decoder/EPROM/RAM chip 88−63666
CMOS memories *(Swedish)* 85−45040
CMOS memory circuits, growth of market, general overview *(Swedish)* 85−11237
CMOS microprocessor on-chip RAM, stand-by power source multiplexer switch 85−11282
CMOS nonclocked RAM cell 85−54874
CMOS nonvolatile static RAM memory *(German)* 86−62585
CMOS p-well, 1.25 μm, bulk process 88−57812
CMOS PLA, RAM and ROM generator for ASIC designs using CAD 87−1773
CMOS programmable logic devices using SRAM technology 87−59356
CMOS pseudostatic RAM, 288K, with high speed and low power dissipation 85−22874
CMOS pseudostatic RAM with 30 μA data retention and virtually SRAM mode 88−32193
CMOS RAM, 64K, 15 ns access time, design and charact. 87−10866
CMOS RAM, battery backup, chip-enable cct. 86−7938
CMOS RAM, data security using capacitor *(French)* 85−35160
CMOS RAM cell with well-source struct. for latch-up-free operation 87−66167
CMOS RAM circuit simulation with two-dimensional MOST models 85−40936
CMOS RAM fail-safe memory systems using Li batteries *(German)* 85−22649
CMOS RAM using Li-$(CF_x)_n$ battery, data retention lifetime 86−19445
CMOS RAMdisc techniques *(German)* 88−32208
CMOS RAMs, gamma-radiation testing, personal computer appl. 86−15272
CMOS RAMs for long-term storage *(German)* 86−8214
CMOS RAMSs and PROMs, more is better 86−1079
CMOS sea of gates LSI for random logic and memories, 120 K gate config. 88−70628
CMOS single chip graphic system 87−59592
CMOS SRAM, 10 μW standby power 256K 86−20534
CMOS SRAM, 13 ns, 64K, low active power devices, design and charact. 87−10865
CMOS SRAM, 16 K, dose-rate upset patterns 87−31880
CMOS SRAM, 16 K, fabrication by direct-write electron beam technology 87−24187
CMOS SRAM, 16K, 100 ns, radiation-hardened design 87−31878
CMOS SRAM, 16K, M5M21C67P, design and charact., cache memory appl. *(Japanese)* 86−52835
CMOS SRAM, 16K, temp. and epi thickness depend. of heavy ion induced latchup threshold 88−25201
CMOS SRAM, 1 Mb, selective Si growth as self-aligned contact hole filler 88−7745
CMOS SRAM, 1 Mbit, 25 ns, design with loading-free bit line circuitry 88−6832
CMOS SRAM, 1 Mbit, 34 ns, design using triple poly-Si technology 88−6831
CMOS SRAM, 1 Mbit, 35 ns, design, fabrication and charact. 88−6830
CMOS SRAM, 1 Mbit, 46 ns, design and charact 88−6876
CMOS SRAM, 1 Mbit, 46 ns, design with high-resistivity load cell 88−32199
CMOS SRAM, 256 K, high-speed design with address transition detection and redundancy 87−66166
CMOS SRAM, 256 Kbit, design and charact. *(Japanese)* 87−5886
CMOS SRAM, 256K, Hitachi HM62256, design and charact. 86−41093
CMOS SRAM, 256K, with variable impedance data-line loads 86−20532
CMOS SRAM, 256K 25 ns access time array config. and charact. 87−17085
CMOS SRAM, 2K, transient radiation upset anal. 86−34784
CMOS SRAM, 32 K×8 bit, 21 ns, design with selectively pumped p-well array 88−6828
CMOS SRAM, 35 ns 1 Mb 87−59502
CMOS SRAM, 35 ns 8K×8, with internal power down design techniques 86−20535
CMOS SRAM, 45 ns 256K, with tri-level word line 86−20533
CMOS SRAM, 4 kb, fabrication using SIMOX technology 86−41122
CMOS SRAM, 64K, design 86−1027
CMOS SRAM, 64K, high-speed device with redundancy, design and performance 86−34813
CMOS SRAM, 64K, ultrahard, gamma dose charact. 88−25199
CMOS SRAM, 8 kb, 3D LSI process technology 87−44847
CMOS SRAM, 8K×8, with fast access time and low active power 86−8240
CMOS SRAM, alpha particle modelling, sensitivity and immunity study 88−38532
CMOS SRAM, folded resistor and capacitor memory cell with triple polysilicon structs. 88−6872
CMOS SRAM, single event upsets, laser simulation 88−26492
CMOS SRAM's, market survey *(German)* 88−63671
CMOS SRAM 256K, fabrication using deep trench well isolation process 86−41128
CMOS SRAM and PROM, heavy particle induced latch-up, ^{252}Cf source 85−22884
CMOS SRAM cell, transient 2D simulation of cosmic event 86−20562
CMOS SRAM cell fabrication with laser recrystn. technology 85−49886
CMOS SRAM cell using polysilicon interconnection struct. 86−46841
CMOS SRAM cell with fully planarising technology 88−6873
CMOS SRAM cells, comparison of 2D memory SEU transport simulation withexperiments 86−35881
CMOS SRAM cells, soft error upset charact., phase planar anal. 86−20564
CMOS SRAM fabrication using double level metallisation scheme 88−71453
CMOS SRAM mass prod. in Japan *(Japanese)* 86−62598
CMOS SRAM pattern imprinting by ^{60}Co irradiation 88−25194
CMOS SRAM postirradiation response degradation, radiation and annealing bias identification 88−25195

DRAM reference cell for alignment-insensitive one-devicecell with plate push 86−1042
DRAM reliability assessment 87−44831
DRAM reliability improvement using VLSI error detect and correct ccts. 85−11261
DRAM reliability prediction method for design improvements 88−56635
DRAM repair, pulsed laser beam NEC SL492A appl. *(Japanese)* 87−66181
DRAM sense amplifier, filler-induced stress in plastic package, model and expt. study 86−41127
DRAM sense ccts., noise and sensitivity anal. *(Japanese)* 88−6853
DRAM sensing cct. using, LDD transistors design with improved sensitivity 86−47851
DRAM sheath-plate capacitor cell with self-aligned buried plate wiring 88−38527
DRAM storage capacitors for 4-Mbit devices, phys. limitations 85−28507
DRAM taper isolated cell, 2-D anal. of writing mechanisms 85−40900
DRAM trench storage capacitor vertical gated diodes, parasitic leakage study 88−38529
DRAM using shared word line, dense plate control sense amplifier cct. 86−34768
DRAM vertical storage trench gated diode leakage 88−32207
DRAM VLSI cell with soft-error immunity, stacked CMOS struct. 87−59454
DRAM with 4 Mbit memory and 60 ns access time, device by Matsushita *(Swedish)* 88−12367
DRAM with built-in error checking and correcting cct. *(Japanese)* 86−41117
DRAM with data-transfer architecture for fast multi-bit serial access mode 86−34815
DRAM with parity generation and checking logic, 8K by 9-bit 86−34754
DRAM word lines; dynamic capacitance effects 88−25182
DRAMs, 0.5 μm, electron-beam direct write process 88−64762
DRAMs, 1 Mb, trench capacitors using rapid thermal oxidation 88−6869
DRAMs, 256 K, with on-chip error correction, single-event upset obs. 88−25192
DRAMs, 256K, high performance 85−49873
DRAMs, 4 Mbit, trench capacitor doping technology 87−31904
DRAMS, 4 Mbit devices, developments and charact. *(Italian)* 88−746
DRAMs, 4-16 Mbit, cost/performance tradeoffs and testing considerations 87−17074
DRAMs, 64 and 256K devices, comparison of alpha-particle-induced soft error rates 87−10840
DRAMs, α-particle induced failure modes 85−17380
DRAMs, high speed, using BiCMOS circuit technology 88−764
DRAMs, intelligent, self-aligned refresh scheme 87−24193
DRAMs, LSI control and error correction 85−11273
DRAMs, market and cost considerations 86−14180
DRAMs, Mbit, trench capacitor cell with double diffused struct. 87−24189
DRAMs, megabit, power supply constraints in future 86−34809
DRAMs, megabit type, noise generation anal. and suppression design techniques 87−66172

random-access storage continued
DRAMs, megabit type, selector-line merged built-in ECC technique 88−6838
DRAMs, new concepts 85−11271
DRAMs, offset word line architecture for scaling to gigabit level 88−765
DRAMs, offset word-line architecture for scaling to gigabit level 88−32197
DRAMs, power-on cct. design 87−10848
DRAMs, screening techniques to ensure quality and reliability 86−46807
DRAMs in 3.3 V n-well CMOS technology, substrate-plate trench cell design 86−46859
DRAMs testing by masked alpha radiation 88−25214
DRAMs with 3D architecture, parallel testing of parametric faults, testable design techniques 88−63674
DRAMs with soft error immunity, switched-load-resistor memory cells 88−6867
DRAMs with static-column control, decoding, control using PSG507 programmable sequence generator 87−66008
DRAMs with substrate-plate-electrode memory cells, voltage limiter design 88−32198
DS1220, DS1225 nonvolatile CMOS RAMs with Li-cell battery backup 86−57624
DS5000, soft microcontroller development system 88−25239
dual amplifier high resolution CMOS sensing 88−32209
dual FIFO dynamic RAM manager for buffer insertion ring LAN 85−25517
dual port, dual data width random-access memory controller 85−61271
dual port, for enhanced system performance 87−73451
dual port, serial port pattern memory, asynchronous and write-per-bit tests 86−46836
dual port RAM controller HMC 6207 86−27192
dual-port 1 Mbit memory for display buffer appl. *(Japanese)* 88−32215
dual-port 65 ns 64K×4 DRAM with a 50 MHz serial output 87−17072
dual-port DRAM controllers, 100 MHz Signetics 74F764/5 87−5926
dual-port DRAM controllers, N74LS764/5 *(German)* 87−66163
dual-port FIFO memory with unlimited expansion capability 86−14183
dual-port memory controller implementation using PAL devices 86−46813
dual-port RAM, use of Intel 5CBIC programmable logic unit for bus management *(German)* 88−44116
dual-port RAM and error correction-detection devices 88−6854
dual-port RAMS, design using 87−59470
dual-port RAMs, high-speed operation, design and appls. 87−59512
dual-port RAMs for improved data communications 88−6857
dual-port SRAM chips 87−10835
dual-port video RAM, 64 kbit×4, with logic functions 87−37276
dual-ported and application specific RAM architectures 88−6774
dynamic, array, dual recessed oxide technology 86−8221
dynamic, back-bias testing, cast and time reduction 86−20519
dynamic, deck memory interconnections for rapid access 85−11249
dynamic, NSDP8400; a fast, expandable, multiple error detector and corrector 85−11263
dynamic, repair solutions determ. using fault-driven comprehensive redundancy algorithm 85−33922
dynamic, self-diagnosing and error correcting systems *(German)* 87−56492
dynamic and static RAMs, using MOS and CMOS LSI technologies, design and charact. 85−33911
dynamic bipolar RAM, pipe-insensitive struct. using polyimide-filled trench 85−40091
dynamic digital memory for holography, moire and ESPI techniques 88−2413
dynamic error correction and detection, system architectures 87−73449
dynamic FIFO RAM manager for buffer insertion-ring, LAN 85−25519
dynamic memory, operations and interfacing with 68000 systems 86−62581
dynamic MOS RAM, 256 Kbit, design with plastic package *(Japanese)* 85−17408
dynamic MOS RAM based on epitaxial substrate, hot electron improvement 85−40071
dynamic RAM, 1 Mb device using n-channel Si-gate technology, design and charact. 85−17377
dynamic RAM, 256 Kbit, fabrication and cct. technology 85−11255
dynamic RAM, 256 Kbit, with high alpha immunity 85−11254
dynamic RAM, 256K, designed for wide range of appls. 85−22872
dynamic RAM, 60 ns 256K, using LD^3 technology and double-level metal interconnection 85−22869
dynamic RAM, 64K, failure mechanisms of sputtered Al-Si metallurgy 85−6861
dynamic RAM, 64K, reliability problem rel. to Si inclusions in Al interconnects 85−6862
dynamic RAM, design with on-chip error checking and correction 85−28534
dynamic RAM, fault tolerant, on-chip error control coding, cost anal. 87−66196
dynamic RAM, insight 86−57832
dynamic RAM, large capacity, power dissipation reduction using multidivided data-line struct. 87−52568
dynamic RAM, packaged chip pricing trends study 85−40094
dynamic RAM, power saving refresh control 85−786
dynamic RAM, sense amplifier reference voltage cell design 85−560
dynamic RAM, substrate voltage bump test technique 85−33907
dynamic RAM, testable, fault tolerant design 88−25220
dynamic RAM, triple-poly-Si shared word line cell technology 85−40088
dynamic RAM 1M-bit, 256k×4-bit 86−34751
dynamic RAM cell, buried storage capacitor struct., design and fabrication 85−11251
dynamic RAM cell with high storage capacitance, fabrication process 85−6321
dynamic RAM cell with merged drain and storage 86−8229
dynamic RAM chips, Intel 51C86 and 51C87 devices *(German)* 85−45037
dynamic RAM controller, Intel 8202A, four banks of 64K 85−45055
dynamic RAM controller; National Semiconductor DP8419 85−40076
dynamic RAM controller for iAPX 186/8 systems, Intel 8208 85−11370
dynamic RAM controllers 88−6859
dynamic RAM design, for resistance to alpha-particle-induced soft errors 87−66191
dynamic RAM dual refresh mechanism 85−22893
dynamic ram for 68000 systems *(German)* 86−1035
dynamic RAM imaging display technology utilizing silicon blackbody emitters 87−70729
dynamic RAM operation 86−8220
dynamic RAM page mode for a pseudo cache 88−12372

random-access storage continued
dynamic RAM refresh cycle start cct. for low power battery back-up 85−17399
dynamic rAM refresh frequency controller 86−27292
dynamic RAM storage capacitor struct., fabrication using HiC implant in N-skin compatible process 85−40090
dynamic RAM storage capacitors, fundamental limitations study 85−40093
dynamic RAM stores, error elimination *(Italian)* 86−8215
dynamic RAM with 256K density *(Italian)* 86−1038
dynamic RAM with nitride/oxide capacitor insulation, fabrication using double poly-Si technology 85−22888
dynamic RAM with scrubbing function for error detection/correction 85−40068
dynamic RAMs 86−27313
dynamic RAMs, active FET invertors for power reduction 85−33650
dynamic RAMs, design and development using Intel CHMOS technology *(German)* 85−771
dynamic RAMs, fabrication technique and struct. to form N-skin under storage node 85−33902
dynamic RAMs, megabit level, built-in error checking and correcting techniques *(Japanese)* 85−17419
dynamic RAMs, progress towards Mbit storage *(Norwegian)* 85−28519
dynamic RAMs, stacked capacitor storage cells *(German)* 87−52589
dynamic RAMs, test designers challenged by new generation 85−54865
dynamic RAMs 1 Mbit devices, technological aspects *(French)* 85−49849
dynamic RAMs for graphic display appls., Intel CHMOS devices, screen refreshing aspects *(German)* 85−49856
dynamic RAMs in VLSI technology 88−19157
dynamic RAMs with substrate-plate electrode memory cells, voltage limiters 88−767
dynamic RAMs without waiting cycles *(German)* 86−27284
dynamic semiconductor RAM structures, patent-oriented survey, book 85−5636
dynamic-RAM-controller ICs squeeze maximum performance from DRAMs 88−70751
ECL 2.8 ns 16K RAM with 1.2K logic gate array, design and charact. 87−17088
ECL bipolar 4K 86−20557
ECL bipolar RAM, 4 Kbit device with on-chip address latches 85−49899
ECL compatible RAM, 16K CMOS device, 12 ns/350 mW charact. and bipolar I/O buffers 86−34816
ECL compatible RAM 64 kbit, 7 ns, design using Hi-BiCMOS technology 88−6835
ECL multiport RAM implemented in cascode logic 85−6315
ECL RAM, 16 kbit, 3.5 ns access time, design and charact. 87−10862
ECL RAM, 16K, very high speed design and charact. *(Japanese)* 87−31900
ECL RAM, 16K 4 ns access time, design fabrication and charact. 87−17087
ECL RAM, 1-kbit, 0.85 ns address access time 87−745
ECL RAM, 4K, with optimised cell design 88−12380
ECL RAM, 5 ns access time 65 kb 87−59492
ECL RAM, 5K, 1.0 ns access time, design and charact. 87−10861
ECL RAM, design with double-word-line struct. 87−66168
ECL RAM, double word line struct. 87−24188
ECL RAM, plastic encapsulated by Mitsubishi Electric *(Japanese)* 88−6841
ECL RAM using Hi-BiCMOS technology, 64K, design and charact. 87−10863
ECL RAMs, choice for high-performance system design 86−1078
ECL RAMs, high-speed, technology improvements 87−44849
ECL RAMs, obvious choice for high performance system design 87−6866
ECL SRAM based on trench-isolated self-aligned bipolar technology 88−26491
ECL static RAM, 64K, design using 2 μm bipolar technology 85−54893
EEPROM and NOVRAM, review *(Italian)* 85−61274
EEPROMs move into standard cell libraries, manufacturers' approaches 86−57814
electron-beam access memory, modification in MOS structures caused by electron beam *(Polish)* 86−58606
electron-beam reticle writing system for 16M DRAM class devices 88−13220
electronic keyer with multi-memory, design 87−2818
Elektronika-60 microcomputer, static RAM *(Russian)* 86−34800
embedded, random testing for stuck-at storage cells 85−33821
embedded array eval., high-resolution on-chip meas. test struct. 87−760
embedded array test with ECIPT 86−34762
embedded flush-through RAM improving test data generation 86−1043
embedded multiport memory, random pattern testing for address-line faults 86−46829
embedded multiport memory, random pattern testing for data-line faults 86−46828
embedded RAM features improve test data generation 85−17396
embedded RAM in gate arrays: configurability and testability 88−6721
embedded RAM testing, using exhaustive random sequences 88−12377
embedded RAMs, built-in functional self-test scheme 86−1080
EMS 4.0, expanded memory specification, memory standard with task-switching capability 88−56624
Emulo-8, EPROM emulator, building project 86−34750
EPI-CMOS radiation-hardened RAM and microprocessor devices, dose rate 85−17391
EPROM, RAM and DRAM, development *(Italian)* 86−20543
EPROM replacement using battery-buffered RAMs 85−61258
EPROM simulator cct. RAM-based 85−49847
EPROM simulator for instrumentation, 4K RAM unit 85−8690
EPROM/SRAM package, design appls. 85−17411
error detection using error correction code hardware 86−41113
error-corrected DRAM,. 1-megabit 88−6860
Esprit 824, wafer scale integration project 88−25281
expandable RAM structs. in ASIC design environment, layout generation, simulation and routeing 88−19126
expansion boards, increased demand 87−5891
F1600 high density static RAM blends process and provenarchitecture 87−6891
failure analysis of VLSI chips using dynamic probing 85−55930
fast memory module for rapid acquisition of digital data, spectrometer appl. 86−5130
fast RAM as a pulse delay circuit *(German)* 86−52742
fast read-out of twin four-square array by 'local potentialequilibration' 87−741

random-access storage continued
fast sense latch for a CMOS static RAM 87−740
fast systolic FIFO queue 86−57839
fault detection algorithm *(Russian)* 85−61259
fault tolerance; dynamic redundancy schemes 88−70758
fault tolerant ICs and WSI, conf., London, England (Feb. 1986) 86−33958
fault-tolerant parameterised memory for Plessey Megacell system 86−34821
features of latest devices from RAMs to EEPROM 85−11233
ferroelectric memories 88−70763
ferroelectric nonvolatile RAM, 16 K UniRAM 88−63688
FET DRAM, voltage dummy cell scheme 85−61266

amplitude modulator and demodulator design based on hard limiters 87−65940
analogue random noise generator, design 85−6199
aperture-synthesis radar system, digital signal processing by harmonic anal., quantisation noise 86−43898
APK system, error rate performance in presence of interference and noise *(Korean)* 85−2736
ARMA modeling and phase reconstruction of multidimensional non-Gaussian processes using cumulants 88−72971
array beamforming angular resolution with nonsinusoidal waveforms 88−14529
ASK multiport optical homodyne receivers 87−70053
astronomical image photon counting system, granularity noise reduction via mag. scanning 86−70043
asynchronous machines, mag. texture influence on noise 87−15762
atmosphere sodar system design, noise problem reduction 87−71297
autoregressive spectral estimation in additive noise 88−46031
band-limited Gaussian nose plus sinusoid, output power spectral density evaluation 87−177
binary errors testing, Tausworthe generator appl. 86−44326
binary signals in Gaussian noise, maximum likelihood sequence estimation, neural net implementation 88−59182
bioelectrical activity recording and noise 88−10361
bipolar invertor noise models 88−12337
bipolar transistor oscillators, low-noise, anal. 88−18972
bipolar transistor reliability evaluation by means of noise power spectral density 88−13335
bipolar transistors, 1/f collector current noise calcs. 87−74267
bipolar transistors, 1/f mobility fluctuations 86−67847
bipolar transistors, 1/f mobility fluctuations 86−67848
bipolar transistors, 1/f noise 85−18304
bipolar transistors, 1/f noise and DC characteristics 86−15136
bipolar transistors, 1/f noise sources 86−67849
bipolar transistors, 1/f noise sources 87−1488
bipolar transistors, emitter-edge dislocations rel. to 1/*f* g-r and burst noise 85−6906
bipolar transistors, flicker noise due to minority carrier trapping 86−67850
bipolar transistors, Hooge parameters, Handel quantum 1/f noise theory 85−45693
bipolar transistors, mobility fluctuation 1/f noise 87−11751
bipolar transistors, n^+-p-n and p^+-n-p, 1/f noise, Hooge parameters 85−40698
bipolar transistors, surface 1/f noise *(Chinese)* 88−19922
bipolar transistors, test for presence of injection-extraction and Umklapp quantum 1/f noise in collector 86−63262
bistability in active circuits: application of a novel Fokker-Planck approach 88−38614
bistable flow circuit, coloured noise driven, two dimensional density meas. 86−11777
broadband microwave amplifiers, noise reduction 88−12235
Bubble Space Telescope fine guidance sensors, photon noise in multiplier phototubes, stochastic model 86−58217
burst generator for EMC tests *(German)* 87−47237
calibration of acoustic-emission receivers by a random-noise technique 88−5213
capacitive pickup using low-noise, low-frequency amplifier 88−9944
capacity region of Gaussian CDMA channels 87−39575
CATV signal distortion 88−27982
CCD image sensor for absolute radiometry, 1/f noise calc., Earth obs. appl. 88−4488
CCD imagers, generation currents charactn. 86−11456
CCD imaging arrays, spatial noise characterisation using Fourier spectrum techniques 88−22646
CCD signal charge detection, partition noise, expt and theoretical study 86−47618
